- If a written prescription is received which is not on a tamper-resistant prescription blank, the pharmacy must contact the prescribing provider and either have the prescription re-submitted in compliant written form or convert the prescription, where otherwise allowable, into verbal, faxed or electronic form.

- In an emergency situation where the pharmacy is unable to contact the prescribing provider, the pharmacy may choose to fill the prescription from the non-compliant form and subsequently obtain a prescription in compliant form. If a compliant prescription cannot be obtained within 72 hours, the pharmacy must withdraw the claim.

- To be considered tamper-resistant on or after April 1, 2008, a prescription pad must contain at least one of the following three characteristics:

    1. one or more industry-recognized features designed to prevent unauthorized copying of a completed or blank prescription form; or
    2. one or more industry-recognized features designed to prevent the erasure or modification of information written on the prescription by the prescriber; or
    3. one or more industry-recognized features designed to prevent the use of counterfeit prescription forms.

- To be considered tamper-resistant on or after October 1, 2008, a prescription pad must contain all of the foregoing three characteristics.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Effective May 1, 2008, an override will be required for a brand name drug with an exact generic equivalent submitted with a Dispense as Written code of 1. In this case, the provider must provide documentation of the medical necessity for the brand name, rather than the available generic equivalent and receive an override. This override applies to those instances where the prescriber has written a prescription for a brand name drug when a pharmaceutically and therapeutically equivalent drug product is available generically. Exclusions to this process include carbamazepine, levothyroxine, phenytoin, and warfarin. Overrides may be completed and faxed or mailed to the Pharmacy Administrative Services contractor, currently Acentra Health.

In accordance with Section 5042 of the SUPPORT Act, effective October 1, 2021, prescribers of Medicaid eligible recipients are required to check the Alabama PDMP (Prescription Drug Monitoring Program) prior to prescribing a Schedule II controlled substance. If the prescriber does not check the PDMP, the prescriber is required to document the reason in the medical record. Exclusions to this requirement include prescriptions written for hospice patients, patients with an active cancer diagnosis, residents of a long-term care nursing facility, and children under the age of 18 (Schedule II prescriptions for ADHD only).

27.2.2 Appropriate Utilization of Dispense As Written (DAW) Codes

Dispense As Written (DAW) product selection codes are an integral part of accurate billing to the Alabama Medicaid Agency and provide the agency with the reason why a specific brand or generic is dispensed based on the prescriber's instructions. Failure to accurately use DAW codes results in misinformation to the Pharmacy program and its decision making process. Misinformation on claims may also result in retrospective pharmacy review and/or recoupment. Inaccurate usage of DAW codes is among one of the discrepancies found during an audit and is one of the Primary Pharmacy Audit Components listed in the Provider Billing Manual Section 27.2.5. The following codes are the various DAW codes available to the Alabama Medicaid Pharmacy program with explanations that have been taken from the National Council on Prescription Drug Programs (NCPDP) version 5.1 data dictionary for field 408-D8 Product Selection Codes. Providers should utilize the correct codes based upon the information submitted on the prescription and the prescriber's signature:

- **0=No Product Selection Indicated-**This is the field default value that is appropriately used for prescriptions where product selection is not an issue. Examples include prescriptions written for single source brand products and prescriptions written using the generic name and a generic product is dispensed.

- **1=Substitution Not Allowed by Prescriber**-This value is used when the prescriber indicates, in a manner specified by prevailing law, that the product is to be Dispensed As Written.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- **2=Substitution Allowed-Patient Requested Product Dispensed**-This value is used when the prescriber has indicated, in a manner specified by prevailing law, that generic substitution is permitted and the patient requests the brand product. This situation can occur when the prescriber writes the prescription using either the brand or generic name and the product is available from multiple sources. *(Not permitted by Alabama Medicaid)*

- **3=Substitution Allowed-Pharmacist Selected Product Dispensed**-This value is used when the prescriber has indicated, in a manner specified by prevailing law, that generic substitution is permitted and the pharmacist determines that the brand product should be dispensed. This can occur when the prescriber writes the prescription using either the brand or generic name and the product is available from multiple sources.

- **4=Substitution Allowed-Generic Drug Not in Stock**-This value is used when the prescriber has indicated, in a manner specified by prevailing law, that generic substitution is permitted and the brand product is dispensed since a currently marketed generic is not stocked in the pharmacy. This situation exists due to the buying habits of the pharmacist, not because of the unavailability of the generic product in the marketplace.

- **5=Substitution Allowed-Brand Drug Dispensed as a Generic**-This value is used when the prescriber has indicated, in a manner specified by prevailing law, that generic substitution is permitted and the pharmacist is utilizing the brand product as the generic entity.

- **6=Override** *(Not permitted by Alabama Medicaid)*

- **7=Substitution Not Allowed-Brand Drug Mandated by Law**-This value is used when the prescriber has indicated, in a manner specified by prevailing law, that generic substitution is permitted but prevailing law or regulation prohibits the substitution of a brand product even though generic versions of the product may be available in the marketplace.

- **8=Substitution Allowed-Generic Drug Not Available in Marketplace**-This value is used when the prescriber has indicated, in a manner specified by prevailing law, that generic substitution is permitted and the brand product is dispensed since the generic is not currently manufactured, distributed, or is temporarily unavailable. *(In the event of an audit, provider shall make available documentation to validate product unavailability).*

- **9=Substitution Allowed- Plan Requests Brand Dispensed –** This value is used when the prescriber has indicated, in a manner specified by prevailing law, that generic substitution is permitted,

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

but the plan's formulary requests the brand product to be dispensed.

To indicate instructions to the dispensing pharmacy, a physician simply signs the prescription in a manner specified by prevailing law to indicate to a providing pharmacy whether or not generic substitution is allowed. Effective May 1, 2008 an override form and Medwatch 3500 form is required in order to medically justify a provider's reason for requesting a branded product when an exact generic equivalent is available. DAW overrides and the Medwatch 3500 form should be submitted to the Pharmacy Prior Authorization contractor.

27.2.3 Quantity Limitations

Claims must be submitted in the units specified on the prescription by the prescribing physician up to a 34 day supply. Medications supplied in a dosage form that would prevent the dispensing of an exact 30-34 day supply for chronic medications, such as insulin, may require quantities that exceed the 34 day maximum and would not be subject to recoupment as long as the pharmacist can provide appropriate documentation.

Pharmacies may not split a prescription into small units and submit them as separate claims in order to obtain additional dispensing fees.

A pharmacist should not change quantities (units) of drugs prescribed by a physician except by authorization of the physician. The pharmacist must contact the prescribing physician for authorization to reduce the quantity of any Medicaid prescription and note physician authorization on the prescription form.

If the prescription to be paid by Medicaid exceeds the drug's maximum unit limit allowed per month, the prescriber or pharmacist must request an override for the prescribed quantity. If the override is denied, then the excess quantity above the maximum unit limit is non-covered and the recipient can be charged as a cash recipient for that amount in excess of the maximum unit limit. In other words, for a prescription to be "split billed" (the maximum unit allowed paid by Medicaid and the remainder paid by the patient), a maximum unit override must be requested by the provider and denied. A prescriber should not write separate prescriptions, one to be paid by Medicaid and one to be paid as cash, to circumvent the override process.

NOTE:
A provider's failure or unwillingness to go through the process of obtaining an override does not constitute a non-covered service.

If the full quantity prescribed is not available at the time of dispensing, the pharmacist may dispense the quantity available. In this case the pharmacist must note on the prescription the number of units dispensed and retain the claim until the balance of medication is dispensed. Only one claim with one dispensing fee may be billed.

Long Term Maintenance Supply

Effective October 1, 2013, the Alabama Medicaid Agency reimburses for a three month supply of Agency designated maintenance medications

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

dispensed to recipients. A maintenance medication is an ordered/prescribed medication generally used to treat chronic conditions or illnesses and taken regularly and continuously. The following criteria apply to the three month supply:

- The medications will be designated by the Agency
- The three month supply medications listing(s) will be available to the public on the State's website: www.medicaid.alabama.gov
- The recipient must demonstrate 60 consecutive days of stable therapy (same strength and dose) within a 90 day timeframe, according to Medicaid claims data, prior to the State reimbursing the provider for dispensing a three month supply. This means the patient must have shown to be compliant/stable on the medication according to Medicaid claims data.
- An opt out program for recipients who may not be candidates for maintenance supplies will be available. The recipient's prescribing physician will need to provide documentation regarding the opt out reasons for each applicable recipient.
- Effective May 1, 2014, drugs on Medicaid's three month maintenance medication list will be excluded from the monthly five prescription limit of adults. This exclusion is regardless of whether the claim is for a three month supply or one month supply (during the first 60 days to establish stable therapy).
- The three month supply medications require that 90% of the medication be exhausted before they can be refilled.

NOTE:

If the drug to be dispensed is included in the Agency's three month supply program, a pharmacist may shift a patient to a three month supply of prescribed drug using the existing prescription, pending enough units are remaining on the prescription authorized by the physician. Pharmacists may not add total units to a prescription unless authorized by the prescriber and documented in the patient file.

Short Acting Opioid Naïve Limits

Effective November 1, 2018, the Alabama Medicaid Agency began implementing limits on short-acting opiates for opioid naïve recipients. The Agency defines "opioid naïve" as a recipient with no opioid claim in the past 180 days.

Edit Details:

- A 7-day supply limit for adults age 19 and older
- A 5-day supply limit for children age 18 and younger
- A maximum of 50 morphine milligram equivalents (MME) per day allowed on a claim for an opioid naïve recipient
- Any claim for a short acting opioid for an opioid naïve recipient exceeding the maximum days' supply limit or MME limit will be denied.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Claims prescribed by oncologists will bypass the edit.
- Long term care and hospice recipients are excluded.
- Refills of remaining quantities and/or new prescriptions filled within 180 days of the initial opioid naive claim **will require an override.**
- Refills of remaining quantities of prescriptions that are partially-filled will be allowed per State and federal law* but will require an override through Medicaid. See below for more details from the State Board of Pharmacy.
- For adults, the refill of the quantity remaining on the partial fill **will not count** towards the prescription limit if filled within 30 days of the original prescription. Monthly maximum unit quantities still apply.
- Overrides for quantities exceeding the maximum days' supply limit or MME limit may be submitted to Acentra Health. Please see the Pharmacy Override External Criteria Booklet for information about override requirements. Please refer to the following link for more information regarding overrides for opioid naïve patients: http://medicaid.alabama.gov/alert_detail.aspx?ID=12978
- A Recipient Information Sheet for prescribers and pharmacists to provide to recipients can be found at http://www.medicaid.alabama.gov/content/4.0_Programs/4.3_Pharmacy-DME.aspx

NOTE:

A recipient may not pay cash for the remaining amount over 7 days for the same prescription of a Medicaid-paid opioid claim (ie a single fill/dispense/claim may not be 'split billed' to both Medicaid and cash). If the prescription to be paid by Medicaid exceeds the drug's limit allowed, an override may be requested. Only if the override is denied, then the excess quantity above the maximum unit limit is deemed a non-covered service, and the recipient can be charged as a cash recipient for that amount *in excess* of the limit. A prescriber must not write separate prescriptions, one to be paid by Medicaid and one to be paid as cash, to circumvent the override process. FAILURE TO ABIDE BY MEDICAID POLICY MAY RESULT IN RECOUPMENTS AND/OR ADMINISTRATIVE SANCTIONS.

27.2.4 Prescription Refill

Prescriptions cannot exceed eleven refills for non-controlled prescriptions and five refills for Control III-V prescriptions. Medicaid will deny claims for prescription refills exceeding eleven for non-controlled prescriptions and five for Control III-V prescriptions. Prescriptions may be refilled only with the prescribing provider's authorization. Failure of the prescribing provider to designate refills on a prescription will be interpreted as no refills authorized. If a prescription is refilled, the date the prescription is refilled must appear on the prescription.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Pharmacy providers should refill all prescriptions only in quantities corresponding to dosage schedule and refill instructions.

The use of automatic refills by pharmacies is not allowed by the Medicaid Agency. Prescriptions that have been filled but not picked up by the patient or patient's authorized representative should be credited back to pharmacy stock and Medicaid through claims reversal within sixty days.

Violations of these policies may result in unauthorized charges. The pharmacy may be held liable or Medicaid may cancel the pharmacy vendor agreement.

Early/Timely Refills

Medicaid allows timely refills, defined as utilization of 85% of opioid agonist and opioid partial agonist claims, 90% of drugs on the 3-month maintenance list, and 75% of all other medications. Timely refills are based on the days' supply on a pharmacy claim; day's supply is an integral part of a valid claim, and should represent the actual days' supply of a claim based on the prescriber's instructions and quantity of drug dispensed. Claims processed prior to the timely refill allowance will require an override.

Medicaid utilizes an accumulation edit to limit dispensing of early refills to no more than seven extra days' worth of medication per 120 rolling days. Claims that exceed or result in the accumulation of more than seven extra days' worth of medication in a 120 - day time period will deny.

NOTE:

Medicaid may recoup payments for early refills.

Acentra Health is contracted with the Alabama Medicaid Agency to assist pharmacists receiving hard denials, such as early refills, therapeutic duplication and excessive quantity. Pharmacies must receive an override from Acentra Health before payment will be made. **Contact Acentra Health at 1 (800) 748-0130**. Only Acentra Health can issue the necessary override.

NOTE:

Deleted: ~~LTF~~
Added: LTC

HOLDING OF MEDICATIONS FOR LTC RESIDENTS

When a resident leaves a LTC facility and is expected to return, the facility shall hold all medications until the return of the resident. All continued or re-ordered medications will be placed in active medication cycles upon the return of the resident. If the resident does not return to the facility within 30 days, any medications held by the facility shall be placed with other medications for destruction or distribution as permitted by the State Board of Pharmacy regulations. If at the time of discharge it is known that the patient will not return, medications may be destroyed or donated as allowed by State law.

If the medications are not held in accordance with this policy, the facility will be responsible for all costs associated with replacement of the medication.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

27.2.5 Reimbursement for Covered Drugs and Services

This section describes reimbursement for multiple source drugs, over-the-counter medications and other drugs, dispensing fees, vaccine administration and pricing.

Medicaid pays for certain legend and non-legend drugs prescribed by practitioners legally licensed by the state of Alabama to prescribe the drugs authorized under the program and dispensed and/or administered by a licensed pharmacist or licensed authorized physician in accordance with state and federal laws as stated in Administrative Code Rule 560-X-16-.01.

A. Notwithstanding specific reimbursement described in this section, payment for covered outpatient drugs (both brand and generic) dispensed by a:

1. Retail community pharmacy
2. Specialty pharmacy
3. Long-term care or institutional pharmacy (when not included as an inpatient stay)
4. 340B eligible entities (including 340B contract pharmacies) not listed on the U.S. Department of Health and Human Services Health Resources & Service Administration (HRSA) 340B Drug Pricing Program Database
5. Indian Health Service, Tribal and Urban Indian pharmacy

Shall not exceed the lowest of:

a. Effective January 1, 2021, The Alabama Average Acquisition Cost (AAC) of the drug; when no AAC is available, the Wholesale Acquisition Cost (WAC)-4% for brand drugs and WAC + 0% for generic drugs, plus a professional dispensing fee of $10.64,

b. The Federal Upper Limit (FUL), plus a professional dispensing fee of $10.64, or

c. The provider's Usual and Customary (U&C) charge to the general public regardless of program fees.

B. Payment for blood clotting factor products will be the Average Sales Price (ASP) + 6% plus a professional dispensing fee of $10.64.

C. For eligible 340B entities listed on the U.S. Department of Health and Human Services Health Resources & Service Administration (HRSA) 340B Drug Pricing Program Database, payment shall not exceed the entity's actual acquisition cost for the drug, as charged by the manufacturer at a price consistent with the Veterans Health Care Act of 1992, plus a professional dispensing fee of $10.64.

D. For facilities purchasing drugs through the Federal Supply Schedule (FSS), payment shall not exceed the entity's actual acquisition cost for the drug, plus a professional dispensing fee of $10.64.

E. For facilities purchasing drugs at Nominal Price, payment shall not exceed the entity's actual acquisition cost for the drug, plus a professional dispensing fee of $10.64.

F. Physician Administered Drugs (PADs) are reimbursed at a rate of ASP+ 6%. For PADs that do not have a published ASP, the reimbursement is

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

calculated based on published compendia pricing such as Wholesale Acquisition Cost (WAC). For PADs administered by 340 entities, payment shall not exceed the entity's actual acquisition cost for the drug.

G. Investigational drugs not approved by the FDA are not covered.

Prescription Compounding

Alabama Medicaid pays for prescription drugs through the billing of NDCs. Pharmacists may dispense compounded medications when prescribed and must bill for each ingredient with a valid NDC on a single claim. Bulk products (i.e. powders) used for compounded medications are non-covered for adults (aged 21 and older). Some exclusions may apply. Bulk products must be submitted as a compound claim. Bulk products submitted on a pharmacy claim will deny.

The finished compound must not be available as a legend or over-the-counter product in an equivalent dosage form/route of administration. Compound products are subject to review, must meet medical criteria and may require peer-reviewed medical literature before being covered.

The maximum payable amount for a compounding product is $200 per claim. Requests for overrides for compounded products that exceed $200 should be referred to Acentra Health at 1 (800) 748-0130.

Other Drugs

Reimbursement for covered drugs other than multiple source drugs will not exceed the lower of the Alabama Estimated Acquisition Cost (AEAC) for the drug plus a reasonable dispensing fee, OR the provider's Usual and Customary Charge to the general public for the drug. For blood clotting factor products, Medicare Part B Drug pricing plus a reasonable dispensing fee is utilized.

Dispensing Fees

A reasonable dispensing fee is set by the Agency. The fee is reviewed periodically for reasonableness and, when deemed appropriate by Medicaid, may be adjusted. The dispensing fee paid by the agency effective September 22, 2010 is $10.64.

Only one dispensing fee is allowed for a 34 day supply of the same drug per month unless the recipient qualifies for an “early refill”. To qualify for an “early refill”, the recipient must have used 75% of the original supply or there is a documented consultation with the prescribing physician authorizing the refill.

Over-the-Counter Medications (OTCs)

Medicaid pays for certain OTCs through the Medicaid pharmacy program. OTCs dispensed to an eligible Medicaid recipient may be submitted for payment by utilizing the appropriate NDC number.

Over-the-counter medications require a prescription from a physician or other practitioner legally licensed by the State of Alabama to prescribe the drugs authorized under the program. Telephone prescriptions are acceptable for OTCs.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Long term care facilities may bill OTC insulins covered by the Medicaid pharmacy program by submitting for payment the NDC number utilized. All other OTCs should be billed by the nursing facility using the facility cost report.

Do not dispense more medication than indicated on the prescription unless authorized by the prescribing physician to do so.

Medicaid will reimburse for covered OTCs as stated under Multiple Source Drugs.

Non-Drug Items

Alabama Medicaid Agency reimburses for certain non-drug items, including but not limited to spacers, syringes, and tablet splitters, through the pharmacy program with a valid prescription and NDC number. Other supplies such as blood glucose testing strips and lancets may be billed through Durable Medical Equipment. Please refer to chapter 14.2 for complete information.

Vaccine Administration

Alabama Medicaid will reimburse Medicaid-enrolled pharmacy providers for the administration of all vaccines recommended by the Advisory Committee on Immunization Practices (ACIP) for ages 19 and older. A list of ACIP recommended vaccines can be located on the CDC website under the vaccine page.

Claims for a vaccine and the administration of the vaccine will be submitted on the same claim. Pharmacy providers should submit a claim for the vaccine (i.e. ingredient) with the appropriate NDC along with the administration fee in the Incentive Amount Submitted field (NCPDP Field 438-E3) on the same claim as the vaccine being administered.

A maximum reimbursement of $8 is allowed for each vaccine administration. Only one dispensing fee (for the ingredient) and copay (if applicable) will be applied to the claim. There is a maximum quantity for each vaccine administered of 1 injection per recipient within a timeframe in accordance with the CDC dosing regimen.

A prescription or standing order is required for each vaccine administered and should be retained on file for documentation purposes.

To facilitate coordination of care, Pharmacy providers are required to inform (via phone, fax, email, or mail) each recipient's PMP upon administration of any vaccines for which an administration claim is submitted. Documentation must be kept on file at the pharmacy of the notification to the PMP. If the PMP is unknown, the pharmacy may call the Alabama Medicaid Automated Voice Response System (AVRS) at 1-800-727-7848 to obtain the PMP information. Pharmacy providers may also notify the recipient's local Alabama Coordinated Health Network (ACHN) region to assist with finding a PMP; ACHN contact information can be located on the Agency website under Contacts/ACHN Contacts. A suggested Immunization Provider Notification Letter, which can be used to notify the PMP, can be found on the Agency website under Pharmacy/Vaccines.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Alabama State Board of Pharmacy law and regulations should be followed regarding dispensing and administration of legend drugs/vaccines.

Total Parenteral Nutrition

Alabama Medicaid Agency may reimburse for total parenteral nutrition (TPN) through the pharmacy program if the order/prescription and recipient meets certain requirements. TPN solutions include those used for hyperalimentation, intradialytic parenteral nutrition (IDPN) and intraperitoneal nutrition (IPN). Please refer to chapters 35.2 and 28.2 for complete information.

TPN prescriptions/orders are written to provide a sufficient amount of medication necessary for the duration of the illness or an amount sufficient to cover the interval between physician's visits. TPN prescriptions/orders should be billed using a compound pharmacy claim based on a month's supply. It is Medicaid's policy that a prescription shall not be split into small units and submitted as separate claims in order to obtain additional dispensing fees.

340 B Pricing

The Veterans Health Care Act of 1992 enacted section 340 B of the Public Health Services Act, "Limitation on Prices of Drugs Purchased by Covered Entities". This Section provides that a manufacturer who sells covered outpatient drugs to eligible 340B entities must sign a pharmaceutical pricing agreement with the Secretary of Health and Human Services in which the manufacturer agrees to charge to Medicaid a price for covered outpatient drugs that will not exceed the average manufacturer price decreased by a rebate percentage.

Eligible entities are defined in 42 U.S.C. § 256b(a)(4).
When an eligible 340B entity other than a disproportionate share hospital, a children's hospital excluded from the Medicare prospective payment system, a free-standing cancer hospital exempt from the Medicare prospective payment system, sole community hospital, rural referral center, or critical access hospital submits a bill to the Medicaid Agency for a drug purchased by or on behalf of a Medicaid recipient, the amount billed shall not exceed the entity's actual acquisition cost for the drug, as charged by the manufacturer at a price consistent with the Veterans Health Care Act of 1992, plus the dispensing fee established by the Medicaid Agency.

A disproportionate share hospital, children's hospital excluded from the Medicare prospective payment system, free-standing cancer hospital exempt from the Medicare prospective payment system, sole community hospital, rural referral center, or critical access hospital may bill Medicaid the total charges for the drug. As manufacturer price changes occur, the entities must ensure that their billings are updated accordingly.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Eligible 340B entities are identified on the Department of Health and Human Service's website. These entities shall notify Medicaid of their designation as a 340B provider.

Audits of the eligible entities' (claims submissions and invoices) will be conducted by the Medicaid Agency. Eligible 340B entities, other than the providers listed above, must be able to verify acquisition costs through review of actual invoices for the time frame specified. Charges to Medicaid in excess of the actual invoice costs will be subject to recoupment by the Medicaid Agency in accordance with Chapter 33 of the Administrative Code.

27.2.6 Primary Pharmacy Audit Components

The following information serves as a general guide to the components of a Medicaid Pharmacy Audit. Although the list provided may not be all-inclusive, it covers most of the discrepancies found through on-site and desk review audits. Non-compliant prescriptions may result in recoupments. Questions regarding this information may be directed to Medicaid at (334) 353-4584.

- **Rx Hardcopy Requirements**
    - **Tamper Resistant Prescriptions –** Prescriptions for outpatient drugs for Medicaid recipients which are executed in written (and non-electronic) form must be executed on tamper-resistant prescription pads.
    - **Controlled Substance Prescriptions –** Medicaid follows all DEA and Alabama State Board of Pharmacy rules and regulations regarding controlled substance prescriptions. The prescribing physician must authorize all changes from the original prescription before dispensing, and any change must be documented on the prescription. Written controlled substance prescriptions require a manual signature by the practitioner.

- **Total Parenteral Nutrition (TPN) - TPN** prescriptions/orders include those used for hyperalimentation intradialytic parenteral nutrition (IDPN), and intraperitoneal nutrition (IPN). A certification statement of medical necessity must be written or stamped on the prescription/order, or accompany all TPN prescriptions/orders.
- **Claims Submission**
    - **Dispense As Written (DAW) Codes -** Use of DAW codes will be audited on a regular basis to ensure correct billing. For a detailed explanation of each DAW code, see Section 27.2.2 of the Provider Billing Manual.
    - **Emergency Prior Authorization (PA) -** The use of the emergency PA code is to be used only in cases of emergency. This code will be monitored, and recoupments will be initiated if the code is found to have been used inappropriately.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- **Other Coverage Code (OCC) -** Pharmacy providers should file a patient's primary insurance prior to filing Medicaid. Once the primary payer has responded, the patient's claim can be submitted to Medicaid. The use of OCC's will be monitored regularly. For detailed information on OCC's, see Section 27.5.6 of the Provider Billing manual.

- **Timely Prescription Reversal -** If a patient or a patient's authorized representative has not picked up his/her prescription within sixty (60) days, the pharmacy is required to reverse the claim and credit Medicaid the amount originally billed.

- **High Cost Claims -** High cost prescription claims will be reviewed on a regular basis. The NDC number of the product actually dispensed should be billed, and the days supply should be clinically appropriate according to prescription instructions. All aspects of the claims will be reviewed for accuracy.

- **Inaccurate Billing -** Certain drug products are at increased risk for billing errors. Claims for these prescriptions will be reviewed on a regular basis. The NDC number of the product actually dispensed should be billed, and the days supply should be clinically appropriate according to prescription instructions. All aspects of the claim will be reviewed for accuracy.

- **Usual & Customary (U&C)** - For specified products, submitted charge will be compared to cash price to general public. Adjustments may be initiated.

- **Out of State Providers -** Claims submitted by out of state providers will be reviewed regularly to ensure the medication dispensed is in accordance with the provider's enrollment guidelines.

- **Compound Prescriptions** - Claims for compounded prescriptions will be audited to ensure they follow all guidelines set forth in Chapter 27.2.4 in the Provider Billing Manual.

- **Multiple Dispensing Fees -** Providers must have documentation to include call-in and hard copy prescriptions to support the multiple dispensing of the same product to the same patient within an appropriate period of time.

- **Recipient Signatures** - Recipient signatures are required for all pharmacy claims to validate the service was rendered to the recipient and to ensure the recipient was offered appropriate counseling. For pharmacy items that have been delivered, the signature of the recipient or his/her designee is required. Pharmacies should maintain recipient signature logs for examination.

Continued violations of Medicaid claims processing policies may result in recoupment and referral to the Alabama Attorney General's Office for investigation of fraud. Please visit CMS' Medicaid Program Integrity (MPIE) website at www.cms.gov. The site provides educational resources

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

for providers, beneficiaries, managed care plans (MCPs) and other stakeholders and promotes best practices and awareness of Medicaid fraud, waste and abuse.

27.2.7 Drug Utilization Review (DUR)

The objective of DUR is to improve the quality of pharmaceutical care by ensuring that prescriptions are appropriate, medically necessary, and unlikely to result in adverse medical outcomes.

This section contains information about the components of the DUR Program:

- General Information
- Prospective Drug Utilization Review (Pro DUR)
- Online Drug Utilization Review (Online DUR)
- National Council for Prescription Drug Programs (NCPDP) Standards
- Retrospective Drug Utilization Review (Retro DUR)

General Information

The DUR Program uses educational tools directed to physicians and pharmacists in order to reduce the frequency of patterns of fraud, abuse, gross overuse, or inappropriate or medically unnecessary care by addressing:

- Potential and actual drug reactions
- Therapeutic appropriateness
- Over-utilization
- Under-utilization
- Appropriate use of generic products
- Therapeutic duplication
- Drug/disease contraindications
- Drug interactions
- Incorrect drug dosage or duration
- Drug allergy interactions
- Clinical abuse/misuse

The DUR Program reviews, analyzes and interprets patterns of drug usage against standards consistent with the American Medical Association Drug Evaluations, United States Pharmacopoeia Drug Index, American Hospital Formulary Service Drug Index, and peer reviewed medical literature.

DUR will be conducted for drugs dispensed to residents of nursing facilities.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Pharmacists should refer cases of possible fraud or abuse to the Medicaid Program Integrity Division. Information may be provided through the Medicaid Agency's Fraud hotline by calling 1(866) 452-4930. Calls may be made anonymously.

Prospective DUR

Prospective DUR (Pro-DUR) is required at the point of sale or distribution before each prescription is filled or delivered to a Medicaid recipient. It must include screening, patient counseling, and use of patient profiles.

Pro-DUR screening is the responsibility of each Medicaid participating pharmacy and is a requirement for participation in the program.

Online DUR

Medicaid provides an online system to assist the dispensing pharmacist. Incoming drug claims are compared to the patient's medical and pharmacy claims history files to detect potential therapeutic problems. DUR alert messages are returned to the pharmacist for significant problems discovered by this review.

Potential problems identified include:

- Therapeutic duplication – Examples of therapeutic duplication, involving overlapping periods of time where such therapy is not medically indicated, include:
  - Two or more doses of the same drug
  - At least two drugs from the same therapeutic class
  - At least two drugs from different therapeutic classes with similar pharmacological effects being used for the same indication
- Drug/Disease contraindications
- Drug interactions
- Incorrect dosage or duration of drug treatment
- Drug allergy interactions
- Clinical abuse or misuse
- Preferred drug status

Medicaid distributes criteria and standards to providers in Medicaid Provider Notices and Bulletins.

Pharmacists must respond to prospective DUR alerts to continue claims processing through Gainwell.

Pharmacies without computers must screen based on guidelines provided by the Alabama State Board of Pharmacy Practice Act and criteria and standards endorsed by Medicaid's DUR Board.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

National Council for Prescription Drug Programs (NCPDP) Standards

Pharmacy claim telecommunication standards dictate the order and content of the fields relayed to the pharmacist when the system generates a DUR alert. Displaying these fields to the pharmacist facilitates communication when health care providers discuss the potential therapeutic problems discovered by online prospective DUR.

This section explains DUR fields and information, lists standard response fields and codes, shows example DUR alert messages, and lists DUR alerts in order of priority.

Field Name	***Information Displayed in the Field***
Conflict Code	Alerts the pharmacist that the incoming drug claim conflicts with information in the patient's history file or with predetermined screening criteria ER = Early Refill TD = Therapeutic duplication DD = Drug Interaction EQ = Excessive Quantity
Clinical Significance/Severity Index Code	Indicates database-assigned significance of the conflict. 0 = Not applicable 1 = Major 2 = Moderate 3 = Minor
Other Pharmacy Indicator	Informs the pharmacist of the originating location of the claim with which the incoming drug claim conflicts. 0 = Not applicable 1 = Your Pharmacy 3 = Other Pharmacy
Previous Date of Fill	The last recorded date of the active medication in the patient's history file with which the incoming drug claim conflicts.
Quantity of Previous Fill	Quantity of previously filled prescription with which the incoming drug claim conflicts
Database Indicator	Identifies source of DUR conflict information 0 = Not applicable 1 = First DataBank. 4 = Processor Developed
Other Prescriber Indicator	Identifies the prescriber of the previously filled prescription with which the incoming drug claim conflicts. 0 = Not applicable 1 = Same Prescriber 2 = Other Prescriber
Free Text Message	30-character field that transmits decoded information regarding the DUR conflict.

To respond to an alert, the pharmacist must enter the corresponding codes to describe the action taken on the alert in the response fields. For a claim that generates multiple alerts, the pharmacist's response indicates that each alert has been considered and the response should be applied to all alerts generated by this claim.

The pharmacist should respond to alerts with the appropriate conflict code. For example, enter TD for Therapeutic Duplicate in response to a therapeutic duplication alert.

Do not change any claim information such as the NDC code or Quantity unless you are indicating your change with the appropriate Outcome Codes listed in the table below**.** Changing claim information could cause your claim to deny online.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Response fields and codes are listed in the following table:

Response Field	*Response Codes*
Conflict Codes	HD – High Dose ER – Early Refill LR – Late Refill DD – Drug-Drug Interaction TD – Therapeutic Duplication PS – Product Selection
Intervention Codes	M0 – Prescriber consulted P0 – Patient consulted R0 – Pharmacist consulted other source
Outcome Codes	1A - Filled As Is, False Positive 1B - Filled Prescription As Is 1C - Filled, with Different Dose 1D - Filled, with Different Directions 1E - Filled, with Different Dose 1F - Filled, with Different Quantity 2A - Prescription Not Filled 2B - Not Filled, Directions Clarified

NOTE:

Intervention codes contain the number zero, not the letter O. Using the letter O will cause your claim to deny online.

Proprietary pharmacy software for prescription processing systems may display DUR alerts in different formats. Examples of standard content of DUR messages are presented below. These may differ from the message actually displayed on the pharmacist's computer screen.

Example DUR Alert Messages	
On April 2, 1998, the pharmacist attempts to dispense an aspirin-containing product to a patient currently receiving welfare in prescribed by the same physician and filled at another pharmacy:	
CONFLICT CODE:	DD - DRUG INTERACTION
SEVERITY:	1 = Major
OTHER PHARMACY INDICATOR:	3 = Other Pharmacy
PREVIOUS FILL DATE:	19980315 (March 15, 1998)
QUANTITY OF PREVIOUS FILL:	30
DATABASE INDICATOR:	1 = First DataBank
OTHER PRESCRIBER INDICATOR:	1 = Same Prescriber
MESSAGE:	Coumadin
On April 19, the pharmacist attempts to dispense a refill for which the previous prescription has greater than 25 percent of days supply remaining:	
CONFLICT CODE:	ER - OVERUTILIZATON
OTHER PHARMACY INDICATOR:	1 = Same Pharmacy
PREVIOUS FILL DATE:	19980301 (March 1, 1998)
QUANTITY OF PREVIOUS FILL:	90
OTHER PRESCRIBER INDICATOR:	1 = Same Prescriber
The pharmacist attempts to dispense a refill of levothyroxine on May 15, a date equal to greater than 125 percent of previous prescription's days supply:	
CONFLICT CODE:	LR - UNDERUTILIZATION
OTHER PHARMACY INDICATOR:	1 = Same Pharmacy
PREVIOUS FILL DATE:	19980401 (April 1, 1998)
QUANTITY OF PREVIOUS FILL:	30
OTHER PRESCRIBER INDICATOR:	1 = Same Prescriber

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Example DUR Alert Messages	
On May 12, the pharmacist attempts to dispense flurazepam to a patient with an active prescription for triazolam:	
CONFLICT CODE:	TD - THER. DUPLICATION
OTHER PHARMACY INDICATOR:	3 = Other Pharmacy
PREVIOUS FILL DATE:	19980501 (May 1, 1998)
QUANTITY OF PREVIOUS FILL:	30
DATABASE INDICATOR:	1 = First DataBank
OTHER PRESCRIBER INDICATOR:	2 = Other Prescriber
MESSAGE:	Triazolam
The pharmacist attempts to dispense acetaminophen w/codeine, three tablets every 4 hours (dose exceeds usual adult daily maximum):	
CONFLICT CODE:	HD - HIGH DOSE
DATABASE INDICATOR:	1 = First DataBank
The pharmacist attempts to dispense an NDC that is not a preferred drug.	
CONFLICT CODE:	PS - PRODUCT SELECT OPPORTUNITY
DATABASE INDICATOR:	4 = Processor Developed

The system displays up to three DUR alerts for a prescription. To access additional alerts pertaining to the prescription, the pharmacist may call the Gainwell Help Desk at 1(800) 456-1242.

Multiple alerts on a prescription are prioritized according to the following hierarchy:

1. Drug-drug interactions
2. Therapeutic duplication
3. Overutilization (early refill)
4. Incorrect dose (high dose)
5. Underutilization (late refill)
6. Preferred drug

Retrospective DUR

The retrospective DUR Program reviews, analyzes and interprets patterns of recipient drug usage through periodic examination of claims data to identify patterns of fraud and abuse, gross overuse, and inappropriate or medically unnecessary care.

27.3 Prior Authorization and Referral Requirements

Pharmacy providers must contact Acentra Health at 1(800) 748-0130 for overrides and prior authorization of drugs requiring prior approval. Only Acentra Health can issue prior authorizations and overrides.

Acentra Health should respond within 24 hours of receipt of requests for prior authorization and overrides. In cases of emergency, Acentra Health will make provisions for the dispensing of at least a 72-hour supply of a covered outpatient prescription drug.

Federal Law also makes a provision for a 72-hour supply by using the following authorization number: 0000999527. This number is to be used only in cases of emergency. Utilization of this code will be strictly monitored and recoupments will be initiated when the code is found to have been used inappropriately.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

27.3.1 Hemophilia Management Standards of Care

In order to be paid for providing blood clotting factor to Alabama Medicaid recipients, the provider must agree to provide, at the minimum, the following clinically appropriate items and services to their patients with hemophilia and blood clotting factor-related diseases:

(1) Home or office delivery of blood clotting factor and supplies. All shipments/delivery of clotting factor, including overnight deliveries, must use appropriate cold chain management and packaging practices to ensure proper temperature, drug stability, integrity, and efficacy are maintained during shipment.

(2) Educational materials and programs.

(a) The provider shall develop a training library at each enrolled provider location with materials for patient use, to include but not limited to, audio, video, electronic, and written materials.

(b) The provider shall offer educational materials to patient or family/caregiver at minimum at initiation of participation with the provider, yearly during the in-home assessment, and upon the request of Medicaid, the prescribing physician, or patient or family/caregiver. Topics of education shall include, but not be limited to, specific patient and family/caregiver education aimed at preventing injury that would result in a bleed, self-administration and reconstitution of blood clotting products.

(3) Medically necessary ancillary supplies required to perform the actual IV administration of clotting factor. Supplies may be billed to Medicaid through the Durable Medical Equipment (DME) program. In addition, sharps containers and any other necessary biohazardous waste containers shall be provided, as well as pickup and disposal of waste containers according to national, state and local biohazardous waste ordinances.

(4) Emergency telephone support 24 hours a day, 7 days a week to ensure patients are directed appropriately for care in emergent situations.

(5) For the purposes of this Rule and the Alabama Medicaid Agency hemophilia management standards of care, “clinical staff trained in hemophilia and related blood clotting factor related diseases” is defined as follows:

(a) Pharmacists are required to obtain a minimum of 2 Continuing Education (CE) credit hours per year that are specific to hemophilia or related blood clotting factor-related diseases.

(b) Nurses and social workers are required to obtain a minimum of 4 Continuing Education (CEU) hours per year that are specific to hemophilia or related blood clotting factor-related diseases.

Continuing education must be specific to hemophilia or related blood clotting factor-related diseases and recognized by a state or national hemophilia or bleeding disorder education/support group (for example: Hemophilia Federation of America or the National Hemophilia Association).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

(6) Emergency delivery of blood clotting factor within 24 (with a target of less than 12) hours of the receipt of a prescription for a covered person's emergent situation, or notification of the patient with an existing valid prescription. Emphasis should be placed during patient education of the importance of keeping an adequate supply on hand and self-administration for emergent situations.

(7) A pharmacist, nurse, and/or a case representative assigned to each patient. A case representative shall maintain, at a minimum, monthly telephone contact with the patient or family/caregiver to include, but not limited to:

- Inquiry regarding patient's current state of well-being
- Assessment of patient/family compliance/adherence, and persistence with the medical treatment plan
- Incidence of adverse events
- Incidences of supply or equipment malfunctions
- Home inventory check of factor and supplies
- Confirmation of next delivery date

Case representatives may include administrative support staff but must coordinate with clinical staff (as described in (5) above) in the event a clinical issue should arise.

(8) Compliance programs.

(a) The provider must assess patient adherence on monthly telephone contact (see (7) above) and on all in-home visits by a pharmacist, nurse, or case manager.

(b) The provider must verify the amount of clotting factor the patient has on hand prior to each dispense. Blood clotting factor and related products are not to be sent to the patient on an auto-ship basis. The provider shall discourage "stockpiling" of product.

(c) The number of bleeds and infusions from the prior shipment shall be tracked to validate the need for additional product or non-compliance with the medical treatment plan.

(9) Notification of product recalls or withdrawals.

(a) Any stock of recalled medications/equipment/supplies shall be removed from stock and quarantined immediately.

(b) Any recalled items dispensed to patients shall be retrieved and quarantined; notification to patients must occur within 24 hours of the recall receipt.

(c) The prescribing physician shall be notified of a medication recall. A prescription for an alternative product shall be obtained, if necessary.

(10) Visiting clinical services.

(a) At minimum, an initial and subsequent yearly in-home assessment of the patient, family/caregiver, and environment shall be conducted by a nurse or pharmacist trained in blood clotting factor related diseases.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

(b) Additional in-home assessments of the patient, family/caregiver, and environment deemed necessary by the physician or patient situation shall be conducted.

(c) Visits may be provided directly by the provider or by arrangement with a qualified local home health care agency. All hemophilia-related clinical staff must be trained in hemophilia and bleeding disorder related diseases.

(11) A registered pharmacist trained in blood clotting factor related diseases to perform assay to prescription management. Variance in assay to prescription/target dose should not exceed +/- 10%. Providers shall strive to dispense as close to the prescribed target dose within the assay variance as possible without breaking a new vial (i.e. do not dispense 'extra' vials, even if the 'extra' vials fall within the +/-10% variance). Extra vials dispensed within the +/-10% assay variance may be subject to recoupment. Pharmacists/pharmacy staff shall not change a Medicaid recipient's therapy based on the cost of the medication without prior written approval from the prescriber and noted in the patient chart.

(12) Adverse drug reaction and drug interaction monitoring and reporting.

(a) Pharmacists shall counsel the patient or family/caregiver in accordance with the Omnibus Budget Reconciliation Act of 1990 (OBRA 90) to encourage appropriate medication use, promote realistic therapy expectations, help recipients manage or minimize expected adverse effects and encourage compliance.

(b) Pharmacists shall report any issues or concerns related to the patient's medications to the physician. For significant events, utilization of the FDA 3500 MedWatch voluntary reporting form is encouraged.

(13) Continuation of Care. The provider shall not present any bill to or collect any monies from a covered Medicaid recipient with whom the provider has agreed to the provision of services and supplies for the home treatment of bleeding episodes associated with hemophilia, except as follows:

(a) to collect the copayments/coinsurance amounts the covered person is required to pay under the terms defined by Medicaid, or

(b) if the service/product has been deemed "non-covered" and the recipient has been notified in advance as outlined in the Alabama Medicaid Agency Administrative Code and Provider Billing Manual.

Upon discontinuation of services by the provider, the provider shall, at a minimum, coordinate for another designated health care provider to provide services to covered persons, prior to withdrawal of any hemophilia-related services from the home of any covered person. The provider shall continue to provide services and supplies to a covered individual until the individual obtains an alternate source of services and supplies. Every effort shall be made by the provider (including notification to the Medicaid Director of Pharmacy) to find an alternative provider to

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

ensure that the coordination of care/transition follows the minimum standards of care as set forth in this document.

(14) The Alabama Medicaid Agency (or its designated representative), to ensure clinically appropriate services are being given to hemophilia patients, shall monitor providers of blood clotting factor by prospective and retrospective audits, as well as administer a patient/family/caregiver satisfaction survey to include, but not limited to, measurement of:

(a) staff availability

(b) staff knowledge

(c) timeliness of deliveries

(d) accuracy of supplies and equipment

(e) overall satisfaction

If a provider does not meet one or more of the standards for care, as outlined in this Rule, the Alabama Medicaid Agency shall provide a written notice of that determination, with an explanation therefore, to the provider. The provider will not be reimbursed for blood clotting factor or hemophilia related services until the provider meets the standards as approved by the Agency.

27.4 Cost Sharing (Copayment)

Copayment amounts vary and are described in this section. **Copayments do not apply to services provided for pregnant women, long term care (nursing home) residents, emergencies, recipients under 18 years of age, or family planning**.

Copayments do not apply to Native American Indians that present an "active user letter" issued by Indian Health Services (IHS). The provider must enter a value of '4' in the prior authorization type code field indicating co-pay exemption for a Native American Indian with an active user letter.

A provider may not deny services to any eligible Medicaid recipient because of the recipient's inability to pay the cost sharing (copayment) amount imposed.

- If the physician has indicated on the prescription that the recipient is pregnant, enter "P" in the copay block.

NOTE:
Do not enter a dollar amount in the copay block.

The copayment schedule is based on the total charge amount (ingredient cost plus dispensing fee):

Pharmacy Charge	***Copay Amount***
$10.00 or less	$0.65
$10.01 to $25.00	$1.30
$25.01 to $50.00	$2.60
$50.01 or more	$3.90

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Copayment amount should be collected on the original prescription as well as any refills.

Providers may use various resources to verify recipient eligibility:

- Provider Electronic Solutions software
- Software developed by the provider's billing service, using specifications provided by Gainwell
- Automated Voice Response System (AVRS) at 1(800) 727-7848
- Contacting the Gainwell Provider Assistance Center at 1(800) 688-7989

Appendix B, Electronic Media Claims Guidelines, provides an overview of the Gainwell Provider Electronic Solutions software, which providers may use to verify recipient eligibility and submit claims. Instructions for requesting the software are also included in this appendix.

Providers who use a billing service may be able to verify eligibility through the billing service's software, providing the service obtained a copy of the vendor specification. Please refer to Appendix B for contact information.

Appendix L, AVRS Quick Reference Guide, provides instructions for using AVRS to verify recipient eligibility. Providers can obtain a faxed response verifying eligibility by following the instructions provided.

27.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, provider should bill Medicaid claims electronically.

Pharmacy providers who bill Medicaid claims electronically receive the following benefits:

- Faster claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

Most pharmacy claims are submitted electronically for online adjudication. Claims filed electronically use Provider Electronic Solutions software from Gainwell or Point of Sale proprietary pharmacy software.

NOTE:

When filing a claim on paper, an XIX-DC-10-093 pharmacy claim form is required.

Paper claims may also be filed. The pharmacist must initiate a two-part Medicaid Pharmacy Claim. The pharmacy must retain the original claim for State and audit purposes and submit a duplicate claim to Gainwell for payment. Gainwell will furnish pharmacy claim forms upon request.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Pharmacy claim forms can be purchased from Gainwell for $35.44 per 1,000 forms. Claim forms will be mailed after receipt of payment.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

27.5.1 Time Limit for Filing Claims

Medicaid requires all claims for Pharmacy providers to be filed within one year of the date of service. Refer to Section 5.1.4, Filing Limits, for more information regarding timely filing limits and exceptions.

27.5.2 Diagnosis Codes

Diagnosis Codes do not apply when filing the pharmacy claim form.

27.5.3 Procedure Codes and Modifiers

Procedure Codes and Modifiers do not apply to Pharmacy billing.

27.5.4 Place of Service Codes

Formerly named Patient Location Code, new code values have been assigned. A value of either 31, 32, or 54 in 307-C7 will indicate the patient is in a Long Term Care (LTC) facility and the claim will be processed accordingly.

27.5.5 Required Attachments

Attachments are not required for pharmacy claims.

27.5.6 Third Party Liability (TPL) Payments

As a general rule, pharmacy providers are required to file a patient's primary insurance prior to filing Medicaid. Once the primary payer has responded, the patient's claim can be submitted to Medicaid. Medicaid will pay the Medicaid rate less any payment and applicable contractual adjustment. Medicaid should not pay more than the than the sum of the health plan's patient co-pay, coinsurance and/or deductible.

The following NCPDP codes should be used when billing Medicaid as the secondary payer:

- Other coverage code "02" (NCPDP field 308-C8) will require a TPL amount (431-DV) greater than zero.
- Other coverage code***s*** "02" and "04" (NCPDP field 308-C8) will require a patient responsibility amount (352-NQ) greater than zero.
- Other coverage code "03 - Other coverage exists- claim not covered" (NCPDP field 308-C8) will not require either TPL amount or patient responsibility amount to be greater than zero.

An exception to the rule is when the patient has a point of sale (POS) drug plan, which requires the cost of the prescription to be paid up front by the patient. Then a claim can be submitted to the insurance plan for reimbursement directly to the patient. These POS drug plans require special handling when the patient is also a Medicaid recipient.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Click the following link for special instructions for pharmacies when the recipient has both Medicaid and a point-of-sale drug plan: https://medicaid.alabama.gov/content/7.0_Providers/7.1_Third_Party/7.1.6_Coord_Benefits.aspx

27.5.7 Prescription Origin Code

The code indicating the means used to deliver a prescription to a pharmacy – this is a required field. Valid values are:

0 = Not Known
1 = Written
2 = Telephone
3 = Electronic
4 = Facsimile
5 = Pharmacy

27.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

Resource	Where to Find It

Medical Necessity/Medically Necessary Care	Chapter 7
Electronic Media Claims (EMC) Submission Guidelines	Appendix B
AVRS Quick Reference Guide	Appendix L
Alabama Medicaid Contact Information	Appendix N

27.7 Alabama Medicaid Pharmacy Questions and Answers (Q&A)

The Medicaid Pharmacy Q&A has been developed to provide guidance and clarification on pharmacy issues. Questions may be submitted to:

Medicaid Program Management, Fax (334) 353-7014

Responses will be published in the quarterly Medicaid Pharmacy Newsletter.

Are original prescriptions and signatures required for all drugs?

Medicaid requires original, signed prescriptions for Schedule II drugs. Schedule III, IV, and V drugs may be called in, as allowed by state pharmacy regulations.

Can I make a therapeutic or strength substitution without calling the prescribing physician?

No. Alabama State law requires the pharmacist to have the approval of the prescribing physician before dispensing anything other than what has been indicated on the prescription. If the physician has indicated product selection is allowed, the pharmacist may dispense generic substitution without subsequent contact with the physician.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

What is the appropriate action when a physician writes a prescription that exceeds the Medicaid monthly dosing units?

When a prescription is denied for excessive quantity or monthly limit exceeded, claims will deny. In order to receive an override, providers (either the pharmacy or physician) should contact the Acentra Health help desk at 1(800) 748-0130 for consideration of an override.

Can I "split bill" a prescription if the prescribed quantity exceeds the maximum units allowed?

If a prescription to be paid by Medicaid exceeds the drug's maximum unit limit allowed per month, the prescriber or pharmacist must request an override for the prescribed quantity. If the override is denied, then the excess quantity above the maximum unit limit is non-covered and the recipient can be charged as a cash recipient for that amount in excess of the maximum unit limit. In other words, for a prescription to be "split billed" (the maximum unit allowed paid by Medicaid and the remainder paid by the patient), a maximum unit override must be requested by the provider and denied. Note: A provider's failure or unwillingness to go through the process of obtaining an override does not constitute a non-covered service.

How long is a prescription valid?

In accordance with state law, controlled substance prescriptions, for schedule III-V, may be refilled up to five times within six months from the original issue date. Non-controlled prescriptions are reimbursable by Medicaid for up to 12 months from the date of the original dispensing date.

Can I receive authorization for additional refills from the prescribing physician after the 12 months have expired?

No. A new prescription should be obtained after 12 months from the date of the original dispensing date. Medicaid will make payment for up to 5 refills on an original prescription for Control III-V prescriptions and 11 refills on non-controlled prescriptions.

Why is it important that I bill the exact NDC number dispensed if the product is a generic?

According to the State Board of Pharmacy, pharmacies dispensing controlled substances and submitting claims with different NDC numbers would have problems with the Drug Enforcement Agency (DEA). Additionally, Medicaid provider contracts require that claims be submitted accurately. Under federal law, manufacturers rebate Medicaid for use of their drugs. When an NDC is submitted on a claim that is not the actual NDC dispensed, Medicaid may incorrectly invoice the manufacturer for the rebate. Rebate dollars provide a significant source of money to offset pharmacy benefit costs. Therefore, NDC numbers reported on pharmacy claims should be the exact NDC number dispensed to the patient.

Can referrals be made to the Medicaid Agency when a provider believes a recipient is defrauding the program?

Yes. Any information regarding inappropriate and/or illegal drug-related activity by Medicaid recipients can be referred to the **Medicaid Fraud Hotline** at **1(866) 452-4930**. All complaints are researched. If evidence is

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

found to support recipient abuse or fraud, recipients can be locked in to one physician and one pharmacy or removed from the Medicaid program.

Does Medicaid make payment for benefits when a patient is in a state or county correctional facility?

Medicaid benefits are not available for individuals who are inmates of public institutions as defined by CFR 435.1009. It is the responsibility of the correction facility to provide medical care. Incarcerated recipients still receiving Medicaid benefits may be referred to the **Medicaid Fraud Hotline** at **1(866) 452-4930**.

If a provider receives multiple dispensing fees for the same patient, same drug and strength within the same month, will the additional dispensing fees be recouped?

Medicaid auditors look specifically for providers who split 30-day prescriptions into shorter time periods and amounts. Intentionally splitting prescriptions to receive multiple dispensing fees is fraud and monies paid will be recouped. Multiple dispensing fees within the same month for the same patient and same drug are acceptable if the provider has documentation supporting the need for multiple dispensings. Example: A child needs a 10 mg tablet for school and a 20 mg tablet for home to take at night; the provider should have in his documentation prescriptions for both.

If a provider is audited and cannot produce documentation while Medicaid auditors are in the store, is there a period of time allowed to provide the documentation before recoupments are initiated?

If an auditor requests documentation that is not present in the provider's facility, the provider should indicate to the auditor where the documentation is and when it can be provided for review. If additional information is needed by the state as a result of discrepancies identified in an audit, the provider should submit the requested information within 30 days of the request. Failure to submit documentation within 30 days may result in recoupment.

Is it important to bill the correct days supply?

Yes, days supply is an instrumental portion of a legitimate claim. Retroactive audits may consider the day supply billed, along with quantity of medication billed, in regards to the original prescription. Day supply billed should be clinically appropriate according to the physician's instructions on the prescription.

Can a pharmacy provider advertise waived copays for their Medicaid patients?

No. Advertising the waiver of or routinely waiving Medicaid copayments is a prohibited remuneration under Section 22-1-11, Code of Alabama and 1128B of the Social Security Act (SSA). Please refer to the Provider Manual, Chapter 7 "Understanding your rights and responsibilities as a provider", Section 7.1.8 "Provider Certification" for more information on offering incentives and advertising discounts.

Can a pharmacy enroll in Alabama Medicaid and dispense drugs off site?

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

No*. Per the Alabama Medicaid Agency provider enrollment agreement: *"1.3.3: All claims or encounters submitted by Provider must be for services actually rendered by Provider."* This means that the dispensing of drugs to an Alabama Medicaid Agency recipient must occur by the rendering provider, who is enrolled and billing per the pharmacy NPI.

In addition, per Alabama Medicaid Administrative Code: Rule No. 560-X-16-.02 Requirements for Participation *(1) A pharmacy must be operating under a permit or license to dispense drugs as issued by the Alabama State Board of Pharmacy or appropriate authority in the State where the service is rendered. (2) A pharmacy applicant must submit and have approved a pharmacy agreement signed by owner, authorized representative, pharmacist, or dispensing physician. (3) Pharmacies and dispensing physicians must agree to abide by the rules and regulations of the program; must agree that payment for covered services will be accepted as payment in full.* Therefore, unless approved by the Alabama Board of Pharmacy, the permitted pharmacy is permitted by the Alabama Board of Pharmacy for that particular location, and the dispensing from that permitted location must match the billing/service location of the enrolled pharmacy's NPI.

*The only exception allowed by Alabama Board of Pharmacy is: Section 34-23-70 of the Alabama Practice of Pharmacy Act 205: Management; display of permit and license; poisons; prescription requirements; violations: *(e) No pharmacy shall authorize any person, firm, or business establishment to serve as a pick-up station or intermediary for the purpose of having prescriptions filled or delivered, whether for profit or gratuitously. Except with respect to controlled substances, any facility recognized as a federally qualified health center, as defined in 42 U.S.C. §1396d(l)(2)(B), operating health care practices and providing pharmacy services in the state is expressly exempt from this subsection. Each eligible federally qualified health center is authorized to fill certain prescriptions at one location and deliver medications to clinics for patient pick-up subject to the review of the board.*

28

28 Physician

Physician's services, whether furnished in the office, the recipient's home, a hospital, a skilled nursing facility, or elsewhere, refer to services provided by a physician:

- Within the scope of practice of medicine or osteopathy as defined by state law; and
- By or under the personal supervision of an individual licensed under state law to practice medicine of osteopathy.

The policy provisions for physicians can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 6.

28.1 Enrollment

The Alabama Medicaid Agency fiscal agent enrolls physicians and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*. For the purpose of enrollment, a physician is defined as: a physician who is fully licensed and possesses a current license to practice medicine.

Gainwell also enrolls Physician Assistants (PA), Certified Registered Nurse Practitioners (CRNP), Certified Registered Nurse Anesthetists (CRNA), and Anesthesiology Assistants (AA) who are employed by a Medicaid enrolled physician. Physician-employed includes physicians practicing in an independent practice or in a group practice relationship.

Refer to Chapter 38, Anesthesiology, for more information on CRNA and AA services.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a physician is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for physician-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

Physicians are assigned a provider type of 31 (Physician). Nurse Practitioners are assigned a provider type of 09. Physician Assistants are assigned a provider type of 10. For a list of valid specialties for Nurse Practitioners and Physician Assistants, please refer to Chapter 21.

Valid specialties for physicians and practitioners include but are not limited to the list below:

Specialty (Physician - 31)	***Code***
Allergist	310
Anesthesiologist	311
Applied Behavior Analysis	175
Cardiac surgery	312
Cardiovascular disease	313
Cochlear implant team	740—See Chap. 10, Audiology/Hearing Services
Colon and rectal surgery	750
Dermatology	314
Dental Anesthesiology	279 (with inclusion of Specialty 311-Anesthsiology)
EENT	760
Emergency medicine Practitioner	315
Endocrinology	770
EPSDT	560
Family practice	316
Gastroenterology	317
General practice	318
General surgery	319
Geriatrics	320
Hand surgery	321
Hematology	780
Infectious diseases	790
Internal medicine	800
Mammography	292
Mobile Provider	299
Neonatology	323
Nephrology	324
Neurological surgery	325
Neurology	326
Nuclear medicine	327
Nutrition	230
Obstetrics/Gynecology	328
Oncology	329
Ophthalmology	330

All rights reserved. Applicable FARS/DFARS apply.

Specialty (Physician - 31)	*Code*
Oral and maxillofacial surgery	272
Orthopedic	810
Orthopedic surgery	331
Otorhinolaryngology	332
Pathology	333
Pediatrics	345
Plastic, reconstructive, cosmetic surgery	337
Primary care provider (not a screening provider but can refer patients)	720
Proctologist	338
Psychiatrist	339
Pulmonary disease Specialist	340
Radiology	341
Rheumatology	830
Telemedicine	931
Thoracic surgeon	342
Urologist	343
Vascular surgery	313

Enrollment Policy for Physicians

Providers (in-state and out-of-state) who meet enrollment requirements are eligible to participate in the Alabama Medicaid Program. The PA or CRNP must send a copy of the prescriptive authority granted by the licensing board in order for the PA or CRNP to be added to the Provider License File for the purpose of reimbursing the pharmacist for the prescriptions written by the PA or CRNP. This copy must be sent to Gainwell Provider Enrollment, P.O. Box 241685, AL 36124-1685.

Gainwell will not enroll physicians having limited licenses unless complete information as to the limitations and reasons are submitted in writing to the Provider Enrollment Unit for review and consideration for enrollment.

Enrollment Policy for Primary Care Enhanced Physician Rates or BUMP Rate

In order for PCPs to qualify for BUMP rates, the following requirements must be met:

A. A provider must meet one of the following requirements listed below:

1. A provider is eligible1 who has a specialty or subspecialty designation in family medicine, general internal medicine, or pediatrics that is recognized by the American Board of Medical Specialties (ABMS), the American Board of Physician Specialties (ABPS), or the American Osteopathic Association (AOA), and practice in their specialty.

2. A NON-board certified provider who practices in the field of family medicine, general internal medicine, or pediatrics or a subspecialty under one of these specialties, is eligible1 if he/she can attest that 60 percent of their paid Medicaid procedures billed are for certain specified procedure codes for evaluation and management (E&M) services and certain Vaccines for Children (VFC) vaccine administration codes.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

B. The following providers do not meet criteria for BUMP rates:

1. Federally Qualified Health Center (FQHC)
2. Rural Health Clinic (RHC)
3. Health Department (ADPH)
4. Teaching Facility
5. OB/GYNs
6. Nursing Facility

C. Eligible providers may enroll by:

1. Visit www.medicaid.alabama.gov
2. Select Provider Enrollment from the drop-down menu under “Providers” and then “Forms for Provider Enrollment and Revalidation”
3. Complete the “Bump” Self-Attestation Form
4. Attach proof of board certification, if applicable
5. Mail original self-attestation form to the address specified

D. Providers will receive payment at the enhanced rates for dates of service beginning with the date the self-attestation is entered into the system by the fiscal agent.

[1]As defined by 42 C.F.R. Pts.438, 441, and 447, interpreted by Centers for Medicare and Medicaid (CMS) guidance and consistent with the Alabama State Plan.

Providers that meet the following criteria are eligible to participate in the Physician Teaching Facility (PTF) program or Physician Retention and Access Improvement Program (PRAIP).

Physician Teaching Facilities [PTF]

In order to maintain adequate access to specialty faculty physician (all specialties including general practice, family practice, and general pediatrics) services as required, supplemental payments will be made for services provided to Medicaid recipients by eligible physicians and other professional services practitioners.

To qualify for the supplemental payments, eligible physicians and other professional service practitioners
must:

1. Be enrolled as one of the following provider types:
   a. Physicians (as defined in state plan)
   b. Physician Assistants
   c. Nurse Practitioners (NPs)
   d. Certified Nurse Midwives (CNM)
   e. Certified Registered Nurse Anesthetists (CRNAs) or Anesthesiology Assistants (AAs)
   f. Clinical Psychologists
   g. Optometrists
2. Be in a hospital sponsored location as an approved place of service:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

a. Inpatient hospital
b. Outpatient hospital
c. Hospital-based clinic
d. Hospital affiliated clinic

3. Be licensed by the State of Alabama, have an Alabama Medicaid provider agreement and be employed by or under contract with a medical school that is part of the public university system or a children's hospital healthcare system which meets the criteria and receives funding under Section 340E (a) of the U.S. Public Health Services Act (42 U.S.C. 256e) and which operates and maintains a state license for specialty pediatric beds. Participants that currently qualify are:

a. The University of Alabama System
b. The University of South Alabama
c. Children's of Alabama

The services listed below do not qualify under the Physician Access (Enhanced) Payments Teaching Physicians:

a) Clinical diagnostic lab procedures
b) Technical component of radiology services
c) Services provided to dual eligibles
d) EPSDT
e) Injectables

Non-state governmental entity (Specifically a health care authority or a wholly owned subsidiary thereof

Physician Retention and Access Improvement Program [PRAIP]

In order to maintain adequate access to specialty physicians (all specialties, including general practice, family practice, and general pediatrics) services as required, supplemental payments will be made for services provided to Medicaid recipients by eligible physicians and other professional services practitioners.

To qualify for the supplemental payments, eligible physicians and other professional service practitioners must:

1. Be one of the following provider types:
   a. Physicians (as defined in state plan)
   b. Physician Assistants
   c. Nurse Practitioners (NPs)
   d. Certified Nurse Wives (CNMs)
   e. Certified Registered Nurse Anesthetists (CRNAs) or Anesthesiology Assistants (AAs)
   f. Clinical Psychologists
   g. Optometrists
2. Be in a hospital-sponsored location as an approved place of service:
   a. Inpatient hospital
   b. Outpatient hospital
   c. Hospital-based clinic
   d. Hospital affiliated clinic

3. Be licensed by the State of Alabama, have an Alabama Medicaid provider agreement and be employed

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

by or under contract with a non-state governmental entity, specifically a health care authority or a
wholly owned subsidiary thereof; and be a participant in the PRAIP. Participants that currently qualify are:

a. The Health Care Authority for Baptist Health an Affiliate of UAB Health System
b. The Health Group of Alabama, LLC, a wholly owned subsidiary of The Health Care
Authority of The City of Huntsville, Alabama
c. Houston County Health Care Authority D/B/A as Southeast Alabama Medical Center

The services listed below do not qualify under PRAIP:

a. Clinical diagnostic lab procedures
b. Technical component of radiology services
c. Services provided to dual eligibles
d. EPSDT
e. Injectables

For supplemental payment formula, see State Plan Attachment 4.19B.

28.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Section 7.1.1 - “Medical Necessity/Medically Necessary Care”, for general criteria on Medical Necessity/ Medically Necessary Care.

Physicians are expected to render medically necessary services to Medicaid patients in the same manner and under the same standards as for their private patients. Physicians are to bill the Alabama Medicaid Agency their usual and customary fee.

Office visits are limited to one per day, per recipient, per provider. For purposes of this limitation, a physician or physician of the same specialty and subspecialty from the same group practice are considered a single provider. Annual office visit benefit limits are 14 office visits per calendar year.

Medicaid will no longer require physicians enrolled in and providing services through a **residency** training program be assigned a pseudo Medicaid license number to be used on prescriptions written for Medicaid recipients. Effective for claims submitted on or after January 1, 2012, interns and non-licensed residents must use the NPI or license number of the teaching, admitting, or supervising physician.

Written medication prescriptions should have a typed or printed name of the prescriber on the prescription and the handwriting must be legible. Pharmacists **must have the physician’s license number** prior to billing for prescriptions. Pharmacies shall use the correct physician license number when submitting a pharmacy claim to Medicaid.

Supervising physicians may bill for services rendered to Medicaid recipients by residents enrolled in and providing services through (as part of) an approved residency training program. The following rules shall apply

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

to physicians supervising residents as part of an approved residency training program:

a. The supervising physician shall sign and date the admission history and physical progress notes written by the resident.

b. The supervising physician shall review all treatment plans and medication orders written by the resident.

c. The supervising physician shall be available by phone or pager.

d. The supervising physician shall designate another physician to supervise the resident in his/her absence.

e. The supervising physician shall not delegate a task to the resident when regulations specify that the physician perform it personally or when such delegation is prohibited by state law or the facility's policy.

Payments from Medicaid funds can be made only to physicians who provide the services; therefore, no reimbursement can be made to patients who may personally pay for the service rendered.

The physician agrees when billing Medicaid for a service that the physician will accept as payment in full, the amount paid by Medicaid for that service, plus any cost-sharing amount to be paid by the recipient, and that no additional charge will be made. Conditional collections from patients, made before Medicaid pays, which are to be refunded after Medicaid pays, are not permissible. The physician may bill the patient, in addition to the cost-sharing fee, for services rendered when benefit limitations are exhausted for the year or when the service is a Medicaid non-covered benefit. However, the provider (or their staff) must advise each patient prior to services being rendered when Medicaid payment will not be accepted, and the patient will be responsible for the bill. If a provider routinely accepts a Medicaid assignment, he or she may not bill Medicaid or the recipient for a service he or she did not provide, i.e., missed or canceled appointment.

A hospital-based physician who is a physician employed by and paid by a hospital may not bill Medicaid for services performed therein and for which the hospital is reimbursed. A hospital-based physician shall bill the Medicaid Program on a CMS-1500, Health Insurance Claim Form or assign their billing rights to the hospital, which shall bill the Medicaid Program on a CMS-1500 form. A hospital-based physician who is not a physician employed by and paid by a hospital shall bill Medicaid using a CMS-1500 claim form.

A physician enrolled in a residency training program and whose practice is limited to the institution in which that resident is placed shall not bill Medicaid for services performed therein for which the institution is reimbursed through the hospitals' cost reports. For tracking purposes, these physicians will be assigned pseudo Medicaid license numbers.

Hospital-based physicians are reimbursed under the same general system as is used in Medicare. Bills for services rendered are submitted as follows:

- All hospital-based physicians, including emergency room physicians, radiologists, and pathologists, will bill Medicaid on a CMS-1500 claim form, or assign their billing rights to the hospital, which shall bill Medicaid on a CMS-1500 claim form.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Physician services personally rendered for individual patients will be paid only on a reasonable charge basis (i.e., claims submitted under an individual NPI on a physician claim form). This includes services provided by a radiologist and/or pathologist.
- Reasonable charge services are: 1) personally furnished for a patient by a physician; 2) ordinarily require performance by a physician and; 3) contribute to the diagnosis or treatment of an individual patient.

Out-of-State Services

Alabama Medicaid will pay for services furnished in another state to the same extent it would pay for services furnished within its boundaries as long as the service is provided to an Alabama Medicaid recipient and any of four following conditions is met:

(a) Medical services are needed due to a medical emergency.
(b) Medical services are needed, and the recipient's health would be endangered if he were required to travel to his state of residence.
(c) The state determines, on the basis of medical advice, that the needed medical services, or necessary supplementary services, are more readily available in the other state.
(d) It is general practice for recipients in a particular locality to use medical resources in another state.

Out-of-state providers must follow the enrollment procedures of the Alabama Medicaid Agency. Please refer to Chapter 2 - Becoming a Medicaid Provider, for detailed information. All program policies apply regardless of where care is provided.

Medical care and services that require prior authorization for in-state providers will continue to require prior authorization for out-of-state providers.

The following is required prior to submitting an out-of-state service request:

- The requested services are not available in-state, and
- The out-of-state provider is enrolled or willing to enroll as an Alabama Medicaid Provider, and
- The out-of-state provider is agreeable to Alabama Medicaid's per diem rate and provider fee schedules.

To request an out-of-state service, complete and submit an *Out-of-State Service Request* Form 382 by following the steps below:

(a) Locate the Out-of-State Service Request Form 382 under the "Programs" tab on Alabama Medicaid's website. Refer to instructions 382-A for further guidance. Form 382 is to be completed by the in-state referring provider.
(b) Obtain the out-of-state provider's Alabama Medicaid ID number. See Chapter 2 – Becoming a Medicaid Provider for further information.
(c) Attach the following medical documentation outlined in part IX of Form 382:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Letter of Medical Necessity supporting the need for out-of-state service along with documentation ensuring all local and state resources have been exhausted.
- Consult note from University of Alabama at Birmingham, University of South Alabama, or Children's of Alabama detailing evaluation and professional treatment plan recommendation.
- Any relevant medical, surgical, and/or consultation notes, lab/radiology results, pathology reports, and/or recent hospital History and Physical (H&P) and discharge summary
- Detailed care plan from the out-of-state provider.

(d) Please ensure that all sections of Form 382 are filled in completely and accurately. Incomplete submissions will be returned to the requestor for completion.

Submit Form 382 along with all supporting documentation via encrypted email to: out-of-state-request@medicaid.alabama.gov The program manager will review your submission and communicate with you regarding next steps.

Off-site Mobile Physician Services

Off Site Mobile Physician's Services shall comply with all Medicaid rules and regulations as set forth in the State Plan, Alabama Medicaid Administrative Code, and Code of Federal Regulations including but not limited to the following requirements:

(a) Shall provide ongoing, follow-up, and treatment and/or care for identified conditions,

(b) Shall provide ongoing access to care and services through the maintenance of a geographically accessible office with regular operating business hours within the practicing county or within 15 miles of the county in which the service was rendered,

(c) Shall provide continuity and coordination of care for Medicaid recipients through reporting and communication with the Primary Medical Provider,

(d) Shall maintain a collaborative effort between the off-site mobile physician and local physicians and community resources. A matrix of responsibility shall be developed between the parties and available upon enrollment as an off-site mobile physician,

(e) Shall provide for attainable provider and recipient medical record retrieval,

(f) Shall maintain written agreements for referrals, coordinate needed services, obtain prior authorizations and necessary written referrals for services prescribed. All medical conditions identified shall be referred and coordinated, for example:

(i) Eyeglasses,

(ii) Comprehensive Audiological services,

(iii) Comprehensive Opthalamological services,

(g) Shall not bill Medicaid for services which are offered to anyone for free. Provider shall utilize a Medicaid approved sliding fee scale based on Federal Poverty Guidelines,

(h) Shall ensure that medical record documentation supports the billing of Medicaid services, and

(i) Shall obtain signed and informed consent prior to treatment.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

If a provider routinely accepts Medicaid assignments, he/she may not bill Medicaid or the recipient for a service he/she did not provide, i.e., "no call" or “no show”.

Locum Tenens and Substitute Physician Under Reciprocal Billing Arrangements

It is common practice for physicians to retain substitute physicians to take over their professional practices when the regular physicians are absent for reasons such as illness, pregnancy, vacation, or continuing medical education, and for the regular physician to bill and receive payment for the substitute physician’s services as though he/she performed them. The substitute physician generally has no practice of his/her own and moves from area to area as needed. The regular physician generally pays the substitute physician a fixed amount per diem, with the substitute physician having the status of an independent contractor rather than of an employee. The substitute physicians are generally called “locum tenens” physicians.

Reimbursement may be made to a physician submitting a claim for services furnished by another physician in the event there is a reciprocal arrangement. The regular physician shall identify the services as substitute physician services by entering HCPCS modifier **Q5** (Service Furnished by a Substitute Physician under a Reciprocal Arrangement) or HCPCS modifier **Q6** (Service Furnished by a Locum Tenens Physician) after the procedure code. The reciprocal arrangement may not exceed 14 days in the case of an informal arrangement. Effective for claims submitted on or after June 15, 2012, the reciprocal arrangement may not exceed 60 continuous days in the case of an arrangement involving per diem or other fee-for-time compensation. Both providers participating in a reciprocal arrangement must be enrolled with the Alabama Medicaid Agency. The regular physician should keep a record on file of each service provided by the substitute physician and make this record available to Medicaid upon request. Claims will be subject to post-payment review. Please refer to section 28.6.3 Procedure Codes and Modifiers for information regarding modifiers Q5 and Q6.

Pharmacy Quantity Limitations and Controlled Substances

The pharmacist or prescriber must request an override when the prescription exceeds Medicaid’s maximum limit allowed per month. The prescriber should not write separate prescriptions, one to be paid by Medicaid and one to be paid as cash, to circumvent the override process. For further information on pharmacy quantity limitations and prescriptions for controlled substances, refer to Chapter 27, section 27.2.3 “Quantity Limitations”.

NOTE:

In accordance with Section 5042 of the SUPPORT Act, effective October 1, 2021, prescribers of Medicaid eligible recipients are required to check the Alabama PDMP (Prescription Drug Monitoring Program) prior to prescribing a Schedule II controlled substance. If the prescriber does not

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

check the PDMP, the prescriber is required to document the reason in the medical record. Exclusions to this requirement include prescriptions written for hospice patients, patients with an active cancer diagnosis, residents of a long term care nursing facility, and children under the age of 18(Schedule II prescriptions for ADHD only).

28.2.1 Physician-Employed Practitioner Services

Medicaid payment may be made for the professional services of the following physician-employed practitioners:

- Physician Assistants (PAs)
- Certified Registered Nurse Practitioners (CRNPs)

Nurse Practitioner is defined as a Registered Professional Nurse who is currently licensed to practice in the state, who meets the applicable State of Alabama requirements governing the qualifications of nurse practitioners.

Physician Assistant is a person who is a graduate of an approved program, is licensed by the Board of Medical Examiners (BME) of the State of Alabama, and is registered by the BME to perform medical services under the supervision of a physician approved by the BME to supervise the assistant.

All services requiring additional education and training beyond the scope of practice billed by a CRNP/PA must be documented in the approved collaborative agreement from the BME and the Alabama Board of Nursing (ABN) between the practitioner and physician. The only exception is for those "routine" services within the scope of practice approved by the applicable licensing and governing boards. Services billed outside a CRNP/PA scope of practice and/or collaborative agreement are subject to post-payment review.

Medicaid may make payment for services of PAs and CRNPs who are legally authorized to furnish services and who render the services under the supervision and collaboration of an employing physician with payment made to the employing physician. Medicaid will not make payment to the PA or CRNP. Generally, CRNPs and PAs are reimbursed at 80% of the allowed amount for all services except lab and injectables, which should pay at 100%.

The employing physician must be a Medicaid provider in active status. The employing physician need not be physically present with the PA or CRNP when the services are being rendered to the recipient; however, the physician must be immediately available to the PA or CRNP for direct communication by radio, telephone, or telecommunication. The PA's or CRNP's employing physician is responsible for the professional activities of the PA or CRNP and for assuring that the services provided are medically necessary and appropriate for the patient. There shall be no unsupervised practice by PAs or CRNPs.

The PA or CRNP **must enroll with the Alabama Medicaid Agency** with a valid NPI number and employing physician as the payee.

Covered services furnished by the PA or CRNP must be billed under the PA's or CRNP's name and NPI as the rendering provider.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The office visits performed by the PA or CRNP will count against the recipient's yearly benefit limitation.

The PA or CRNP may make physician-required visits to nursing facilities.

The PA or CRNP may not make physician-required inpatient visits to hospitals or other institutional settings to qualify for payment to the physician or to satisfy current regulations as physician visits.

Effective August 01, 2018, an initial prescription or order for home health services and certain medical supplies, equipment and appliances must be signed by a physician.

Refer to Chapter 14 – Durable Medical Equipment (DME), supplies, Appliances, Prosthetics, Orthotics and Pedorthics (POP) for more information on the requirements for the initial written prescription/order for certain medical supplies, equipment, and appliances.

Refer to Chapter 17 – Home Health for more information on the requirements for placing the initial written prescription/order for home health services.

Refer to Chapter 21 – Certified Registered Nurse Practitioner (CRNP) and Physician Assistant (PA) for additional information. Information regarding Independent CRNPs is also found in this chapter. For more specific information on coverage, you may call the Provider Assistance Center at 1-800-688-7989.

28.2.2 Covered Services

In general, Medicaid covers physician services if the services meet the following conditions:

- Considered medically necessary by the attending physician
- Designated by procedure codes in the Physicians' Current Procedural Terminology (CPT), or HCPCS. The table below contains details on selected covered services.

Consistent with the implementation of the mandated Medicaid NCCI edits effective November 9, 2010. Refer to this link, https://www.medicaid.gov/medicaid/program-integrity/national-correct-coding-initiative-medicaid/index.html for more information regarding NCCI.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Abdominoplasty	Medical necessity criteria must be met and Prior Authorization obtained, or the procedure will be considered cosmetic and will not be covered. See Chapter 4, Obtaining Prior Authorization.
Add-on Code	Add-on Code definition in the CPT is recognized and allowed for payment with the appropriate primary code.
Administration Fee	Please refer to Appendix H, Medicaid Physician Administered Drugs, section H.1 (Policy) for information regarding office visits, chemotherapy, and administration fees. When an Evaluation and Management service is provided *and* a Drug Administration code (96372, 96373, 96374, 96375, and 96376) is provided at the same time, the E&M code, Drug Administration Code, and the HCPCS Code for the drug may be billed. A **Significant Separately Identifiable Service** must be performed in conjunction with the Drug Administration code for consideration of payment for the E&M Code. A **Modifier 25** must be appended to the E&M service for recognition as a "**Significant Separately Identifiable Service".** Medical Record documentation must support the medical necessity of the visit as well as the level of care provided. However, when no **Significant Separately Identifiable** E&M service is actually provided at the time of a Drug Administration, an E&M code should not be billed. In this instance, the Drug Administration Code and the HCPCS Code for the drug may be billed. An example of this is routine monthly injections like B-12, iron, or Depo-Provera given on a regular basis without a **Significant Separately Identifiable** E&M service being provided. These services will be subject to post payment review. Please refer to Appendix A, Well Child Check-Up, Section A.6.1 (Fees) for information regarding the use of designated VFC codes for billing immunization administration fee(s).
Allergy Treatments	Please refer to Appendix H, Medicaid Physician Administered Drugs for information.
Applied Behavior Analysis (ABA)Therapy	ABA therapy is covered. See Chapter 37 – Therapy.
Anesthesia	Anesthesia is covered. See Chapter 38, Anesthesiology.
Artificial Eyes	Artificial eyes must be prescribed by a physician. Refer to Chapter 15, Eye Care Services for specific coverage information.
Bariatric Procedures	Considered cosmetic unless specific medical criteria are met and with Prior Authorization. Bariatric surgical procedures are considered for Medicaid eligible recipients between 18 and 64 years of age, effective June 1, 2009. Bariatric surgery for recipients who are under 18 years old and who have one or more immediate life-threatening co-morbidities will be considered for authorization on a case-by-case basis by the Medical Director, effective March 1, 2014. See Chapter 4, Obtaining Prior Authorization.
Breathing or Inhalation Treatments	Breathing or inhalation treatments are a covered service. Any medication provided during a breathing treatment (e.g., Albuterol) is considered a component of the treatment charge. EXCEPTION: See Appendix H related to coverage of J2545 Pentamidine Isethionate.
Cardiac Catheterization	Cardiac Catheterization codes may be subject to the multiple procedure/surgery reductions.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Cerumen Removal	CPT code 69210 is a covered service. **Payment may be made for impacted cerumen** (when **ALL** of the following are met): 1) the service is the sole reason for the patient encounter, 2) the service is personally performed by the physician or non-physician practitioner (i.e. nurse practitioner, physician assistant), 3) the service is provided to a patient who is symptomatic, and 4) the documentation illustrates significant time and effort spent in performing the service. Effective January 1, 2014, CPT code 69210 is a unilateral procedure. Please refer to section 28.6.3 for billing of bilateral procedures. **Payment consideration may be made for both the procedure and the E&M services** if **ALL** of the following conditions exist: 1) The nature of the E&M visit is for something other than removal of impacted cerumen. 2) During an unrelated patient encounter (visit), a specific complaint or condition related to the ear(s) is either discovered by or brought to the attention of the physician/non-physician practitioner by the patient. 3) Otoscopic examination of the tympanic membrane is not possible due to a cerumen obstruction in the canal. 4) The removal of impacted cerumen requires the expertise of a physician or non-physician practitioner. 5) The procedure requires a significant amount of the physician'/non-physician practitioner's effort and time. 6) Documentation is present in the patient record to identify the above criteria have been met. **Limitations**: • Removal of impacted cerumen performed by someone other than the physician or non-physician practitioner is not billable. • Simple cerumen removal performed by the physician or office personnel (e.g., nurses, office technicians) is not medically necessary and therefore, not separately payable. • An E&M service and the removal of impacted cerumen are not separately payable when the sole reason for patient encounter is for the removal of impacted cerumen. • The patient is asymptomatic (e.g. denies pain, hearing loss, vertigo. etc.). • Visualization aids such as, but not necessarily limited to, binocular microscopy, are considered to be included in the reimbursement for 69210 and should not be billed separately. Most patients do not require medically necessary disimpaction of cerumen by a physician. Patients who require this service more often than 3-4 times per year would be unusual. **NOTE: CPT 69210 requires a prior authorization and is restricted to ages 0-20 in the outpatient hospital setting.
Chemotherapy Administration	When an Evaluation and Management service is provided *and* a Hydration, Therapeutic, Prophylactic, Diagnostic and Chemotherapy Administration code is provided at the same time, the E&M code, Drug Administration Code, and the HCPCS Code for the drug may be billed. A **Significant Separately Identifiable Service** must be performed in conjunction with these administration codes for consideration of payment for the Evaluation and Management Code. A **Modifier 25** must be appended to the E & M service for recognition as a **"Significant Separately Identifiable Service".** Procedure Code 99211 will not be allowed with a modifier 25 or when billed in conjunction with the above administration codes. Medical record documentation must support the medical necessity and level of care of the visit. These services are subject to post payment review.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

CT Scans	CT scans are covered as medically necessary. Effective for dates of service March 2, 2009, and thereafter, CT scans require prior authorization for coverage. See Chapter 4, Obtaining Prior Authorization, Chapter 19, Hospital and Chapter 22, Independent Radiology.
Chiropractors	Chiropractic services are covered only for QMB recipients and for services referred directly as a result of an EPSDT screening.
Chromosomal Studies	Refer to Chapter 24: Maternity Care for further information.
Circumcision	Circumcision of newborns is a covered service. If medically necessary, non-newborn circumcision is covered. These services will be subject to post payment review.
Dental Varnishing	Refer to Chapter 13, Dentist for specific coverage information.
Developmental Testing Intensive Level (Multi-disciplinary Team only)	Refer to Appendix A, Well Child Check-Up (EPSDT) for specific coverage information.
Diet Instruction	Diet instruction performed by a physician is considered part of a routine visit.
Drugs	Refer to Appendix H, Physician Drug List for coverage information.
Endovenous **Laser** Ablation of Varicose Veins, Endoluminal **Radiofrequency** Ablation of Saphenous Varicose Veins, Sclerotherapy, and Ambulatory phlebectomy	The following procedure codes require prior authorization before services are rendered to a recipient: 1. Procedure codes**36478** (Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, **laser**; first vein treated) and **Add on** code **36479** (second and subsequent veins treated in a single extremity, each through separate access sites) should only be billed along with the primary code (36478). 2. Procedure codes **36475** (Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, **radiofrequency**; first vein treated, and **Add on** code **36476** (second and subsequent veins treated in a single extremity, each through separate access sites) should only be billed along with the primary code (36475). 3. **Effective 1/1/2013**, the following procedure codes will require prior authorization: **36470** (Injection of **sclerosing** solution; single vein), **36471** (multiple veins, same leg), **37765** (Stab **phlebectomy** of varicose veins, 1 extremity; 10-20 stab incisions), and **37766** (more than 20 incisions). ** **These procedures are not covered for cosmetic purposes.**
Eustachian Tube Inflation	Effective 8/25/2008, only physicians with specialties of EENT and Otorhinolaryngology may bill eustachian tube inflation, transnasal; with catherization (69400), without catheterization (69401).
Examinations	Physician visits for examinations are counted as part of each recipient's benefit limit of 14 physician visits per year. Exception: Certified Emergencies. Office visits are limited to one per day, per recipient, per provider. For purposes of this limitation, a physician or physician of the same specialty and subspecialty from the same group practice are considered a single provider. Annual routine physical examinations are not covered except through EPSDT. Refer to Appendix A, EPSDT, for details. Medical examinations for such reasons as insurance policy qualifications are not covered. Physical examinations for establishment of total and permanent disability status if considered medically necessary are covered. Medicaid requires a physician's visit once every 60 days for patients in a nursing facility. Patients in intermediate care facilities for the individuals with intellectual disabilities must receive a complete physical examination at least annually.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Eyecare	Eye examinations by physicians are a Medicaid covered service. Physician visits for eye care disease are counted as part of each recipient's benefit limit of 14 physician visits per year.
Foot Devices	See Chapter 14, Durable Medical Equipment (DME), for details
Gastric bypass	Covered with prior authorization approval when specific medical criteria are met. See Chapter 4, Obtaining Prior Authorization.
Hearing Aids	See Chapter 10, Audiology/Hearing Services, for details.
Hyperbaric Oxygen Therapy	Topically applied oxygen is not hyperbaric and is not covered. HBO therapy should not be a replacement for other standard successful therapeutic measure. Medical necessity for the use of hyperbaric oxygen for more than two months must be prior approved. (Chapter 4, Obtaining Prior Authorization). Refer to Chapter 19 Hospital, under Outpatient Hyperbaric Oxygen Therapy (HBO) for specific coverage information.
Hyperalimention Parental TPN IDPN IPN	Please refer to Section 28.2.9 for documentation requirements for parental, TPN, IDPN, and IPN nutrition.
Immunizations	Refer to Appendix A, EPSDT, for information regarding the Vaccines For Children (VFC) Program. Payment for immunizations against communicable diseases for adults will be made if the physician normally charges his patients for this service. Refer to Appendix H, Alabama Medicaid Physician Administered Drugs for coverage information.
Infant Resuscitation	Newborn resuscitation (procedure code 99465 on/after 01/01/09) is a covered service when the baby's condition is life threatening and immediate resuscitation is necessary to restore and maintain life functions. Intubation, endotracheal, emergency procedure (procedure code 31500) cannot be billed in conjunction with newborn resuscitation.
Long Acting Reversible Contraception (LARC)	Effective for dates of service April 1, 2014, and thereafter, Alabama Medicaid will cover long acting birth control in the inpatient hospital setting after a delivery for postpartum women or in an outpatient setting after discharge from the inpatient hospital. Refer to Chapter 19, Hospital for additional information.
Mammography Diagnostic	Refer to Chapter 22, Independent Radiology for coverage information.
Mammography Screening	Refer to Chapter 22: Independent Radiology for coverage information.
Medical Materials and Supplies	Costs for medical materials and supplies normally utilized during office visits or surgical procedures are to be considered part of the total fee for procedures performed by the physician and therefore are not generally a separately billable service.
Medical Necessity	The Alabama Medicaid Agency is mandated to only reimburse for services, procedures, and surgeries that are medically necessary. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider for general criteria on Medical Necessity/ Medically Necessary Care. Medical necessity must be clearly documented in the recipient's medical record with supporting documentation such as: Laboratory test results, diagnostic test results, history (past attempts of management if applicable), signs and symptoms, etc. All Medicaid services are subject to retrospective review for medical necessity. EXAMPLE: Endometrial Ablation is covered by Medicaid when it is considered medically necessary and should not be performed when an alternative outcome is intended such as cessation of menses.
Nerve Conduction Studies and Electromyography	Refer to Chapter 22, Independent Radiology for coverage information.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Newborn Claims	Five kinds of newborn care performed by physicians in the days after the child's birth when the mother is still in the hospital may be filed under the mother's name and number or the baby's name and number: When billing under the mother's Medicaid number, use diagnosis codes **V200 – V202 for ICD-9 or Z76.1-Z76.2 and Z00.129 for ICD-10 only, for normal newborn care. These diagnosis codes must be used on the claim form for consideration of payment.** 1. Routine newborn care (99460 on/after 01/01/09, 99462 on/after 01/01/09, and discharge codes 99238 or 99239). 2. Circumcision (54150 or 54160) Please note that the billing of PC 64450 is not allowed along with PC 54150 (which includes the nerve block in the description). 3. Newborn resuscitation (99465). 4. Standby services following a cesarean section or a high-risk vaginal delivery (99360). 5. Attendance at delivery (when requested by delivering physician) and initial stabilization of newborn (99464). Standby services (procedure code 99360) are covered only when the pediatrician, family practitioner, neonatologist, general practitioner, or non-delivering OB/GYN is on standby in the operating or delivery room during a cesarean section or a high-risk vaginal delivery. Attendance of the standby physician in the hospital operating or delivery room must be documented in the operating or delivery report. Use CPT codes when filing claims for these five kinds of care. If these services are billed under the mother's name and number and the infant(s) are twins, indicate Twin A or Twin B in Block 19 of the claim form. Any care other than routine newborn care for a well-baby, before and after the mother leaves the hospital, must be billed under the child's name and number.
Newborn Hearing Screening	Inpatient newborn hearing screenings are considered an integral part of inpatient hospital services. Please refer to Chapter 19 for Outpatient Services. Limited hearing screen codes 92586 and 92587 (CPT 2002) may be billed in an outpatient setting provided: 1) an infant was discharged prior to receiving the inpatient hearing screen, or 2) an infant was born outside a hospital or birthing center. These codes are reimbursable for audiologists, pediatricians, otolaryngologists, and EENT. Comprehensive hearing screen codes 92585/92588/92558 may be billed for: 1) infants who fail the newborn hearing screening prior to discharge from the hospital, or 2) infants/children fail a hearing screening at any time following discharge. Comprehensive hearing screenings should be performed on infants by three months of age if they failed the newborn hearing screening prior to discharge. Code 92585 is reimbursable for otolaryngologists, audiologists, pediatricians, and EENT. Code 92588 is reimbursable for otolaryngologists, audiologists, pediatricians, EENT, and neurologists.
Obstetrical Services	Refer to Chapter 24: Maternity Care for further information.
Obstetrical Ultrasounds	Refer to Chapter 24: Maternity Care for further information.
Oxygen and Compressed Gas	A physician's fee for administering oxygen or other compressed gas is a covered service under the Medicaid program. Oxygen therapy is a covered service based on medical necessity and requires prior authorization. Please refer to Chapter 14, DME, for more information.
Podiatrist Service	Covered for QMB or EPSDT referred services only. See Chapter 29, Podiatrist, for more details.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Post-Surgical Visits	Routine post-surgical care in the hospital or office visits for conditions directly related to major surgical procedures are covered by the surgical fee. Post-surgical visits cannot be billed separately the day of, or up to 90 days after surgery. For conditions unrelated to the surgical procedure bill the appropriate (E&M) procedure code with a 24 modifier appended. The diagnosis must support use of the modifier 24.
Prosthetic Devices	Internal prosthetic devices (e.g., Smith Peterson Nail or pacemaker) are a covered benefit.
Psychiatric Services	Physician visits for psychiatric services are counted as part of each recipient's benefit limit of 14 physician visits per year. Psychiatric evaluation or testing are covered services under the Physicians' Program if services are rendered by a physician in person and are medically necessary. Psychiatric evaluations are limited to one per calendar year, per provider, per recipient. Psychotherapy visits are included in the office visit limit of 14 visits per calendar year. Effective January 1, 2013, the following psychotherapy Add-on codes may be billed in conjunction with Evaluation and Management codes billed by the psychiatrist: 90833, 90836, and 90838. Psychiatric services under the Physicians' Program are confined to use with psychiatric diagnosis (290-319 for ICD-9 and F0150-F99 for ICD-10 and must be performed by a physician. The "must be performed by a physician" does not apply for EPSDT-referred psychiatric services. Hospital visits are not covered when billed in conjunction with psychiatric therapy on the same day. For EPSDT-referred services rendered by psychologist, see Chapter 34 for details. Psychiatric day care is not a covered benefit under the Physicians' Program. **NOTE**: For billing purposes, psychiatrist services are not limited to what psychologist bills.
Radiation Treatment Management	Radiation treatment management services do not need to be furnished on consecutive days. Up to two units may be billed on the same date of service as long as there has been a separate break in therapy sessions.
Second Opinions	Physician visits for second opinions are counted as part of each recipient's benefit limit of 14 physician visits per year. Optional Surgery: Second opinions (regarding non-emergency surgery) are highly recommended in the Medicaid program when the recipients request them. Diagnostic Services: Payment may be made for covered diagnostic services deemed necessary by the second physician.
Self-inflicted injuries	Self-inflicted injuries are covered.
Sleep Studies	Covered when billed through the enrolled physician's NPI or Outpatient hospital NPI. Medicaid does not enroll sleep study clinics. Unattended sleep studies (95806) are not covered by Medicaid. Please refer to Chapter 19, Hospital, for additional limitations.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Spinal Facet-Joint Interventions	Effective for dates of service on or after May 1, 2024, spinal facet-joint intervention procedure codes CPT 64490-64495 and CPT 64633-64636 will require PA prior to services rendered. Diagnostic Facet-Joint Injection procedures codes CPT 64490, 64491, 64493, & 64494 will be limited to one spinal region (e.g., cervical/thoracic, or lumbar/sacral) per session, with a maximum of two joints per session. In total, each covered spinal region is allowed four sessions per calendar year. Therapeutic Facet-Joint Injection procedure codes CPT 64492 & 64495 are non-covered and describe a third and additional level. Therapeutic Facet-Joint injections are medically necessary only if a recipient is not a candidate for denervation and utilize the same restrictions as diagnostic injections. Facet-Joint Denervation procedure codes CPT 64633, 64634, 64635, & 64636 will be limited to one spinal region (e.g., cervical/thoracic, or lumbar/sacral) per session, with a maximum of four joints per session. In total, each covered spinal region is allowed two sessions per calendar year. All the following requirements must be met for medical necessity to be determined for diagnostic injections: 1) ≥ 3 months of documented back or neck pain that interferes with the recipients 'activities of daily living (ADLs). 2) ≥ 6 weeks of conservative therapy (e.g., physical therapy, home exercise program, activity modification) with documented failure of pain to respond to treatments. 3) ≥ 3 weeks NSAID therapy or NSAID is contraindicated or was not tolerated. 4) Clinical findings suggestive of facet joint syndrome as evidenced by the absence of nerve root compression. 5) Imaging studies suggestive of no other cause for the pain (e.g., disc herniation, radiculitis, discogenic or sacroiliac pain). 6) No prior spinal fusion surgery in the vertebral level being treated. 7) A facet joint denervation intervention is being considered. All the following requirements must be met for medical necessity to be determined for denervation: 1) The recipient has had up to two medically reasonable and necessary diagnostic facet joint injections with each one providing a consistent minimum of 80% pain relief. 2) ≥ 3 months of documented back or neck pain that interferes with the recipients' ADLs. 3) ≥ 6 weeks of conservative therapy (e.g., physical therapy, home exercise program, activity modification) with documented failure of pain to respond to treatments. 4) ≥ 3 weeks NSAID therapy or NSAID is contraindicated or was not tolerated. 5) Clinical findings suggestive of facet joint syndrome and imaging studies suggestive of no other cause for the pain (e.g., fracture, tumor, infection, disc herniation, radiculitis, discogenic or sacroiliac pain, etc.). No prior spinal fusion surgery in the vertebral level being treated.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Surgery	Cosmetic surgery is covered only when prior approved for medical necessity. Examples of medical necessity include prompt repair of accidental injuries or improvement of the functioning of a malformed body member. Elective surgery is covered when medically necessary. **Multiple surgeries are governed by the following rules:** When multiple or bilateral surgical procedures that add significant time or complexity are performed at the same operative session, Medicaid pays for the procedure with the highest allowed amount and half of the allowed amount for each subsequent procedure. This also applies to laser surgical procedures. Additional payments will **not** be made for procedures considered to be mutually exclusive or incidental. Mutually Exclusive procedures are services that cannot reasonably be performed at the same anatomic site or same patient encounter. Certain procedures are commonly carried out as integral parts of a total service and as such do not warrant a separate charge. When incidental procedures (e.g., excision of a previous scar or puncture of an ovarian cyst) are performed during the same operative session, Medicaid reimburses for the major procedure only. CPT defined Add-on codes are considered for coverage when billed with the appropriate primary procedure code. Add-on codes are not subject to rule of 50 percent reduction. Any dressing/compression wrap performed in conjunction with wound debridement is considered part of the debridement services and is not separately covered/billable. Laparotomy is covered when it is the only surgical procedure performed during the operative session or when performed with an unrelated or incidental surgical procedure. Surgeons performing laparoscopic procedures on recipients where a laparoscopic procedure code (PC) has not been established should bill the most descriptive PC with modifier 22 (unusual procedural services) until the new PC is established. Unlisted CPT codes require prior authorization **before** services are rendered. Whenever unusual procedures are performed and there is no exact descriptive CPT code, the Alabama Medicaid Agency requires the most appropriate CPT code be utilized with a modifier 22. Procedure Code 69990 Operating Microscope may be paid separately only when submitted with the following CPT codes: 61304-61546, 61550-61619, 61624-61626, 61640-61711, 62010-62100, 63081-63308, 63704-63710, 64831, 64834-64836, 64840-64858, 64861-64870, 64885-64898, 64905-64907. Certain relatively small surgical procedure codes designated as “zero” global days may be billed in addition to an office visit. Additionally, these codes do not carry the global surgical package concept of inclusion of post-operative care. It is necessary to append the appropriate anatomical modifiers to surgical codes to differentiate between multiple surgeries and sites. Please refer to Section 28.6.3 Procedure Codes and Modifiers. Modifier 57 (Decision for Surgery), is not billable on the same day of surgery. NOTE: Surgeons are responsible for digital submission of consent forms and supporting documentation for hysterectomy and sterilization consent forms. Please refer to Section 28.6.7 of this chapter.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Surgery, Breast Reconstruction	Breast reconstruction surgery is reimbursable following a medically necessary mastectomy when performed for the removal of cancer. Breast reconstruction will also be allowed on the non-cancerous contra lateral breast for the purpose of symmetry. Medicaid does **not** reimburse for reconstruction after a prophylactic mastectomy unless evidence of breast cancer is documented in the medical record. All reconstructive procedures require prior authorization. The term "reconstruction" shall include augmentation mammoplasty, reduction mammoplasty, and mastoplexy. Breast reconstruction surgeries are governed by the following rules: • The reconstruction follows a medically necessary mastectomy for the removal of cancer. A pathology report is required. • The recipient is eligible for Medicaid on the date of reconstruction surgery • The recipient elects reconstruction within two years of the mastectomy surgery date • Documentation of therapy completion (chemotherapy and/or radiation treatment), and Operative Report of mastectomy if reconstructive procedure is performed after mastectomy on a different date. If reconstructive procedures are to be performed on the same date as the mastectomy, the physician must send certification that radiation therapy is not planned based on current staging or treatment plan, or must document therapy completion. • For more information regarding prior authorization, please refer to Chapter 4 Obtaining Prior Authorization. For more information related to breast prosthesis, please refer to Chapter 14 Durable Medical Equipment.
Telemedicine	Refer to Chapter 112, Telemedicine Service, for coverage details.
Therapy	Physician visits for therapy are counted as part of each recipient's benefit limit of 14 physician visits per year. See Rule No. 560-X-6.14 for details about this benefit limit in the *Alabama Medicaid Agency Administrative Code,* Chapter 6. Physical Therapy is not covered when provided in a physician's office. Physical therapy is covered only when prescribed by a physician or non-physician practitioner and provided in a hospital setting. Refer to Chapter 19, Hospital, for more information. For all physical therapy services performed as a result of an EPSDT screening refer to Chapter 37, Therapy, for policy only. Group Therapy is a covered service when a psychiatric diagnosis is present and the therapy is prescribed, performed, and billed by the physician personally. Group Therapy is not covered when performed by a caseworker, social services worker, mental health worker, or any counseling professional other than physician. Group Therapy is included in the physician visit limit of 14 visits per year. Speech Therapy for a speech related diagnosis, such as stroke (CVA) or partial laryngectomy, is a covered benefit when prescribed by and performed by a physician in his office. Speech therapy performed in an inpatient or outpatient hospital setting or in a nursing facility is a covered benefit, but is considered covered as part of the reimbursement made to the facility and should not be billed by the physician. Family Therapy is a covered service when a psychiatric diagnosis is present and the physician providing the service supplies documentation that justifies the medical necessity of the therapy for each family member. Family therapy is not covered unless the patient is present. Family Therapy is not covered when performed by a caseworker, social service worker, mental health worker, or any counseling professional other than a physician. Family Therapy is included in the physician visit limit of 14 visits per year.
Transplants	See Chapter 19, Hospitals, for transplant coverage.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Ventilation Study	Ventilation study is covered if done in physician's office by the physician or under the physician's direct supervision. Documentation in the medical record must contain all of the following: • Graphic record • Total and timed vital capacity • Maximum breathing capacity Always indicate if the studies were performed with or without a bronchodilator.
Newborn Care Services	Well baby coverage is covered only on the initial visit, which must be provided within 8 weeks of birth. When the well-baby checkup is done, the physician should bill procedure code 99461. Diagnosis codes V20.2, V20.31 and V20.32 for ICD-9 and Z00.129. Z00.110 and Z00.111 for ICD-10 are acceptable to bill for routine newborn care/well baby checkup. Only one well-baby checkup can be paid per lifetime, per recipient. Refer to Appendix A, EPSDT, for information on additional preventive services.

NOTE:
For newborn hospital discharge services performed on a subsequent admission date, use code 99238. Please use code 99463 when filing claims for newborns assessed and discharged from the hospital or birthing room on the same date.

Coding Exceptions

Specific codes sets in an audit were identified with an explanation as to why they should be removed or modified in the audit process. Medicaid agrees these codes sets can be billed together as an exception to NCCI and/or CPT policy. As indicated, the multiple surgery rule will be applied.

Code Sets									***Multiple Surgery***
Procedure code 64450 is allowed with code 54160.									Yes
Tympanostomy 69436 – codes below									Yes
Allowed with 69436		21030	30545	31238	31511	31615	40819	42720	42831

All rights reserved. Applicable FARS/DFARS apply.

28.2.3 Non-covered Services

Service	*Coverage and Conditions*
Acupuncture	Acupuncture is not covered.
After Office Hours	The following services are not covered: After office hours, services provided in a location other than the physician's office, and office services provided on an emergency basis.
Autopsies	Autopsies are not covered.
Bariatric Procedures	Considered cosmetic unless specific medical criteria are met
Biofeedback	Biofeedback is not covered.
Blood Tests	Blood tests are not covered for marriage licenses.
Casting and Supplies	Some surgical codes are considered an inclusive package of professional services and/or supplies and are not considered separately allowable or reimbursable as the fracture repair or surgical codes is inclusive of these services. An example of this would be a surgical code for a fracture repair which is inclusive of any casting and strapping services or supplies.
Cerumen Removal	CPT Code 69210 is not covered if the ear wax is not impacted and the service does not meet the criteria outlined in section 28.2.2, Covered Services.
Chiropractors	Chiropractic services are not covered, except for QMB recipients and for services referred directly as a result of an EPSDT screening.
Chromosomal Studies	Refer to Chapter 24: Maternity Care for further information.
Dressing and Compression Wrap	Any dressing/compression wrap performed in conjunction with wound debridement is considered part of the debridement services and is not separately covered / billable.
Experimental Treatment or Surgery	Experimental treatment or surgery is not covered.
Filing Fees	Filing Fees are not covered.
Hypnosis	Hypnosis is not covered.
Laetrile Therapy	Laetrile therapy is not covered.
Mutually Exclusive Procedures	Mutually exclusive procedures are those codes that cannot reasonably be done in the same session and are considered not separately allowable or reimbursable. For example, a vaginal and abdominal hysterectomy on the same date of service.
Oxygen and Compressed Gas	Oxygen therapy is a covered service based on medical necessity and requires prior authorization. Please refer to Chapter 14, DME, for more information.
Pulse Oximetry	Effective January 1, 2009, Non-invasive ear or pulse oximetry services (procedure codes 94760-94762) will no longer be considered separately billable/payable by Medicaid for physician and outpatient services. These procedure codes, per policy dated July 2006, are considered bundled services which are included in Evaluation and Management codes for both physician and outpatient services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Service	***Coverage and Conditions***
Surgery	When multiple and/or bilateral procedures are billed in conjunction with one another and meet the CPTs definition of "Format of Terminology" (bundled or subset) and/or comprehensive/component (bundled) codes, then the procedure with the highest allowed amount will be paid while the procedure with the lesser amount will not be considered for payment as the procedure is considered an integral part of the covered service. Please refer to Section 28.6.3 Procedure Codes and Modifiers. Incidental surgical procedures are defined as those codes that are commonly carried out as integral parts of a total service and as such do not warrant a separate charge. An example of this would be lysis of adhesions during the same session as an abdominal surgery. Refer to this link, https://www.medicaid.gov/medicaid/program-integrity/national-correct-coding-initiative-medicaid/index.html for more information regarding NCCI.
Post-Surgical Visits	Post-surgical hospital or office visits for conditions directly related to major surgical procedures are covered by the surgical fee. Surgical visits cannot be billed separately the day of surgery or up to 90 days after surgery. Visits by Assistant Surgeon or Surgeons are not covered.
Preventive Medicine	Medicaid does not cover preventive medicine other than those specified elsewhere, including but not limited to, EPSDT screening.
Syntocin	Syntocin is not covered.
Telephone Consultations	Telephone consultations are not covered.
Therapy	Occupational and Recreational Therapies are not covered.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

28.2.4 Limitations on Services

Within each calendar year each recipient is limited to no more than a total of 14 physician visits in offices, hospital outpatient settings, nursing facilities, rural health clinics or Federally Qualified Health Centers.

- Visits not counted under this benefit limit will include (but not limited to): EPSDT, prenatal care, postnatal care, and family planning.
- Recipients receiving cancer treatment during the calendar year are eligible for additional annual physician office visits (*see Cancer Treatment Visits section below).
- Physicians services provided in a hospital outpatient setting that have been certified as an emergency do not count against the physician benefit limit of 14 per calendar year.
- If a patient receives ancillary services in a doctor's office, by the physician or under his/her direct supervision, and the doctor submits a claim only for the ancillary services but not for the office visit, then the services provided will not be counted as a visit.

Office visits are limited to one per day per recipient per provider. For purposes of this limitation, a physician or physician of the same specialty and subspecialty from the same group practice are considered a single provider. Annual office visit benefit limits are 14 office visits per calendar year, although each limit can be exceeded based upon medical necessity.

NOTE:

Medicaid will continue to pay covered ancillary services (injections, lab, x-rays etc.…) for recipients after they have exhausted the 14 physician office visit limitation.

Claims for physician's visits which deny due to the recipient exceeding their 14 annual physician office visit limit require manual review and override. The physician must request a redetermination from Gainwell as outlined in Chapter 7, Section 7.2.2. When the redetermination request results in a denial by Gainwell, the provider may request an Administrative Review of the claim as long as the claim is within the timely filing limit by submitting the following along with the claim:

- Copy of previous redetermination correspondence sent to Gainwell
- Copies of all relevant remittances advices or redetermination denial notification
- Completed Medical Utilization Administrative Review Form 402
- An original signed clean Red Drop Ink CMS Form 1500.
- Documentation of medical necessity
- Supporting medical documentation (Op notes, Medical records, supportive reports, etc.)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Send all required documents to the following address:

Alabama Medicaid Agency
Attn: Physician Division
P.O. Box 5624
Montgomery, AL 36103-5624

For more information regarding the Administrative Review process, refer to Chapter 7, Section 7.2.2, Claims Denials and the Appeals Process.

For further information regarding outpatient maintenance dialysis and ESRD, refer to Chapter 35, Renal Dialysis Facility.

A new patient office visit codes shall not be paid to the same physician or same group practice for a recipient more than once in a three-year period.

Cancer Treatment Visits

Effective January 1, 2023, Alabama Medicaid will increase the annual physician office visit maximum to 32 for Medicaid recipients receiving cancer treatment during the calendar year (January -- December). This increase will be available for each calendar year in which the recipient is receiving cancer treatment and is applicable for all cancers.

To qualify for this increase in annual physician office visits:

1. The claim must include one of the following informational procedure codes to identify the treatment stage:
   - 3300F: American Joint Committee on Cancer (AJCC) state documented and reviewed (ONC)
   - 3301F: Cancer stage documented in medical record as metastatic and reviewed (ONC)
   - S0353: Treatment planning and care coordination management for cancer initial treatment
   - S0354: Treatment planning and care coordination management for cancer established patient with a change in regimen

(Failure to provide one of the required informational procedure codes will cause the recipient to not be eligible for the 32 visits.)

2. A cancer diagnosis, within the current calendar year, must be in the recipient's claims history.

Additionally, medical documentation to support the diagnosis and treatment(s) must be maintained in the recipient's record and provided to the Agency, upon request, in the event of audit.

Prolonged Services Direct Patient Contact in Office or Other Outpatient Setting and Hospital Setting

Effective January 1, 2023, the procedure codes for prolonged services have changed. Procedure code G2212 will be used for the office or other outpatient setting, and procedure code G0316 will be used for the hospital setting.

- **Documentation Requirement**: When prolonged time occurs, the appropriate prolonged services code may be reported. The total time

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

on the date of the encounter spent caring for the patient should be documented in the medical record when it is used as the basis for code selection. Time must be documented clearly in the medical record to indicate the beginning of service time and the end of service time to justify these codes being billed in addition to the office visit.

1. Physician or other qualified health care professional time includes the following activities, when performed:
   - preparing to see the patient (e.g., review of tests)
   - obtaining and/or reviewing separately obtained history
   - performing a medically appropriate examination and/or evaluation
   - counseling and educating the patient/family/caregiver
   - ordering medications, tests, or procedures
   - referring and communicating with other health care professionals (when not separately reported)
   - documenting clinical information in the electronic or other health record
   - independently interpreting results (not separately reported) and communicating results to the patient/family/caregiver
   - care coordination (not separately reported)
2. Do not count time spent on the following:
   - the performance of other services that are reported separately
   - travel
   - teaching that is general and not limited to discussion that is required for the management of a specific patient

- When filing claims, procedure codes G2212 or G0316 are assigned only when the code for the primary E&M service has been selected based solely on total time, and only after exceeding by 15 minutes the maximum time that is required to report the highest-level service. For example, when reporting an established patient encounter (99215), code G2212 would not be reported until at least 15 minutes of time beyond 54 minutes has been accumulated (i.e., 69 minutes) on the day of the encounter. **Do not report G2212 or G0316 for any time unit less than 15 minutes. The maximum allowed billable units is 4 at 15 minute intervals.**

  1. G2212 and G0316 must be billed in conjunction with companion procedure codes:
     - G2212 must be filed with 99205 or 99215 for office or other outpatient E&M services.
     - G0316 must be filed with 99223, 99233, or 99236 for hospital inpatient or observation care E&M services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

2. These services will be subject to post-payment review.

28.2.5 Physician Services to Hospital Inpatients

In addition to the 14 physician visits, Medicaid covers up to 16 inpatient dates of service per physician, per recipient, per calendar year. For purposes of this limitation, each specialty within a group or partnership is considered a single provider. Physician visits are limited to one per day.

When filing claims for recipients enrolled in the ACHN Program, refer to Chapter 40.

Physician hospital visits are limited to one visit per day, per recipient, per provider.

Physician(s) may bill for inpatient professional interpretation(s), when that interpretation serves as the official and final report documented in the patient's medical record. Professional interpretation may be billed in addition to a hospital visit if the rounding physician also is responsible for the documentation of the final report for the procedure in the patient's medical record. The procedure code must be billed with modifier **26** (Professional Component) and modifier **CG** (Policy criteria applied) appended.

Physician(s) may **not** bill for inpatient professional interpretation(s) in addition to hospital visits if the provider reviews results in the medical record or unofficially interprets medical, laboratory, or radiology tests. Review and interpretation of such tests and results are included in the evaluation and management of the inpatient. Medicaid will cover either one hospital visit or professional interpretation(s) up to the allowed benefit limit for most services.

- Echocardiography (i.e., M-mode, transthoracic, complete and follow up)
- Echocardiography (i.e., 2D, transesophageal)
- Echocardiography (i.e., Doppler pulsed or continuous wave with spectral display, complete and follow up)
- Cardiac Catheterizations
- Comprehensive electrophysiologic evaluations and follow up testing
- Programmed stimulation and pacing
- Intra-operative epicardial and endocardial pacing and mapping
- Intracardiac catheter ablations; intracardiac echocardiography
- Evaluation of cardiovascular function
- Plethysmography, total body and tracing
- Ambulatory blood pressure monitoring
- Cerebrovascular arterial studies, extremity arterial studies, venous studies, and visceral and penile studies
- Circardian respiratory pattern recording (i.e., pediatric pneumogram), infant

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Needle electromyography
- Ischemic limb exercise test
- Assessment of aphasia
- Developmental testing
- Neurobehavioral status exam and neuropsychological testing battery

Professional interpretations for lab and x-ray (CPT code 70000 through 80000 services) in the inpatient setting can only be billed by pathologists and radiologists. The only exception is for professional interpretations by cardiologists for catheterization or arterial studies and for select laboratory procedures by oncologists and hematologists. Professional interpretations/components done by other physicians for services in this procedure code range are included in the hospital visit if one is done. If no hospital visit is made, professional interpretation by physicians other than radiologists, pathologists, oncologists, hematologists, and cardiologists should not be billed as these services are covered only for the above-mentioned specialties.

A physician hospital visit and hospital discharge shall not be paid to the same physician on the same day. If both are billed, only the discharge shall be paid.

Professional interpretations performed for an inpatient are counted by dates of service rather than the number of interpretation performed.

An office visit shall not be paid to the same provider or other physicians in the same group practice with the same specialty and subspecialty on the same day as an inpatient visit. If both are billed, then the **first** Procedure Code billed will be paid.

Physician consults are limited to one per day per recipient.

28.2.6 Critical Care (99291 & 99292)

When caring for a critically ill patient, for whom the constant attention of the physician is required, the appropriate critical care procedure code (99291 and 99292) must be billed. Critical care guidelines are defined in the Current Procedural Terminology (CPT) and Provider Manual. Critical care is considered a daily global inclusive of all services directly related to critical care.

Coverage of critical care may total no more than four hours per day.

The actual time period spent in attendance at the patient's bedside or performing duties specifically related to that patient, irrespective of breaks in attendance, must be documented in the patient's medical record.

RESTRICTIONS:

No individual procedures related to critical care may be billed in addition to procedure codes 99291 and 99292, except:

- An EPSDT screening may be billed in lieu of the initial hospital care (P/C 99221, 99222, or 99223). If screening is billed, the initial hospital care cannot be billed.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Procedure code 99082 (transportation or escort of patient) may also be billed with critical care (99291 and/or 99292 for recipients 25 months of age and older or 99466 and/or 99467 for recipients 24 months of age or less). Only the attending physician may bill this service and critical care. Residents or nurses who escort a patient may not bill either service.

LIMITATIONS:

PROCEDURE CODES NOT BILLABLE IN ADDITION TO CRITICAL CARE (99291 & 99292):

FROM	TO	FROM	TO	FROM	TO	FROM	TO
31500	31500	43752	43757	92265	92275	95925	95937
36000	36440	51100	51100	92280	92287	99090	99091
36468	36479	51701	51702	92920	93299	99170	99199
36510	36510	62270	62270	93303	93352	99460	99463
36555	36555	71010	71020	93561	93562		
36591	36591	82800	82820	93668	93799		
36600	36680	91105	91105	93875	94799		

- Procedure codes 99291, 99292, 99466 and 99467 may be billed by the physician providing the care of the critically ill or injured patient in place of service 41, Ambulance, if care is personally rendered by the physician providing the care of the critically ill or injured patient.

28.2.7 Pediatric and Neonatal Critical Care

CPT Code	Description	Criteria
99468	Initial Inpatient Neonatal Critical Care, per day for the evaluation and management of a critically ill neonate, 28 days of age or less	Not valid for 29 days or older, can be billed by any physician provider type
99469	Subsequent Inpatient Neonatal Critical Care, per day for the evaluation and management of a critically ill neonate, 28 days of age or less	Not valid for ages 29 days or older, can be billed by any physician provider type
99471	Initial Inpatient Pediatric Critical Care, per day for the evaluation and management of a critically ill infant or young child, 29 days through 24 months of age	Not valid for 28 days or less, can be billed by any physician provider type
99472	Subsequent Inpatient Pediatric Critical Care per day, for the evaluation and management of a critically ill infant or young child, 29 days through 24 months of age	Not valid for ages 28 days or less, can be billed by any physician provider type

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

CPT Code	Description	Criteria
99475	Initial inpatient pediatric critical care, per day, for the evaluation and management of a critically ill infant or young child, 2 through 5 years of age	May be billed by any physician provider type for infant or child, 2 through 5 years of age
99476	Subsequent inpatient pediatric critical care, per day, for the evaluation and management of a critically ill infant or young child, 2 through 5 years of age	May be billed by any physician provider type for infant or child, 2 through 5 years of age

The pediatric and neonatal critical care codes (99468-99476) include management, monitoring and treatment of the patient, including respiratory, pharmacological control of the circulatory system, enteral and parenteral nutrition, metabolic and hematologic maintenance, parent/family counseling, case management services and personal direct supervision of the health care team in the performance of their daily activities.

The following criteria should be used as guidelines for the correct reporting of neonatal and pediatric critical care codes for the critically ill neonate/infant. Only one criterion is required to be classified as critically ill.

- Respiratory support by ventilator or CPAP
- Nitric oxide or ECMO
- Prostaglandin, Indotropin of Chronotropic or Insulin infusions
- NPO with IV fluids
- Acute Dialysis (renal or peritoneal)
- Weight less than 1,250 grams
- Acute respiratory distress in a pediatric admission requiring oxygen therapy with at least daily adjustment and FIO2>35% oxygen by oxyhood.

RESTRICTIONS:

No individual procedures related to critical care may be billed in addition to procedure codes 99468-99476 except:

- Chest tube placement
- Pericardiocentesis or thoracentesis
- Intracranial taps
- Initial hospital care history and physical screen may be billed in conjunction with 99468.

  NOTE: One EPSDT screen for the hospitalization will encompass all diagnoses identified during the hospital stay for referral purposes. The EPSDT screen is considered apart of 99468. Pediatric and neonatal providers should enroll as EPSDT and ESPDT Referred providers and document the referral in the medical record in order to file subsequent claims as EPSDT referred services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Standby (99360), resuscitation (99465), or attendance at delivery (99464) may be billed in addition to critical care. Only one of these codes may be billed in addition to neonatal intensive care critical care codes.

LIMITATIONS:

- Pediatric, neonatal critical care codes and intensive (non-critical) low birth weight service codes are reported once per day per recipient.
- Subsequent Hospital Care codes (99231-99233) cannot be billed on the same date of service as neonatal critical care codes (99468-99476)
- Only one unit of critical care can be billed per child per day in the same facility. Medicaid pays the first claim received and denies subsequent claims (first in, first out policy).
- Critical care is considered to be an evaluation and management service. Although usually furnished in a critical or intensive care unit, critical care may be provided in any inpatient health care setting. Services provided which do not meet critical care criteria, should be billed under the appropriate hospital care codes. If a recipient is readmitted to the NICU/ICU, the provider must be the primary physician in order for NICU critical care codes to be billed again.
- Once the patient is no longer considered by the attending physician to be critical, the Subsequent Hospital Care codes (99231-99233) should be billed. Only one unit can be billed per day per physician regardless of specialty. Medicaid pays the first claim received and denies subsequent claims (first in, first out policy).
- Transfers to the pediatric unit from the NICU cannot be billed using critical care codes. Subsequent hospital care would be billed in these instances.
- Global payments encompass all care and procedures that are included in the rate. Providers may not perform an EPSDT screen and refer to a partner or other physician to do procedures. All procedures that are included in the daily critical care rate, regardless of who performed them, are included in the global critical care code.
- Consultant care rendered to children for which the provider is not the primary attending physician must be billed using consultation codes. Appropriate procedures may be billed in addition to consultations. If, after the consultation the provider assumes total responsibility for care, critical care may be billed using the appropriate critical care codes as defined above. The medical record must clearly indicate that the provider is assuming total responsibility for care of the patient and is the primary attending physician for the patient.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

28.2.8 Initial and Continuing Observation or Intensive Care Services

CPT Code	Description	Criteria
99477	Initial hospital care, per day for the evaluation and management of the neonate, 28 days of age or younger, which requires intensive observation, frequent interventions, and other intensive care services.	May only be billed by a neonatologist
99478	Subsequent intensive care, per day, for the evaluation and management of the recovering very low birth weight infant (present body weight less than 1500 grams)	May only be billed by a neonatologist
99479	Subsequent intensive care, per day, for the evaluation and management of the recovering very low birth weight infant (present body weight of 1500-2500 grams)	May only be billed by a neonatologist
99480	Subsequent intensive care, per day, for the evaluation and management of the recovering infant (present body weight of 2501-5000 grams)	May only be billed by a neonatologist

These codes are used to report care subsequent to the day of admission provided by a neonatologist directing the continuing intensive care of the very low birth weight infant who no longer meets the definition of being critically ill. Low birth weight services are reported for neonates less than 2500 grams who do not meet the definition of critical care but continue to require intensive observation and frequent services and intervention only available in an intensive care setting. Services provided to these infants exceed those available in less intensive hospital areas of medical floors. These infants require intensive cardiac and respiratory monitoring, continuous and/or frequent vital signs monitoring, heat maintenance, enteral and/or parenteral nutritional adjustments, laboratory and oxygen monitoring and constant observation by the health care team under direct supervision.

Restrictions:

No individual procedures related to critical care may be billed in addition to procedure codes 99478-99480 except:

- Chest tube placement
- Pericardiocentesis or thoracentesis
- Intracranial taps

Limitations:

- Once the patient is no longer considered by the attending physician to be critical, the Subsequent Hospital Care codes (99231-99233) should be billed. Only one unit can be billed per day per physician regardless of specialty. Medicaid pays the first claim received and denies subsequent claims (first in, first out policy).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Global payments encompass all care and procedures that are included in the rate. Providers may not perform an EPSDT screen and refer to a partner or other physician to do procedures. All procedures that are included in the daily critical care rate, regardless of who performed them, are included in the global critical care code.
- Consultant care rendered to children for which the provider is not the primary attending physician must be billed using consultation codes. Appropriate procedures may be billed in addition to consultations. If, after the consultation the provider assumes total responsibility for care, critical care may be billed using the appropriate critical care codes as per the setting. The medical record must clearly indicate that the provider is assuming total responsibility for care of the patient and is the primary attending physician for the patient.
- Pediatric, neonatal critical care codes and intensive (non-critical) low birth weight services codes are only reported once per day per recipient.

PROCEDURE CODES NOT BILLABLE IN ADDITION TO INITIAL AND CONTINUING OBSERVATION OR INTENSIVE CARE SERVICES

FROM	TO	FROM	TO	FROM	TO	FROM	TO
31500	31579	62263	62368	94002	94004	99218	99220

53670	53675	93000	93352	99090	99091		

28.2.9 End-Stage Renal Disease (ESRD)

Physician services rendered to each outpatient maintenance dialysis patient provided during a full month shall be billed on a monthly capitation basis using the appropriate procedure code by age as outlined in the CPT. Monthly maintenance dialysis payment (i.e., uninterrupted maintenance dialysis) is comprehensive and covers most of a physician's services whether a patient dialyzes at home or in an approved ESRD outpatient facility. Dialysis procedures are allowed in addition to the monthly maintenance dialysis payment. In general, the Agency follows Medicare guidelines related to monthly capitation payments for physicians.

Physician services included in the monthly capitation payment for ESRD related services include, but are not limited to:

- Assessment and determination of the need for outpatient chronic dialysis therapy
- Assessment and determination of the type of dialysis access and dialyzing cycle,
- Management of the dialysis visits including outpatient visits for evaluation and management, management during the dialysis, and telephone calls.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Assessment and determination if a recipient meets preliminary criteria as a renal transplant candidate including discussions with family members
- Assessment for a specified diet and nutritional supplementation for the control of chronic renal failure, including specifying quantity of total protein, sodium, potassium, amount of fluids, types of anemia and appropriate treatments, type of arthropathy or neuropathy and appropriate treatment or referral, estimated ideal dry weight, etc. Assessment for diabetic patient's diet and caloric intake is included also.
- Prescribing the parameters of intradialytic management including anticoagulant, dialysis blood flow rates and temperature, duration and frequency of treatments, etc.

The monthly capitation payment is limited to once per month, per recipient, per provider.

The following services are not covered by the monthly capitation payment (MCP) for the attending dialysis physicians and are reimbursed in accordance with usual and customary charge rules:

- Declotting of shunts
- Covered physician services furnished to hospital inpatients by a physician who elects not to receive the MCP for these services. For example, an attending physician who provides evaluation and management (E & M) services for a renal patient in an inpatient setting may bill appropriate CPT hemodialysis procedures in lieu of certain other E & M services for inpatient visits.

Nonrenal related physician services furnished by the physician providing renal care or by another physician. (These services may not be incidental to services furnished during a dialysis session or office visit necessitated by the renal condition.) For example, physician services rendered to hospitalized inpatient recipients who require dialysis but are not receiving dialysis on that day may use the appropriate procedure code as described in the CPT.

Physician services are allowed for outpatient maintenance dialysis patients not performed as prescribed during a full month or interruptedly. An example of interrupted monthly outpatient dialysis maintenance is preceding and/or following the period of hospitalization.

The CPT codes described by age for physicians rendering outpatient dialysis services that are interrupted during a full month should be billed on a per day basis. These codes should be billed for the days of the month in which the outpatient ESRD related services were performed.

Single or repeated physician assessments are allowed for hemodialysis or dialysis procedures other than hemodialysis. These services are comprehensive and include assessment and management related to the patient's renal dialysis. Please utilize the most descriptive and appropriate CPT dialysis procedure when billing for single or repeated physician evaluation(s).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Dialysis training is a covered service when billed by an approved ESRD facility.

Refer to Chapter 35, Renal Dialysis Facility, for further details.

Parenteral Nutrition

The Alabama Medicaid Agency may reimburse for total parenteral nutritional (TPN) solutions through the pharmacy program if the recipient meets certain requirements as listed below. TPN solutions include those used for hyperalimentation, intradialytic parenteral nutrition (IDPN), and intraperitoneal nutrition (IPN). Requirements must be met and clearly documented in the medical record for coverage of all TPN. All services rendered are subject to post payment review.

Statement of Medical Necessity

The ordering physician will be responsible for writing a statement of medical necessity. This statement shall certify that the patient cannot be maintained on oral or enteral feedings and that due to severe pathology of the alimentary tract either hyperalimentation or IDPN/IPN must be given for 100% of nutritional needs. The original signed statement of medical necessity must be kept in the patient's medical record. This certification statement must be written or stamped on the prescription or reproduced on a form accompanying the prescription. The statement must be signed and dated by the certifying physician at the time of the initial order and updated yearly in accordance with Medicaid billing practice.

Hyperalimentation

Medicaid covers hyperalimentation for recipients who meet certain requirements of medical necessity and documentation in the medical record is sufficient based on the following:

- Documentation in the medical record must validate the patient suffers from a permanently impaired gastrointestinal tract and that there is insufficient absorption of nutrients to maintain adequate strength and weight. The following are considered conditions which could cause insufficient absorption:
    1. Crohn's disease
    2. Obstruction secondary to stricture or neoplasm of the esophagus or stomach
    3. Loss of ability to swallow due to central nervous system disorder, where the risk of aspiration is great
    4. Short bowel syndrome secondary to massive small bowel resection
    5. Malabsorption due to enterocolic, enterovesical or enterocutaneous fistulas (TPN temporary until the repair of the fistula)
    6. Motility disorder (pseudo-obstruction)
    7. Prolonged paralytic ileus following a major surgical procedure or multiple injuries
    8. Newborn infants with catastrophic gastrointestinal anomalies such as tracheoesophageal fistulas, gastroschisis, omphalocele or massive intestinal atresia

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

9. Infants and young children who fail to thrive due to systemic disease or secondary to insufficiency associated with short bowel syndrome, malabsorption or chronic idiopathic diarrhea.

- Medical record documentation must include supporting evidence that the patient cannot be maintained on oral or enteral feedings and that due to severe pathology of the alimentary tract, hyperalimentation must be given in order to meet 100% of the patient's nutritional needs.
- Physical signs, symptoms and test results indicating severe pathology of the alimentary tract must be clearly documented in the medical record. This would include BUN, serum albumin, and phosphorus. Medical records must document inability to maintain weight during a trial of at least four weeks of enteral feeding.

Intradialytic Parenteral Nutrition (IDPN) and Intraperitoneal Nutrition (IPN)

IDPN and IPN involves infusing hyperalimentation fluids as part of dialysis, through the vascular shunt or intraperitoneally to normalize the amounts of albumin, glucose, and other nutrients in the blood stream to decrease morbidity and mortality associated with protein calorie malnutrition. IDPN and IPN solutions are considered **not covered** for the recipient with a functioning gastrointestinal tract whose need for parenteral nutrition is only due to the following:

- If IDPN or IPN is offered as an addition to regularly scheduled infusions of TPN
- If the recipient would not qualify as a candidate for TPN
- A swallowing disorder
- A temporary defect in gastric emptying such as a metabolic or electrolyte disorder
- A psychological disorder, such as depression, impairing food intake
- A metabolic disorder inducing anorexia, such as cancer
- A physical disorder impairing food intake, such as dyspnea or severe pulmonary or cardiac disease
- A side effect of medication
- Renal failure and/or dialysis

The following requirements must be met in order to bill for IDPN or IPN solutions:

- Documentation in the medical record must validate the patient suffers from a permanently impaired gastrointestinal tract and that there is insufficient absorption of nutrients to maintain adequate strength and weight.
- Documentation must include that the patient cannot be maintained on oral or enteral feedings and that due to severe pathology of the alimentary tract, IDPN or IPN must be given in order to meet 100% of the patient's nutritional needs.
- Infusions must be vital to the nutritional status of the recipient and not supplemental to a deficient diet or deficiencies caused by dialysis.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Physical signs, symptoms and test results indicating severe pathology of the alimentary tract must be clearly documented in the medical record. This would include creatinine (predialysis), serum albumin (predialysis), a low or declining serum cholesterol level, and phosphorus. Medical records must document inability to maintain weight during a trial of at least four weeks of enteral feeding.

Restrictions

A few solutions used in TPN preparation are considered payable as part of the composite rate for dialysis and should not be billed separately by the pharmacist; these are as follows:

- Glucose
- Dextrose
- Trace Elements
- Multivitamins

28.2.10 Anesthesiology

Administration of anesthesia is a covered service when administered by or directed by a duly licensed physician for a medical procedure that is covered by Medicaid. Medical direction by an anesthesiologist of more than four Certified Registered Nurse Anesthetists (CRNAs) or Anesthesiology Assistants (AAs) concurrently will not be covered.

Administration of anesthesia by an AA is a covered service when the AA has met the qualifications and standards set forth by the Alabama Board of Medical Examiners. The AA must enroll with a NPI to bill the Alabama Medicaid Program. Refer to Chapter 38, Anesthesiology, for more information.

28.2.11 Obstetrical and Related Services

Refer to Chapter 24: Maternity Care for further detailed information.

28.2.12 Vaccines For Children (VFC)

The Department of Public Health provides vaccines at no charge to Medicaid providers enrolled in the Vaccines For Children (VFC) Program as recommended by the Advisory Committee on Immunization.

Medicaid reimburses administration fees for vaccines provided free of charge through the VFC Program. The rate for the administration fee is $8.00; it is not the rate on the pricing file. Please refer to Appendix A, Well Child Check-Up, Section A.6.1 (Fees) for information regarding the use of designated VFC codes for billing immunization administration fee(s).

A VFC provider may or may not choose to become an enrolled Medicaid provider. Enrollment as a VFC provider or a Medicaid provider is independent of each other.

Refer to Appendix A, EPSDT, for procedure codes for VFC.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

28.2.13 Lab Services

Collection of laboratory specimens may be billed only when sending specimens to another site for analysis if the other site is not owned, operated, or financially associated with the site in which the specimen was collected. The collection fee may not be billed if the lab work is done at the same site where the specimen was collected or in a lab owned, operated, or financially associated with the site in which the specimen was collected. Providers will not be paid for and should not submit claims for laboratory work done for them by independent laboratories or by hospital laboratories.

Providers may submit claims for laboratory work done by them in their own offices or own laboratory facilities. Providers who send specimens to independent laboratories for analysis may bill a collection fee. This fee shall not be paid to any provider who has not actually extracted the specimen from the patient.

Lab Tests Performed in Physician's Offices

When performing laboratory tests in the physician's office:

1. The Physician must be CLIA certified to perform the test,
2. The Physician must have the appropriate equipment to perform the test, and
3. The Physician's office bills for the tests performed but not the collection fee.

When specimens are sent to an outside lab:

1. The Physician's office should not bill the laboratory code, and
2. The Physician's office may bill a collection fee with a "90" modifier for blood specimens.

EXAMPLE:

Lead Levels

Procedure Code 83655 (Lead) should only be billed when the office has the equipment to perform the test. When collecting a specimen only and then sending the blood sample to an outside lab for analysis, you must bill Procedure Code 36415 with modifier 90. The utilization of procedure code 36415-90 will enable you to receive a collection and handling fee for the specimen obtained.

Procedure code 36415-90 should not be billed when lab procedures are performed in the office. The appropriate lab procedure code(s) must be billed when actually performing the lab test. Again, the correct equipment must be utilized to perform the test. These services are subject to post-payment review. Medical record documentation must support the performance and medical necessity of the laboratory test.

NOTE:

Providers should use procedure code 36415-90 for routine venipuncture collection, 36416-90 for collection of capillary blood specimen (e.g., finger, heel, ear stick) and Q0091-90 for collection of Pap smear specimen.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Repeat Lab Procedures

Modifier 91 may be utilized to denote a repeat clinical laboratory test performed on the same date of service for the same recipient. Providers should use modifier 91 instead of modifier 76 for repeat lab procedures.

NOTE:

A physician CANNOT bill the following pathology/laboratory procedure codes; however the above collection fee can be billed, if applicable:

82775 Galactose – 1 – phosphate uridyl transferase; quantitative
83498 Hydroxyprogesterone, 17 – d
84030 Phenylalanine (PKU) blood
84437 Thyroxine; total requiring elution (e.g., neonatal)

28.2.14 Supply Code

The procedure code 99070 is utilized by physicians to bill for supplies and materials over and above those usually included with the office visit. Examples of supplies and materials over and beyond usual supplies include elastic wraps, disposable tubing for bronchial dilating equipment or post-operative dressing changes when no office visit is allowable.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

28.3 Prior Authorization and Referral Requirements

Medical care and services that require prior authorization for in-state providers will continue to require prior authorization for out-of-state providers, e.g., organ transplants and select surgical procedures. Please refer to Chapter 4, Obtaining Prior Authorization for more information.

For information regarding Prior Authorization for MRI's, CT scans, CTA's, MRA's, and PET scans, refer to chapter 22, Independent Radiology.

Unlisted services and procedure codes are not covered by the Alabama Medicaid Agency, with the exception of Medicare crossover claims and rare instances when approval is granted prior to service provision after the agency has determined that the service is covered and that no other procedure code exists for reimbursement.

NOTE:

It is the responsibility of the physician to obtain prior authorization for any outpatient surgical procedure to be performed in an outpatient hospital.

28.4 Signature Requirements

Signature Requirement for Referrals: Effective May 16, 2012, for hard copy referrals, the printed, typed, or stamped name of the primary care physician with an original signature of the physician or designee is required. **Stamped or copied signatures will not be accepted.** For electronic referrals, provider certification is made via standardized electronic signature protocol.

Services that require a physician's order must be written according to practice guidelines and state/federal law and must include the date and signature of the provider, the service(s) ordered and the recipient's name. The EPSDT referral form may be considered the physician's order as long as these guidelines are met. Refer to the individual provider manual chapters for detailed description of what must be included in an order.

All entries in the medical record must be legible and complete, and must be authenticated and dated promptly by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. The author of each entry must be identified and must authenticate his/her entry. Authentication may include handwritten or electronic signatures, or written initials, **Stamped or copied signatures will not be accepted.**

28.5 Cost Sharing (Copayment)

The copayment amount for office visit* including crossovers is:

$3.90 for procedure codes reimbursed $50.01 or more
$2.60 for procedure codes reimbursed between $25.01 - $50.00
$1.30 for procedure codes reimbursed between $10.01 - $25.00
$0.65 for procedure codes reimbursed $10.00 or less

* The following CPT codes are considered office visits and the copayment is based on Medicaid's allowed amount (fee schedule) for each procedure:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

90847, 90849, 90853, 90865, 92002, 92004, 92012, 92014, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99241, 99242, 99243, 99244, 99245, 99281, 99282, 99283, 99284, 99285, 99341, 99342, 99343, 99344, 99345, 99347, 99348, 99349, 99350

If one of these CPT codes is applicable for your practice, then copay applies.

Copayment does not apply to services provided for pregnant women, nursing facility residents, recipients less than 18 years of age, emergencies, and family planning. Native American Indians that present an "active user letter" issued by Indian Health Services (IHS) will be exempt from the Medicaid required copayment.

The provider may not deny services to any eligible Medicaid recipient because of the recipient's inability to pay the cost-sharing (copayment) amount imposed.

28.6 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Physicians who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare-related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

28.6.1 Time Limit for Filing Claims

Medicaid requires all claims for physicians to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits, for more information regarding timely filing limits and exceptions.

28.6.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association,

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on or after 10/01/2015.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

28.6.3 Procedure Codes and Modifiers

Medicaid uses the Healthcare Common Procedure Coding System (HCPCS). HCPCS is composed of the following:

- American Medical Association's Current Procedural Terminology (CPT)
- Nationally assigned codes developed for Medicare
- Locally assigned codes issued by Medicaid. Effective for dates of service on or after 01/01/2004, use national codes.

Filing Claims with Modifiers

Appropriate use of CPT and HCPCS modifiers is required to differentiate between sites and procedures. It is necessary to append the appropriate anatomical modifiers to surgical codes to differentiate between multiple surgeries and sites.

Appropriate Use of Modifiers

Please refer to this CMS link for more information regarding NCCI edits: https://www.medicaid.gov/medicaid/program-integrity/national-correct-coding-initiative-medicaid/index.html

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Modifier 24 (Unrelated Evaluation and Management Service by the Same Physician During a Postoperative Period)

The Physician may need to indicate that an evaluation and management service was performed during a postoperative period for a reason(s) unrelated to the original procedure. This circumstance may be reported by adding modifier 24 to the appropriate level of E&M service. From a coding perspective, modifier 24 is appropriate when a physician provides a surgical service related to one problem and, during the postoperative period or follow-up care for the surgery, provides and E&M service unrelated to the problem requiring the surgery.

Modifier 25 (Significant, Separately Identifiable Evaluation and Management Service by the Same Physician on the Same Day of the Procedure or Other Service)

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E&M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E&M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E&M service to be reported.

Modifiers 59, XE, XP, XS, and XU (Distinct Procedural Services)

Under certain circumstances, the physician may need to indicate that a procedure or service was distinct or independent from other non-E&M services performed on the same day. Modifiers 59, XE, XP, XS, and XU are used to identify procedures/services, other than E&M services, that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injuries in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. This may represent a different session or patient encounter, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same physician. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used.

Modifiers XE, XP, XS, and XU are effective for dates of service beginning January 1, 2015 and thereafter. These modifiers were developed to provide greater reporting specificity in situations where modifier 59 was previously reported and may be utilized in lieu of modifier 59 whenever possible. (Modifier 59 should only be utilized if no other more specific modifier is appropriate.) The modifiers are defined as follows:

- **XE – Separate encounter**: A service that is distinct because it occurred during a separate encounter.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- **XP – Separate practitioner**: A service that is distinct because it was performed by a different practitioner.

- **XS – Separate structure**: A service that is distinct because it was performed on a separate organ/structure.

- **XU – Unusual non-overlapping service**: The use of a service that is distinct because it does not overlap usual components of the main service.

Modifier 76 (Repeat Procedure by Same Physician)

The physician may need to indicate that a procedure or service was repeated subsequent to the original procedure or service. This circumstance may be reported by adding the modifier 76 to the repeated procedure/service. From a coding perspective, modifier 76 is intended to describe the same procedure or service repeated, rather than the same procedure being performed at multiple sites.

Modifier 78 (Return to the Operating Room for a Related Procedure During the Postoperative Period)

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure. When the subsequent procedure is related to the first, and requires the use of the operating room, it may be reported by adding the modifier 78 to the related procedure. Modifier 78 is not used for procedures that indicate in the code descriptor “subsequent, related or redo.”

Modifiers 80, 81, 82 and AS (Assistant-at-Surgery Modifiers)

An assistant-at-surgery serves as an additional pair hands for the operating surgeon. Assistants-at-surgery do not carry primary responsibility for or “perform distinct parts” of the surgical procedure. Assistant-at-surgery coverage is limited to fully qualified physicians and non-physician practitioner (i.e., PAs, CRNP, etc.) if it is within the scope of their licenses.

- **Modifier 80** – Assistant surgeon

- **Modifier 81** – Minimum assistant surgeon

- **Modifier 82** – Assistant surgeon (when qualified resident surgeon not available)

- **Modifier AS** – Physician assistant, nurse practitioner, or clinical nurse specialist for assistant at surgery.

Modifier Q5 (Service Performed by a Substitute Physician under a Reciprocal Billing Agreement)

Under certain circumstances, the physician may need to indicate that a service was provided by a substitute physician. Modifier Q5 is reported when the regular physician arranges for a substitute physician to furnish

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

services on an occasional reciprocal basis. Modifier Q5 should be appended after the procedure code to indicate that the service was provided by a substitute physician under a reciprocal arrangement. When appending modifier Q5, the regular provider is certifying that the services are covered services furnished by the substitute physician. The regular physician should keep a record on file of each service provided by the substitute physician and make this record available to Medicaid upon request.

Modifier Q6 (Service Furnished by a Locum Tenens Physician)

Under certain circumstances, the physician may need to indicate that a service was provided by a locum tenens physician. A locum tenens physician generally has no practice of his/her own; he/she usually moves from area to area as needed. The regular physician generally pays the substitute physician a fixed per diem amount or other fee-for-time compensation, with the locum tenens physician having a status of an independent contractor rather than of an employee. Modifier Q6 should be appended after the procedure code to indicate that the service was provided by a locum tenens physician. The regular physician should keep a record on file of each service provided by the locum tenens physician and make this record available to Medicaid upon request.

Bilateral Procedures

Effective for dates of adjudication October 1, 2006 and thereafter the procedure for billing bilateral procedures changed. In the past, (through September 30, 2006), providers were instructed to bill for bilateral procedures on one line with modifier 50. The reimbursement was adjusted to 150% of Medicaid's fee schedule.

Effective for dates of adjudication October 1, 2006 and thereafter, the new procedure is as follows:

- Bill the appropriate procedure code on 2 separate lines with RT and LT modifier, or other appropriate anatomical modifier,
- Modifier 50 will be used for informational purposes only and is no longer a pricing modifier.
- The payment will be 100% of Medicaid fee schedule for first line and 50% for second line.
- Claims will be subject to multiple surgery payment adjustments for multiple procedures.

Example:

Line 1: 27558 RT
27558 LT; 50 (Optional use of modifier 50)

Alabama Medicaid's Fiscal Agent utilizes Optum Insight Tool to determine whether a 50 modifier or RT and LT modifier should be allowed with the procedure code billed. When an inappropriate procedure code is billed with modifier 50 or RT and/or LT modifier, the claim will deny.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:
When Medicaid payment occurs for a procedure code billed inappropriately with modifier 50, AND/OR RT (right) AND/OR LT (left), the claim will be subject to a system adjustment in payment, post payment review, and recoupment.

Procedure Codes

The CPT manual lists most procedure codes required by Medicaid. This manual may be obtained by contacting the Order Department, American Medical Association, 515 North State Street, Chicago, IL 60610-9986. The (837) Professional electronic claim and the paper claim have been modified to accept up to four Procedure Code Modifiers.

NOTE:
Unlisted procedure codes are not covered by the Agency unless the provider requested and received approval for a prior authorization before the service is rendered. The Agency will deny all requests for payment of unlisted codes after the fact.

Physician-Employed Physician Assistants (PA) and Certified Registered Nurse Practitioners (CRNP)

CRNP and PA payment will be made only for CPT codes identified in Chapter 21, physician administered drugs, and laboratory services, (must be CLIA certified). EPSDT screenings will be covered only if the provider is enrolled in that program. Refer to Appendix A, EPSDT, for EPSDT program requirements.

The Physician's Assistant or CRNP can make physician required inpatient visits to nursing facilities. However, physician required inpatient visits to hospitals or other institutional settings cannot be made by a PA or CRNP. CRNP and PA services have been expanded. Please refer to Chapter 21 for additional information.

Global Surgical Packages

Effective for dates of adjudication 10/1/06 and thereafter, Medicaid will adopt Medicare's RVU file designation for global surgical days. In the past and through date of adjudication September 30, 2006, Medicaid has used a 62 day post op period after major surgeries.

Effective for dates of adjudication 10/1/06 and thereafter, Medicaid will use a zero, 10 day, and 90 day post op period for routine surgical care. Routine post-surgical care in the hospital or office setting for conditions directly related to surgical procedures is covered by the surgical fee. Depending on post-operative period, post-surgical visits cannot be billed separately the day of, or up to 90 days after surgery.

For conditions unrelated to the surgical procedure bill the appropriate (E&M) procedure code with a 24 modifier appended. The diagnosis must support use of the modifier 24.

Claims for these services will be subject to post payment review.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Refer to this Medicare RVU file:http://www.cms.gov/apps/physician-fee-schedule/overview.aspx for global surgical procedure codes Zero, 10 and 90 day(s) post-operative period.

Professional and Technical Components

Some procedure codes in the 70000, 80000, 90000, and G series are a combination of a professional component and a technical component. Therefore, these codes may be billed one of three different ways; (1) as a global, (2) as a professional component, or (3) as a technical component. NOTE: Not all providers are allowed to bill any or all of the three ways to bill. Specific coverage questions should be addressed to the Provider Assistance Center.

- **Global**, the provider must own the equipment, pay the technician, review the results, and provide a written report of the findings. The procedure code is billed with no modifiers. The Global component should be billed only for the following place of service locations:
  - 11 (Office)
  - 81 (Independent Laboratory)

- **Professional component**, the provider does not own or operate the equipment. The provider reviews the results, and provides a written report of the findings. The Radiological professional component is billed by adding modifier 26 to the procedure code, and should be billed only for the following place of service locations:
  - 21 (inpatient hospital)
  - 22 (outpatient hospital)
  - 23 (emergency room - hospital)
  - 51 (inpatient psychiatric facility)
  - 61 (comprehensive inpatient rehab facility)
  - 62 (comprehensive outpatient rehab facility)
  - 65 (end-stage renal disease facility)
  - 81 (Independent Laboratory)

- **Technical component**, the provider must own the equipment, but does not review and document the results. The technical component charges are the facility's charges and are not billed separately by physicians. The technical component is billed by adding modifier TC to the procedure code. The technical component can only be billed by facilities.

28.6.4 Billing for ACHN Referred Service

Please refer to Chapter 40 for information regarding the ACHN Program.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

28.6.5 Place of Service Codes

The following place of service codes apply when filing claims for physicians:

POS	Description
02	Telemedicine Services
11	Office
12	Home
21	Inpatient Hospital
22	Outpatient Hospital
23	Emergency Room - Hospital
24	Ambulatory Surgical Center
25	Birthing Center
26	Military Treatment Facility
31	Skilled Nursing Facility or Nursing Facility
32	Nursing Facility
33	Custodial Care Facility
34	Hospice
41	Ambulance - Land
42	Ambulance - Air or water
51	Inpatient Psychiatric Facility
52	Psy. Fac. Partial Hospitalization
53	Community Mental Health Center
54	Intermediate Care Fac./ Individuals with Intellectual Disabilities
55	Residential Substance Abuse Treatment Facility
56	Psychiatric Residential Treatment Center
61	Comprehensive Inpatient Rehabilitation Facility
62	Comprehensive Outpatient Rehabilitation Facility
65	End Stage Renal Disease Treatment Facility
71	State or Local Public Health Clinic
72	Rural Health Clinic

28.6.6 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

NOTE:

When an attachment is required, a hard copy CMS-1500 claim form must be submitted.

Refer to Section 5.8, Required Attachments, for more information on attachments.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

28.6.7 Consent Forms Required Before Payments Can Be Made

NOTE:

Gainwell will NOT pay any claims to ANY provider until a correctly completed original of the appropriate form is on file at Gainwell. Please note, **only the surgeon** should submit consent forms to Gainwell. All other providers should not request and or submit copies of the consent form. Multiple copies slow down the consent form review and claims payment process.

Abortions

In accordance with federal law, abortions are covered only (1) if the pregnancy is the result of an act of rape or incest; or (2) where a woman suffers from a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would, as certified by a physician, place the woman in danger of death unless an abortion is performed.

On July 1, 2016, Alabama Medicaid implemented fillable Portable Document Format (PDF) versions of the Abortion Consent forms that enable faster processing of provider submitted information. Providers **must** use these fillable consent forms with the digital submission of Consent Forms and supporting documentation. Any form received that is not in a fillable format will be returned to the provider.

Effective October 26, 2016, providers will be able to upload or fax their fillable Consent Forms (Abortion) and supporting documentation for review and processing via the Forms menu of the Alabama Medicaid Interactive Web Portal. A new form will allow providers the ability to upload Consent Forms and supporting documents in PDF format or create a fax barcode cover sheet from the Web Portal. Providers may submit additional documentation via fax at a later time and have that documentation combined with original document through the use of the same barcode cover sheet.

Providers must submit the completed form and supporting documentation via Provider Web Portal upload or fax to Gainwell at: (334) 215-7416.

NOTE:

Abortion Consent forms and supporting documentation will be accepted in paper format via mail or fax until November 26, 2016. After that date, consent forms and supporting documentation submitted to Gainwell on paper will be returned to the provider.

Please refer to Chapter 5, Filing Claims, for instructions on using the digital submission of Consent Forms and supporting documentation.

In the case of abortions performed secondary to pregnancies resulting from rape or incest, the documentation required is a letter from the recipient or provider certifying that the pregnancy resulted from rape or incest.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- A second copy of the consent form or certification letter must be placed in the recipient's medical record.

All claims relating to abortions must have the above-specified documentation on file at Gainwell prior to payment.

This documentation is not required when a recipient presents with a spontaneous abortion.

If the recipient does not qualify for payment by Medicaid and elects to have the abortion, providers may bill the recipient for the abortion as a non-covered service.

The fillable consent forms are available under the Resource tab on the Alabama Medicaid website at: www.medicaid.alabama.gov.

Sterilization

Gainwell must have on file the Medicaid-approved sterilization form. Refer to Appendix C, Family Planning, for more information. See Appendix E, Medicaid Forms for a copy of this form, or visit the Medicaid website at: www.medicaid.alabama.gov. for an electronic fillable version of this form.

Effective October 27, 2016, providers will be able to upload or fax their fillable Consent Forms (Sterilization) and supporting documentation for review and processing via the Forms menu of the Alabama Medicaid Interactive Web Portal. A new form will allow providers the ability to upload Consent Forms and supporting documents in PDF format or create a fax barcode cover sheet from the Web Portal. Providers may submit additional documentation via fax at a later time and have that documentation combined with original document through the use of the same barcode cover sheet. The provider must submit a copy of the recipient's signed sterilization consent form to Gainwell via Provider Web Portal upload or fax. Fax form and supporting documentation to Gainwell at: (334) 215-7416.

Refer to Appendix C for detailed instructions.

Sterilization by Hysterectomy

Payment is not available for a hysterectomy if:

1. **It was performed solely for the purpose of rendering an individual permanently incapable of reproducing**
2. **If there was more than one purpose to the procedure, it would not have been performed but for the purpose of rendering the individual permanently incapable of reproducing**

NOTE:

Sterilization performed for the sole purpose of rendering a person permanently incapable of reproducing is not available to persons under twenty-one (21) years of age under the Medicaid Program.

Refer to Appendix E, Medicaid Forms, for a sample of the sterilization form.

Hysterectomy

Hysterectomy procedures performed for the sole purpose of rendering an individual incapable of reproducing are not covered under Medicaid.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Hysterectomies done as a medical necessity as treatment of disease can be paid for by the Medicaid funds under the physician's program.

The hysterectomy consent form was revised to include a section for unusual circumstances. This form should be used by a physician to certify a patient was already sterile when the hysterectomy was performed; a hysterectomy was performed under a life threatening situation; or a hysterectomy was performed under a period of retroactive Medicaid eligibility. In all of these circumstances, medical records must be sent to Gainwell through digital submission along with the hysterectomy consent form and claim(s) in order for a State review to be performed.

NOTE:

The **doctor's explanation** to the patient that the operation will make her sterile and the **doctor's and recipient's signature** must precede the operation except in the case of medical emergency. If a field is missing, contains invalid information or indicates the recipient/representative or physician signed after the date of surgery, Gainwell will return the consent form to the provider to correct invalid information.

Gainwell must have on file a Medicaid-approved Hysterectomy Consent Form.

On July 1, 2016, Alabama Medicaid implemented fillable Portable Document Format (PDF) versions of the Hysterectomy Consent form that enables faster processing of provider submitted information. Providers **must** use the fillable consent form with the digital submission of Consent Forms and supporting documentation. Any form received that is not in a fillable format will be returned to the provider.

Effective October 26, 2016, providers will be able to upload or fax their fillable Consent Forms (Abortion, Hysterectomy) and supporting documentation for review and processing via the Forms menu of the Alabama Medicaid Interactive Web Portal. A new form will allow providers the ability to upload Consent Forms and supporting documents in PDF format or create a fax barcode cover sheet from the Web Portal. Providers may submit additional documentation via fax at a later time and have that documentation combined with original document through the use of the same barcode cover sheet.

The fillable consent forms are available under the Resource Tab on the Alabama Medicaid website in the section labeled Consent Forms at: www.medicaid.alabama.gov.

Providers must submit the completed form and supporting documentation via Provider Web Portal upload or fax to Gainwell at: (334) 215-7416.

NOTE:

Hysterectomy Consent forms and supporting documentation will be accepted in paper format via mail or fax until November 26, 2016. After that date, consent forms and supporting documentation submitted to Gainwell on paper will be returned to the provider.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Please refer to Chapter 5, Filing Claims, for instructions on using the digital submission of Consent Forms and supporting documentation.

Exceptions That Do Not Require Prior Completion of the Consent Form

In the following situations, the consent form is required and section III and IV of the consent form must be completed.

1. The physician who performed the hysterectomy certifies in writing that the patient was already sterile when the hysterectomy was performed; the cause of sterility must be stated in this written statement. Refer to Section IV on the consent form.
2. The physician who performed the hysterectomy certifies in writing that the hysterectomy was performed under a life-threatening emergency situation in which prior acknowledgement was not possible. This written statement must include a description of the nature of the emergency. Refer to Section IV on the consent form.
3. The hysterectomy was performed during a period of retroactive Medicaid eligibility, and the physician who performed the hysterectomy submits, in lieu of the consent form, a written statement certifying that the individual was informed before the operation that the hysterectomy would make her sterile. Refer to Section IV on the consent form.

NOTE:

Medicaid payment cannot be made for any claims for services provided in connection with an abortion, a sterilization procedure or a hysterectomy for medical reasons unless an approved consent form is on file. Please be aware consent for sterilization is different from consent for hysterectomy. See Appendix E, Medicaid Forms, for examples of each.

29

29 Podiatrist

Podiatrists are enrolled only for services provided to QMB recipients or to recipients referred as a result of an EPSDT screening.

The policy provisions for podiatrists can be found in the *Alabama Medicaid Agency Administrative Code*, Chapter 11.

29.1 Enrollment

Alabama Medicaid's Fiscal Agent enrolls podiatrists and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a podiatrist provider is added to the Medicaid system with the National Provider Identifiers provided at the time applications is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for podiatry-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

Podiatrists are assigned a provider type of 14 (Podiatrist). Valid specialties for podiatrists include the following:

- Podiatry (140)
- QMB/EPSDT (600)

Enrollment Policy for Podiatrists

To participate in the Alabama Medicaid Program, podiatrists must meet the following requirements:

- Possess a current license issued to practice podiatry

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Operate within the scope of practice established by the appropriate state's Board of Podiatry

29.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Podiatry services are covered only for services provided to QMB recipients or to recipients referred as a result of an EPSDT screening.

For more information regarding the EPSDT program, refer to Appendix A, EPSDT.

29.3 Prior Authorization and Referral Requirements

Podiatrists may provide services for QMB recipients or to recipients referred as a result of an EPSDT screening.

For podiatry services to be paid by Medicaid for non-QMB recipients (i.e., EPSDT), the service must be medically necessary and the result of a referral from a contracted Medicaid EPSDT screening provider. Screening providers will complete and forward an Agency Referral Form (form 362), which must identify the reason for referral and serve as documentation that the services provided were the result of an EPSDT screening.

Signature Requirement for Referrals: Effective May 16, 2012:
For hard copy referrals, the printed, typed, or stamped name of the primary care physician with an original signature of the physician or designee is required. **Stamped or copied signatures will not be accepted**. For electronic referrals, provider certification is made via standardized electronic signature protocol.

When filing claims for recipients enrolled in the Alabama Coordinated Health Network (ACHN) Program, refer to Chapter 40 to determine whether your services require a referral from the Primary Care Physician (PCP).

29.4 Cost Sharing (Copayment)

The copayment amount for office visit* including crossovers is:

$3.90 for procedure codes reimbursed $50.01 and greater
$2.60 for procedure codes reimbursed between $25.01 and $50.00
$1.30 for procedure codes reimbursed between $10.01 and $25.00

* The following CPT codes are considered office visits and the copayment is based on Medicaid's allowed amount (fee schedule) for each procedure:

99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99241, 99242, 99243, 99244, 99245,
If one of these CPT codes is applicable for your practice, then copay applies.

Copayment does not apply to services provided for pregnant women, nursing facility residents, recipients less than 18 years of age, emergencies, and

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

family planning. Native American Indians that present an "active user letter" issued by Indian Health Services (IHS) will be exempt from the Medicaid required copayment.

The provider may not deny services to any eligible Medicaid recipient because of the recipient's inability to pay the cost-sharing (copayment) amount imposed.

29.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Podiatrists who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare-related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

29.5.1 Time Limit for Filing Claims

Medicaid requires all claims for podiatrists to be filed within one year of the date of service. Refer to Section 5.1.4, Filing Limits, for more information regarding timely filing limits and exceptions.

29.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

29.5.3 Procedure Codes and Modifiers

Podiatry providers use the Current Procedural Terminology (CPT) coding system. The CPT manual lists most required procedure codes. This manual may be obtained by contacting the Order Department, American Medical Association, 515 North State Street, Chicago, IL 60610-9986.

The (837) Professional electronic claim and the paper claim have been modified to accept up to four Procedure Code Modifiers.

Podiatry CPT codes describing procedures performed on the foot and toes range from 28001 - 29909. In addition to the 28001-29909 CPT codes, podiatrists may also use the evaluation and management codes 99202-99215 and nail codes 11719-11765. Procedure code coverage, maximum units and prior authorization requirements should be checked through AVRS prior to rendering service. Refer to Appendix L, AVRS Quick Reference Guide, for more details on verifying this information.

29.5.4 Place of Service Codes

The following place of service codes apply when filing claims for podiatry services:

POS Code	*Description*
11	Office
21	Inpatient Hospital
22	Outpatient Hospital
23	Emergency Room – Hospital
24	Ambulatory Surgical Center
31	Skilled Nursing Facility or Nursing Home
32	Nursing Facility
51	Inpatient Psychiatric Facility
52	Psychiatric Facility Partial Hospitalization
54	Intermediate Care Facility/Mentally Retarded
61	Comprehensive Inpatient Rehabilitation Facility
62	Comprehensive Outpatient Rehabilitation Facility
71	State or Local Public Health Clinic
72	Rural Health Clinic

29.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

NOTE:

When an attachment is required, a hard copy CMS-1500 claim form must be submitted.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Refer to Section 5.8, Required Attachments, for more information on attachments.

29.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

30

30 Preventive Health Education

Preventive Health Education Services are services provided by a physician or other licensed practitioner of the healing arts (within the scope of practice), or by other qualified providers, designed to prevent disease, disability, or other health conditions or their progression; to prolong life; and to promote physical and mental health and efficiency.

The purpose of these services is to reduce unintended adolescent pregnancies; decrease the rate of infant mortality; and decrease the incidence of maternal complications, low birth weight babies, and deaths among infants and small children.

The policy provisions for preventive health education services can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 50.

30.1 Enrollment

Gainwell enrolls preventive health education providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid Agency as a preventive health educator is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for preventive health educator-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

Preventive health education providers are assigned a provider type of 55 (Private Prenatal Education). The valid specialty for preventive health education providers is Preventive Health Education (183).

Enrollment Policy for Preventive Health Education Providers

Providers include clinics or other organizations that use licensed practitioners of the healing arts within the scope of practice under state law and federal regulations.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Professional instructors of the provider must meet the following qualifications (according to specialty) as listed below:

- A health educator must have graduated from an accredited four-year college or university with major course work in public health, health education, community health, or health/physical education/recreation with a concentration in health.
- A social worker must be licensed by the Alabama Board of Social Work Examiners.
- A registered nurse must be licensed by the Alabama Board of Nursing as a Registered Nurse.
- A nurse practitioner must have successfully completed a supplemental program in an area of specialization, and must be licensed by the Alabama Board of Nursing as a Registered Nurse and be issued a certificate of approval to practice as a Certified Registered Nurse Practitioner in the area of specialization.
- A nurse midwife must be licensed by the Alabama Board of Nursing as a Registered Nurse and a Certified Nurse Midwife.
- A nutritionist must be licensed as a Registered Dietitian by the American Dietetic Association.
- A nutritionist associate must have graduated from a four-year college or university with major course work in nutrition or dietetics.
- A professional counselor must be licensed by the Alabama Board of Examiners in Counseling.
- A health instructor must have a bachelor's degree with extensive experience in providing instruction in preventive health education supplemented by a training program approved by the Alabama Medicaid Agency.

In cases where there is no licensing board for the instructors listed above, the instructor must work under the personal supervision of a physician or work in a facility that provides the services under the direction of a physician, such as in a clinic or outpatient hospital. "Under the supervision of" denotes that the physician is familiar with the Medicaid approved preventive information being presented to recipients and is available to the preventive health instructor by telephone, fax, or in person at the time the instructor is providing the preventive health education service. Providers must supply Medicaid with the name and resume of the physician supervising the instructor and maintain documentation sufficient to demonstrate their availability to the instructors.

All provider instructors must have successfully completed a training program, which is designed to prepare them to provide educational services. This training program must be approved by the Alabama Medicaid Agency.

Providers must develop a specific written curriculum for their educational services, including specific course content and objectives for each class. This curriculum must be approved by the Alabama Medicaid Agency.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

30.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Eligibility of recipients for preventive health education services varies according to the type of service being provided.

- Prenatal Education services are limited to pregnant Medicaid eligible females (as evidenced by physical examination or a positive pregnancy test).
- Adolescent Pregnancy Prevention Education is available to all Medicaid eligible individuals who are of childbearing age, who are not pregnant, and who are eligible for services under the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Program, regardless of sex or previous pregnancy.

Covered Services

Preventive Health Education Services are covered when provided by a Medicaid enrolled preventive health education service provider.

Prenatal and Pregnancy Prevention Education

Prenatal Education consists of a series of classes that teach pregnant women about the process of pregnancy, healthy lifestyles, and prenatal care. These services are covered for Medicaid eligible pregnant women only. Prenatal Education visits are limited to 12 visits per recipient during each two-year period beginning with the first date of service.

Adolescent Pregnancy Prevention Education

Adolescent Pregnancy Prevention Education consists of a series of classes which teach non-pregnant adolescents (male or female) about consequences of unintended pregnancy, methods of family planning, and decision-making skills. These services are covered for all Medicaid eligible non-pregnant individuals of child bearing age who are eligible for services under the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Program, regardless of sex or previous pregnancy. Adolescent Pregnancy Prevention Education visits are unlimited.

Reimbursement

Reimbursement to providers is based on Medicaid's established fee schedule, not to exceed the prevailing rate in the locality for comparable services offered under comparable conditions.

30.3 Prior Authorization and Referral Requirements

Preventive health education procedure codes generally do not require prior authorization. Any service that is warranted outside of these codes must have prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

When filing claims for recipients enrolled in the Alabama Coordinated Health Network (ACHN) Program, refer to Chapter 40, ACHN, to determine whether your services require a referral from the Primary Care Provider (PCP).

30.4 Cost Sharing (Copayment)

Copayment does not apply to services provided by preventive health education providers.

30.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Preventive health education providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:
When filing a claim on paper, a CMS-1500 claim form is required.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

30.5.1 Time Limit for Filing Claims

Medicaid requires all claims for preventive health education to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits, for more information regarding timely filing limits and exceptions.

30.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

Prenatal Education services are limited to diagnosis code V220 - V222 for ICD-9 or Z34.00, Z34.80, and Z33.1 for ICD-10. Adolescent Pregnancy Prevention Education services are limited to diagnosis code V2509.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

30.5.3 Procedure Codes and Modifiers

The (837) Professional, Institutional and Dental electronic claims and the paper claim have been modified to accept up to four Procedure Code Modifiers.

Services are **limited** to the billing of the following two procedure codes:

Procedure Code	*Description*
S9445	Prenatal Education – Limited to pregnant female recipients. Limited to diagnosis code V220 - V222 for ICD-9 or Z34.00, Z34.80, and Z33.1 for ICD-10.
99412	Adolescent Pregnancy Prevention Education – Limited to recipients ages 10-20. Limited to diagnosis code V2509 for ICD-9 and Z30.09 for ICD-10.

30.5.4 Place of Service Codes

The following place of service code applies when filing claims for preventive health education services:

Code	*Description*
99	Other Unlisted Facility

30.5.5 Required Attachments

NOTE:

When an attachment is required, a hard copy CMS-1500 claim form must be submitted.

Refer to Section 5.8, Required Attachments, for more information on attachments.

30.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

31

31 Private Duty Nursing

The purpose of the Private Duty Nursing Program is to provide payment for quality, safe, cost-efficient skilled nursing care to Medicaid recipients who require a minimum of four consecutive hours of continuous skilled nursing care per day. Skilled nursing care is defined as prescribed care that can only be provided by a licensed Registered Nurse (RN) or Licensed Practical Nurse (LPN) which is medically necessary to treat or ameliorate medical conditions identified as a result of an EPSDT screening. The medical criteria herein must be present when the specified condition listed below is found. For conditions not found in the Alabama Medicaid Administrative Code, medical necessity review will be conducted by the Medicaid Medical Director. Medicaid recipients who do not meet the medical necessity requirements for the Private Duty Nursing Program have access to a variety of nursing and related community services. The Agency will make referrals to the appropriate programs based on the level of care needed.

A private duty-nursing agency is a public agency, voluntary non-profit organization, or proprietary agency that provides a minimum of four hours per day of continuous skilled nursing care in the recipient's home. Recipients eligible for in-home private duty-nursing services may be considered for services when normal life activities take the recipient outside the home.

NOTE:

Providers of private duty nursing services under the Technology Assisted (TA) Waiver for Adults should refer to the Alabama Medicaid Provider Manual, Chapter 107 for policy provisions.

The policy provisions for private duty-nursing can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 11.

31.1 Enrollment

Gainwell enrolls providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the State of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Electronic Visit Verification (EVV)

Electronic visit verification is required for Private Duty Nursing providers. These services are electronically verified when the following information is electronically captured by EVV solution:

- (i) the type of service performed,
- (ii) the individual receiving the service,
- (iii) the date of the service,
- (iv) the location of service delivery,
- (v) the individual providing the service, and
- (vi) the time the service begins and ends.

All private duty nursing provider must secure their own EVV system prior to provider enrollment. The EVV Attestation Form must be completed by the PDN provider prior to enrolling. Failure to complete the form will result in denial of application. This form can be found on the Medicaid Agency website at:

9.4.16_EVV_Attestation_Form_PDN_HH_TA_Waiver_Providers_5-2-24.pdf (alabama.gov)

National Provider Identifier, Type, and Specialty

A private duty nursing provider who contracts with Medicaid is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for nursing-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

Private duty nursing providers are assigned a provider type of *52* (Private duty nursing). The valid specialty is Private duty nursing (580).

Enrollment Policy for Nursing Providers

Private duty-nursing providers enroll as EPSDT only. Only in-state private duty-nursing providers and out-of-state providers within 30 miles of the state line qualify for participation in the Medicaid program. Private duty-nursing providers must have a RN on staff.

1. All employees' files should contain updated information that will include, at a minimum, full name, job title indicating full or part time status, address, phone numbers, emergency contacts, current state board RN license or LPN license, current TB skin test, background check information and current daily work schedules. The statewide background check shall consist of the following personal identifiers: name, social security number, date of birth, and driver's license number and/or applicable state identification card (i.e. non-drivers identification).
2. The authorized background check agency shall notify the potential employed if the background check reveals that an applicant is listed in the national sex offender public registry. Applicants must not have

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

convictions or pending charges for any crime of violence or any felony conviction as well as any pending felony arrests.

3. If a Private duty Nursing (PDN) provider operates from a home office, a specified room for office space for the business must be separated from the personal dwelling in the home. Office space with locked file cabinets for business and confidential files for Protected Health Information is required. All medical records must be retained for audit purposes. A sitting area must be included in the office space to meet with employees, recipients, or business associates.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

31.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Nursing services must be prescribed as medically necessary by a licensed physician as a result of an EPSDT screening referral, based on the expectation that the recipient's medical needs are adequately and safely met in the home.

The EPSDT screening is valid for up to one year. If the need for services continues beyond the valid date, a new EPSDT screening is required.

All private duty-nursing services require prior authorization. Additionally, the recipient must be under 21 years of age to qualify and must be Medicaid eligible.

The recipient must require skilled nursing care which exceeds the caregiver's ability to care for the recipient without the assistance of at least four consecutive hours of skilled nursing care.

Qualified Caregiver

Major commitment on the part of the recipient's family is mandatory to meet the recipient's needs. The primary caregiver must sign the *Private Duty Nursing Agreement for Care* form agreeing to participate in and complete training. Additional caregivers identified for training must be indicated on the *Private Duty Nursing Agreement for Care* form (Form 388). In the event that multiple caregivers exist, an adjustment in the hours approved for PDN will occur.

- The family must have at least one member capable of and willing to be trained to assist in the provision of care for the recipient in the home.
- The family must provide evidence of parental or family involvement, and an appropriate home situation (for example, a physical environment and geographic location for the recipient's medical safety).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Reasonable plans for emergencies (such as power and equipment backup for those with life-support devices) and transportation must be established.

Hours Allowed For Continuation of Private Duty Nursing Services Under the Following Circumstances:

- Temporary Illness: Private duty nursing hours may be provided for a period up to 90 days if the primary caregiver is incapacitated due to personal illness or illness of another family member who is dependent upon the caregiver and there is no other trained caregiver available in the home. Temporary illness includes a required surgical procedure due to illness/disease, an illness which would be a danger to the child because of contagion, or an illness which is debilitating for a limited period. Medical documentation from the caregiver's attending physician is required. The number of hours approved is dependent upon the specific circumstances.
- Patient at Risk: Private duty nursing hours may be approved if the patient appears to be at risk of abuse, neglect, or exploitation in the domestic setting and a referral for investigation has been made to the appropriate state agency. The number of hours approved is dependent upon the specific circumstances.
- Sleep: Private duty nursing hours may be provided up to eight hours depending on the situation of the primary care giver. For example, a single parent with no other family support may be granted a full eight hours while two parents serving as primary caregivers may require fewer hours or only hours on an occasional basis.
- Work: Private duty nursing hours provided will be up to the number of hours that the primary caregiver is at work plus one hour travel time. If additional travel time is needed beyond one hour, documentation must be provided to justify the increase. *A Private Duty Nursing Verification of Employment/School Attendance* form (Form 387) providing documentation of work hours must be completed.
- School: Private duty nursing hours provided will be up to the number of hours that the primary caregiver is attending class plus one hour travel time. If additional travel time is needed beyond one hour, documentation must be provided to justify the increase. A current course selection guide published by the school, validated class schedule from school, curriculum guide and transcripts of previous courses taken must be provided along with a completed *Private Duty Nursing Verification of Employment/School Attendance form (Form 387)*. The coursework must be consistent with the requirement for obtaining a GED, college degree, or some other type of certification for employment. Courses selected must follow a logical approach with class hours being taken one after the other unless the course has been indicated by school officials as "closed".

Added: NOTE: The private…with the recipient.

NOTE:

The private duty nurse providing services may not be a spouse, parent, guardian, foster parent, or anyone who is legally responsible (regardless of the relationship) who resides with the recipient.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

The private duty-nursing program does not cover recipients receiving skilled nursing care through the home health program. Nursing care covered by Medicaid in both programs would result in duplicate reimbursements.

NOTE:

Any private duty nursing hours approved will be reduced by the number of hours of care which are provided or are available from other resources. Hours provided by sources other than Medicaid must be reported on the Private Duty Nursing Agreement for Care form (Form 388). In the event a child eligible for Medicaid is already attending or plans to attend public school, the case manager should contact the Special Education Coordinator within the appropriate school district to request that the child's Individual Education Program (IEP) committee meet to determine the student's need for related services. The names and contact information for the coordinators are on the education website at www.alsde.edu**.** The Individuals with Disabilities Education Act (IDEA) guarantees every child the right to a free, appropriate public education and related services in the least restrictive environment. The case manager may be asked to be part of the client's IEP team to facilitate the coordination of necessary related services. Related services needed in the school that are the same as services provided in the home should be closely coordinated. For example, a child needing nursing services should be evaluated and recommended for the appropriate level of care to ensure no break in services if services previously provided by Medicaid are subsequently provided by the school district. For children attending public school, the number of approved hours may be modified during the summer months and school breaks.

NOTE:

When a Private Duty Nursing (PDN) applicant is added to the PDN Program, they may be granted more PDN hours beyond what is normally approved. The purpose of the additional hours initially is to give the PDN provider time to train the qualified caregiver(s). However during the recertification period, the PDN hours may be decreased to the hours determined by the PDN criteria.

31.2.1 Criteria for Non-Ventilator-Dependent Recipients

High technology non-ventilator-dependent recipients may qualify for private duty-nursing services if they meet either of the following criteria and at least one qualified caregiver has been identified:

- Any one of the primary requisites is present.
- Two or more secondary requisites are present.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Primary Requisites

Primary requisites include, but may not be limited to, the following as qualifying criteria for nursing recipients:

- Tracheotomy –Coverage for a functioning tracheotomy requiring oxygen supplementation; and nebulizer treatments or cough assist/inexsufflator devices. Continuation of nursing services may be approved after initial certification for those periods of time when the qualified primary caregiver is away from the home for work or school or otherwise unable to provide the necessary care.
- Total Parenteral Nutrition (TPN) - Coverage up to two months for acute phase with additional certification based upon the need for continuing therapy
- Intravenous Therapy - Coverage up to two months for a single episode. The number of hours required for a single infusion must be at least four continuous hours and require monitoring and treatment by a skilled nurse. An additional period of certification may be approved based on medical necessity for continuing therapy. Additional hours may also be approved for secondary criteria requisites listed below in conjunction with the primary criteria requisites.

Secondary Requisites

Secondary requisites include, but may not be limited to the following as qualifying criteria for nursing recipients:

- Decubitus ulcers - coverage for stage three or four ulcers
- Colostomy or ileostomy care - coverage for new or problematic cases
- Suprapubic catheter care - coverage for new or problematic cases
- Internal nasogastric or gastrostomy feedings - coverage for new or problematic cases
- Tracheotomy
- A documented illness or disability, which requires ongoing skilled observation, monitoring and judgment to maintain or improve health status of a medically fragile or complex condition to include at least one (1) of the following:
    a. An unstable seizure disorder
    b. Unstable respiratory function
    c. Unstable vital signs
    d. A cardiac pacemaker
    e. Unstable shunted hydrocephalus or otherwise unstable neurological status and delayed skilled intervention is expected to result in:
        - Deterioration of a chronic condition
        - Loss of function
        - Imminent risk to health status due to medical fragility
- Extensive or complete assistance with activities of daily living in a child of an age normally expected to perform ADLs such as eating, bathing, dressing, and mobility, bowel and bladder control.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

"New" denotes acquired three months or less from the date of the PA submission. "Problematic" includes, but is not limited to: bleeding, infection, obstruction, necrosis, leaking. Other issues shall be reviewed by the reviewing physician.

31.2.2 Criteria for Ventilator-Dependent Recipients

Ventilator dependent recipients may qualify for private duty-nursing services if any one of the primary requisites is present and at least one qualified caregiver has been identified.

Primary Requisites

Primary requisites include, but may not be limited to the following as qualifying criteria for nursing recipients:

- Mechanical ventilator support is necessary for at least six hours per day and appropriate weaning steps are in progress on a continuing basis.
- Frequent ventilator checks are necessary. Frequent ventilator checks are defined as daytime versus nighttime setting changes, weaning in progress, or parameter checks a minimum of every eight hours with subsequent ventilator setting changes.
- Oxygen supplementation for ventilator dependent recipients is at or below an inspired fraction of 40 percent (Fi02 of 0.40).

31.2.3 Scope of Services

This section lists the scope of services provided by professional nurses and licensed practical nurses for private duty nursing.

Registered Nurse Services (RN)

A registered nurse employed by a Medicaid-enrolled private duty-nursing agency may provide continuous skilled nursing services to the recipient if a licensed physician prescribes the services and Medicaid grants prior authorization.

The RN completes an in-home assessment to determine if services may be safely and effectively administered in the home. The registered nurse establishes a nursing care plan complying with the plan of treatment.

The RN must make monthly supervisory visits to evaluate the appropriateness of services rendered by a licensed practical nurse (LPN). An RN must be on call 24 hours a day, seven days a week.

Licensed Practical Nurse Services (LPN)

The LPN may provide continuous skilled nursing services for the recipient if a licensed physician prescribes the services and Medicaid grants prior authorization. The LPN works under the supervision of the RN.

The RN shall be approved to render all services according to the service authorization.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The Medicaid program requires that the RN on a monthly basis provides direct or indirect supervisory visits of the LPN in the home of each recipient the LPN serves. Direct supervisory visits are made by the RN to observe the appropriateness of LPN services when the LPN is present. Indirect supervisory visits are made by the RN to observe the appropriateness of LPN services when the LPN is not present. LPN shall be approved for all services excluding skilled services provided outside the LPN scope such as administration of hyperalimentation (TPN) by routes other than a peripheral venous catheter.

Missed Visits

(1) A missed visit occurs when the client is at home waiting for scheduled services, but the services are not delivered.

(2) The DSP shall have a written policy assuring that when a Private Duty Nurse is unavailable, the Supervisor assesses the need for services and makes arrangements for a substitute to provide services as necessary.

(a) If the Supervisor sends a substitute, the substitute will complete and sign the service log after finishing duties.

(b) If the Supervisor does not send a substitute, the Supervisor will contact the client and inform them of the unavailability of the Private Duty Nurse.

(3) The DSP will document missed visits in the client's files.

31.2.4 Documentation of Services

The private duty-nursing agency is responsible for establishing and maintaining a permanent medical record for each recipient including the following:

- Home Health Certification and Plan of Care form (HCFA-485) for certification and re-certification signed by the physician
- Medical Update and Patient Information form (HCFA-486)
- Private Duty Nursing Agreement for Care form (Form 388)
- Alabama Medicaid Agency Referral form (Form 362)
- Any additional physician orders
- Signature log with dates, duration of visits, types of service, and signature of the RN/LPN and the caregiver (a copy must be provided to the recipient or recipient's representative).
- Continuous progress reports
- Documentation of in-home RN visits to supervise the LPN

Medical records shall be retained for at least three years plus the current year.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Plan of Care for Private Duty Nursing

A plan of care must be developed and submitted with each request for service documenting the extent of nursing needs. Each professional participating in the recipient's care must carefully review the recipient's status and needs. Each discipline must formulate goals and objectives for the recipient and develop daily program components to meet these goals in the home. This plan must also include the following:

- Designation of a home care service coordinator
- Involvement of a primary care physician with specific physician orders for medications, treatments, medical follow-up, and medical tests as appropriate
- Family access to a telephone
- A plan for monitoring and adjusting the home care plan
- A defined backup system for medical emergencies
- A plan to meet the educational needs of the recipient
- A clearly shown planned reduction of private duty hours
- Criteria and procedures for transition from private duty-nursing care, when appropriate

At each certification, the care plan will be denied, approved, or returned to request additional information. The recipient should transition to the most appropriate care when the recipient no longer meets the private duty-nursing criteria. The most appropriate care may be home care services, nursing facility placement, or the Home and Community Based Waiver Program.

31.2.5 Non-Covered Private Duty Nursing Services

When the recipient does not meet the medical need and diagnosis criteria or does not require at least four consecutive hours of continuous skilled nursing care per day, Medicaid will not cover private duty-nursing services.

Medicaid does not provide private duty-nursing services under the following circumstances:

- Observational care for behavioral, eating disorders, or for medical conditions that do not require medically necessary intervention by skilled nursing personnel
- Services not prescribed to treat or improve a condition identified as a result of an EPSDT screening
- Custodial, sitter, and respite services
- Services after the recipient is admitted to a hospital or a nursing facility
- Services after the recipient is no longer eligible for Medicaid

If the provider fails to comply with agency rules and program policies, Medicaid may recoup payments and terminate the provider contract.

Please refer to the *Alabama Medicaid Agency Administrative Code,* Chapter 11, for detailed policy information.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

31.3 Prior Authorization and Referral Requirements

All private duty-nursing services require prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

Private duty-nursing providers are required to submit to Gainwell the following forms for consideration of authorization for services:

- Alabama Prior Review and Authorization Request form (Form 342)
- Alabama Medicaid Agency Referral form (Form 362)
- Home Health Certification and Plan of Care form (HCFA-485) for certification and recertification signed by the physician.
- Medical update and Patient Information form (HCFA-486)
- Private Duty Nursing Agreement for Care form (Form 388)
- Any additional physician orders

When filing claims for recipients enrolled in ACHN Program, refer to Chapter40, ACHN Billing Manual to determine whether your services require a referral from the Primary Care Physician (PCP).

The Alabama Medicaid Agency Referral form (Form 362) is valid for one year from date of screening. If the recipient continues to be approved for services beyond the one year screening date, a new Alabama Medicaid Agency Referral form (Form 362) indicating the current screening date and appropriate information must be submitted

Re-certification

Every three months, documentation consisting of the Home Health Certification and Plan of Care (Form CMS 485), the Medical Update and Patient Information (Form CMS 486), Verification of Employment /School Attendance (Form 387), Private Duty Nursing Agreement for Care form (Form 388), and two weeks of nursing record documentation must be submitted to Gainwell to support the need for continuation of private duty-nursing services. Providers must submit re-certification requests to Gainwell **at least** 14 days prior to the re-certification due date. Re-certifications not received timely will be approved when criteria are met based on date of receipt. The request for re-certification will be approved or denied based on Medicaid criteria. Gainwell denies claims for services rendered after the cancellation date.

In an emergency where the delay of adjustment of prior authorization hours would endanger the health of the recipient, the case manager, private duty-nursing agency, or parent should initiate a change request within 24 hours of the onset of the emergency by calling Kepro at (800)-426-7259 or (800)-472-2902. If the emergency situation occurs after hours, on weekends, or on a holiday, a voice message left at the same number or a fax sent to (833)-536-2134 or (833)536-2136 will be accepted for consideration. The message must include the following information:

- Recipient’s name
- Recipient’s Medicaid number (13 digits)
- NPI of Private Duty Nursing Agency

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Phone number of Private Duty Nursing Agency
- Phone number and name of case manager, if applicable
- Nature of emergency and number of hours involved
- Contact person and contact telephone number for follow-up

The Addendum to the Care Plan (HCFA-487) and a Medical Update and Patient Information Form (HCFA-486) must be received by Kepro within ten calendar days of the voice message/fax request. Form HCFA-486 should indicate the reason for the emergency request (example; “child is ill and did not report to school”) giving the date and the number of hours involved. If the documentation is not received within ten calendar days, the authorized START DATE will be the Julian (receipt) date of approval. To be approved, the request must meet established guidelines and criteria as set forth in Chapter 31 of the Provider Manual. Initiation of the Emergency Procedures does not guarantee approval but establishes the earliest start date.

31.4 Cost Sharing (Copayment)

Copayment does not apply to services provided by private duty-nursing providers.

31.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers are encouraged to bill Medicaid claims electronically.

Private duty-nursing providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a UB-04 claim form is required. When completing the UB-04, enter type of bill 331. Medicare-related claims must be filed using the Institutional Medicaid/Medicare Related Claim Form (Form 341).

NOTE:

Claims must contain the detail date of service. Span-billing dates of service on the detail line IS NOT Allowed. The provider must submit each date of service on a separate line on the claim.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

31.5.1 Time Limit For Filing Claims

Medicaid requires all claims for private duty-nursing providers to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

31.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

31.5.3 Procedure Codes

Private duty-nursing providers use the Current Procedural Terminology (CPT) coding system. The CPT manual lists most Medicaid required procedure codes. This manual may be obtained by contacting the Order Department, American Medical Association, 515 North State Street, Chicago, IL 60610-9986.

An RN or LPN may provide skilled nursing services to two PDN recipients at the same time. Modifier “LU” must be used to denote the second recipient. Reimbursement for the procedure code with the “LU” modifier shall be at 50% of the RN or LPN hourly rate.

The following revenue codes and procedure codes apply when filing claims for private duty-nursing services:

Revenue Code	*Procedure Code*	*Description*
551	S9123/Modifier EP	Private Duty Nurse/RN
551	S9124/Modifier EP	Private Duty Nurse/LPN

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Revenue Code	*Procedure Code*	*Description*
551	S9123/Modifier EP:LU	Private Duty Nurse/RN – second recipient, concurrent care
551	S9124/Modifier EP:LU	Private Duty Nurse/LPN-second recipient, concurrent care

31.5.4 Place of Service Codes

Place of services codes do not apply when filing the UB-04 claim form.

31.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following:

- Claims With Third Party Denials
- For recipients with third party insurance, it is the private duty-nursing provider's responsibility to verify that PDN is not covered by the other insurance. Documentation of non-coverage should be submitted with the PA request. Failure to do so may result in recoupment.

NOTE:
When an attachment is required, a hard copy UB-04 claim form must be submitted.

Refer to Section 5.8, Required Attachments, for more details about these attachments.

31.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

32

32 Provider-Based Rural Health Clinics

Rural health clinics are defined as clinics located in a rural area designated by the Bureau of Census as non-urbanized and medically under-served. Rural health clinics are designed to meet the needs of those recipients who might otherwise be unable to access medical attention.

Provider based rural health clinics are clinics that are an integral part of hospital, home health agency, or nursing facility. Provider-based rural health clinics are reimbursed on an encounter rate for services provided to Medicaid recipients.

Refer to the following chapters of the *Alabama Medicaid Agency Administrative Code*:

- Chapter 59 for policy for provider-based rural health clinics
- Chapter 60 for reimbursement policy

32.1 Enrollment

Gainwell enrolls rural health clinic providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Medicaid as a rural health clinic provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for claims.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

NOTE:
The 10-digit NPI is required when filing a claim.

Rural health clinics are assigned a provider type of 58 and valid specialty is 185.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Physicians affiliated with rural health clinics are enrolled with their own NPI, which links them to the clinic. The provider type for the physician is 58 (Rural Health Clinic). The valid specialties are any of those specialties valid for physicians. Please refer to Chapter 28, Physician, for a listing of valid specialties.

All other personnel affiliated with the rural health clinic, such as physician assistants or nurse practitioners, bill using the clinic NPI, and are not assigned individual NPIs.

Enrollment Policy for Provider-Based Rural Health Clinics

In order to participate in the Title XIX (Medicaid) Program, and to receive Medicaid payment, a provider-based rural health clinic must:

- Receive certification for participation in the Title XVIII (Medicare) Program
- Obtain certification by the appropriate State survey agency
- Comply with the Clinical Laboratory Improvement Amendment (CLIA) testing for all laboratory sites
- Operate in accordance with applicable federal, state and local laws.

All clinics must enroll separately and execute a separate provider contract with Alabama Medicaid.

The effective date of enrollment of a provider-based rural health clinic will be the date of Medicare certification. Providers who request enrollment more than 120 days after certification are enrolled on the first day of the month the enrollment is approved.

The provider based rural health clinic must be under the medical direction of a physician. The physician must be physically present at the clinic for sufficient periods of time to provide medical care services, consultation, and supervision in accordance with Medicare regulations for rural health clinics. A *sufficient period* is defined as follows:

- No less than once every 72 hours for non-remote sites
- At least once every seven days for remote sites

Remote sites are defined as those more than 30 miles from the primary supervising physician's principal practice location.

This requirement must be accommodated except in extraordinary circumstances. The clinic must fully document any extraordinary circumstances that prevent it from meeting this requirement.

When not physically present, the physician must be available at all times through direct telecommunication for consultation, assistance with medical emergencies or patient referral.

Change of Ownership (CHOW) and Closures

Medicaid will mirror Medicare's Change of Ownership (CHOW) policy. Refer to Chapter 19, Hospital for additional information on Change of Ownership.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The new owner may choose to accept the established reimbursement rate or submit a budgeted cost report to the Medicaid Agency and must submit his choice in writing to Medicaid's Provider Audit Program within the 30 calendar days timeframe of the change of ownership.

- The clinic must be a licensed federally recognized RHC enrolled in the Alabama Medicaid Program, who has not been sanctioned.
- The administrator must sign a clinic PCP agreement that delineates program requirements including, but not limited to, patient management, 24-hour coverage, and other program requirements.
- The RHC and or site must be opened a minimum of 40 hours per week and the physician must practice at the location of 40 hours per week to be considered a Full Time Equivalent (FTE)
- The RHC must specify what arrangements have been made for hospital admissions. If physicians within the RHC do not have admitting privileges, then the designee must be specified. If the RHC/physician does not have a designee, then the enrollment form must contain documentation as to what is done to arrange these services for non-**Alabama Coordinated Health Network (ACHN)** enrollees including a written statement from the hospital.
- All physicians and mid-levels practicing in the clinic and their FTP status which are to be considered for purposes of the **ACHN** Program should be listed on the enrollment form.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

32.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

32.2.1 Covered Services

Rural health clinic visits and inpatient physician services are subject to the same routine benefit limitations as for physicians. Refer to the *Alabama Medicaid Agency Administrative Code,* Chapter 6, for details.

The following services are covered in the provider-based rural health clinic:

- Medically necessary diagnostic and therapeutic services and supplies that are an incident to such services or as an incident to a physician's service and that are commonly furnished in a physician's office or a physician's home visit.
- Basic laboratory services essential to the immediate diagnosis and treatment of the patient that must include but are not limited to the following six tests that must be provided directly by the rural health clinic:
  - Chemical examinations of urine by stick or tablet methods or both (including urine ketones)
  - Hemoglobin or hematocrit
  - Blood glucose
  - Examination of stool specimens for occult blood
  - Pregnancy tests
  - Primary culturing for transmittal to a certified laboratory
- Medical emergency procedures as a first response to life threatening injuries and acute illness.
- Provider based rural health services may be provided by any of the following individuals:
- Physician
- Physician assistant, nurse practitioner, certified nurse midwife, or registered nurse

The physician, physician assistant, nurse practitioner, certified nurse midwife, or registered nurse must conform to all state requirements regarding the scope or conditions of their practice.

The CRNP can make physician-required visits to nursing facilities. However, a CRNP cannot make physician required inpatient visits to hospitals or other institutional settings to qualify for payment to the physician or to satisfy current regulations as physician visits. The PA or CRNP may provide low complexity or straightforward medical decision-making services in the emergency department or assist at surgery (identified surgical codes only) for Medicaid reimbursement.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A nurse practitioner, physician assistant, or certified nurse midwife must furnish patient care services at least fifty (50%) percent of the time the clinic operates.

32.2.2 Reimbursement

PBRHC services are reimbursed by an all-inclusive encounter rate. All services provided for that date of service will be included in the encounter rate. If a recipient only has lab or x-rays, this will also constitute an encounter.

Encounters are face-to-face contacts between a patient and a health professional for medically necessary services.

Surgical procedures performed in place of service 21 (inpatient) or place of service 22 (outpatient) will be reimbursed fee-for-service.

Contacts with one or more health professionals and multiple contacts with the same health care professional that take place on the same day at a single location constitute a single encounter, unless the patient later suffers illness or injury requiring additional diagnosis or treatment.

Reimbursement for an enrolled out-of-state PBRHC will be the lesser of the encounter rate established by the Medicaid Department of the out-of-state PBRHC or the average encounter rate established by Alabama Medicaid for in-state facilities.

As described in Section 1902(aa) of the Social Security Act, PBRHCs will be paid under a prospective payment system rate (PPS rate) effective January 1, 2001. The rate setting period is from October 1 through September 30th. Each PBRHC is entitled to the payment amount (on a per visit basis) to which the PBRHC was entitled to in the previous fiscal year, increased by the percentage increase in the Medicare Economic Index (MEI) for primary care services, and adjusted to take into account any increase (or decrease) in the scope of services furnished by the PBRHC during that fiscal year.

If a service has been eliminated, the Health Center must notify Medicaid that they have discontinued a given service. Medicaid must be notified in writing within ninety (90) calendar days of any termination of service(s). The notification of discontinued service must include the 12-month cost report for the discontinued service leading up to the termination of the service. The Agency may request additional documentation. An elimination of a service or services will not result in a rate adjustment unless the elimination has a cost impact of 3%. Failure to notify Medicaid of a termination of service may result in recoupment of paid claims.

PBRHC services and other ambulatory services provided at the PBRHC will be reimbursed by an all-inclusive encounter rate. Refer to the *Alabama Medicaid Agency Administrative Code*, Chapter 60, for details.

Change in Scope (CIS)

A PBRHC may request that their PPS rate be adjusted to take into account a change (either increase or decrease) in the scope of services furnished by the PBRHC. A change in scope of services is defined as a change in the type, intensity, duration, and/or amount of services provided during a PBRHC visit. Change in Scope requests must meet regulatory compliance as required by state and federal law as it relates to the operation of PBRHC services provided under the Alabama Medicaid (“Medicaid”) Program.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A change in scope request must be sent to the Managed Care Operations Division for review. The request must specifically state what PBRHC service was changed, and specifically detail how the type, intensity, duration, or amount of that service has changed. Medicaid will not review the CIS request until a complete submission is received. A complete submission includes the documentation listed below. The CIS request must be submitted to the Agency no later than 180 days (six months) after the Health Clinic's fiscal year end. The request shall include, at a minimum, the following items clearly labeled and identified documentation:

1. Narrative of the Qualifying Event or Events including a description of the Event or Events and other relevant information such as the locations affected, the date new services began, time period over which the changes took place or how patients are impacted; any relevant supporting documentation should also be provided. The Health Clinic must specify their fiscal year period in the narrative that will be submitted with the CIS request. Failure to disclose the fiscal year in the narrative will result in an incomplete submission.
2. A CIS Medicaid cost report with at least 12-months of actual expenses associated with the requested change in scope
    - The Medicaid cost report must reflect ALL clinic visits. Also, initial supporting documentation must include the following:
        - General Ledger Detail (in excel format) for the period under audit
        - Trial Balance (in excel format)
        - Crosswalk of Trial Balance accounts to Medicaid cost report line item
        - Medicare Cost Report for period(s) consistent with the Medicaid Cost Report
3. The PBRHC's proposed PPS rate with detailed documentation of how the proposed PPS rate was derived or calculated.
4. A listing of deleted services not reported to Medicaid, if applicable. Listing must include the deleted service and the date the service was deleted.

The Medicaid Agency may request more documentation or clarification of the documentation provided. If the PBRHC fails or refuses to provide the documentation requested by the Medicaid Agency, the change in scope request may be denied. PBRHCs may submit one CIS request within 12-months of the last submitted CIS request.

NOTE:

A deletion in service(s) does not count towards the 12-month CIS submission limitation.

The Agency will notify the Health Clinic within seven days of receipt of a CIS request. If the Health Clinic does not receive a response within seven days, it is the Health Clinic's responsibility to reach out to the Agency regarding receipt of the CIS request. The Agency will review the CIS request to determine if the CIS request is complete. The Agency will notify the Health Clinic within 30 days regarding the completion status of the CIS request. The Agency will notify

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

the Health Clinic within 60 days from CIS submission completion date of the approved qualifying events.

A change in the scope of service occurs if the PBRHC has added or discontinued any service that meets the definition of PBRHC services as provided in Section 1905(a) (2) (B) and (C) of the Act, ***and*** the service is included as a covered Medicaid service under the Alabama Medicaid State Plan. A change in the scope of service is defined as a change in the type, intensity, duration and/or amount of services compared to the services offered at the time of the last change of scope rate adjustment.

Type- the FQHC/RHC has added or dropped any service that meets the definition of FQHC/RHC services as provided in section 1905(a) (2) (B) and (C) of the Social Security Act or if the service is included as a covered Medicaid service in the State Plan.

Intensity- a change in the characteristics of services offered in an average visit such that the average patient receives a different array of services.

Amount- an increase or decrease in the quantity of services that an average patient receives in an average visit.

Duration- a change in the average length of time it takes medical providers to complete an average patient visit due to changing circumstances.

A change in scope review will not take increased costs or inflation into account. Further, Patient-Centered Medical Home (PCMH) certification will not qualify for a rate adjustment. When the cost of the changed service has been determined, the incremental/decremental rate adjustment to the individual service will be combined into the overall PPS rate thereby calculating a revised encounter rate. Only the services that changed will be included in the PPS rate calculation during the change in scope request review. If the new PPS rate results in an overall increase or decrease of at least 3 percent of the PPS rate at the time Medicaid receives the change in scope request, then the PPS rate will be adjusted. The effective date of the new PPS rate will be the first day of the month that the Medicaid Agency receives a completed CIS request. The Agency will notify the health clinic within 30 days if the CIS request is complete or not. A complete submission includes the documentation listed above.

NOTE:

For example: if a CIS request is received on March 31, but does not contain all required information, it will be returned. On May 15th, the Agency receives the resubmitted CIS request with all required documentation, therefore the effective date will be May 1st.

The PBRHC must demonstrate the following:

- a cost impact per qualifying event or a combination of more than one qualifying event and
- the incremental cost impact per visit to the change in scope of service.

Any costs supporting the rate adjustment must be allowable for PBRHCs under the Administrative Code Chapter 60- Provider-Based Rural Health Clinic

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Reimbursement. The calculated incremental cost per visit of the change in scope will be applied to the PPS rate currently in effect.

A Change in Scope request may take more than a period of one year to process; however, the Agency anticipates processing change in scope requests within 6 months. For additional information, please contact the Managed Care Operations Division.

NOTE:

New PPS rates due to an approved change in scope will be based on the incremental and/or decremental costs of the approved qualifying event(s).

Family Planning

- Family planning services are services provided to prevent or delay pregnancy.
- The Plan First visit will be reimbursed at the encounter rate when billed.
- Complete guidelines for family planning are in the Provider Billing manual, Appendix C.

1st Look - The Oral Health Risk Assessment and Dental Varnishing Program

For additional Oral Health Risk Assessment and Dental Varnishing information and guidelines please refer to Medicaid's Provider Manual's Dental Chapter 13.

32.3 Prior Authorization and Referral Requirements

Procedure codes billed by rural health providers generally do not require prior authorization. Any service warranted outside of these codes must have prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

When filing claims for recipients enrolled in the ACHN Program, refer to Chapter 40, to determine whether your services require a referral from the Primary Care Physician (PCP).

32.4 Cost Sharing (Copayment)

The copayment amount $3.90 per visit including crossovers. The copayment does not apply to services provided for pregnant women, nursing facility residents, recipients less than 18 years of age, emergencies, and family planning. Native American Indians that present an "active user letter" issued by Indian health Services (IHS) will be exempt from the Medicaid required copayment.

Providers may not deny services to any eligible Medicaid recipient because of the recipient's inability to pay the cost-sharing (copayment) amount imposed.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Medicaid copayment is NOT a third party resource. Do not record copayment on the CMS-1500 claim form.

Medicare Deductible and Coinsurance

For provider-based rural health clinic services, Medicaid pays the Medicare deductible and coinsurance up to the encounter rate established by Medicaid.

32.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Provider-based rural health clinics that bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare-related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

32.5.1 Time Limit for Filing Claims

Medicaid requires all claims for provider-based rural health clinics to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits, for more information regarding timely filing limits and exceptions.

32.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

32.5.3 Procedure Codes and Modifiers

NOTE:

Provider based rural health provider should refer to Chapter 28, Physician, for procedure code information.

NOTE:

Providers should use procedure code 36415-90 for routine venipuncture collection, 36416-90 for collection of capillary blood specimen (eg, finger, heel, or ear stick) and Q0091-90 for collection of Pap smear specimen.

Collection of laboratory specimens may be billed only when sending specimens to another site for analysis if the other site is not owned, operated, or financially associated with the site in which the specimen was collected.

The collection fee may not be billed if the lab work is done at the same site where the specimen was collected or in a lab owned, operated, or financially associated with the site in which the specimen was collected.

Independent laboratory providers will not be paid for and should not submit claims for laboratory work done for them by other independent laboratories or by hospital laboratories.

Providers may submit claims for laboratory work done by them in their own laboratory facilities. Providers who send specimens to another independent laboratory for analysis may bill a collection fee. This fee shall not be paid to any provider who has not actually extracted the specimen from the patient.

Vaccines For Children (VFC)

Refer to Appendix A, EPSDT, for procedure codes for VFC.

32.5.4 Place of Service Codes

The following place of service codes apply when filing claims for provider-based rural health clinics:

POS Code	*Description*
11	Office
21	Inpatient Hospital
22	Outpatient Hospital
23	Emergency Room – Hospital
31	Skilled Nursing Facility or Nursing Facility
32	Nursing Facility

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

32.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

Refer to Section 5.8, Required Attachments, for more information on attachments.

32.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

33 Psychiatric Treatment Facilities

The policy provisions for psychiatric hospitals and psychiatric residential treatment facilities (PRTFs) may be found in Chapter 41 of the Medicaid Administrative Code. The complete administrative code is found on the Medicaid website: www.medicaid.alabama.gov.

Psychiatric services for recipients under age 21 are covered services when provided under the following conditions:

- Under the direction of a physician
- By a psychiatric hospital enrolled as a Medicaid provider

  By a psychiatric residential treatment facility (PRTFs) which is accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO), the Commission on Accreditation of Rehabilitation Facilities (CARF), the Council on Accreditation of Services for Families and Children (COA), or by another accrediting organization with comparable standards that is recognized by the State;
- Before the recipient reaches age 21
- If the recipient was receiving services immediately before he/she reached age 21, before the earlier of the following dates:
  - The date the recipient no longer requires the services
  - The date the recipient reaches age 22
  - The expiration of covered days
    - To a recipient admitted to and remaining in the facility for the course of the hospitalization
    - As certified in writing to be necessary in the setting in which it will be provided in accordance with 42 CFR 441.152.

33.1 Enrollment

Gainwell enrolls psychiatric hospital providers and issues provider contracts to applicants meeting the licensure and certification requirements of the State of Alabama, the Code of Federal Regulations, the *Medicaid Administrative Code*, and the *Medicaid Provider Manual*.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a psychiatric hospital or PRTFs provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for psychiatric hospital-related claims.

Psychiatric hospitals and PRTFs are assigned a provider type of 01 (Hospital). The valid specialty for psychiatric hospitals is (017) and (013) for PRTFs.

Enrollment Policy for Psychiatric Hospital Providers

To participate in the Alabama Medicaid Program, psychiatric hospital providers must meet the following conditions:

- Receive certification for participation in the Medicare program
- Possess a license as an Alabama psychiatric hospital in accordance with current rules contained in the Alabama Administrative Code. State hospitals that do not require licensing as per state law are exempt from this provision.
- Be accredited by the Joint Commission on Accreditation of Healthcare Organizations
- Have a distinct unit for children and adolescents
- Have a separate treatment program for children and adolescents
- Submit a written description of an acceptable utilization review plan currently in effect
- Submit a budget of cost for medical inpatient services for its initial cost reporting period, if a new provider

Enrollment Policy for Psychiatric Residential Treatment Facilities (PRTFs)

To participate in the Alabama Medicaid program, PRTFs must meet the following conditions:

- Be accredited by JCAHO, CARF, COA, or be certified as an Alabama PRTF in accordance with standards promulgated by the Alabama Department of Human Resources (DHR), the Department of Mental Health (DMH), or the Department of Youth Services (DYS), or the Department of Children's Services (DCA). Upon enrollment and each time the PRTF is recertified a copy of the certification letter must be sent to Medicaid within forty-five business days.
- Be in compliance with Title VI and VII of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975
- Execute a contract or placement agreement with DHR, DMH, DYS, or DCA to provide residential psychiatric treatment services in the State of Alabama

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Execute a provider agreement with Alabama Medicaid to participate in the Medicaid program;
- Submit a written description of an acceptable UR plan currently in effect
- Submit a written attestation of compliance with the requirements of 42 CFR, Part 483, Subpart G, regarding the reporting of serious occurrences and the use of restraint and seclusion upon enrollment and yearly on or before July 21;
- Be in compliance with staffing and medical record requirements necessary to carry out a program of active treatment for individuals under age 21.

All correspondence regarding application by Alabama PRTFs for participation in the Medicaid program should be mailed to:

Alabama Medicaid Agency
Attention: Institutional Services
PO Box 5624
Montgomery, AL 36103.

Change of Ownership (CHOW) and Closures

Medicaid will mirror Medicare's Change of Ownership (CHOW) Policy Refer to Chapter 19, Hospital for additional information on Change of Ownership

33.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

For purposes of this chapter, an inpatient is a person admitted to a psychiatric facility for bed occupancy for purposes of receiving inpatient or residential psychiatric services.

The number of days of care charged to a recipient for inpatient psychiatric services is always a unit of a full day. A day begins at midnight and ends 24 hours later. The midnight to midnight method is used to report days of care for the recipients, even if the facility uses a different definition of day for statistical or other purposes.

Medicaid covers the day of admission, but not the day of discharge.

When a recipient is discharged and admitted to the same hospital on the same date of service, the hospital should completely discharge the recipient and then readmit on separate UB-04's (even if the readmission was for the same diagnosis).

If a recipient is discharged to a general hospital, the psychiatric facility must not bill Medicaid for those non covered days.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

33.2.1 Therapeutic Visits

Therapeutic visits away from the psychiatric hospital to home, relatives, or friends are authorized if certified by the attending physician as medically necessary in the treatment of the recipient. An admission to a general hospital does not count as a therapeutic visit. Therapeutic visits are subject to the following limitations:

- No more than three days in duration
- No more than two visits per 60 calendar days per admission, per recipient

Therapeutic visit records will be reviewed retrospectively by Medicaid. Medicaid will recoup payments from providers who receive payments for therapeutic visits in excess of the amount as described above. This policy applies only to visits away from the psychiatric hospital. Visits away from the PRTF are not limited by this policy.

33.3 Certification of Need for Inpatient and Residential Services

Providers should refer to Chapter 41 of the Medicaid Administrative Code for complete instructions on documenting the certification of need for inpatient or residential treatment services. Instructions for documenting emergency and non-emergency admissions to PRTFs will also be found in Chapter 41.

All entries in the medical record must be legible and complete, and must be authenticated and dated promptly by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. The author of each entry must be identified and must authenticate his or her entry. Authentication may include signatures, written initials, or computer entry.

Reimbursement

Medicaid pays for inpatient services provided by psychiatric hospitals according to the per diem rate established for the hospital. The per diem rate is based on the Medicaid cost report and the provisions documented in the *Medicaid Administrative Code,* Chapter 23.

Providers are required to file a complete uniform Medicaid cost report for each fiscal year. Medicaid must receive one copy of this report within three months after the Medicaid year-end cost report.

Hospitals that terminate participation in the Medicaid program must provide a final cost report within 120 days of the date of termination of participation.

If a uniform cost report is not filed by the due date, the hospital shall be charged a penalty of $100.00 per day for each calendar day after the due date.

Medicaid pays for residential treatment services provided by PRTFs according to the per diem rate established in the placement agreement between the PRTF and the contracting state agency (DHR, DYS, DMH, DCA).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Provider Preventable Conditions (PPCs)

Provider Preventable Conditions (PPCs) are clearly defined into two separate categories: Healthcare Acquired Conditions and Other Provider Preventable Conditions (OPPCs)

Healthcare Acquired Conditions include Hospital Acquired Conditions (HACs).

OPPCs include but are not limited to the following; surgery on a wrong body part, wrong surgery on a patient, surgery on a wrong patient.

Non- payment of PPCs shall not prevent access to services for Medicaid beneficiaries.

To be reportable, PPC's must meet the following criteria:

- The PPC must be reasonably preventable as determined by a root cause analysis or some other means.
- The PPC must be within the control of the provider.
- The PPC must be clearly and unambiguously the result of a preventable mistake made and hospital procedures not followed, and not an event that could otherwise occur.
- The PPC must result in significant harm. The OPPCs for consideration should be limited to those that yield a serious adverse result. Serious adverse result is defined as one that results in death, a serious disability or a substantial increase in the duration and/or complexity of care that is well beyond the norm for treatment of the presenting condition. A serious disability is defined as a major loss of function that endures for more than 30 days, is not present at the time services were sought and is not related to the presenting condition.
- Any process for identifying non-payable events must actively incorporate some element of case-by-case review and determination. While the source and cause of some OPPCs may be clear, most would require further investigation and an internal root cause analysis to determine the cause of the serious preventable event and to assign ultimate accountability.

Pursuant to these guidelines, hospitals will not seek payments for additional days directly resulting from a PPC.

Reporting Other Provider-Preventable Conditions (OPPCs).

The following OPPCs must be reported to Medicaid by encrypted emailing of the required information to: *mailto:AdverseEvents@medicaid.alabama.gov*.

Each hospital will receive a password specifically for e-mail reporting. Reportable "OPPCs" include but are not limited to:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Surgery on a wrong body part
- Wrong surgery on a patient
- Surgery on a wrong patient

Reports will require the following information: Recipient first and last name, date of birth, Medicaid number, date event occurred and event type. A sample form is on the Alabama Medicaid Agency website at: http://medicaid.alabama.gov/content/4.0_Programs/4.4_Medical_Facilities/4.4.1_Hospital_Services/4.4.1.3_Adverse_Events.aspx although hospitals may submit their own form as long as it contains all required information.

NOTE:

***Reporting is required only when not filing a UB-04 claim.**

Reporting Hospital–Acquired Conditions (HAC) and Present on Admission (POA) on the UB-04 Claim Form

Psychiatric hospitals and PRTF's should use the POA indicator on claims for these HACs as identified by Medicare other than Deep Vein Thrombosis (DVT)/Pulmonary Embolism (PE) following total knee replacement or hip replacement surgery in pediatric and obstetric patients. If no claim is submitted for the event or the event cannot be filed on a UB-04 claim form, then the Alabama Medicaid Agency is to be notified via encrypted e-mail at AdverseEvents@medicaid.alabama.gov . The following information will be required: Recipient first and last name, date of birth, Medicaid number, date of event occurrence and event type. A sample form can be found on the Alabama Medicaid Agency website or a hospital may submit their own form as long as it contains all of the required information. Below are Hospital Acquired Conditions (HACs) with ICD-9 Codes that hospitals are required to report on the UB-04 claim form:

Selected HAC	CC/MCC (ICD-9-CM Codes)	CC/MCC (ICD-10-CM Codes)
Foreign Object Retained After Surgery	998.4 (CC) and 998.7 (CC)	T81.500A to T81.599A T81.60XA to T81.69XA
Air Embolism	999.1 (MCC)	T80.0XXA
Blood Incompatibility	999.60 (CC) 999.61 (CC) 999.62 (CC) 999.63 (CC) 999.69 (CC)	T80.30XA T80.319A T80.310A T80.311A T80.39XA
Pressure Ulcer Stages III & IV	707.23 (MCC) and 707.24 (MCC)	L89.003 to L89.93 L89.004 to L89.94
Falls and Trauma: -Fracture -Dislocation -Intracranial Injury -Crushing Injury -Burn -Electric Shock	Codes within these ranges on the CC/MCC list: 800-829 830-839 850-854 925-929 940-949 991-994	 S02.0XXA to T07 S03.0XXA to S91.109A S06.0X0A to S01.90XA S07.0XXA to S77.20XA T26.50XA to T32.99 T33.011A-T70.9XXA
Catheter-Associated Urinary Tract Infection (UTI)	996.64—Also excludes the following from acting as a CC/MCC: 112.2 (CC), 590.10 (CC), 590.11 (MCC), 590.2 (MCC), 590.3 (CC), 590.80 (CC), 590.81 (CC), 595.0	T83.51XA B37.41 to B37.49 N10

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Selected HAC	CC/MCC (ICD-9-CM Codes)	CC/MCC (ICD-10-CM Codes)
	(CC), 597.0 (CC), 599.0 (CC)	N10 N15.1 N28.84 to N28.86 N11.9 to N13.6 N16 N30.00 and N30.01 N34.0 N39.0
Vascular Catheter-Associated Infection	999.31 (CC) 999.32 (CC) 999.33 (CC)	T80.218A to T80.219A T80.211A T80.212A
Manifestations of poor glycemic control	250.10-250.13 (MCC), 250.20-250.23 (MCC), 251.0 (CC), 249.10-249.11 (MCC), 249.20-249.21 (MCC)	E10.10 to E13.10 E11.00 to E13.01 E15 E08.00 to E13.10 E08.00 to E13.01
Surgical Site Infection, Mediastinitis, Following Coronary Artery Bypass Graft (CABG)	519.2 (MCC) and one of the following procedure codes: 36.10-36.19.	J98.5 See CMS website for listing of associated Procedure Codes
Surgical Site Infection Following Certain Orthopedic Procedures	996.67 (CC) 998.59 (CC) And one of the following procedure codes: 81.01-81.08, 81.23. 81.24 81.31-81.38, 81.83, 81.85	T84.60XA to T84.7XXA K68.11 to T81.4XXA See CMS website for listing of associated Procedure Codes
Surgical Site Infection Following Bariatric Surgery for Obesity	Principal Diagnosis code-278.01, 539.01 (CC), 539.81 (CC) OR 998.59 (CC) and one of the following procedure codes: 44.38,44.39, or 44.95	Principal Diagnosis code E6601 and one of the secondary diagnosis codes: K68.11, K9501, K9581 or T81.4XXA See CMS website for listing of associated Procedure Codes
Surgical Site Infection Following Cardiac Implantable Electronic Device (CIED)	996.61 (CC) or 998.59 (CC) And one of the following procedure codes: 00.50, 00.51, 00.52, 00.53, 00.54, 37.80, 37.81, 37.82, 37.83, 37.85, 37.86, 37.87, 37.94, 37.96, 37.98, 37.74, 37.75, 37.76, 37.77, 37.79, 37.89	K68.11, T814XXA. T826XXA, T827XXA See CMS website for listing of associated Procedure Codes
Deep Vein Thrombosis and Pulmonary Embolism Following Certain Orthopedic Procedures	415.11 (MCC), 415.13 (MCC), 415.19 (MCC), or 453.40-453.42 and one of the following procedure codes: 00.85-00.87, 81.51-81.52, or 81.54.	T80.0XXA to T82.818A I26.90, I2699 I26.09, I26.99 I82.401 to I82.4Z9 See CMS website for listing of associated Procedure Codes
Iatrogenic Pneumothorax with Venous Catheterization	512.1 (CC) And the following procedure code 38.93	J95.811 and one of the following procedure codes: 05HM33Z 05HN33Z 05HP33Z 05HQ33Z 0JH63XZ

For ICD-10, please use the CMS Diagnosis Listing for POA Exempt Diagnosis Codes at:
https://www.cms.gov/Medicare/Coding/ICD10/index.html

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Select the appropriate fiscal year ICD-10-CM POA Exempt file for the dates of service on the claim. These codes are for recipient encounters occurring between October 1st through September 30th of each fiscal year.

All Diagnosis codes NOT present in the listing require POA indicator.

The psychiatric hospital or PRTFs may use documentation from the physician's qualifying diagnoses to identify POA which must be documented within 72 hours of the occurrence. Medicaid also recommends that the event be reported to Medicaid on the claim or via e-mail within 45 days of occurrence.

Non-payment of provider preventable conditions shall not prevent access to services for Medicaid beneficiaries.

No reduction in payment for a PPC will be imposed on a hospital provider when the condition defined as a PPC for a particular patient existed prior to the initiation of treatment for that patient by that provider.

Reductions in Provider payment may be limited to the extent that the following apply:

- The Identified PPC would otherwise result in an increase in payment.
- Psychiatric hospitals and PRTFs are paid based on a daily per diem rate. It is the responsibility of the hospital to identify any Health Care-Acquired Condition and not seek payment for any additional days that have lengthened a recipient's stay due to a PPC. In reducing the amount of days: Hospitals are to report a value code of '81' on the UB-04 claim form along with any non-covered days and the amount field must be greater than '0'.

It is the responsibility of the psychiatric hospital or PRTFs to identify these events, report them, and not seek any additional payment for additional days. Medicaid will accept all POA indicators as listed below:

- **Y**-Yes. Diagnosis was present at time of inpatient admission.
- **N**-No. Diagnosis was not present at time of inpatient admission.
- **U**-No information in the record. Documentation insufficient to determine if the condition was present at the time of inpatient admission.
- **W**-Clinically undetermined. Provider unable to clinically determine whether the condition was present at the time of inpatient admission.

It is the psychiatric hospital or PRTF's responsibility to include all supporting documentation with the chart for a review to be conducted by Medicaid's contracted Quality Improvement Organization (QIO). Submission of a root cause analysis is not required but may be submitted as part of the documentation to support billing.

A document with frequently asked questions has been posted on the Agency's website under Programs/Hospital Services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

33.4 Cost Sharing (Copayment)

Copayment does not apply to services provided by inpatient psychiatric hospitals or PRTFs.

33.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Psychiatric hospitals and PRTFs billing Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a UB-04 claim form is required. Medicare-related claims must be filed using the Institutional Medicaid/Medicare-related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

33.5.1 Time Limit for Filing Claims

Medicaid requires all claims to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits, for more information regarding timely filing limits and exceptions.

33.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field. Only the diagnosis codes within the range of 290-316 are covered for services under this program.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

33.5.3 Revenue Codes

Refer to the Alabama UB-04 Manual, published by the Alabama Hospital Association, for a complete list of revenue codes.

33.5.4 Place of Service Codes

Place of service codes do not apply when filing the UB-04claim form.

33.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to claims with Third Party Denials.

NOTE:
When an attachment is required, a hard copy UB-04 claim form must be submitted.

Refer to Section 5.8, Required Attachments, for more information on attachments.

33.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

34

34 Behavioral Health

Licensed psychologists and licensed social workers are enrolled for services provided to QMB recipients or to recipients under the age of 21 referred as a result of an EPSDT screening. Licensed counselors and licensed marriage and family therapists are enrolled only for services provided to recipients under the age of 21 referred as a result of an EPSDT screening. The policy provisions for psychologists can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 11.

For those providers seeking to render ABA Therapy services, please refer to Chapter 37 Therapy (Occupational, Physical, Speech and ABA).

Federal regulations require that the State make provisions for handling of recoupments and recoveries. The Alabama Medicaid Agency will actively seek recovery of all misspent Medicaid funds and correctly paid benefits recoverable under Federal law; this statement will apply to the entire Alabama Medicaid Agency Provider Manual Chapter 34. For further understanding of recoupments, recoveries, and liens please refer to Alabama Medicaid Agency Administrative Code, Chapter 33.

The purpose of the recoupments, recoveries and liens effort is to assure that the State and Federal dollars allocated for medical assistance are spent only on those individuals who meet all eligibility criteria; to correct erroneous payments; and to recover benefits correctly paid, but recoverable by law; this statement will apply to the entire Alabama Medicaid Agency Provider Manual Chapter 34. For further understanding of recoupments, recoveries, and liens please refer to Alabama Medicaid Agency Administrative Code, Chapter 33.

34.1 Enrollment

Gainwell enrolls Psychologists and Behaviorial Health providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a psychologist or behavioral health provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for behavioral health-related claims.

NOTE:

All ten digits are required when filing a claim.

Psychology providers are assigned a provider type of 54 (Psychologist). Valid specialties for psychology providers include the following:

- Psychology (112)
- QMB/EPSDT (600)

Behavioral Health providers are assigned a provider type of 07 (Behavioral Health). Valid specialties for behavioral health providers include the following:

- Licensed Professional Counselor / LPC (070)
- Associate Licensed Counselor / ALC (071)
- Licensed Marriage and Family Therapist / LMFT (072)
- Licensed Marriage and Family Therapist Associate / LMFTA (075)
- Licensed Master Social Worker / LMSW (073)
- Licensed Independent Clinical Social Worker / LICSW (074)
- Licensed Psychological Technician / LPT (076)
- QMB/EPSDT (600)

Enrollment Policy for Psychologists and Behavioral Health Providers

Psychology and Behavioral Health providers must meet the following requirements for direct enrollment and participation in Medicaid:

- **Psychologists** – must possess a doctoral degree in psychology from an accredited school or department of psychology; Have a current license issued by the Alabama Board of Examiners in Psychology to practice as a psychologist and operate within the scope of practice as established by the Alabama Board of Examiners in Psychology.
- **Professional Counselor** – must possess a masters degree (or above) in counseling from an accredited school; Have a current license issued by the Alabama Board of Examiners in Counseling to practice as a counselor (LPC, ALC) and operate within the scope of practice as established by the Alabama Board of Examiners in Counseling.
- **Marriage and Family Therapist** - must possess a masters degree (or above) in marriage and family therapy from an accredited school; Have a current license issued by the Alabama Board of Examiners in Marriage and Family Therapy to practice as a marriage and family counselor

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

(LMFT, LMFTA) and operate within the scope of practice as established by the Alabama Board of Examiners in Marriage and Family Therapy.

- **Social Worker** - must possess a masters degree (or above) in social work from an accredited school; Have a current license issued by the Alabama State Board of Social Work Examiners to practice as a social worker (LMSW, LICSW) and operate within the scope of practice as established by the Alabama State Board of Social Work Examiners.
- **Psychological Technician** - must possess a masters degree (or above) in psychology from an accredited school or department of psychology; Have a current license issued by the Alabama Board of Examiners in Psychology to practice as a licensed psychological technician (LPT) and operate within the scope of practice as established by the Alabama Board of Examiners in Psychology. {Must maintain supervision requirements as outlined by the Alabama Board of Examiners in Psychology}.

To enroll as an Alabama Medicaid Behavioral Health Provider the service location must be a physical facility that is not a home residence, a cubicle located within an office space, or a shaped space inside another business. The physical facility must also have visible signage bearing the name of the business.

34.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Medicaid bases reimbursement of services on a fee for service for the procedure codes covered for behavioral health providers.

Behavioral Health services are only covered for QMB recipients (psychologists, licensed social workers), recipients referred directly as a result of an EPSDT screening (psychologists, licensed counselors, licensed marriage and family therapists) or recipients referred cascading by the psychologist (LMSW, LICSW). Treatment eligibility is limited to individuals with a diagnosis within the ICD-10 code range of F0150-F069 or F080-F099, assigned by a licensed physician, a licensed psychologist, a licensed physician's assistant, a certified registered nurse practitioner, a licensed counselor or a licensed marriage and family therapist (as approved by a psychologist) as listed in the most current International Classification of Diseases.

The provider agrees when billing Medicaid for a service that the provider will accept as payment in full, the amount paid by Medicaid for that service, plus any cost-sharing amount to be paid by the recipient, and that no additional charge will be made. Conditional collections from recipients, made before Medicaid pays, which are to be refunded after Medicaid pays, are not permissible. The provider may not charge a recipient or any financially responsible relative or representative of the recipient for Medicaid-covered services, except where a copayment is authorized under the Medicaid State Plan. (42 C.F.R. §447.20). The provider (or its staff) must advise each

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

recipient when Medicaid payment will not be accepted prior to services being rendered, and the recipient must be notified of responsibility for the bill. The fact that Medicaid payment will not be accepted must be recorded in the recipient's medical record. If a provider routinely accepts a Medicaid assignment, he or she may not bill Medicaid or the recipient for a service he or she did not provide, i.e., missed or canceled appointment.

Payments from Medicaid funds can be made only to providers of the services; therefore, no reimbursement can be made to patients who may personally pay for the service rendered.

NOTE:

Behavioral Health providers can bill only those procedures listed in Section 34.6.3, Procedure Codes and Modifiers. Only the diagnosis codes within the range of F0150-F069 or F080-F099 for ICD-10 are covered for treatment services under this program. Intellectual Disability diagnosis codes (F070-F079) are not covered for treatment services **except for Crisis Intervention (performed by a psychologist)**; however, Medicaid will cover diagnostic testing, status exam (96101-96103, 96116 and 96118-96120 even if the resulting diagnosis is Intellectual Disability.

NOTE:

Codes 90832, 90832+90785, 90834, 90834+90785, 90837, 90837+90785, 90846, 90847, 90849, and 90853 may be billed on a weekly basis; although limited to no more than 52 max units per year (combined).

***Exception: Procedure codes 90846, 90847, 90849 and 90853 may be billed on the same date of service as other codes listed in the group above as per CPT® guidelines.**

The Alabama Medicaid Agency will not cover the following therapies as a stand-alone service:

- Equine assisted psychotherapy
- Biofeedback therapy
- Neurobiofeedback therapy
- Sleep therapy
- Dance therapy
- Music therapy
- Art therapy
- Play therapy

However, these therapies may be incorporated into the recipients counseling sessions for **no more than 50%** of the total time of the session. The start and stop time of each of the therapies (i.e. counseling vs alternative therapy) must be clearly documented. If the person administering one of the above therapies is different from the person providing the counseling, the name and credentials of that individual will need to be documented in the progress note as well as a copy of the credentials in the employee file.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

34.3 Service Provision

The Psychologist, LPC/ALC, and LMFT must receive a valid, completed EPSDT referral from the recipient's Primary Physician (PMP) in order to provide behavioral health services to a recipient. For additional information about the EPSDT referral form please refer to Appendix A Well Child Check-Up EPSDT.

In order to provide behavioral health services to a recipient, the LMFT, LMSW or LICSW must receive an Alabama Medicaid Psychology (AMP) Referral form from an Alabama Medicaid enrolled psychologist or may directly receive an EPSDT referral for a recipient with a documented diagnosis.

Medical documentation must be present in the recipient's medical record identifying the psychologist making the referral. The AMP Referral is valid for a maximum of one year from the date that the referral is completed. The referring psychologists signature **and** number of visits or months approved must be documented on the referral in order for the form to be considered a valid referral.

The AMP Referral Form and instructions for completing can be found here: http://www.medicaid.alabama.gov/content/4.0_Programs/4.2_Medical_Services/4.2.5_Health_Professionals/4.2.5.1_Psychologist_Billing.aspx.

Both the EPSDT and AMP Referral Form must be maintained on file and in the recipient's medical record.

Client Intake

An intake evaluation must be performed for each client considered for initial entry into any course of covered services. A fillable or printable version of this Medicaid approved tool (Diagnostic Intake Interview) can be downloaded at the following link: http://www.medicaid.alabama.gov/content/4.0_Programs/4.2_Medical_Services/4.2.5_Health_Professionals/4.2.5.1_Psychologist_Billing.aspx.

The intake evaluation process must include relevant information from among the following areas:

- Family history
- Educational history
- Medical history
- Educational/vocational history
- Psychiatric treatment history
- Legal history
- Substance abuse history
- Mental status exam
- Summary of the significant problems the client is experiencing

A comprehensive behavioral health assessment must be conducted whenever a behavioral health or developmental screening indicates the

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

presence of a behavioral health symptom(s). For assessments that require certifications and/or trainings beyond the users education, the certification/training must be successfully completed **prior to** the use/administration of the chosen behavioral health assessment tool(s). Failure to possess the required certifications and/or trainings will subject the provider to program integrity action up to and including recoupment.. Examples of screening tools that can be used include, but are not limited to:

- Beck Depression Inventory and Child Behavior Checklist
- Behavior Assessment System for Children, 2nd Edition (BASC-2)
- Brief Symptom Inventory (BSI)
- Brown Attention-Deficit Disorder Scales
- Child and Adolescent Needs and Strengths (CANS)
- Childhood Autism Rating Scale (CARS)
- Children's Depression Inventory (CDI)
- Likert Scale
- Minnesota Multiphasic Personality Inventory (MMPI)
- Parent-Child Interaction Assessment-II
- State-Trait Anger Expression Inventory-2 , Child & Adolescent (STAXI-2 C/A)
- Wechsler Intelligence Scale for Children-Fourth Edition (WISC-IV)

Treatment Planning

The intake evaluation process must result in the development of a written treatment plan completed by the fifth client visit.

The treatment plan shall:

- Identify the clinical issues that will be the focus of treatment
- Specify those services necessary to meet the client's needs (Services are defined as the specific CPT® code descriptions as outlined on the grid in Section 34.6.3 Procedure Codes and Modifiers)
- Include referrals as appropriate for needed services
- Identify expected outcomes toward which the client and therapist will work to have an effect on the specific clinical issues
- The (initial) Treatment Plan is valid when the recipient/legally responsible person **and** the person who developed the plan sign and date it. Unless clinically contraindicated, the recipient will sign or mark the treatment plan to document the recipient's participation in developing /revising the plan. If the recipient is under the age of 14 or adjudicated incompetent, the parent, foster parent or legal guardian must sign the treatment plan.

Services must be specified in the treatment plan in order to be paid by Medicaid. The treatment plan can be developed and carried out by the licensed social worker ***after*** diagnosis has been approved or received from the physician or psychologist practicing with their scope of practice.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The psychologist and/or behavioral health provider must review the treatment plan once every three months to determine the client's progress toward treatment objectives, the appropriateness of the services furnished, and the need for continued treatment. This review shall be documented in the client's clinical record by notation on the treatment plan. This review shall note the treatment plan has been reviewed and updated or continued without change. Treatment plans being carried out by an allied mental health provider must be reviewed/approved by the associated psychologist. **All** treatment plans must be updated annually. Treatment plan reviews should be conducted every 3-6 months to monitor progress.

Added: Treatment plan reviews…to monitor progress.

Treatment plan review is not a face-to-face service, therefore the recipient/or legally responsible person signature is not required. The quarterly treatment plan review may be conducted by the Psychologist, Behavioral Health provider or by another professional with the same credentialing (or above), such as a supervisor or a peer. Only the reviewing professionals' signatures (handwritten or associated computerized electronic health record {not typed} signature) or initials and dates are necessary. A stamped signature is not acceptable.

Service Documentation

Documentation in the client's record for each session, service, or activity for which Medicaid reimbursement is requested must include, the following:

- The identification of the specific services rendered (Services are defined as the specific CPT® code descriptions as outlined on the grid in Section 34.6.3 Procedure Codes and Modifiers)
- The date and the amount of time (time started and time ended---excluding time spent for interpretation of tests---applicable to psychologists only) that the services were rendered
- The signature of the staff person who rendered the services
- The identification of the setting in which the services were rendered
- A written assessment of the client's progress, or lack thereof, related to each of the identified clinical issues discussed
- All entries must be legible and complete, and must be authenticated and dated (***prior*** to being submitted for reimbursement) by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. The author of each entry must be identified and must authenticate his or her entry. Authentication may include handwritten signatures, written initials (for treatment plan reviews), or computer entry (associated with electronic records—not a typed signature). A stamped signature is not acceptable.

The list of required documentation described above will be applied to justify payment by Medicaid when clinical records are audited. Payments are subject to recoupment when the documentation is insufficient to support the services billed. LPCs/ALCs and LMFTs no longer require psychologist signatures on any documents related to the treatment of a Medicaid recipient.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Service Documentation Additional Information

To further clarify service documentation questions/issues, please note the following:

Documentation

Documentation must not be repetitive (examples include, but are not limited to the following scenarios):

- Progress Notes that look the same for other recipients.
- Progress notes that state the same words day after day with no evidence of progression, maintenance or regression.
- Treatment Plans that look the same for other recipients.
- Treatment Plans with goals and interventions that stay the same and have no progression.

Progress Notes

- Progress Notes must not be ***preprinted*** or predated.
- The progress note must match the goals on the plan and the plan must match the needs of the recipient. The interventions must be appropriate to meet the goals. There must be clear continuity between the documentation.
- Progress Notes must provide enough detail and explanation to justify the amount of billing.

Treatment Plan

- The Treatment Plan must not be signed or dated prior to the plan meeting date.
- The Treatment Plan is valid when the recipient/legally responsible person **and** the person who developed the plan sign and date it.

Authentication

- Authors must always compose and sign their own entries (whether handwritten or electronic). An author should never create an entry or sign an entry for someone else or have someone else formulate or sign an entry for them. If utilizing a computer entry system, the program must contain an attestation signature line and time & date entry stamp. A stamped signature is not acceptable.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- If utilizing a computer entry system, the program must contain an attestation signature line and time & date entry stamp. There must also be a written policy for documentation method in case of computer failure/power outage.

Corrections

- Corrections must be made legally and properly by drawing a line through the entry and making sure that the inaccurate information is still legible. Write "error" by the incorrect entry and initial. Do not obliterate or otherwise alter the original entry by blacking out with marker, using whiteout, or writing over an entry. White Out, Liquid Paper, or any form of correctional fluid or correctional tape is not acceptable on **any** records whether being used as a corrective measure or to individualize an original template or for any other reason.

Communication

- It is the responsibility of the provider to ensure that the primary care physician has been made aware of treatment plan goals by the fifth recipient visit, annually prior to EPSDT renewal; and, when requesting more than one therapy session per week. Documentation of communication will be required i.e. treatment note, fax confirmation sheet.

34.4 Prior Authorization and Referral Requirements

Psychology procedure codes generally do not require prior authorization. Any service warranted outside of these codes must have prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

A current completed Alabama Medicaid Agency Referral Form must be present in the patient's medical record that identifies the treated conditions referred as the result of an EPSDT screening or payments for these services will be recouped. The referral form must be current and appropriately completed by the screening physician including the date that the problem was identified and the reason for the referral. Refer to Appendix A Sections 4.2 – 4.6.

Signature Requirement for Referrals: Effective May 16, 2012:
For hard copy referrals, the printed, typed, or stamped name of the primary care physician with an original signature of the physician or designee is required. **Stamped or copied signatures will not be accepted**. For electronic referrals, provider certification is made via standardized electronic signature protocol.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

34.5 Cost Sharing (Copayment)

The copayment amount for office visit* including crossovers is:

$3.90 for procedure codes reimbursed $50.01 and greater
$2.60 for procedure codes reimbursed between $25.01 and $50.00
$1.30 for procedure codes reimbursed between $10.01 and $25.00

* The following CPT® codes are considered office visits and the copayment is based on Medicaid's allowed amount (fee schedule) for each procedure:

90847, 90849, 90853, 90865, 92002, 92004, 92012, 92014, 99201, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99241, 99242, 99243, 99244, 99245, 99281, 99282, 99283, 99284, 99285, 99341, 99342, 99343, 99344, 99345, 99347, 99348, 99349, 99350

If one of these CPT® codes is applicable for your practice, then copay applies.

Copayment does not apply to services provided for pregnant women, nursing facility residents, recipients less than 18 years of age, emergencies, and family planning. Native American Indians that present an "active user letter" issued by Indian Health Services (IHS) will be exempt from the Medicaid required copayment.

The provider may not deny services to any eligible Medicaid recipient because of the recipient's inability to pay the cost-sharing (copayment) amount imposed.

34.6 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Behavior Health providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare-related Claim Form.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

This section describes program-specific claims information. Providers should refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

34.6.1 Time Limit for Filing Claims

Medicaid requires all claims for Behavioral Health to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

34.6.2 Diagnosis Codes

The *International Classification of Diseases -10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field. Only the ICD-10 diagnosis codes within the range of F0150-F69 and F80-F99 are covered for services under this program.

34.6.3 Procedure Codes and Modifiers

The following procedure codes apply when filing claims for behavioral health services billed by a psychologist. The (837) Professional and Institutional electronic claims and the paper claim have been modified to accept up to four procedure code modifiers.

Claims without procedure codes or with invalid codes will be denied. Only the procedure codes/service descriptions listed in this section are covered under this program. Some codes are covered for QMB recipients only. Check the guidelines following this grid.

CPT® Code	*Description*	*See Note*	*Daily Max*	*Annual Max*
90791	Psychiatric diagnostic evaluation	1	1	1
90791 +90785	Psychiatric diagnostic evaluation with interactive complexity	1	1	1

All rights reserved. Applicable FARS/DFARS apply.

96116	Neurobehavioral status exam (clinical assessment of thinking, reasoning and judgement, e.g., acquired knowledge, attention, language, memory, planning and problem solving, and visual spatial abilities), by physician or other qualified health care professional, both face-to-face time with the patient and time interpreting test results and preparing the report; **first hour**			
96121	Each additional hour (List separately in addition to code for primary procedure)			
96146	Psychological or neuropsychological test administration, with single automated instrument via electronic platform, with automated result only		1	1

Reimbursable Codes for LPCs, LMFTs, LMSWs, LICSWs, and LPTs

The following codes are billable by the above named behavioral health professionals operating within their scope of practice. 90791 (billable by the **LPC/ALC and LMFT** only); 90832, 90834, 90837 (and with 90785 add-on for interactive complexity), 90846, 90847, 96130/96131, 96132/96133, 96138/96139, 96146.

LPTs: 90791, 96130, 96131, 96138 and 96139

The description, notes and daily/annual limitations apply as listed in the above grid, and as outlined below. It is the responsibility of the provider to keep up with any and all updates and/or changes to CPT® and/or HCPCS ® codes applicable to billing.

Individual psychotherapy codes should be used only when the focus of the treatment encounter involves psychotherapy. Psychotherapy codes should not be used as generic psychiatric service codes.

Guidelines for Covered Procedure Codes:

1. Codes 90791 and -90791+90785 have a combined annual max limitation of 1. The LICSW or LGSW may complete the Intake, but it must be reviewed **and** approved by the Psychologist, LPC or ALC. This code is billable by the psychologist, LPT, LPC, LMFT and ALC **only**.
2. Please note 90837 / 90837+90785 are now the codes to be used to reflect 60 minutes of face-to-face time, and is included in the 52 unit annual max limitation.
3. Medicaid will not accept psychiatric therapy procedure codes 90832-90837 being billed on the same date of service as an E&M service by the same physician or mental health professional group.
4. Procedure codes 90847 and 90849 are used to describe family participation in the treatment process of the client. Code 90847 is used when the patient is present. Code 90849 is intended for group therapy sessions for multiple families when similar dynamics are occurring due to a commonality of problems in the family members in treatment.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Group therapy must be performed by a clinical psychologist licensed in the state of Alabama. Group Therapy/Counseling progress notes must support that a process-oriented service involving group dynamics was provided.

Family therapy is defined as the treatment of family members as a family unit, rather than an individual patient. When family therapy without the patient present (90846) or family therapy with the patient present (90847) is provided, the session is billed as one service (one family unit), regardless of the number of individuals present at the session. These codes are now time based, 50 minutes and a minimum of 26 minutes must be documented in the start and stop time in order to be billed.

If there is more than one eligible child and no child is exclusively identified as the primary recipient of treatment, then the oldest child's recipient id number ***must*** be used for billing purposes. When a specific child is identified as the primary patient of treatment, that child's recipient ID number ***must*** be used for billing purposes. A family may be biological, foster, adoptive or other family unit.

A family is *not* a group and providers may *not* submit a separate claim for each eligible person attending the same family therapy session.

The therapist must document all attendees presence and participation.

All members of the family in attendance for the session will sign/mark the signature log or progress note to document their participation in the session (in addition to the therapist documenting their presence/participation).

5. Procedure code 90853 is used when psychotherapy is administered in a group setting with a trained group leader in charge of several clients. Personal and group dynamics are discussed and explored in a therapeutic setting allowing emotional catharsis, instruction, insight, and support. **Group therapy must be performed by a clinical psychologist licensed in the state of Alabama.** Group Therapy/Counseling progress notes must support that a process-oriented service involving group dynamics was provided. Group Therapy/Counseling for children and/or adolescents may not exceed 10 (ten) recipients.

6. **Professional and Technical Activities Performed by the Psychologist**

   Please note that the new codes do not cross-walk on a one-to-one basis with the deleted codes. The single code, 96101, will now be billed using up to four (4) codes; two (2) codes for Psychological Evaluation Services (96130, 96131) and two (2) for Test Administration and Scoring (96136, 96137).

   Evaluation services include interpretation of test results and clinical data, integration of patient data, clinical decision making, treatment planning, report generation, and interactive feedback to the patient, family member(s) or caregiver(s).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The first hour of evaluation is billed using 96130 and each additional hour needed to complete the service is billed with code add-on 96131.
- CPT® Time Rules allow an additional unit of a time-based code to be reported as long as the mid-point of the stated amount of time is passed. Beyond the first hour (96130), at least an additional 31 minutes of work must be performed to bill the first unit of the add-on code 96131.

Evaluation services must always be performed by the professional prior to test administration, and must be billed on the last date of service, but documented in the medical record the actual date(s) the service is performed.
Test administration and scoring services **performed by the psychologist** includes time spent to administer and score a minimum of two (2) psychological tests.

- The first 30 minutes of test administration and scoring is billed using 96136 and each additional 30-minute increment needed to complete the service is billed with code 96137.
- CPT® time rules apply to the add-on code if, beyond the first 30 minutes, at least an additional 16 minutes of work is performed.

Professional Services Performed by the Psychologist and Technical Services Performed by Technician
Please note that the new codes do not cross-walk on a one-to-one basis with the deleted codes. The single code, 96102, will now be billed using four (4) codes; two (2) codes for Psychological Evaluation Services (96130, 96131) and two (2) for Test Administration and Scoring by Technician (96138, 96139).

Psychological Evaluation services include interpretation of test results and clinical data, integration of patient data, clinical decision making, treatment planning, report generation, and interactive feedback to the patient, family member(s) or caregiver(s).

- The first hour of evaluation is billed using 96130 and each additional hour needed to complete the service is billed with code add-on 96131.
- CPT® Time Rules allow an additional unit of a time-based code to be reported as long as the mid-point of the stated amount of time is passed. Beyond the first hour (96130), at least an additional 31 minutes of work must be performed to bill the first unit of the add-on code 96131.

Evaluation services must always be performed by the professional prior to test administration, and must be billed on the last date of service, but documented in the medical record the actual date(s) the service is performed.
Test administration and scoring services **performed by the Technician** includes time spent to administer and score a minimum of two (2) psychological tests.

- The first 30 minutes of test administration and scoring is billed using 96138 and each additional 30-minute increment needed to complete the service is billed with code 96139.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- CPT® time rules apply to the add-on code if, beyond the first 30 minutes, at least an additional 16 minutes of work is performed.

The units of measure for testing codes 96130 – 96131 has been changed from a 1 hour measurement increment to a 30 minute measurement increment, therefore when billing claims .5 units will equal 30 minutes; 1 unit will equal 1 hour; 1.5 units will equal 1 ½ hours, etc. Providers **cannot** bill less than a 30-minute increment. (*under daily max=combination of the codes).

Each test performed must be medically necessary; therefore, standardized batteries of tests are not acceptable. Nonspecific behaviors that do not indicate the presence of, or change in, a mental illness would not be an acceptable indication for testing. Psychological or psychiatric evaluations that can be accomplished through the clinical interview alone would not require psychological testing and such testing might be considered medically unnecessary. A psychological technician with adequate training may directly provide services listed in the **Code of Alabama Governing Psychologists** Section 34-26-1 without supervision; the licensed psychologist must sign the report. A licensed psychologist must be on-site where an allied mental health professional is performing testing services within their scope of practice, and the licensed psychologist must sign the report.

7. Intellectual Disability diagnosis codes (ICD-10 F70-F79) are not covered for treatment services; however, Medicaid will cover diagnostic testing, status exam (96130/96131, 96136/96137,96138/96139, 96116 and 96132/96133, 96136/96137, 96138/96139), even if the resulting diagnosis is intellectual disability. The record must show the tests performed, scoring and interpretation, as well as the time involved (time started and time ended). Billing should document the **total** time for face-to-face administration, scoring, interpretation and report writing. The test(s) given on the date of service billed must be documented in the treatment note for post payment review purposes. When scoring, interpreting and report writing for test(st) that were administered by a BHP or an AMHP, the documentation must include: the total time spent completing the report, the actual date(s) and names of the test(s) administered as well as the name of the BHP or AMHP who administered the test for the specified recipient in the treatment note for post payment review purposes. The units of measure for testing codes 96132/96133 has been changed from a 1 hour measurement increment to a 30 minute measurement increment, therefore when billing claims .5 units will equal 30 minutes; 1 unit will equal 1 hour; 1.5 units will equal 1 ½ hours, etc. Providers **cannot** bill less than a 30-minute increment. (*under daily max=combination of the codes)

   Each test performed must be medically necessary; therefore, standardized batteries of tests are not acceptable. Nonspecific behaviors that do not indicate the presence of, or change in, a mental illness would not be an acceptable indication for testing. Psychological or psychiatric evaluations that can be accomplished through the clinical interview alone would not require psychological testing and such testing might be considered medically unnecessary. A psychological technician with adequate training may directly provide services listed in the **Code of Alabama Governing Psychologists** Section 34-26-1 without

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

supervision; the licensed psychologist must sign the report. A licensed psychologist must be on-site where an allied mental health professional is performing testing services within their scope of practice, and the licensed psychologist must sign the report.

8. Code 96146 describes psychological/ neuropsychological testing by a computer. CPT® code 96146 includes a single automated psychological or neuropsychological instrument that is administered via electronic platform (e.g. computer) and formulates in an automated result. Only report 96146 for a single test administered via electronic platform. Do not report 96146 for administration of 2 or more tests and/or if test administration is performed by professional or technician. This code is billed only **once** as one service regardless of the number of tests taken or time spent by the recipient completing the test. The computer code is used only when the recipient is taking a computer-based test unassisted. This code can only be billed if the computer is used to score tests.

9. These procedure codes may be used in any combination for no more than 52 units total annually. Procedure codes 90846, 90847, 90849 and 90853 may be billed on the same date of service as other codes listed in this group as per CPT® guidelines. For exceptional circumstances where more than 52 units will be needed, consideration for request must be submitted.

10. Procedure Code 96116 is intended to describe the performance of gathering information to provide an important first analysis of brain dysfunction and progression and changes in the symptoms over time. This exam must include screening for impairments in acquired knowledge, attention, language, learning, memory, planning and problem solving, and visual-spatial abilities. This code has been revised and should no longer be billed in multiple units.

    This service includes an initial interview to collect clinical information prior to evaluation and test administration and scoring services.

    - The first hour of the exam is billed with CPT® code 96116 and each additional hour needed to complete the exam is billed using code 96121.

    CPT® Time Rules allow an additional unit of a time-based code to be reported as long as the mid-point of the stated amount of time is passed. Beyond the first hour (96116), at least an additional 31 minutes of work must be performed to bill additional unit(s) of the add-on code 96121.

NOTE:

Psychological Testing codes 96130, 96131, 96136, 96137, 96138, and 96139 can be billed in any combination for a max of 5 units annually. Neuropsychological Testing codes 96132, 96133, 96136, 96137, 96138, and 96139 can be billed in any combination for a max of 5 units annually.

11. For consideration of lifting the maximum cap on weekly unit limitations, submit a cover letter, documentation of medical necessity **and** the exceptional circumstance (*i.e. how the recipient is an eminent danger to self or others and/or is at risk for hospitalization or decompensation*) along with the claim, related progress note(s) and cover letter to the following address:

    Associate Director, Mental Health Programs
    P.O. Box 5624
    Montgomery, AL 36103-5624

    A sample Psychologist Override Request form (that can be used in lieu of a cover letter) can be found at:
    http://www.medicaid.alabama.gov/documents/9.0_Resources/9.4_Forms_Library/9.4.11_Mental_Health/9.4.11_Psychology_Override_Request_Template.pdf

12. Crisis Intervention is defined as immediate emergency intervention performed only by **the psychologist** to ameliorate a client's maladaptive emotional/behavioral reaction. Service is designed to resolve the crisis and develop symptomatic relief, increase knowledge of where to turn for help at a time of further difficulty, and facilitate return to pre-crisis routine functioning.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Identifying the maladaptive reactions exhibited by the client
- Evaluating the potential for rapid regression
- Resolving the crisis
- Referring the client for treatment at an alternative setting, when indicated

1 unit=15 minutes; maximum billable units are 4 units per recipient per day; This code can also be performed (and reimbursed) for recipients with an Intellectual Disability, ICD-10 diagnosis codes (F070-F079).

13. "Billed on a weekly basis" means per calendar week (Sunday to Saturday).

14. It is the responsibility of the provider to keep up with any and all updates and/or changes to CPT® and/or HCPCS ® codes applicable to billing.

Use of Modifiers

Codes billed by an LPC, ALC, LMFT, LMFTA, LICSW, LGSW, LPT or with an HO modifiers will be reimbursed at 75% of the allowable amount.

Modifier 59 (Distinct Procedural Service)

Under certain circumstances eligible psychologist (and/or allied professional mental health staff) staff may need to indicate that a procedure or service was distinct or independent from other services performed on the same day. Modifier 59 is used to identify procedures/services that are not normally reported together, but are appropriate under the circumstances. This may represent a different session or patient encounter, not ordinarily encountered or performed on the same day by the same eligible psychologist (and/or allied professional mental health staff) staff. *However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used.*

According to the CPT® book, modifier 59 is described as being necessary to describe a distinct procedural service. This modifier should only be used to show a distinct procedural service when a comprehensive/component coding pair is billed. Modifier 59 should not be billed to represent that multiple services of the same procedure code were performed.

A comprehensive/coding pair occurs when one code is considered a component procedure and the other code is considered a comprehensive procedure. These code pairs are frequently referred to as bundled codes thus meaning the component code is usually considered an integral part of the comprehensive code. Therefore, in most instances the most comprehensive code only should be billed and the component code should be denied as re-bundled or mutually exclusive.

Modifier 59 should only be used in conjunction with a comprehensive/ coding pair procedure when appropriately unbundling the code pair. This modifier 59 should not be billed with the comprehensive code. The component code can be unbundled or allowed separately, in certain situations. If the two

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

services are performed at two different times of day, then modifier 59 can be submitted with the component procedure code.

In order to communicate the special circumstances of the component/ comprehensive code pair unbundling, diagnoses codes must be utilized as appropriate on the claim form. In some cases, it may be necessary to attach a detailed explanation of services rendered to further explain the reason for the unbundling of code pairs.

CMS publishes the National Correct Coding Initiative Coding Policy Manual for Medicare and Medicaid Services (https://www.medicaid.gov/medicaid/program-integrity/ncci/index.html) and this may be used as a reference for claims-processing edits. The manual is updated annually, and the NCCI edits are updated quarterly. It is the responsibility of the provider to check the site quarterly for any billing related updates.

NOTE:

Procedure codes 90862, pharmacologic management, and 90865, narcosynthesis for psychiatric diagnostic and therapeutic purposes, **are covered for physicians only** and may not be performed or billed by psychologists.

34.6.4 Place of Service Codes

The following place of service codes apply when filing claims for behavioral health services:

POS Code	*Description*
03	School
11	Office
12	Home
21	Inpatient Hospital /(Psychologist Only)
22	Outpatient Hospital
23	Emergency Room – Hospital
31	Skilled Nursing Facility or Nursing Facility
32	Nursing Facility
51	Inpatient Psychiatric Facility (Psychologist Only)
52	Psychiatric Facility Partial Hospitalization
53	Community Mental Health Center
54	Intermediate Care Facility/Individuals With Intellectual Disabilities
55	Residential Substance Abuse Treatment Facility
56	Psychiatric Residential Treatment Center
72	Rural Health Clinic
99	Other Unlisted Facility

34.6.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:
When an attachment is required, a hard copy CMS-1500 claim form must be submitted.

Refer to Section 5.8, Required Attachments, for more information on attachments.

34.7 Covered Services Eligible for Telemedicine

Refer to Chapter 112, Telemedicine Services, for general information and limitations.

34.8 For More Information

This section contains a cross-reference to other relevant sections in the manual.

35

35 Renal Dialysis Facility

End Stage Renal Disease (ESRD) services are outpatient maintenance services provided by a freestanding ESRD facility or hospital-based renal dialysis center.

The policy provisions for Renal Dialysis Facility providers can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 24.

35.1 Enrollment

Gainwell enrolls Renal Dialysis Facility providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a renal dialysis provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for dialysis-related claims.

NOTE:

The 10-digit NPI is required when filing a claim.

Renal Dialysis Facility providers are assigned a provider type of 30 (Renal Dialysis Facility). The valid specialty for Renal Dialysis Facility providers is Hemodialysis (300).

Enrollment Policy for Renal Dialysis Facility Providers

To participate in Medicaid, End Stage Renal Disease (ESRD) facilities/centers must meet the following requirements:

- Certification for participation in the Title XVIII Medicare Program
- Approval by the appropriate licensing authority

Satellites and sub-units of facilities or centers must be separately approved and contracted with Medicaid.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Change of Ownership (CHOW) and Closures

Medicaid will mirror Medicare's Change of Ownership (CHOW) Policy Refer to Chapter 19, Hospital for additional information on Change of Ownership

35.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Medicaid covers maintenance dialysis treatments when they are provided by a Medicaid-enrolled hospital-based renal dialysis center or a freestanding ESRD facility. The maintenance dialysis treatments do not count against the routine outpatient visit limit.

Deleted: ~~is~~
Added: and acute kidney…dialysis services are

Hemodialysis and acute kidney injury (AKI) dialysis services are limited to 156 sessions per year, which provides three sessions per week.

Continuous Ambulatory Peritoneal Dialysis (CAPD) and Continuing Cycling Peritoneal Dialysis (CCPD) are furnished on a continuous basis, not in discrete sessions, and will be paid a daily rate, not on a per treatment basis. Providers are to report the number of days in the units field on the claim.

The daily IPD or CAPD/CCPD payment does not depend upon the number of exchanges of dialysate fluid per day (typically 3-5) or the actual number of days per week that the patient undergoes dialysis. The daily rate is based on the equivalency of one week of IPD or CAPD/CCPD to one week of hemodialysis, regardless of the actual number of dialysis days or exchanges in that week.

Reimbursement will be based on a composite rate consisting of the following elements of dialysis treatment:

- Overhead costs
- Personnel services, such as administrative services, registered nurse, licensed practical nurse, technician, social worker, and dietician
- Equipment and supplies
- Use of a dialysis machine
- Maintenance of the dialysis machine
- ESRD-related laboratory tests
- Biologicals and certain injectable drugs, such as heparin and its antidote

NOTE:

Dialysis facilities that have a physician who performs EKGs on-site can apply to enroll the physician with payment going to the facility. The CPT-4 procedure codes for EKG tracing and interpretation may be billed using the physician NPI on the CMS-1500 claim form.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Laboratory Services

Laboratory tests listed below are considered routine and are included as part of the composite rate of reimbursement. When any of these tests are performed at a frequency greater than specified below, the additional tests are separately billable and are covered only if they are medically necessary and billed directly by the actual provider of the service. A diagnosis of ESRD alone is not sufficient medical evidence to warrant coverage of additional tests. The nature of the illness or injury (diagnosis, complaint, or symptom) requiring the performance of the test(s) must be present on the claim.

Hemodialysis

The following table lists Hemodialysis tests and frequency of coverage:

Frequency	*Covered Tests*
Per treatment	All hematocrit and clotting time tests furnished incidentally to dialysis treatments.
Weekly	Prothrombin time for patients on anticoagulant therapy; serum creatinine, BUN.
Monthly	Alkaline Phosphates LDH Serum Biocarbonate Serum Calcium Serum Chloride Serum Phosphorous Serum Potassium SGOT Total Protein

Continuous Ambulatory Peritoneal Dialysis (CAPD)

The following table lists CAPD tests and frequency of coverage.

Frequency	*Covered Tests*	
Monthly	BUN	Total Protein
	Creatinine	Albumin
	Sodium	Alkaline Phosphatose
	Potassium	LDH
	CO2	SGOT
	Calcium	HCT
	Magnesium	Hgb
	Phosphate	Dialysis Protein

All laboratory testing sites providing services to Medicaid recipients, either directly by provider or through contract, must be certified by Clinical Laboratory Improvement Amendments (CLIA) that they provide the required level of complexity for testing. Providers are responsible for assuring Medicaid that they strictly adhere to all CLIA regulations and for providing Medicaid waiver certification numbers as applicable.

Laboratories that do not meet CLIA certification standards are not eligible for reimbursement for laboratory services from Medicaid.

Ancillary Services

The actual provider of services must bill take home drugs that are medically necessary under the pharmacy program.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Routine parenteral items are included in the facility composite rate and may not be billed separately.

Non-routine injectables administered by the facility may be billed by the facility actually providing this service. Non-routine injectables are defined as those given to improve an acute condition such as arrhythmia or infection.

Routine drugs or injectables administered in conjunction with dialysis procedures are included in the facility's composite rate and shall not be billed separately. These include but are not limited to the following:

- Heparin
- Glucose
- Protamine
- Dextrose
- Mannitol
- Antiarrythmics
- Saline
- Antihistamines
- Pressor drugs
- Antihypertensives
- Trace elements
- Multivitamins

The administration fee for injectables is included in the facility's composite rate and must not be billed separately under a physician NPI.

The following procedures are non-routine and must be billed by the actual provider of service:

Procedure Code	***Description/Limits***
76061	Bone Survey - annually (roentgenographic method or photon absorptrometric procedure for bone mineral analysis)
71020	Chest X-ray - every six months
95900	Nerve Conductor Velocity Test (Peroneal NCV) - every three months
93000	EKG - every three months

Intradialytic Parenteral Nutrition (IDPN) and Intraperitoneal Nutrition (IPN)

Requirements must be met and clearly documented in the medical record for coverage of IDPN and/or IPN. All services rendered are subject to post payment review.

The ordering physician will be responsible for writing a statement of medical necessity. This statement shall certify that the patient cannot be maintained on oral or enteral feedings and that due to severe pathology of the alimentary tract either hyper-alimentation or IDPN/IPN must be given for 100% of nutritional needs. The original signed statement of medical necessity must be kept in the patient’s medical record. This certification statement must be written or stamped on the prescription or reproduced on a form accompanying the prescription. The statement must be signed and dated by the certifying physician at the time of the initial order and updated yearly in accordance with Medicaid billing practice.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

IDPN and IPN involves infusing hyper-alimentation fluids as part of dialysis through the vascular shunt or intra-peritoneally to normalize the amounts of albumin, glucose, and other nutrients in the blood stream to decrease morbidity and mortality associated with protein calorie malnutrition. IDPN and IPN solutions are considered **not covered** for the recipient with a functioning gastrointestinal tract whose need for parenteral nutrition is only due to the following:

- If IDPN or IPN is offered as an addition to regularly scheduled infusions of TPN
- If the recipient would not qualify as a candidate for TPN
- A swallowing disorder
- A temporary defect in gastric emptying such as a metabolic or electrolyte disorder
- A psychological disorder, such as depression, impairing food intake
- A metabolic disorder inducing anorexia, such as cancer
- A physical disorder impairing food intake, such as dyspnea or severe pulmonary or cardiac disease
- A side effect of medication
- Renal failure and/or dialysis

The following requirements must be met in order to bill for IDPN or IPN solutions:

- Documentation in the medical record must validate the patient suffers from a permanently impaired gastrointestinal tract and that there is insufficient absorption of nutrients to maintain adequate strength and weight.
- Documentation must include that the patient cannot be maintained on oral or enteral feedings and that due to severe pathology of the alimentary tract, IDPN or IPN must be given in order to meet 100% of the patient's nutritional needs.
- Infusions must be vital to the nutritional status of the recipient and not supplemental to a deficient diet or deficiencies caused by dialysis.
- Physical signs, symptoms and test results indicating severe pathology of the alimentary tract must be clearly documented in the medical record. This would include, but is not limited to; creatinine (predialysis), serum albumin (predialysis), a low or declining serum cholesterol and phosphorus. Medical records must document inability to maintain weight during a trial of at least four weeks of enteral feeding.

A few solutions used in TPN preparation are considered payable as part of the composite rate for dialysis and should not be billed separately by the pharmacist. These are glucose, dextrose, trace elements and multivitamins.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

EPO and Aranasp Monitoring Policy

Medicaid is requiring providers include the GS modifier, the ED modifier, or the EE modifiers in mirroring Medicare's policy, refer to Chapter 8 of the Medicare Claims Processing Manual for further definition. These modifiers will be considered 'informational only' when billed to Medicaid and no reductions in payment will be made for straight Medicaid claims. Medicaid expects the provider to adhere to the strict definitions defined below:

GS	Dosage of EPO or Darbopoetin Alfa has been reduced and maintained in response to hematocrit or hemoglobin level.
ED	The hematocrit level has exceeded 39.0% (or hemoglobin 1evel has exceeded 13.0g/dL) 3 or more consecutive billing cycles immediately prior to and including the current billing cycle
EE	The hematocrit level has exceeded 39.0% (or hemoglobin level has exceeded 13.0g/dL) less than 3 consecutive billing cycles immediately prior to and including the current billing cycle.

Physician Services

Physician services rendered to each outpatient maintenance dialysis patient provided during a full month shall be billed on a monthly capitation basis using the appropriate procedure code by age as outlined in the CPT. Monthly maintenance dialysis payment (i.e., uninterrupted maintenance dialysis) is comprehensive and covers most of a physician's services whether a patient dialyzes at home or in an approved ESRD outpatient facility. Dialysis procedures are allowed in addition to the monthly maintenance dialysis payment. In general, the Agency follows Medicare guidelines related to monthly capitation payments for physicians.

Physician services included in the monthly capitation payment for ESRD related services include, but are not limited to:

- Assessment and determination of the need for outpatient chronic dialysis therapy
- Assessment and determination of the type of dialysis access and dialyzing cycle,
- Management of the dialysis visits including outpatient visits for evaluation and management, management during the dialysis, and telephone calls.
- Assessment and determination if a recipient meets preliminary criteria as a renal transplant candidate including discussions with family members
- Assessment for a specified diet and nutritional supplementation for the control of chronic renal failure, including specifying quantity of total protein, sodium, potassium, amount of fluids, types of anemia and appropriate treatments, type of arthropathy or neuropathy and appropriate treatment or referral, estimated ideal dry weight, etc. Assessment for diabetic patient's diet and caloric intake is included also.
- Prescribing the parameters of intradialytic management including anticoagulant, dialysis blood flow rates and temperature, duration and frequency of treatments, etc.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The monthly capitation payment is limited to once per month, per recipient, per provider.

The following services are not covered by the monthly capitation payment (MCP) for the attending dialysis physicians and are reimbursed in accordance with usual and customary charge rules:

- Declotting of shunts
- Covered physician services furnished to hospital inpatients by a physician who elects not to receive the MCP for these service, For example, an attending physician who provides evaluation and management (E&M) services for a renal patient in an inpatient setting may bill appropriate CPT hemodialysis procedures in lieu of certain other E&M services for inpatient visits.
- Nonrenal related physician services furnished by the physician providing renal care or by another physician. (These services may not be incidental to services furnished during a dialysis session or office visit necessitated by the renal condition.) For example, physician services rendered to hospitalized inpatient recipients who require dialysis but are not receiving dialysis on that day may use the appropriate procedure code as described in the CPT.

Physician services are allowed for outpatient maintenance dialysis patients not performed as prescribed during a full month or interruptedly. An example of interrupted monthly outpatient dialysis maintenance is preceding and/or following the period of hospitalization.

The CPT codes described by age for physicians rendering outpatient dialysis services that are interrupted during a full month should be billed on a per day basis. These codes should be billed for the days of the month in which the outpatient ESRD related services were performed.

Single or repeated physician assessments are allowed for hemodialysis or dialysis procedures other than hemodialysis. These services are comprehensive and include assessment and management related to the patient's renal dialysis. Please utilize the most descriptive and appropriate CPT dialysis procedure when billing for single or repeated physician evaluation(s).

Dialysis training is a covered service when billed by an approved ESRD facility.

35.3 Prior Authorization and Referral Requirements

Dialysis procedure codes generally do not require prior authorization. Any service that is warranted outside of these codes must have prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

When filing claims for recipients enrolled in the Alabama Coordinated Health Network (ACHN) Program, refer to Chapter 40, to determine whether your services require a referral from the Primary Care Physician (PCP).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

35.4 Cost Sharing (Copayment)

Copayment does not apply to services provided by Renal Dialysis Facility providers.

35.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Renal Dialysis Facility providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a UB-04 claim form is required. Medicare-related claims must be filed using the Institutional Medicaid/Medicare-related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

35.5.1 Time Limit for Filing Claims

Medicaid requires all claims for Renal Dialysis Facilities to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits, for more information regarding timely filing limits and exceptions.

35.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists Medicaid required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Diagnosis Codes for Acute Kidney Injury (AKI) Dialysis Services
One of the following diagnosis codes is required on claims when AKI dialysis services are provided.

Added: Diagnosis Codes for…(chronic) renal failure

Diagnosis Code	Description
N17.0	Acute kidney failure with tubular necrosis
N17.1	Acute kidney failure acute cortical necrosis
N17.2	Acute kidney failure with medullary necrosis
N17.8	Other acute kidney failure
N17.9	Acute kidney failure, unspecified
T79.5XXA	Traumatic anuria, initial encounter
T79.5XXD	Traumatic anuria, subsequent encounter
T79.5XXS	Traumatic anuria, sequela
N99.0	Post-procedural (acute)(chronic) renal failure

35.5.3 Procedure Codes, Revenue Codes, and Modifiers

Medicare Crossover Claims: Medicare claims billed by renal dialysis providers will cross over directly from Medicare and will be processed by Medicaid. Providers are limited to the following codes on Medicare crossover claims.

Deleted: ~~Future Medicare revisions…to this table:~~

Revenue Codes	Condition Codes	Procedure Code	Description
821, 881	71, 72,73, 74, 76	90999	Hemodialysis, home hemodialysis, self-care training, home hemo training and ultrafiltration.
82X, 83X, 88X	84	G0491	Dialysis services for acute kidney injury (AKI) patients
831, 841, 851	74	90945	Dialysis procedure other than hemodialysis
831, 841, 851	73	90993	Dialysis training, patient, including helper.
634: <10,000 units 635: ≥10,000 units		Q4081	Injection epogen
636		J0882	Darbopoetin alfa, injection
636		Appropriate Injectable Codes	Injectable Drugs
250		Appropriate NDC Codes (No HCPCS)	PO Drugs
31X, 921		Appropriate Lab Codes	Labs
270		A4657, A4913 (IV)	Supply/Admin
771		Appropriate vaccine HCPCS	Vaccine

Added: 82X, 83X, 88X…injury (AKI) patients

Added: units
Deleted: ~~635, >or = 10,000~~
Added: 635: ≥10,000 units

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Deleted: ~~2011~~
Added: 2025

Straight Medicaid Claims: All Medicaid services **beginning with dates of service January 1, 2025**, and thereafter, must be billed according to the following policy. Medicaid's new requirements mirror Medicare's as closely as possible.

Added: 82X, 83X, 88X…units per year

Revenue Codes	Condition Codes	Procedure Code	Description
821	71	90999	Hemodialysis, limited to 156 units per year.
82X, 83X, 88X	84	G0491	Dialysis services for acute kidney injury (AKI) patients, limited to 156 units per year.
831, 841, 851		90945	Dialysis procedure other than hemodialysis.
831, 841, 851	73, 74	90993	Dialysis training, patient, including helper. Limited to 12 per lifetime.
634: <10,000 units 635: ≥10,000 unit		Q4081	Injection epogen
636		J0882	Darbopoetin alfa, injection
636		Injectable Codes	See Alabama Medicaid website www.medicaid.alabama.gov for the Injectable Drug Listing.

Added: units
Deleted: ~~635, >or = 10,000~~
Added: 635: ≥10,000 units

35.5.4 Place of Service Codes

Place of service codes do not apply when filing the UB-04 claim form.

35.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to claims with third party denials.

NOTE:

When an attachment is required, a hard copy UB-04 claim form must be submitted.

Refer to Section 5.8, Required Attachments, for more information on attachments.

35.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

36

36 Rural Health Clinics/Independent

Rural health clinics are defined as clinics located in a rural area designated by the Bureau of Census as non-urbanized and medically under-served. Rural health clinics are designed to meet the needs of those recipients who might otherwise be unable to access medical attention.

Independent rural health clinics (IRHC) are physician-owned. These clinics are reimbursed at the reasonable cost rate per visit (encounter) established for the clinic by Medicaid.

Reimbursement for an enrolled out-of-state IRHC will be the lesser of the encounter rate established by the Medicaid Department of the out-of-state IRHC or the average encounter rate established by Alabama Medicaid for in-state facilities.

Refer to the *Alabama Medicaid Agency Administrative Code,* Chapter 8, for policy provisions for independent rural health clinic providers

36.1 Enrollment

Gainwell enrolls rural health clinic providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Medicaid as a rural health clinic provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for claims. The 10-digit NPI is required when filing a claim.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

Rural health clinics are assigned a provider type of 58 and specialty of 081.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Physicians affiliated with rural health clinics are enrolled with a NPI, which links them to the clinic. The provider type for the physician is 58 (Rural Health Clinic). The valid specialties are any of those specialties valid for physicians. Please refer to Chapter 28, Physician, for a listing of valid specialties.

All other personnel affiliated with the rural health clinic, such as physician assistants or nurse practitioners, bill using the clinic's NPI, and are not assigned individual NPIs.

Enrollment Policy for Independent Rural Health Clinics

To participate in the Alabama Medicaid Program, independent rural health clinic (IRHC) providers must meet the following requirements:

- Submit a copy of the following documentation of Medicare certification: the Centers for Medicare and Medicaid Services (CMS) letter assigning the NPI.
- Submit a copy of the clinics budgeted cost report to Medicaid Alternative Services program to establish the reimbursement rate.
- Submit a copy of the CMS Clinical Laboratory Improvement Amendments of 1988 (CLIA) certificate or waiver.
- Operate in accordance with applicable federal, state, and local laws.

The effective date of enrollment of an independent rural health clinic will be the date of Medicare certification. However, if a provider's request for enrollment is received more than 120 days after the date of their Medicare certification, then the effective date will be the first day of the month the enrollment is initially received by Medicaid's Fiscal Agent.

Change of Ownership (CHOW) and Closures

Medicaid will mirror Medicare's Change of Ownership (CHOW) policy. Refer to Chapter 19, Hospital for additional information on Change of Ownership.

The new owner may choose to accept the established reimbursement rate or submit a budgeted cost report to the Medicaid Agency and must submit his choice in writing to Medicaid's Provider Audit Program within 30 days of the change of ownership.

36.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

36.2.1 Covered Services

Rural health clinic visits and inpatient physician services are subject to the same routine benefit limitations as for physicians. Refer to the *Alabama Medicaid Agency Administrative Code,* Chapter 6, for details.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Independent rural health clinic services are reimbursable if they are provided by any of the following individuals:

- Physician
- Physician assistant, nurse practitioner, certified nurse midwife, registered nurse, or clinical social worker as an incident to a physician's service

The physician, physician assistant, nurse practitioner, certified nurse midwife, registered nurse or clinical social worker must conform to all state requirements regarding the scope or conditions of their practice.

The CRNP can make physician-required visits to nursing facilities. However, a CRNP cannot make physician required inpatient visits to hospitals or other institutional settings to qualify for payment to the physician or to satisfy current regulations as physician visits. The PA or CRNP may provide low complexity or straightforward medical decision-making services in the emergency department for Medicaid reimbursement.

A nurse practitioner, physician assistant, or certified nurse midwife must be available to furnish patient care at least fifty (50%) percent of the time the clinic operates

The Independent Rural Health Clinic must be under the medical direction of a physician. Except in extraordinary circumstances, the physician must be physically present for sufficient periods of times, at least every 72 hours for non-remote sites and every seven (7) days for remote sites (a remote site being defined as a site more than 30 miles away from the primary supervising physician's principal practice location), to provide medical care services, consultation, and supervision in accordance with Medicare regulations for Rural Health Clinics. When not physically present, the physician must be available through direct telecommunication for consultation, assistance with medical emergencies, or patient referral. The extraordinary circumstances must be documented in the records of the clinic.

Services covered under the independent rural health clinic program are any medical service typically furnished by a physician in an office or in a physician home visit. Limits are the same as for the Physician Program.

36.2.2 Reimbursement

IRHC services are reimbursed by an all-inclusive encounter rate. All services provided for that date of service will be included in the encounter rate. If a recipient only has lab or x-rays, this will also constitute an encounter.

Encounters are face-to-face contacts between a patient and a health professional for medically necessary services.

Surgical procedures performed in place of service 21 (inpatient) or place of service 22 (outpatient) will be reimbursed fee-for-service.

Contacts with one or more health professionals and multiple contacts with the same health care professional that take place on the same day at a single location constitute a single encounter unless the patient later suffers illness or injury requiring additional diagnosis or treatment.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Reimbursement for an enrolled out-of-state IRHC will be the lesser of the encounter rate established by the Medicaid Department of the out-of-state IRHC or the average encounter rate established by Alabama Medicaid for in-state facilities.

As described in Section 1902(aa) of the Social Security Act, IRHCs will be paid under a prospective payment system rate (PPS rate) effective January 1, 2001. The rate setting period is from October 1 through September 30th. Each IRHC is entitled to the payment amount (on a per visit basis) to which the IRHC was entitled to in the previous fiscal year, increased by the percentage increase in the Medicare Economic Index (MEI) for primary care services, and adjusted to take into account any increase (or decrease) in the scope of services furnished by the IRHC during that fiscal year.

If a service has been eliminated, the Health Center must notify Medicaid that they have discontinued a given service. Medicaid must be notified in writing within ninety (90) calendar days of any termination of service(s). The notification of discontinued service must include the 12-month cost report for the discontinued service leading up to the termination of the service. The Agency may request additional documentation. This decrease in the scope of services furnished will result in a recalculation of the PPS rate. Failure to notify Medicaid of a termination of service may result in recoupment of paid claims.

IRHC services and other ambulatory services provided at the IRHC will be reimbursed by an all-inclusive encounter rate. Refer to the *Alabama Medicaid Agency Administrative Code*, Chapter 56, for details.

Change in Scope (CIS)

An IRHC may request that their PPS rate be adjusted to take into account a change (either increase or decrease) in the scope of services furnished by the IRHC. A change in scope of services is defined as a change in the type, intensity, duration, and/or amount of services provided during a IRHC visit. Change in Scope requests must meet regulatory compliance as required by state and federal law as it relates to the operation of IRHC services provided under the Alabama Medicaid (“Medicaid”) Program.

A change in scope request must be sent to the Managed Care Operations Division for review. The request must specifically state what IRHC service was changed, and specifically detail how the type, intensity, duration, or amount of that service has changed. Medicaid will not review the CIS request until a complete submission is received. A complete submission includes the documentation listed below. The CIS request must be submitted to the Agency no later than 180 days (six months) after the Health Clinic’s fiscal year end. The request shall include, at a minimum, the following items clearly labeled and identified documentation:

1. Narrative of the Qualifying Event or Events including a description of the Event or Events and other relevant information such as the locations affected, the date new services began, time period over which the changes took place or how patients are impacted; any relevant supporting documentation should also be provided. The Health Clinic must specify their fiscal year period in the narrative that will be submitted with the CIS request. Failure to disclose the fiscal year in the narrative will result in an incomplete submission.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

2. A CIS Medicaid cost report with at least 12-months of actual expenses associated with the requested change in scope
    - The Medicaid cost report must reflect ALL clinic visits. Also, initial supporting documentation must include the following:
        - General Ledger Detail (in excel format) for the period under audit
        - Trial Balance (in excel format)
        - Crosswalk of Trial Balance accounts to Medicaid cost report line item
        - Medicare Cost Report for period(s) consistent with the Medicaid Cost Report
3. The IRHC's proposed PPS rate with detailed documentation of how the proposed PPS rate was derived or calculated.
4. A listing of deleted services not reported to Medicaid, if applicable. Listing must include the deleted service and the date the service was deleted.

The Medicaid Agency may request more documentation or clarification of the documentation provided. If the IRHC fails or refuses to provide the documentation requested by the Medicaid Agency, the change in scope request may be denied. IRHCs may submit one CIS request within 12-months of the last submitted CIS request.

NOTE:
A deletion in service(s) does not count towards the 12-month CIS submission limitation.

The Agency will notify the Health Clinic within seven days of receipt of a CIS request. If the Health Clinic does not receive a response within seven days, it is the Health Clinic's responsibility to reach out to the Agency regarding receipt of the CIS request. The Agency will review the CIS request to determine if the CIS request is complete. The Agency will notify the Health Clinic within 30 days regarding the completion status of the CIS request. The Agency will notify the Health Clinic within 60 days from CIS submission completion date of the approved qualifying events.
A change in the scope of service occurs if the IRHC has added or discontinued any service that meets the definition of IRHC services as provided in Section 1905(a) (2) (B) and (C) of the Act, ***and*** the service is included as a covered Medicaid service under the Alabama Medicaid State Plan. A change in the scope of service is defined as a change in the type, intensity, duration and/or amount of services compared to the services offered at the time of the last change of scope rate adjustment.

Type- the FQHC/RHC has added or dropped any service that meets the definition of FQHC/RHC services as provided in section 1905(a) (2) (B) and (C) of the Social Security Act or if the service is included as a covered Medicaid service in the State Plan.

Intensity- a change in the characteristics of services offered in an average visit such that the average patient receives a different array of services.

Amount- an increase or decrease in the quantity of services that an

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

average patient receives in an average visit.

Duration- a change in the average length of time it takes medical providers to complete an average patient visit due to changing circumstances.

A change in scope review will not take increased costs or inflation into account. Further, Patient-Centered Medical Home (PCMH) certification will not qualify for a rate adjustment. When the cost of the changed service has been determined, the incremental/decremental rate adjustment to the individual service will be combined into the overall PPS rate thereby calculating a revised encounter rate. Only the services that changed will be included in the PPS rate calculation during the change in scope request review. If the new PPS rate results in an overall increase or decrease of at least 3 percent of the PPS rate at the time Medicaid receives the change in scope request, then the PPS rate will be adjusted. The effective date of the new PPS rate will be the first day of the month that the Medicaid Agency receives a completed CIS request. The Agency will notify the health clinic within 30 days if the CIS request is complete or not. A complete submission includes the documentation listed above.

NOTE:

For example: if a CIS request is received on March 31, but does not contain all required information, it will be returned. On May 15th, the Agency receives the resubmitted CIS request with all required documentation, therefore the effective date will be May 1st.

The IRHC must demonstrate the following:

- a cost impact per qualifying event or a combination of more than one qualifying event and
- the incremental cost impact per visit to the change in scope of service.

Any costs supporting the rate adjustment must be allowable for IRHCs under the Administrative Code Chapter 56. The calculated incremental cost per visit of the change in scope will be applied to the PPS rate currently in effect.

A Change in Scope request may take more than a period of one year to process; however, the Agency anticipates processing change in scope requests within 6 months. For additional information, please contact the Managed Care Operations Division.

NOTE:

New PPS rates due to an approved change in scope will be based on the incremental and/or decremental costs of the approved qualifying event(s).

Family Planning

- Family planning services are services provided to prevent or delay pregnancy.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Intrauterine Devises are billable and reimbursable outside of the encounter rate utilizing the non-IRHC National Provider Identifier (NPI) and on a separate claim.
- The Plan First visit will be reimbursed at the encounter rate when billed.
- For additional information, see Medicaid's Provider Manual Appendix C.

Smoking cessation products (under Family Planning) are billable and reimbursable outside of the encounter rate utilizing the non-IRHC National Provider Identifier (NPI) and on a separate claim.

Deliveries are billable and reimbursable outside of the encounter rate utilizing the non-IRHC National Provider Identifier (NPI) and on a separate claim.

Services are billable and reimbursable outside of the encounter rate under the non-IRHC National Provider Identifier (NPI) and on a separate claim include:

- Surgeries with place of service code 21 or 22
- Technical component for: Electrocardiograms (EKG's) and Radiology

1st Look- The Oral Health Risk Assessment and Dental Varnishing Program

For IRHCs reimbursement for these services will be included in the office visit and will not be paid separately.

For additional Oral Health Risk Assessment and Dental Varnishing information and guidelines please refer to Medicaid's Provider Manual Dental Chapter 13and Appendix A.

36.3 Prior Authorization and Referral Requirements

Procedure codes billed by rural health providers generally do not require prior authorization. Any service warranted outside of these codes must have prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

When filing claims for recipients enrolled in the Alabama Coordinated Health Network (ACHN) Program, refer to Chapter 40, to determine whether your services require a referral from the Primary Care Physician (PCP).

36.4 Cost Sharing (Copayment)

The copayment amount $3.90 per visit including crossovers. The copayment does not apply to services provided for pregnant women, nursing facility residents, recipients less than 18 years of age, emergencies, and family planning. Native American Indians that present an "active user letter" issued by Indian health Services (IHS) will be exempt from the Medicaid required copayment.

Providers may not deny services to any eligible Medicaid recipient because of the recipient's inability to pay the cost-sharing (copayment) amount imposed.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Medicaid copayment is NOT a third party resource. Does not record copayment on the CMS-1500 claim form.

Medicare Deductible and Coinsurance

For independent rural health clinic services, Medicaid pays the Medicare deductible and coinsurance up to the encounter rate, established by Medicaid. Please refer to Chapter 5, Filing Claims, for additional information.

36.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Independent rural health clinics that bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare-related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

36.5.1 Time Limit for Filing Claims

Medicaid requires all claims for independent rural health clinics to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits, for more information regarding timely filing limits and exceptions.

36.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

36.5.3 Procedure Codes and Modifiers

Medicaid uses the Healthcare Common Procedure Coding System (HCPCS). HCPCS is composed of the following:

- American Medical Association's Current Procedural Terminology (CPT)
- Nationally assigned codes developed for Medicare
- Locally assigned codes issued by Medicaid. Effective for dates of service on or after 01/01/2004, use national codes.

The CPT manual lists most procedure codes required by Medicaid.

Refer to Appendix H, Alabama Medicaid Injectable Drug Listing.

Claims without procedure codes or with codes that are invalid will be denied. Medicaid recognizes modifiers when applicable. Both CPT and CMS level codes will be recognized. The (837) Professional, Institutional and Dental electronic claims and the paper claims have been modified to accept up to four Procedure Code Modifiers.

Collection of laboratory specimens may be billed when sending specimens to another site for analysis if the other site is not owned, operated, or financially associated with the site in which the specimen was collected.

The collection fee may not be billed if the lab work is done at the same site where the specimen was collected or in a lab owned, operated, or financially associated with the site in which the specimen was collected.

Providers will not be paid for and should not submit claims for laboratory work done for them by independent laboratories or by hospital laboratories.

Providers may submit claims for laboratory work done by them in their own offices or own laboratory facilities. Providers who send specimens to independent laboratories for analysis may bill a collection fee. This fee shall not be paid to any provider who has not actually extracted the specimen from the patient.

Providers should use procedure code 36415-90 for routine venipuncture collection, 36416-90 for collection for capillary blood specimen (eg, finger, heel, ear stick) and Q0091-90 for collection of Pap smear specimen.

Labs are billable and reimbursable outside of the encounter rate utilizing the non-IRHC National Provider Identifier (NPI) and on a separate claim.

Encounters are all-inclusive. All services provided for the encounter are included in the reimbursement rate for the encounter.

Encounters are face-to-face contacts between a patient and a health professional for medically necessary services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Contacts with one or more health professionals and multiple contacts with the same health care professional that take place on the same day at a single location constitute a single encounter, unless the patient later suffers illness or injury requiring additional diagnosis or treatment.

To receive the IRHC encounter rate:

- Itemize the billing services performed
- Utilize the Current Procedure Terminology (CPT) Code Book
- Document medical support in the recipient chart to justify level of care billed
- Submit a clean claim (refer to Provider Manual Chapter 5)
- Utilize the IRHC National Provider Identifier (NPI)

Early and Periodic Screening, Diagnostic and Treatment (EPSDT)

The purpose of the EPSDT program is to find children with actual or potential health problems and to screen, diagnose, and treat the problems before they become permanent, lifelong disabilities. The program also offers preventive health services to Medicaid-eligible children under 21 years of age. See Appendix A in Medicaid's Provider Manual for additional information.

EPSDT Vision Screenings, Hearing Screens, Cognitive Screenings, and Behavioral Assessments are reimbursable utilizing the IRHC National Provider Identifier (NPI). Claims that are billed using the non-IRHC number for reimbursement will be monitored on a post payment review process. Claims that are filed and paid with these procedures outside of the encounter rate will be subject to recoupment.

Vaccines For Children (VFC)

- Refer to Appendix A, EPSDT, for procedure codes for VFC.
- Vaccines are reimbursable outside of the encounter rate utilizing the IRHC National Provider Identifier (NPI) and on a separate claim.

36.5.4 Place of Service Codes

The following place of service codes apply when filing claims for independent rural health clinics:

POS Code	*Description*
11	Office
21	Inpatient Hospital
22	Outpatient Hospital
23	Emergency Room – Hospital
31	Skilled Nursing Facility or Nursing Facility
32	Nursing Facility

36.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims with Third Party Denials

Refer to Section 5.8, Required Attachments, for more information on attachments.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). 37

37 Therapy (Occupational, Physical, Speech, and Applied Behavior Analysis)

This chapter regarding therapy services is specifically designed for therapy providers who meet **either** of the following criteria:

- Provider receives a referral as a result of an EPSDT screening exam and possesses an EPSDT Referral form (Form 362) as a result of an abnormality discovered during the EPSDT exam
- Provider treats QMB recipients

Physical therapy is covered for acute conditions in a hospital outpatient setting for non-EPSDT recipients. For more information regarding this, refer to Chapter 19, Hospital.

The policy provisions for EPSDT referred therapy providers can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 11.

37.1 Enrollment

Alabama Medicaid's Fiscal Agent enrolls therapy providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative C*ode, and the *Alabama Medicaid Provider Manual*.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a therapy provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for therapy-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Therapy providers are assigned a provider type of 17 (Therapy). Valid specialties for therapy providers include the following:

- Occupational Therapy (171)
- Physical Therapy (170)
- Speech Therapy (173)
- Applied Behavior Analysis (ABA) Therapy (175)

Therapists may enroll independently and have their own NPI bill on a CMS-1500 claim form as an EPSDT/QMB-only provider. Refer to Chapter 19, Hospital, for billing information for therapists enrolled by a hospital.

Enrollment Policy for Therapy Providers

Services provided must be ordered by a physician or a non-physician practitioner for an identified condition(s) noted during the EPSDT screening and provided by or under:

- For physical therapy services, a qualified physical therapist
- For occupational therapy (OT) services, the direct supervision of a qualified occupational therapist
- For speech and language services, a qualified speech - language pathologist
- For applied behavior analysis services, a licensed behavior analyst, licensed psychologist or licensed psychiatrist with behavior analysis within their scope of practice

A qualified Speech Therapist must have a Certification of Clinical Competence in Speech Language Pathology or be eligible for certification and licensed by the Alabama Board of Examiners for Speech, Language Pathology, and Audiology.

A qualified occupational therapist must be licensed by the Alabama State Board of Occupational Therapy.

A qualified physical therapist must be licensed by the Alabama Board of Physical Therapy.

A qualified behavior analyst must be licensed by the Alabama Behavior Analyst Licensing Board.

A licensed psychologist or psychiatrist may request to add the ABA therapy specialty – 175 to their enrollment.

37.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Services provided to Medicaid-eligible children by those working under the direction of licensed, enrolled speech therapists, occupational therapists, physical therapists or behavior analysts are subject to the following conditions:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The person providing the service must meet the minimum qualifications established by state laws and Medicaid regulations.
- A supervising provider must employ the person providing the service.
- The case record must identify the person providing the service.
- The supervising therapist must assume full professional responsibility for services provided and bill for such services.
- The supervising provider must assure that services are medically necessary and are rendered in a medically appropriate manner.
- Services must be ordered by a physician or a non-physician practitioner.

For more information about the Plan of Treatment (plan of care, treatment plan, etc.) required for therapy services, refer to Chapter 19.

Speech Therapists (ST-Speech Language Pathologists)

Speech therapy services must be provided by or under the direct supervision of a qualified speech therapist. Services are limited to those procedure codes identified in Section 37.5.3, Procedure Codes and Modifiers.

Speech therapy assistants must be employed by a speech therapist, have a bachelor's degree in Speech Pathology, and be registered by the Alabama Board of Speech, Language Pathology, and Audiology. Assistants are only allowed to provide services commensurate with their education, training, and experience. They may not evaluate speech, language, or hearing; interpret measurements of speech language or hearing; make recommendations regarding programming and hearing aid selection; counsel patients; or sign test reports or other documentation regarding the practice of speech pathology. Assistants must work under the direct supervision of a licensed speech pathologist.

Direct supervision requires the physical presence of the licensed speech pathologist in the same facility at all times when the assistant is performing assigned clinical responsibilities. The licensed speech pathologist must document direct observation of at least 10% of all clinical services provided by the assistant. Speech therapists may supervise no more than the equivalent of two full-time assistants concurrently.

NOTE:

Speech therapy services must be ordered by a physician and must be provided by or under the direct supervision of a qualified speech therapist.

A non-physician practitioner such as a nurse practitioner or a physician assistant can complete an EPSDT screening, order a speech therapy consult then sign an EPSDT referral to see a specialist.

Occupational Therapists (OT)

Occupational therapy services must be provided by or under the direct supervision of a qualified occupational therapist.

Services are limited to those procedures identified in Section 37.5.3, Procedure Codes and Modifiers. Some codes may require prior authorization before services are rendered. Medicaid does not cover recreational activities, such as movies, bowling, or skating.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Occupational therapy assistants may assist in the practice of occupational therapy only under the supervision of an OT. Occupational therapy assistants a license by the Alabama State Board of Occupational Therapy (ASBOT). Supervision of OT assistants must comply with regulations of the ASBOT. The occupational therapist must render the hands – on treatment, write, and sign the treatment note at a minimum of every 6th visit or 90 days. When making a visit the supervising OT must document and sign notes regarding the visit. . The supervising OT assign the duties and responsibilities for which the assistant has been specifically educated and form.

Occupational therapy aides employed by the OT may perform only routine duties under the direct, on-site supervision of the OT with no charge for occupational.

Physical Therapists (PT)

Physical therapy assistants may provide service only under the supervision of a qualified physical therapist. PT assistants requires a license by the Alabama Board of Physical Therapy, and must be an employee of the supervising PT. The PT assistant must only be assigned duties and responsibilities for which the assistant has been specifically educated and which the assistant is qualified to perform.

Licensed certified physical therapist assistants (PTA) are covered providers when working under the direction of a Preferred Physical Therapist with the following provisions:

- The Physical Therapist must interpret the physician's referral.
- The Physical Therapist must perform the initial evaluation.
- The Physical Therapist must develop the treatment plan and program, including long and short-term goals.
- The Physical Therapist must identify and document precautions, special problems, contraindications, goals, anticipated progress and plans for reevaluation.
- The Physical Therapist must reevaluate the patient and adjust the treatment plan, perform the final evaluation and discharge planning.
- The Physical Therapist must implement (perform the first treatment) and supervise the treatment program
- The Physical Therapist must co-sign each treatment note written by the PTA.
- The Physical Therapist must indicate he/she has directed the care of the patient and agrees with the documentation as written by the PTA for each treatment note.

Long Term Therapy Services:

Therapeutic goals must meet at least one of the following characteristics:

- prevent deterioration and sustain function;
- provide interventions that enable the beneficiary to live at their highest level of independence in the case of a chronic or progressive disability;

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- and/or provide treatment interventions for a beneficiary who is progressing, but not at a rate comparable to the expectations of restorative care.

Maintenance Services:

- A repetitive service that does not require the knowledge or expertise of a qualified practitioner and that does not meet the therapy services. Maintenance services begin with the achievement of the therapeutic goals of a treatment plan or when no additional medical benefit is apparent or expected.

The Physical Therapist must render the hands-on treatment, write and sign the treatment note at a minimum of every sixth visit.

According to practice guidelines and state/federal law, written orders must include the date and signature of the provider, the service(s) ordered and the recipient's name. The EPSDT referral form is the physicians' order when meeting these guidelines.

NOTE:

To determine if a procedure code requires prior authorization, use the Automated Voice Response System (AVRS).

Applied Behavior Analysts (ABA Therapists)

Behavior Analyst services must be provided by or under the direct supervision of a qualified behavior analyst, psychologist, or psychiatrist. Services are limited to those procedure codes identified in Section 37.5.3, Procedure Codes and Modifiers.

Applied Behavior Analysis services are covered when provided by a Licensed Behavior Analyst (BCBA), a Licensed Assistant Behavior Analyst (BCaBA) under the supervision of a BCBA, or by a Registered Behavior Technician (RBT) under the supervision of a BCBA or BCaBA within the scope of their practice as defined by state law. Providers must follow the current Behavior Analyst Certification Board® credentialing requirements. The BCBA and BCaBA must in good standing with the State of Alabama.

Deleted: ~~unlicensed~~

BCaBAs and RBTs must be employed by a BCBA and the BCBA assumes professional responsibility for the services provided by a RBT or a BCaBA. Claims must be submitted by the BCBA. The BCBA and BCaBA must document supervision and direct observation according to the current requirements of the Behavior Analyst Certification Board® for clinical services provided by a BCaBA or RBT.

Deleted: ~~unlicensed~~

Locum Tenens and Substitute Physical/Occupational Therapist Under Reciprocal Billing Arrangements

It is common practice for physical/occupational therapists to retain substitute physical/occupational therapists to take over their professional practices when the regular physical/occupational therapists are absent for reasons such as illness, pregnancy, vacation, or continuing medical education, and for the regular physical therapist to bill and receive payment for the substitute physical/occupational therapists services as though he/she performed them.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The substitute physical/occupational therapist generally has no practice of his/her own and moves from area to area as needed. The regular physical/occupational therapist generally pays the substitute physical/occupational therapist a fixed amount per diem, with the substitute physical/occupational therapist having the status of an independent contractor rather than of an employee. The substitute physical/occupational therapists are generally called “locum tenens” physical/occupational therapists.

Reimbursement may be made to a physical/occupational therapist submitting a claim for services furnished by another physical/occupational therapist in the event there is a reciprocal arrangement. The reciprocal arrangement may not exceed 14 days in the case of an informal arrangement. Effective for claims submitted on or after June 15, 2012, the reciprocal arrangement may not exceed 60 continuous days in the case of an arrangement involving per diem or other fee-for-time compensation. Providers participating in a reciprocal arrangement must be enrolled with the Alabama Medicaid Agency. The regular physical/occupational therapist should keep a record on file of each service provided by the substitute physical/occupational therapist and make this record available to Medicaid upon request. Claims will be subject to post-payment review.

37.3 Prior Authorization and Referral Requirements

Physical, Occupations, and Speech service procedure codes generally do not require prior authorization. Any service that is warranted outside of these codes must have prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

Behavior Analysis service procedure codes require prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

When filing claims for recipients enrolled in the ACHN Program, refer to Chapter 40 - ACHN to determine whether your services require a referral from the Primary Care Physician (PCP). If the EPSDT screening provider wants to render treatment services himself, the provider completes a self-referral.

After receiving a screening referral form, Medicaid providers may seek reimbursement for medically necessary services to treat or improve the defects, illnesses, or conditions identified on the referral form. The consulting provider completes the corresponding portion of this form and returns a copy to the screening provider. If services or treatment from additional providers is indicated, a copy of the referral form must be sent to those providers for their medical records. A completed Referral for Services Form must be present in the patient’s medical record that identifies the treated conditions referred as the result of an EPSDT screening or payments for these services will be recouped. The referral form must be appropriately completed by the screening physician including the screening date that the problem was identified and the reason for the referral.

Signature Requirement for Referrals: Effective May 16, 2012:
For hard copy referrals, the printed, typed, or stamped name of the primary care physician with an original signature of the physician or designee (physician or non-physician practitioner) is required. **Stamped or copied signatures will not be accepted**. For electronic referrals, provider certification is made via standardized electronic signature protocol.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

All orders must be written according to practice guidelines and state/federal law and must include the date and signature of the provider, the service(s) ordered and the recipient's name. The EPSDT referral form may be considered as the physicians' order if these guidelines are met.

37.4 Cost Sharing (Copayment)

Copayment does not apply to therapy services.

37.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Therapy providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

Therapy services are billed using the CMS-1500 claim form. Medicare-related claims must be filed using the Medical Medicaid/Medicare-related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

37.5.1 Time Limit for Filing Claims

Medicaid requires all claims for therapy services to be filed within one year of the date of service. Refer to Chapter 5, Filing Limits, for more information regarding timely filing limits and exceptions.

37.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, P. O. Box 930876 Atlanta, GA 31193-0873 or 1-800-621-8335. American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

37.5.3 Procedure Codes and Modifiers

Medicaid uses the Healthcare Common Procedure Coding System (HCPCS). HCPCS is composed of the following:

- American Medical Association's Current Procedural Terminology (CPT)
- Nationally assigned codes developed for Medicare
- Locally assigned codes issued by Medicaid. Effective for dates of service on or after 01/01/2004, use national codes.

The CPT manual lists most procedure codes required by Medicaid. This manual may be obtained by contacting the Order Department, American Medical Association, 515 North State Street, Chicago, IL 60610-9986. The (837) Professional electronic claim and the paper claim have been modified to accept up to four Procedure Code Modifiers.

Speech Therapy

Speech Therapy focuses on receptive language, or the ability to understand words spoken to you, and expressive language, or the ability to use words to express yourself. It also deals with the mechanics of producing words, such as articulation, pitch, fluency, and volume. Identifying those with communicative or oropharyngeal disorders and delays in the development of communication skills, including the diagnosis and appraisal of specific disorders and delays in those skills.

Speech Therapy is covered only when service is rendered to a recipient as a result of an identified condition(s) noted during the EPSDT Screening exam or to QMB recipient. In order for the service to be covered the diagnosis must be speech related, such as stroke (CVA) or partial laryngectomy. In order to be a covered benefit, speech therapy must be ordered by a physician and perform in an office location. Speech therapy performed in an inpatient or outpatient hospital setting, or in a nursing home is a covered benefit, but is considered covered as part of the reimbursement made to the facility and should not be billed by the physician. Speech therapy is not covered by Medicaid unless actually performed by a practitioner in person.

Use revenue codes 44x when billing speech therapy. Speech therapy providers are limited to the procedure codes listed below:

Procedure Code	***Description***	***Requires a Prior Authorization***
92521	Evaluation of speech therapy	No
92522	Evaluation of speech sound production	No
92523**	Evaluation of speech sound production with evaluation of language comprehension and expression	No
92524	Behavioral and qualitative analysis of voice and resonance	No

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Procedure Code	*Description*	*Requires a Prior Authorization*
92526	Treatment of swallowing and/ or oral feeding function	No
92507**	Treatment of speech, language, voice, communication, and/or auditory processing disorder; individual	No
92508**	Group, two or more individuals	No
92607	Evaluation for prescription for speech-generating augmentative and alternative communication device, face-to-face with the patient; first hour	No
92608	Evaluation for prescription for speech-generating augmentative and alternative communication device, face-to-face with the patient; each additional 30 minutes	No
92610	Evaluation of swallowing function	No
96112	Administration of development test, first hour	No
96113	Administration of development test, additional 30 minutes	No
96125	Standardized cognitive performance testing (eg, Ross Information Processing Assessment) per hour, both face-to-face time administering tests to the patient and time interpreting test results and preparing the report.	No
97532	Development of cognitive skills to improve attention, memory, or problem solving, each 15 minutes	No

****Effective June 1, 2023, procedure codes 92507, 92508, and 92523 can be reimbursed for Audio-Only Telecommunication and only be used in lieu of the audio and video telecommunication where telemedicine is approved by Medicaid.**

Providers must place the "FQ" modifier on the claim to designate that the service was rendered via audio only telecommunication method.

Physical Therapy

Physical therapy services address the promotion of sensorimotor function through enhancement of musculoskeletal status, neurobehavioral organization, perceptual and motor development, cardiopulmonary status and effective environmental adaptation. This is covered based on medical necessity.

Key service functions include the following:

- Screening, evaluation and assessment to identify movement dysfunction
- Obtaining, interpreting and integrating information appropriate to program planning to prevent, alleviate or compensate for movement dysfunction and related functional problems
- Providing individual and group services or treatment to prevent, alleviate or compensate for movement dysfunction and related functional problems
- Providing developmental and functionally appropriate services

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Records are subject to retrospective review. Physical therapy records must state the treatment plan and must meet *established* medical *criteria's*. Physical therapy is subject to the following criteria:

- Physical therapy is covered in an outpatient setting for acute conditions only. An acute condition is a new diagnosis that was made within three months of the beginning date of the physical therapy treatments.

- Chronic conditions are not covered except for acute exacerbations or as a result of an EPSDT screening. A chronic condition is a condition that was diagnosed more than three months before the beginning date of the physical therapy treatments. An acute exacerbation is defined as the sudden worsening of the patient's clinical condition, both objectively and subjectively, where physical therapy is expected to improve the patient's clinical condition.

If the medical criteria are not met or the treatment plan is not documented in the medical record, Medicaid may recoup payment.

Physical Therapy is not covered when provided in a physician's office. Physical therapy is covered only when prescribed by a physician. Physical therapy providers are limited to the procedure codes and max units listed below. These procedure codes cannot be span billed and must be submitted for each date of service provided. Documentation by therapist in medical record must support number of units billed on claim.

Procedure Code	***Physical Therapy***	***See Note***	***Max Units Per Day***	***Requires Prior Authorization***
95851	ROM measurements and report (separate procedure); each extremity (excluding hand) or each trunk section (spine)		10	No
95852	ROM measurements and report (separate procedure);hand, with or without comparison with normal side		1	No
96112	Administration of development tests, first hour		1	No
96113	Administration development test, additional 30 minutes		1	No
97161	Evaluation of physical therapy, low complexity, typically 20 minutes		1	No
97162	Evaluation of physical therapy, moderate complexity, typically 30 minutes		1	No
97163	Evaluation of physical therapy, high complexity, typically 45 minutes		1	No
97164	Re-evaluation of physical therapy, typically 20 minutes		1	No
97010	Application of a modality to one or more areas; hot or cold packs	3, 5	1	No

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Procedure Code	*Physical Therapy*	*See Note*	*Max Units Per Day*	*Requires Prior Authorization*
97012	Traction, mechanical	5	1	No
97014	Electrical stimulation, unattended	2	4	No
97016	Vasopneumatic device	5	1	No
97018	Paraffin bath	3, 5	1	No
97022	Whirlpool	3	1	No
97024	Diathermy	5	1	No
97026	Infrared	5	1	No
97028	Ultraviolet		1	No
97032	Application of a modality to one or more areas; electrical stimulation (manual), each 15 minutes	3	4	No
97034	Contrast baths, each 15 minutes	3	4	No
97035	Ultrasound, each 15 minutes	3	4	No
97036	Hubbard tank, each 15 minutes	3	4	No
97110	Therapeutic procedure, one or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, ROM and flexibility	3, 5	4	No
97112	Neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and proprioception	3, 5	1	No
97113	Aquatic therapy with therapeutic exercises	5	1	No
97116	Gait training (includes stair climbing)	5	1	No
97124	Massage, including effleurage, petrissage and/or tapotement (stroking, compression, percussion).	3, 5	1	No
97140	Manual therapy techniques (e.g., mobilization/manipulation, manual lymphatic drainage, manual traction), one or more regions, each 15 minutes	5	1	No
97150	Therapeutic procedure(s), group (2 or more individuals)	5	1	No
97530	Therapeutic activities, direct (one on one) patient contact by the provider, (use of dynamic activities to improve functional performance), each 15 minutes	3, 5	4	No
97533	Sensory integrative techniques to enhance sensory processing and promote adaptive responses to environmental demands, direct (one on one) patient contact by the provider, each 15 minutes		4	No
97535	Self-care/home management training (e.g., activities of daily living (ADL)	3, 5	4	Yes

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Procedure Code	*Physical Therapy*	*See Note*	*Max Units Per Day*	*Requires Prior Authorization*
	and compensatory training, meal preparation, safety procedures, and instructions in use of adaptive equipment), direct one on one contact by provider each 15 minutes.			
97542	Wheelchair management/propulsion training, each 15 minutes	3, 5	4	No
97550	Caregiver training in strategies and techniques to facilitate the patient's functional, performance in the home or community, initial 30 minutes		1	No
97551	Caregiver training in strategies and techniques to facilitate the patient's functional, performance in the home or community, each additional 15 minutes		1	No
97552	Group caregiver training in strategies and techniques to facilitate the patient's functional, performance in the home or community		1	No
97597	Removal of devitalized tissue From wounds		1	No
97598	Removal of devitalized tissue From wounds		8	No
97750	Physical performance test or measurement, (e.g., musculoskeletal, functional capacity) with written report, each 15 minutes	3	12	No
97760	Orthotic(s) management and training (including assessment and fitting when not otherwise reported), upper extremity(s), lower extremity(s) and/or trunk, each 15 minutes	3, 4, 5	4	No
97761	Prosthetic training, upper and/or lower extremity(s), each 15 minutes	3	4	No
97762	Checkout for orthotic/prosthetic, use, established patient, each 15 minutes	3	4	No

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

1. Reserved

2. 97014 cannot be billed on same date of service as procedure code 20974, 20975 or 20982.

3. When a physical therapist and an occupational therapist perform the same procedure for the same recipient for the same day of service, the maximum units reimbursed by Medicaid will be the daily limit allowed for procedure, not the maximum units allowed for both providers.

4. 97760 should not be reported with 97116 for the same extremity.

5. Procedures 97010, 97012, 97016, 97018, 97024, 97026 (therapy procedures) must be billed with one of the following codes: 97014, 97020, 97110, 97112, 97113, 97116, 97124, 97140, 97150, 97530, 97535, or 97542 (therapeutic treatment).

Occupational Therapy

Occupational Therapy is a service that addresses the functional needs related to adaptive development, adaptive behavior and sensory, motor and postural development. These services are designed to improve the functional ability to perform tasks in the home and community settings.

Occupational therapy procedure codes cannot be span billed and must be submitted for each date of service provided. Some codes may require attainment of prior authorization before services are rendered. Documentation by therapist in medical record must support number of units billed on claim. Use revenue code 43x when billing claims for occupational therapy.

Medicaid does not cover group occupational therapy. Covered occupational therapy services do not include recreational and leisure activities such as movies, bowling, or skating. Individual occupational therapy providers are limited to the following procedure codes:

Code	*Description*	*See Note*	*Max Units Per Day*	*Requires Prior Authorization*
96112	Administration of development tests, first hour		1	No
96113	Administration of development tests, additional 30 minutes		1	No
96125	Standardized cognitive performance testing (eg, Ross Information Processing Assessment) per hour, both face-to-face time administering tests to the patient and time interpreting test results and preparing the report.		1	No
97165	Evaluation of occupational therapy, low complexity, typically 30 minutes		1	No
97166	Evaluation of occupational therapy, moderate complexity, typically 45		1	No

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Code	*Description*	*See Note*	*Max Units Per Day*	*Requires Prior Authorization*
	minutes			
97167	Evaluation of occupational therapy established plan of care, high complexity, typically 60 minutes		1	No
97168	Re-evaluation of occupational therapy established plan of care, typically 30 minutes		1	No
97010	Application of a modality to one or more areas; hot or cold packs	1, 3, 5	1	No
97018	Paraffin bath	1, 3, 5	1	No
97022	Whirlpool	3	1	No
97032	Application of a modality to one or more areas; electrical stimulation (manual), each 15 minutes	3	4	No
97034	Contrast baths, each 15 minutes	3	4	No
97035	Ultrasound, each 15 minutes	3	4	No
97036	Hubbard tank, each 15 minutes	3	4	No
97110	Therapeutic procedure, one or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility	3, 5	4	No
97112	Neuromuscular reeducation of movement, balance, coordination, kinesthetic sense posture, and proprioception	3, 5	1	No
97124	Massage, including effleurage, petrissage, and/or tapotement (stroking, compression, percussion)	3, 5	1	No
97530	Therapeutic activities, direct (one on one) patient contact by the provider, (use of dynamic activities to improve functional performance), each 15 minutes	3, 5	4	No
97532	Development of cognitive skills to improve attention, memory, or problem solving, each 15 minutes			No
97533	Sensory technique to enhance processing and adaptation to environmental demands, each 15 minutes		4	No
97535	Self-care / home management training (e.g., activities of daily living (ADL) and compensatory training, meal preparation, safety procedures, and instructions in use of adaptive equipment) direct one on one contact by provider, each 15 minutes.	3, 5	4	Yes
97542	Wheelchair management /propulsion training, each 15 minutes	3, 5	4	No

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Code	*Description*	*See Note*	*Max Units Per Day*	*Requires Prior Authorization*
97550	Caregiver training in strategies and techniques to facilitate the patient's functional, performance in the home or community, initial 30 minutes		1	No
97551	Caregiver training in strategies and techniques to facilitate the patient's functional, performance in the home or community, each additional 15 minutes		1	No
97552	Group caregiver training in strategies and techniques to facilitate the patient's functional, performance in the home or community		1	No
97597	Removal of devitalized tissue from wounds		1	No
97598	Removal of devitalized tissue from wounds		8	No
97750	Physical performance test or measurement (e.g., musculoskeletal, functional capacity) with written report, each 15 minutes	3	12	No
97760	Orthotic(s) management and training (including assessment and fitting when not otherwise reported), upper extremity(s), lower extremity(s) and/or trunk, each 15 minutes	3	4	No
97761	Prosthetic training, upper and/or lower extremity(s), each 15 minutes	3	4	No
97762	Checkout for orthotic/prosthetic, use, established patient, each 15 minutes	3	4	No

NOTE:
Procedure code 96125 used for standardized cognitive performance testing should not be billed with autism diagnostic testing codes 96112 and 96113.

Applied Behavior Analysis (ABA) Therapy

ABA therapy is the behavioral treatment approach most commonly used with children with Autism Spectrum Disorder (AS).

Techniques based on ABA include:

- Discrete Trial Training, Incidental Teaching, Pivotal Response Training, and Verbal Behavioral Intervention
- Structured environment, predictable routines, individualized treatment, transition and aftercare planning, and significant family involvement
- Attempts to increase skills related to behavioral deficits and reduce behavioral excesses including eliminating barriers to learning
- Behavior deficits may occur in the areas of communication, social and adaptive skills, but are possible in other areas as well.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Examples of deficits may include: a lack of expressive language, inability to request items or actions, limited eye contact with others, and inability to engage in age-appropriate self-help skills such as tooth brushing or dressing.
- Examples of behavioral excesses may include, but are not limited to: physical aggression, property destruction, elopement, self-stimulatory behavior, self-injurious behavior, and vocal stereotypy.

Applied behavior analysis therapy is a service that may be used for children diagnosed with F84.0 Autistic Disorder, F84.3 Other Childhood Disintegrative Disorders, F84.5 Asperger's, F84.8 Other Pervasive Developmental Disorders, F84.9 Pervasive Developmental Disorder Unspecified.

Applied behavior therapy procedure codes cannot be span billed and must be submitted for each date of service provided. Most codes require attainment of prior authorization before services are rendered. Documentation by the therapist in the medical record must support the number of units billed on claim. An ABA Therapy Behavior Assessment Form is required as part of the support documentation for the prior authorization request. This form can be accessed by visiting the following link on the Medicaid website: http://www.medicaid.alabama.gov/content/4.0_Programs/4.2_Medical_Services/4.2.3_EPSDT.aspx .

Individual behavior therapy providers are limited to the following procedure codes:

Code	Description	Requires Prior Authorization
97151	Behavior Identification Assessment	No
97152	Observational F/U assessment	Yes
0362T	Exposure Behavioral F/U assessment	Yes
97153	Adaptive Behavior Tx	Yes
97154	Group Adaptive Behavior Tx	Yes
97158	Social Skills Group	Yes
0373T	Exposure Adaptive Behavior Tx	Yes
97155	Adaptive Behav Modification	Yes
97156	Family Adaptive Behavior Tx Guidance	Yes
97157	Multiple Family, Group Tx Guidance	Yes

Positive Behavior Support (PBS) Services are a set of researched-based strategies that combine behavioral and biomedical science with person-centered, valued outcomes and systems change to increase quality of life and decrease problem behaviors by teaching new skills and making changes in a waiver recipient's environment.

PBS services may be used for children diagnosed with F-70 to F-79 Intellectual Disabilities and should billed with 0373T - Exposure Adaptive Behavior Tx with prior authorization as described above.

For ABA therapy or PBS services listed above provided via telemedicine, enrolled providers are eligible to participate in the Telemedicine Program to provide medically necessary telemedicine services to Alabama Medicaid eligible recipients. In order to participate in the telemedicine program:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Providers must be enrolled with Alabama Medicaid with a specialty type of 931 (Telemedicine Service).
  - To be enrolled with the 931 specialty, providers must submit the Telemedicine Service Agreement/Certification form which is located on the Medicaid website at: www.medicaid.alabama.gov. Electronic signatures will be acceptable for the telemedicine agreement. The agreement may be uploaded through the provider web portal along with a request to add the 931 specialty. See Chapter 2 – Becoming a Medicaid Provider for further information.
  - Providers must obtain prior consent from the recipient before services are rendered. A sample recipient consent form is attached to the Telemedicine Service Agreement.

Services must be administered via an interactive audio and video telecommunications system which permits two-way communication between the distant site provider and the origination site where the recipient is located (this does not include a telephone conversation, electronic mail message, or facsimile transmission between the provider, recipient, or a consultation between two providers).

Telemedicine health care providers shall ensure that the telecommunication technology and equipment used at the recipient site and at the provider site, is sufficient to allow the provider to appropriately evaluate, diagnose, and/or treat the recipient for services billed to Medicaid. Transmissions must utilize an acceptable method of encryption adequate to protect the confidentiality and integrity of the transmission information. Transmissions must employ acceptable authentication and identification procedures by both the sender and the receiver.

The provider shall maintain appropriately trained staff, or employees, familiar with the recipient's treatment plan, immediately available in-person to the recipient receiving a telemedicine service to attend to any urgencies or emergencies that may occur during the session. The provider shall implement confidentiality protocols that include, but are not limited to:

- specifying the individuals who have access to electronic records; and
- usage of unique passwords or identifiers for each employee or other person with access to the client records; and
- ensuring a system to prevent unauthorized access, particularly via the Internet; and
- ensuring a system to routinely track and permanently record access to such electronic medical information

These protocols and guidelines must be available to inspection at the telemedicine site and to the Medicaid Agency upon request.

Claims submitted for ABA therapy or PBS services delivered via telemedicine should include a valid place of service listed in 37.5.4 with the modifier GT.

NOTE:

Refer to Chapter 108, Early Intervention Services for therapy delivered to infants/children enrolled in Alabama's Early Intervention System (AEIS).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

37.5.4 Place of Service Codes

The following place of service codes apply when filing claims for therapy services:

POS Code	*Description*
11	Office
12	Home (for ABA therapy only)

37.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

NOTE:

When an attachment is required, a hard copy CMS-1500 claim form must be submitted.

Refer to Chapter 5, Required Attachments, for more information on attachments.

37.6 For More Information

38

38 Anesthesiology

Administration of anesthesia is a covered service when administered by or directed by a duly licensed physician for a medical procedure that is covered by Medicaid.

The policy provisions for anesthesia can be found in the Alabama Medicaid Agency Administrative Code, Chapter 6.

38.1 Enrollment

Gainwell enrolls anesthesiologists, Certified Registered Nurse Anesthetists (CRNA) and Anesthesiology Assistants (AA) and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the Alabama Medicaid Agency Administrative Code, and the Alabama Medicaid Provider Manual.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

Gainwell also enrolls Certified Registered Nurse Anesthetists (CRNA), and Anesthesiology Assistants (AA) who are employed by a Medicaid enrolled physician or hospital.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as an anesthesiologist, CRNA, or AA provider is added to the Medicaid systems with the NPIs provided at the time application is made. Appropriate specialty codes are assigned to enable the provider to submit requests and receive reimbursements for anesthesia-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

Anesthesiologists are assigned a provider type of 31 (Physician). CRNAs are assigned a provider type of 09. AAs are assigned a provider type of 10 Valid specialties for the above include the following

- Anesthesiology Assistant (101)
- CRNA (094)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Enrollment Policy for Anesthesiology Providers

Providers (in-state and out-of-state) who meet enrollment requirements are eligible to participate in the Alabama Medicaid Program.

In addition to the completed application, the following information for Anesthesiologist Assistants and CRNAs must be submitted and approved before the enrollment process can be initiated:

- Copy of current state license
- Copy of current certifications (CRNA or AA)

38.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Administration of anesthesia is a covered service when administered by or directed by a duly licensed physician for a medical procedure that is covered by Medicaid. Medical direction by an anesthesiologist of more than four Certified Registered Nurse Anesthetists (CRNAs) or Anesthesiology Assistants (AAs) concurrently will not be covered.

Administration of anesthesia by an AA is a covered service when the AA has met the qualifications and standards set forth in the Alabama Board of Medical Examiners. The AA must enroll and receive a NPI to bill the Alabama Medicaid Program. Reimbursement shall be made only when the AA performs the administration of anesthesia under the direct medical supervision of the anesthesiologist

Administration of anesthesia by a self-employed CRNA is a covered service when the CRNA has met the qualifications and standards set forth in Rule No. 610-X-9-.01 through 610-X-9-.04 of the Alabama Board of Nursing Administrative Code. The CRNA must enroll with a valid NPI to bill under the Alabama Medicaid Program. When billing for anesthesia services, providers shall follow the guidelines set forth in the current Relative Value Guide published by the American Society of Anesthesiologists for basic value and time units.

For billing purposes, anesthesia services rendered with medical direction for one CRNA or AA is considered a service performed by the anesthesiologist. The definition of medical direction is an anesthesiologist medically directing four concurrent cases (CRNA/AA) or less. In order to bill for medical direction, the anesthesiologist must be immediately physically available at all times. Addressing an emergency of short duration, or rendering the requisite CRNA or AA direction activities (listed below in a. through g.), within the immediate operating suite is acceptable as long as it does not substantially diminish the scope of the supervising anesthesiologist's control. If a situation occurs which necessitates the anesthesiologist’s personal continuing involvement in a particular case, medical direction ceases to be available in all other cases.

In order for the anesthesiologist to be reimbursed for medical direction activities of the CRNA or AA, the anesthesiologist must document the performance of the following activities:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Performs a pre-anesthesia examination and evaluation
- Prescribes the anesthesia plan
- Personally participates in the most demanding procedures in the anesthesia plan, including induction as needed, and emergencies
- Ensures that any procedures in the anesthesia plan that he or she does not perform are performed by a qualified individual
- Monitors the course of anesthesia administration at frequent intervals
- Remains immediately physically available for immediate diagnosis and treatment of emergencies
- Provides indicated post-anesthesia care

A necessary task or medical procedure may be executed while concurrently medically directing CRNAs or AAs only if the task or procedure is one which may be: (1) immediately interruptible without compromising the wellbeing, quality of care, or health of the recipient and (2) is executed in an area close enough to the operating rooms where the CRNAs and AAs are being medically directed and that will permit the physician to remain in compliance with the requirements of being immediately physically available. Examples of an “area close enough to the operating rooms” are the Post-Anesthesia Care Unit (PACU) or receiving room. A task or procedure that may be stopped instantly is defined as one of limited difficulty and brief duration so that if it is stopped instantly, it would not interfere with the quality of care, wellbeing, or health of the recipient. There are two exceptions to the above:

1. Acting in response to urgencies of short duration or medical emergencies (e.g., ACLS provision, intubation, starting difficult intravenous (IV) lines that without them would reduce the recipient’s quality of care, etc.)
2. Labor epidural placement and management

The execution of a trigger point injection or an epidural steroid injection while medically directing is permissible when requested by another physician. The 1:4 ratio should be maintained while the trigger point injection or the epidural steroid injection is being executed. The consult for the execution of the aforementioned may serve as the second, third, or fourth simultaneous case. Therefore the execution of these limited pain services is disallowed while medically directing four simultaneous anesthetics. The ability to respond to urgent or emergent needs in the hospital (operating room, labor and delivery room, or anywhere in the hospital where his/her responsibility lies) may not be decreased at any time and is the responsibility of the anesthesiologist who is medically directing. The intent of this exception is to allow for provision of commonly requested procedures and to improve effectiveness. However, this exception does not include consults to diagnose. Diagnosis of chronic pain and treatment of complex problems is not allowed while simultaneously medically directing CRNAs and AAs.

Global Anesthesia Definition

The Agency has identified certain procedures to be included in the global payment for the anesthesia services. These procedures include but are not limited to the following: general anesthesia, regional anesthesia, local anesthesia, supplementation of local anesthesia, and other supportive

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

treatment administered to maintain optimal anesthesia care deemed necessary by the anesthesiologist during the procedure.

Anesthesia services include:

- All customary preoperative and postoperative visits,
- Local anesthesia during surgery,
- The anesthesia care during the procedure,
- The administration of any fluids deemed necessary by the attending physician, and any usual monitory procedures

Interpretation of non-invasive monitoring to include EKG, temperature, blood pressure, pulse, breathing, electroencephalogram and other neurological monitoring,

Monitoring of left ventricular or valve function via transesophageal echocardiogram,

Maintenance of open airway and ventilatory measurements and monitoring,

Oximetry, capnography and mass spectrometry.

Monitoring all fluids used during cold cardioplegia through non-invasive means. Additional claims for such services should not be submitted.

Placement of lines such as arterial catheterizations and insertion and placement of pulmonary artery catheters (e.g., Swan-Ganz) for monitoring will no longer be included in the global anesthesia reimbursement when billed with other procedures but will be allowed to be billed using the same guidelines outlined in this chapter under “Special Situations for Anesthesia”. The time of placement of invasive monitors and who placed them should be documented in the medical record. Verification of anesthesia time units may be subject to post-payment audits. Billing for anesthesia time while placing invasive monitors is not allowed unless the patient required general anesthesia for placement.

The time anesthesia starts is at the beginning of induction via the injection or inhalation of an anesthetic drug or gas and ends at the time the recipient is transferred to the recovery room or post anesthesia care unit (PACU). Induction is defined as the time interval between the initial injection or inhalation of an anesthetic drug or gas until the optimum level of anesthesia is reached. The recipient must be prepared by the anesthesiologist prior to induction and must be assessed by the anesthesiologist immediately after the surgical procedure. Up to 15 minutes are allowed for the preparation of anesthesia, and up to 15 minutes are allowed after the operation (for transfer of the recipient to the receiving room, recovery room, or PACU). It is inappropriate to bill for anesthesia time while the patient is receiving blood products or antibiotics in the holding area or waiting in a holding area, or waiting in the operating room more than 15 minutes prior to induction.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Local anesthesia is usually administered by the attending surgeon and is considered to be part of the surgical procedure being performed. Additional claims for local anesthesia by the surgeon should not be filed. Any local anesthesia administered by an attending obstetrician during delivery (i.e., pudendal block or paracervical block) is considered part of the obstetrical coverage. Additional claims for local anesthesia administered by an attending obstetrician during delivery should not be filed.

When regional anesthesia (i.e., nerve block) is administered by the attending physician during a procedure, the physician's fee for administration of the anesthesia is billed at one-half the established rate for a comparable service when performed by an anesthesiologist. When regional anesthesia is administered by the attending obstetrician during delivery (i.e., saddle block or continuous caudal), the obstetrician's fee for administration of the anesthesia will be billed at one-half the established rate for a comparable service performed by an anesthesiologist. When regional anesthesia is administered by an anesthesiologist during delivery or other procedure, the anesthesiologist's fee will be covered and should be billed separately.

When an epidural is performed as part of maternity labor/delivery by a resident, modifiers **AA** and **GC** must be billed along with the procedure code to identify the service is administered under the direction of a physician **(AA**), and performed by the resident **(GC).** When the epidural is performed by a physician in the absence of a resident, use modifier **AA** only.

When a medical procedure is a non-covered service under the Alabama Medicaid Program, the anesthesia for that procedure is also considered to be a non-covered service.

A primary anesthesia procedure is included in the procedure code range of 00100-01997 as noted in the Relative Value Guide.

NOTE:

Medical record documentation should clearly support and reflect physician services. Post-payment reviews may be performed.

Special Situations for Anesthesia

If two procedures of equal unit value are billed, the first procedure will be paid and the second one will deny because the subsequent procedure is included in the primary anesthesia charge.

If two procedures are billed with different unit values, the procedure with the greatest unit value will pay and the other procedure will deny because the subsequent procedure is included in primary anesthesia charge.

The anesthetic agent for nerve blocks (CPT codes 64400-64530) is included in the reimbursement fee for the performance or administration of the nerve block. No additional procedures should be filed for the nerve block medication.

Anesthesia for CT Scans or MRI/MRA Procedures is not covered for anesthesiologists. The attending/admitting physician is responsible for ordering the necessary measure(s) to ensure the patient is prepared for these tests.

Monitored Anesthesia Care is a covered service.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Medicaid does not cover physical status modifiers.

Standby anesthesia is not payable under Medicaid.

Consultations

A consultation for anesthesia performed on the day of or days before a procedure is considered part of the global procedure and is not a separately reimbursable item.

There are two exceptions to the above as outlined below.

- A recipient with chronic intractable pain receives a consult from an anesthesiologist for the chronic intractable pain, or
- A recipient receives a consult from an anesthesiologist to have an anesthesia procedure performed but ends up not receiving the anesthesia, e.g., the surgery is canceled due to complications.

Post-Operative Pain Management and Epidural Catheters

Surgeons routinely provide necessary post-operative pain management services and are reimbursed for these services through the global surgery fee. The surgeon should manage post-operative pain except under extraordinary circumstances. Procedures involving major intra-abdominal, vascular, orthopedic, and intrathoracic procedures will be covered for post-operative pain management by an anesthesiologist when medically indicated. Postoperative pain management services is not covered by non-physicians.

Under certain circumstances an anesthesia practitioner may separately report an epidural or peripheral nerve block injection or catheter for post-operative pain management when the surgeon requests assistance with post-operative pain management. Refer to the NCCI manual at https://www.cms.gov/Medicare/Coding/NationalCorrectCodInitEd/index for specific coding details and further information.

Claims for post-operative pain management that have denied require manual review. A paper claim, which must include Form 402, a clean Red Drop Ink CMS Form 1500, and supporting medical documentation, must be submitted to the Alabama Medicaid Agency in order to be processed. Please send manual review requests to:

Alabama Medicaid Agency
Attn: Dental / EPSDT / Physician Division
501 Dexter Avenue
P.O. Box 5624
Montgomery, AL 36103-5624

The definition for post-operative pain management is the management of a recipient's pain beyond, or separate from, the recovery room or operating room. The separately identifiable physician-recipient encounter and management should occur outside the intraoperative area. A separately identifiable physician-recipient encounter reflecting the prescription of medication, associated monitoring, adjustment(s) of medication, and ongoing assessments for complications should be clearly reflected in the medical record documentation.

No additional payment is allowed for an injection of Duramorph or other analgesic agents as a boost at the end of an anesthesia procedure (using the

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

same catheter used for the epidural or spinal anesthesia) without a separately identifiable physician-recipient encounter including the prescription of medication, associated monitoring, adjustment(s) of medication, and ongoing assessments for complications. However, if there is a separately identifiable physician-recipient encounter on subsequent post-op days, where the physician provides post-operative analgesic orders and manages post-operative analgesic complications, daily management of epidural or subarachnoid drug administration may be billed.

If a recipient receives general anesthesia and consequently requires additional pain control such as an epidural injection or an epidural catheter placement on the same day as the general anesthesia, the single injection or catheter placement will be reimbursed at one-half of the allowable. However, catheter placement and daily management of an epidural catheter is not allowed on the same date of service. When the physician provides a separately identifiable physician-recipient encounter to manage and evaluate the catheter and it is reflected in the medical record, this coverage is satisfactory for a reasonable period of time over the consecutive post-operative days.

Patient Controlled Analgesia

Patient controlled analgesia (PCA) services are reimbursable when they are administered by an anesthesiologist and are performed for the control of post-operative pain. A separately identifiable physician-recipient encounter should be reflected in the medical record documentation. PCA pumps are usually administered through an intravenous (IV) line or the PCA pump is connected to an epidural catheter line.

When an anesthesiologist provides the management of the PCA pump through an IV line, the anesthesiologist will be allowed a total of four units and will be considered a global payment for the management regardless of the number of days the recipient remains on the pump. Use procedure code 96522 for daily hospital management of intravenous patient-controlled analgesia.

The anesthesiologist should use the appropriate procedure code(s) when filing claims for a single injection or for an injection including catheter placement (epidural, subarachnoid, cervical, thoracic, lumbar, or sacral) when the PCA pump is connected to an epidural line. Placement of the epidural catheter and daily management of a subarachnoid or epidural catheter is not reimbursable on the same date of service. Daily management of a subarachnoid or epidural catheter is reimbursable on subsequent days. Delivery of pain medication through intermittent injections, a regular infusion, or by a PCA pump is included in the management of an epidural line whether a registered nurse or a physician administers it. Additional units for a PCA pump that is connected to an epidural line is not separately reimbursable.

The global surgical reimbursement fee to the surgeon includes the management of a PCA pump for post-operative pain control and is not a separately reimbursable item. Similarly, a physician’s global medical service reimbursement includes the management of a PCA pump for recipients with chronic pain control or terminal cancer and is not separately reimbursable.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Intractable Pain and Epidural Catheters

Some forms of conventional therapy such as oral medication, physical therapy, or a TENS unit may not relieve recipients with intractable pain. Placement of an epidural catheter may be allowed when medically necessary for recipients with intractable pain. Reimbursement for daily management is allowed when it is medically necessary and is a separately identifiable physician-recipient encounter is clearly documented in the medical record by the anesthesiologist. Placement of an epidural catheter and daily management of an epidural catheter is not reimbursable on the same date of service.

38.3 Prior Authorization and Referral Requirements

Anesthesiology procedure codes generally do not require prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

When filing claims for recipients enrolled in the Alabama Coordinated Health Network (ACHN) Program, refer to Chapter 40, ACHN to determine whether your services require a referral from the Primary Care Provider (PCP).

38.4 Cost Sharing (Copayment)

Copayment amount does not apply to services provided by Anesthesiologists, Certified Registered Nurse Anesthetists or Anesthesiology Assistants.

38.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare-related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

38.5.1 Time Limit for Filing Claims

Medicaid requires all claims for Anesthesiologists, CRNAs and AAs to be filed within one year of the date of service. Refer to Section 5.1.4, Filing Limits, for more information regarding timely filing limits and exceptions.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

38.5.2 Diagnosis Codes

The International Classification of Diseases -10th Revision - Clinical Modification (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

38.5.3 Procedure Codes and Modifiers

Anesthesia providers are required to utilize the appropriate anesthesia code identified in the current Relative Value Guide published by the American Society of Anesthesiologists. Time in attendance should be billed by listing **total minutes** of anesthesia time in block 24G of the CMS-1500 claim form. Type of service “7” should be used for billing anesthesia codes (00100-01997). The (837) Institutional electronic claim and the paper claim have been modified to accept up to four Procedure Code Modifiers. Effective October 1, 2004 to bill for code 90784, bill the first line item with the code and one unit. Bill the second line item with code 90784 with modifier 76 (repeat procedure) and 3 units.

Gainwell will calculate total units by dividing the total minutes (reported in block 24G) by 15, rounding up to the next whole number, and adding the time units to the auto-loaded base unit values. The base unit values are derived from the ASARVG for CPT-4 anesthesia codes.

Qualifying Factors

Historically, beginning on June 14, 2002, qualifying factors were reimbursable.

However, effective July 31, 2013 qualifying factors are no longer reimbursable.

Medical Direction - CRNA or AA

Two modifiers are used to indicate whether the service was medically directed or not medically directed in regards to anesthesia. The modifiers listed below should be used:

- QX - MEDICALLY DIRECTED
- QZ - NOT MEDICALLY DIRECTED

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Medical direction should only be billed when supervision of the CRNA or AA is rendered by an anesthesiologist. If a procedure is medically supervised by the surgeon, the claim should be billed as if the service were not medically directed.

Medical Direction - Anesthesiologists

Medically directed services are defined as anesthesia services that are medically directed by an anesthesiologist for 1, 2, 3, or 4 qualified individuals, i.e., CRNAs, AAs, interns, residents or combinations of these individuals.

When billing for medically directed services, anesthesiologists should utilize the modifiers listed below:

- QY for medically directed services of 1 qualified individual, i.e., CRNA, AA, intern, resident or combinations of these individuals (effective for 01/01/99)
- QK for medically directed services of 2, 3, or 4 qualified individuals, i.e., CRNAs, AAs, interns, residents or combinations of these individuals.

The payment amount for the physician's service and the qualified individual, i.e., CRNA, AA, intern, resident or combinations of these individuals is 50% of the allowance otherwise recognized had the service been furnished by the anesthesiologist alone.

Medical Direction – Resident

Residents may bill anesthesia services under the supervision of the teaching physician. They are allowed to bill anesthesia procedure codes using the teaching physician's provider number along with an AA and GC modifier.

The term resident includes interns and fellows.

Please refer to the medical supervision requirements indicated in the previous section for billing requirements when concurrent cases (limited to 4) are being supervised by the same physician.

Other Anesthesia Modifiers

Other appropriate anesthesia modifiers for anesthesiologists include the following:

Modifier	***Description***
AA	Anesthesia services performed personally by an Anesthesiologist

NOTE:

All procedures for anesthesiology services must include appropriate modifiers. CRNAs and AAs are limited to QX and QZ. Anesthesiologists are limited to QY, QK, and AA. Medical directing five or more concurrent cases is not allowed.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

38.5.4 Referring Provider Information

Effective February 23, 2008, anesthesia providers must submit the NPI number of the referring surgeon/physician on the claim. If you file hard copy, the NPI number should be populated in block 17a of the CMS 1500 claim form. For those who file electronically, you should submit the referring surgeon/physician's NPI number in REF02 of the 837P. This is necessary for proper claims processing.

Anesthesiologists should use "OTH000" as the referring or attending NPI number for providers who are not assigned a NPI number by Medicare. For example, when providing anesthesia services for recipients who are being treated by dental providers, please use "OTH000" as the NPI number in block 17a of the CMS 1500 form. Use "OTH000" in REF02 and the ID qualifier 1G in REF 01 when filing claims electronically on the 837P. If you use PES software or a vendor, please make sure your software has been updated to accommodate this change. As a reminder, claims for anesthesia providers not containing this information will deny.

38.5.5 Place of Service Codes

Please refer to Chapter 21 for applicable place of service codes for CRNA providers.

38.5.6 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

NOTE:

When an attachment is required, a hard copy CMS-1500 claim form must be submitted.

Refer to Section 5.8, Required Attachments, for more information on attachments.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

39

39 Psychiatric Inpatient Hospitalization Treatment Facilities (Recipients ages 21-64)

For purpose of this chapter, an inpatient is a person, age 21 through 64 years of age, who has been admitted to an Institutions for Mental Diseases (IMDs) specializing in the diagnosis, treatment, and care of serious mentally ill recipients, for the purpose of maintaining or restoring them to the greatest possible degree of health and independent functioning.

The policy provisions for IMDs can be found in the Alabama Medicaid Agency Administrative Code, Chapter 5.

39.1 Enrollment

Gainwell enrolls IMD providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the Alabama Medicaid Agency Administrative Code, and the Alabama Medicaid Provider Manual and are approved facilities under the Section 1115 Institutions for Mental Disease Waiver for Serious Mental Illness (Number 11-W-00371/4).

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a IMD is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for psychiatric-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

IMDs are assigned a provider type of 01 (Hospital). The valid specialty for IMDs is (008).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Enrollment Policy for Institutions for Mental Diseases Providers

To participate in the Alabama Medicaid Program, IMD providers must meet the following requirements:

- Receive certification for participation in the Medicaid/Medicare program
- Be accredited by the Joint Commission on Accreditation of Healthcare Organizations
- Specialize in the care and treatment of patients with serious mental illness
- Have on staff at least one full-time board-certified psychiatrist; or a full-time board certified adult psychiatrist with a minimum of 3 years' experience caring for patients 21 through 64 years of age
- Employ only staff who meet training certification standards in the area of adult psychiatry as defined by the State's mental health authority
- Provide outpatient and community liaison services throughout the state of Alabama directly or through contract with qualified providers
- Submit a written description of an acceptable utilization review plan currently in effect
- Submit a budget of cost for its inpatient services for its initial cost reporting period

  It is the facility's responsibility to ensure compliance with all federal and state regulations and to ensure that all required documentation is included in the recipient's record. Failure to comply will result in denial of payment and possible recoupment of reimbursements made previously.

Change of Ownership (CHOW) and Closures

Medicaid will mirror Medicare's Change of Ownership (CHOW) policy. Refer to Chapter 19, Hospital for additional information on Change of Ownership.

39.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

The number of days of care charged to a recipient of inpatient psychiatric service is always a unit of a full day. A day begins at midnight and ends 24 hours later. The midnight-to-midnight method is used in reporting days of care for the recipient, even if the facility uses a different definition of day for statistical or other purposes.

Medicaid reimbursement is available for the day of admission, but not the day of discharge.

Inpatient psychiatric services for recipients ages 21 to 64, are covered services when provided under the following circumstances:

- Psychiatric services are provided in an IMD exclusively for the treatment of persons ages 21 to 64 with serious mental illness
- Psychiatric services are provided under the direction of a licensed psychiatrist
- The IMD providing services is enrolled as a Medicaid provider

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The recipient is admitted to the psychiatric facility during the entire hospitalization

IMD services for recipients ages 21 to 64 years are unlimited if deemed medically necessary and the admission and/or the continued stay reviews meet the approved psychiatric criteria.

Certification of Need for Service

Certification of need for services is a determination that is made by a physician regarding the Medicaid recipient's treatment needs for admission to the facility.

The physician must certify for each applicant or recipient that inpatient services in a mental hospital are needed.

The certification must be made at the time of admission. No retroactive certifications will be accepted.

For individuals applying for Medicaid while in the hospital, the certification must be made before Medicaid can authorize payment.

The physician must complete the Form #372, which is the Certification of Need for Services. This form must be kept in the patient's record.

The Certificate of Needs form, which is the recertification of need for continued inpatient services, or acceptable equivalent approved by Medicaid, must be completed by a physician, a physician assistant, or a nurse practitioner acting under the supervision of a physician. The Certificate of Needs form or equivalent must be completed at least every 60 days after initial certification. This form must be kept in the patient's record.

The physician must complete an assessment note in the patient's record within 24 hours of a patient's return from any leave status.

The independent team shall complete and sign a Certification of Need for Services: Form (#372). This form may be obtained from the Mental Health Program Manager at the Alabama Medicaid Agency.

Medical, Psychiatric, and Social Evaluation

Before admission to an IMD facility or before authorization for payment, the attending physician, psychiatrist, or staff physician must make a medical evaluation of each individual's need for care in the facility. Appropriate professional personnel must make a psychiatric and social evaluation.

Each medical evaluation must include:

- Diagnosis
- Summary of present medical findings
- Medical history
- Mental and physical functional capacity
- Prognosis
- A recommendation by the physician concerning admission to the IMD or continued care in the psychiatric facility, for individuals who apply for Medicaid while in the facility

Plan of Care/Treatment Plan

The attending physician or staff physician must establish a written treatment plan of care for each individual before admission to a mental hospital and before authorization of payment.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The plan of care must include the following:

- Diagnosis, symptoms or complaints indicating a need for admission to inpatient care
- Description of the functional level of the patient
- Treatment objectives
- Orders for medications, treatments, therapies, activities, restorative/rehabilitative services, diet, social services, and special procedures needed for health and safety of the patient
- Continuing care plans that include post-discharge plans and coordination of inpatient services with partial discharge plans and related community services to ensure continuity of care with the recipient's family and community service providers upon discharge

The attending or staff physician and other appropriate staff involved in the care of the recipient must review the plan of care as needed or every 30 days.

The plan of care is evaluated to ensure that the recipient receives treatment that maintains or will restore the patient to the greatest possible level of health and independent functioning.

A written report of the evaluations and the treatment plan of care must be in the individual's record at the time of admission or immediately upon completion of the report if the individual is already in the facility.

Utilization Review (UR) Plan

As a condition of participation in the Alabama Medicaid program, each IMD must do the following:

- Have in effect a written UR Plan that provides for review of each recipient's need for services that the facility furnishes to the recipient
- Maintain recipient information required for UR, which includes the certification of need for service and the plan of care
- Provide a copy of the UR Plan and any subsequent revisions to Medicaid for review and approval

Provider Preventable Conditions (PPCs)

Provider Preventable Conditions (PPCs) are clearly defined into two separate categories: Healthcare Acquired Conditions and Other Provider Preventable Conditions (OPPCs).

Healthcare Acquired Conditions include Hospital Acquired Conditions (HACs).

OPPCs include but are not limited to the following: medication given to the wrong patient, wrong medication, wrong dose, wrong route, wrong time, wrong documentation in the medication administration records (MARs), wrong reason, and wrong response.

Non-payment of PPCs shall not prevent access to services for Medicaid beneficiaries.

To be reportable, PPCs must meet the following criteria:

- The PPC must be reasonably preventable as determined by a root cause analysis or some other means.
- The PPC must be within the control of the provider.
- The PPC must be clearly and unambiguously the result of a preventable mistake made and hospital procedures not followed, and not an event that could otherwise occur.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The PPC must result in significant harm. The OPPCs for consideration should be limited to those that yield a serious adverse result. Serious adverse result is defined as one that results in death, a serious disability or a substantial increase in the duration and/or complexity of care that is well beyond the norm for treatment of the presenting condition. A serious disability is defined as a major loss of function that endures for more than 30 days, is not present at the time services were sought and is not related to the presenting condition.
- Any process for identifying non-payable events must actively incorporate some element of case-by-case review and determination. While the source and cause of some OPPCs may be clear, most would require further investigation and an internal root cause analysis to determine the cause of the serious preventable event and to assign ultimate accountability.

Pursuant to these guidelines, hospitals will not seek payments for additional days directly resulting from a PPC.

Reporting Other Provider-Preventable Conditions (OPPCs)

The following OPPCs related to the administering of medication(s) and documentation provided in the medication administration records (MARs) must be reported to Medicaid by encrypted emailing of the required information to:

adverseevents@medicaid.alabama.gov Reportable “OPPCs” include but are not limited to:

- Wrong patient
- Wrong medication
- Wrong dose
- Wrong route
- Wrong time
- Wrong documentation
- Wrong reason
- Wrong response

Reports will require the following information: Recipient first and last name, date of birth, Medicaid number, date event occurred and event type.

The IMDs may use documentation from the physician’s qualifying diagnoses to identify Present of Admission which must be documented within 72 hours of the occurrence. Medicaid also recommends that the event be reported to Medicaid via e-mail within 45 days of occurrence.

Non-payment of provider preventable conditions shall not prevent access to services for Medicaid beneficiaries.

No reduction in payment for a PPC will be imposed on a hospital provider when the condition defined as a PPC for a particular patient existed prior to the initiation of treatment for that patient by that provider.

Reductions in Provider payment may be limited to the extent that the following apply:

- The Identified PPC would otherwise result in an increase in payment.
- IMDs are paid based on a daily per diem rate. It is the responsibility of the hospital to identify any Health Care-Acquired Condition and not seek payment for any additional days that have lengthened a recipient’s stay due to a PPC.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

In reducing the amount of days: Hospitals are to report a value code of '81' on the UB-04 claim form along with any non-covered days and the amount field must be greater than '0'.

It is the responsibility of the IMDs to identify these events, report them, and not seek any additional payment for additional days. Medicaid will accept all POA indicators as listed below:

- Y-Yes. Diagnosis was present at time of inpatient admission
- N-No. Diagnosis was not present at time of inpatient admission
- U-No information in the record. Documentation insufficient to determine if the condition was present at the time of inpatient admission
- W-Clinically undetermined. Provider unable to clinically determine whether the condition was present at the time of inpatient admission

It is the IMD's responsibility to include all supporting documentation with the chart for a review to be conducted by Medicaid's contracted Quality Improvement Organization (QIO). Submission of a root cause analysis is not required but may be submitted as part of the documentation to support billing.

Payment

Payment for inpatient services provided by IMDs for individuals ages 21 to 64 shall be the per diem rate established by Medicaid for the hospital. The per diem rate is based on the Medicaid cost report and all the requirements expressed in the Alabama Medicaid Administrative Code, Chapter 23.

Hospitals that terminate participation in the Medicaid program must provide a final cost report within 120 days of the date of termination of participation.

NOTE:

If a complete uniform cost report is not filed by the due date, the hospital shall be charged a penalty of $100 per day for each calendar day after the due date.

39.3 Inpatient Utilization Review

1. The determination of the level of care will be made by a licensed nurse of the hospital staff
2. All admissions will be retrospectively reviewed by the Medicaid Agency or designee as needed
3. For an individual who applies for Medicaid while in the facility, a Psychiatric Admission form must be signed by the attending physician at the time application for Medicaid is made
4. The following information shall be included on the Psychiatric Admission Form:
   (a) Recipient information:
      1. Admitting diagnosis
      2. Events leading to hospitalization
      3. History of psychiatric treatment
      4. Current medication
      5. Physician orders

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

6. Presenting signs and symptoms

(b) Events leading to present hospitalization

(c) History and physical

(d) Mental and physical capacity

(e) Summary of present medical findings including prognosis and

(f) Plan of care

39.4 Continued Stay Reviews (CSR)

The hospital's utilization review personnel are responsible for performing continued stay reviews on recipients who require continued inpatient hospitalization.

The initial continued stay review should be performed on the date assigned by Medicaid. Later reviews should be performed at least every 30 days from the initial CSR date assigned, provided the patient is approved for continued stay. Each continued stay review date assigned should be recorded in the patient's record.

If the facility's utilization review personnel determine that the patient does not meet the criteria for continued stay, the case should be referred to the facility's psychiatric advisor. If the advisor finds that the continued stay is not needed, the hospital's utilization review procedure for denial of a continued stay should be followed.

If a final decision of denial is made, the hospital notifies the recipient and the attending physician within two days of the adverse determination. Medicaid should be notified in writing within 10 days after the denial is made.

The facility's utilization review personnel are responsible for notifying Medicaid whenever patients are placed on leave status or return from leave. A brief summary describing the outcome of the therapeutic leave should be addressed at this time for patients returning from any leave status.

39.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

IMD hospital providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claims processing turnaround
- Ability to immediately correct claim errors
- Online adjustments capability and
- Enhanced access to eligibility information Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing

NOTE:

When an attachment is required, a hard copy UB-04 claim must be submitted.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

39.5.1 Time Limit for Filing Claims

Medicaid requires all claims to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

39.5.2 Revenue Codes

Refer to the Alabama UB-04 Manual, published by the Alabama Hospital Association, for a complete list of revenue codes.

39.5.3 Place of Service Codes

Place of service codes do not apply when filing the UB-04 claim form.

39.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

40

40 Alabama Coordinated Health Network (ACHN) Primary Care Physician (PCP) and ACHN Entities Billing

The Alabama Coordinated Health Network (ACHN) Manual has been developed by the Alabama Medicaid Agency to explain the policies and procedures of the ACHN program. Every effort has been made to present qualified providers a comprehensive guide to basic information concerning program requirements and billing procedures. The policies outlined in this manual are binding upon the provider. Providers should also refer to the Gainwell Provider Insiders, letters, transmittals or ALERTS regarding any updates or changes within this program.

If you have any questions about this program, please contact the Provider Assistance Center at 1 (800) 688-7989.

40.1 ACHN Overview

The ACHN Program will effectively link recipients, providers, and community resources in each of seven (7) newly defined regions to improve health outcomes for Medicaid recipients. Care Coordination within the ACHN is a single program that will allow the Agency and Providers a more effective platform for service delivery and improved quality.

The Networks are located in the Northwest, Northeast, Jefferson and Shelby, Central, East, Southeast, and Southwest regions. The ACHN Regional Map is available on the Medicaid's website at: www.Medicaid.Alabama.gov (Select the ***ACHN Providers*** tab)

See chart below for a listing of counties for each region:

Region	Counties
Central	Autauga, Butler, Chilton, Crenshaw, Dallas, Elmore, Lowndes, Marengo, Montgomery, Perry, and Wilcox counties
East	Blount, Calhoun, Cherokee, Clay, Cleburne, Coosa, DeKalb, Etowah, Randolph, Talladega, Tallapoosa, and St. Clair counties
Jefferson/Shelby	Jefferson, and Shelby counties
Northeast	Cullman, Jackson, Limestone, Madison, Marshall, and Morgan counties
Northwest	Bibb, Colbert, Fayette, Franklin, Greene, Hale, Lamar, Lauderdale, Lawrence, Marion, Pickens, Sumter, Tuscaloosa, Walker, and Winston counties
Southeast	Barbour, Bullock, Chambers, Coffee, Covington, Dale, Geneva, Henry, Houston, Lee, Macon, Pike, and Russell counties
Southwest	Baldwin, Choctaw, Clarke, Conecuh, Escambia, Mobile, Monroe, and Washington counties

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Entities and their contact information:

Visit www.Medicaid.Alabama.gov and select the ***ACHN Providers*** tab, under Program Documents for the ACHN Contact Information for Providers.

40.2 ACHN Care Coordination Services

PCP Groups will partner with licensed social workers and nurses from the ACHN who will provide Care Coordination services. Care Coordination referrals may be requested by providers, recipients, or community sources.

The ACHN care coordinators can, among other things:

- Provide services in a setting of the recipient's choice, including provider offices, hospitals, ACHN entity office, public location, or in the recipient's home
- Help manage complex or non-compliant patients
- Perform a screening and assessment of the recipient's needs
- Assist recipients in obtaining transportation or applying for Medicaid
- Help recipients with appointments or appointment reminders
- Coordinate and facilitate referrals
- Educate or assist recipients with medication or treatment plans
- Help recipients seek care in the most appropriate setting (e.g., provider's office versus emergency room)
- Facilitate communication between the patient and care providers
- Help recipients locate needed community services

Recipients with abnormal lead levels, newborn metabolic screenings, and newborn hearing screenings will continue to receive Care Coordination from the Alabama Department of Public Health.

40.3 Agreements for Primary Care Physicians (PCPs)

40.3.1 *Enrollment*

Primary Care Physicians (PCPs) who want to receive Bonus Payments and ACHN Participation Rates in conjunction with the state's ACHN Program must sign **two** agreements beyond their Medicaid Enrollment. A PCP Group Enrollment Agreement with Medicaid and one agreement with an ACHN is required. The PCP must be enrolled with Medicaid as a Medicaid provider. The provider's enrollment with Medicaid and the ACHN must be fully processed as defined below to ensure bonus payments are made timely. The enrollment agreement must be on file by March 1st, June 1st, September 1st, or December 1st to ensure timely payment. Below are the guidelines for timely processing of agreements:

Medicaid PCP Group Agreement: Providers must complete and submit the agreement directly to Gainwell. The enrollment effective date for the ACHN PCP Group Agreement will the first day of the following month, if the agreement is received and contains no errors prior to the 15th of the month. For agreements received on or after the 15th of the month, the effective date of the enrollment will be the month following the next month.

- **Example 1:** If an agreement is received by Gainwell on December 14th and contains no errors will have an enrollment effective date of January 1st.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- **Example 2:** If an agreement is received by Gainwell on December 19th and contains no errors will have an enrollment effective date of February 1st.
- **Example 3:** If an agreement is received by Gainwell on December 5th but is returned for errors and the returned agreement is sent back to Gainwell, contains no errors, and received on December 16th, the enrollment effective date will be February 1st.

ACHN PCP Network Participation Agreement: In addition to the Medicaid PCP Group Agreement, providers must complete and submit an ACHN PCP Network Participation Agreement to an ACHN to qualify for participation rates and bonus payments. Providers must sign the agreement with the ACHN. On a monthly basis, the ACHNs will notify the Agency of all executed participation agreements. The PCPs and the ACHNs must ensure that the Medicaid Group Billing ID, NPI, Medicaid ID, and name listed on the ACHN PCP Network Participation Agreement is correct and consistent with what the Agency has on the provider's Medicaid file. The provider's file must also be in an active status with the Medicaid Agency. All information submitted must be based on the group level unless the provider is set up as an individual practice. If the information is not correct or consistent, the agreement will not be added to the provider's Medicaid file. In the absence of this agreement, PCPs will not be eligible for participation rates and will not receive bonus payments. If all information communicated to the Agency is correct, the enrollment effective date for the ACHN PCP Network Participation Agreement will be the first day of the following month. Contact the ACHN you intend to participate with to inquire about submission deadlines for the PCP Network Participation Agreement.

The following provider types are eligible to participate in the ACHN program:

- Family Practitioners
- General Practitioners
- Pediatricians
- Internists
- OB/GYN
- FQHCs and RHCs are eligible to participate with ACHN as a PCP

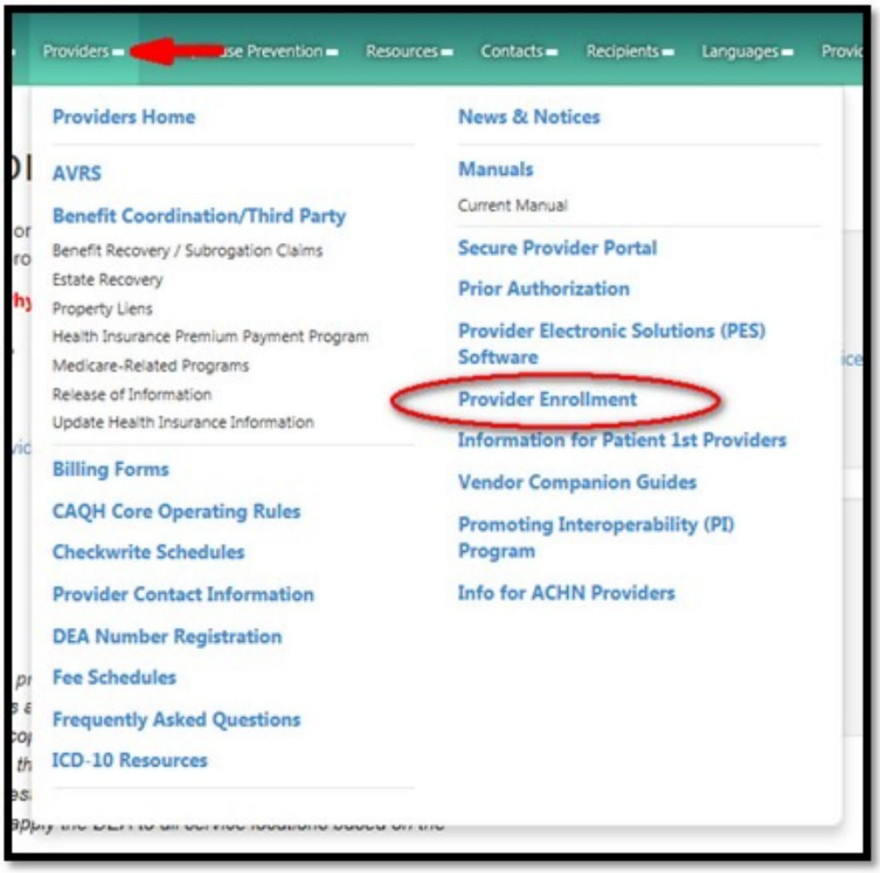
NOTE:

When in the best interest of a patient, a nontraditional PCP may choose to enroll as a PCP with Medicaid. Other physician types may be considered for PCP participation if willing to meet all contractual and participation requirements.

NOTE:

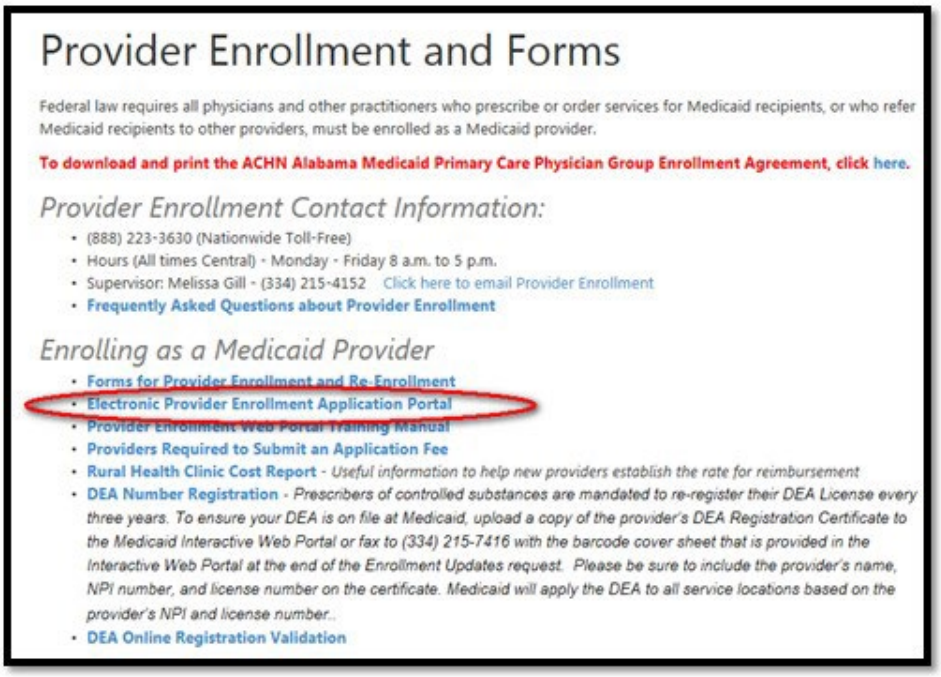
Out-of-state Providers who are interested in participating in the ACHN program, must be within 30 miles of the Alabama state border.

1. The PCP Group Enrollment Agreement may be obtained by visiting www.medicaid.alabama.gov, click ACHN tab, and then click on the Provider section. The ACHN PCP Group Enrollment Agreement must be electronically uploaded to Gainwell Technologies for processing. Instructions for uploading the agreement are posted on Medicaid's website.



The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

2. To obtain the PCP Group Agreement with the ACHN, email the ACHN Regional contact that is listed in the "ACHN Contact Information for Providers" located on Medicaid's website at www.Medicaid.Alabama.gov, select the ***ACHN Providers*** tab.



NOTE:
If you are completing the Medicaid PCP Group Agreement for a new enrollment that resulted in being issued a new Medicaid Billing Group ID from a previous enrollment, you must contact the Managed Care Operations (MCO) Division at Medicaid for additional processing. Failure to contact MCO may result in omitted attribution for the new Medicaid Billing Group ID. You may contact MCO at ACHN@medicaid.alabama.gov.

40.3.2 *Adding a Provider to an Existing ACHN PCP Group Agreement*

For providers who wish to be added to an existing ACHN PCP Group Enrollment, the provider must complete an "Individual within a Group" application. Completing this application will enroll the provider within the group that currently has a PCP Group Agreement on file. The application is submitted electronically via the application portal. This application is also the initial enrollment application for AL Medicaid. The application portal may be found at www.medicaid.alabama.gov. Go to the Providers tab, select Provider Enrollment, and click the hyperlink titled *Electronic Provider Enrollment Application Portal*. For assistance with adding the new provider to your ACHN enrollment, you may contact Provider Enrollment at 1-888-223-3630 or Provider Assistance at 1-800-688-7989.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

40.3.3 *Adding/Updating a Nurse Practitioner's or Physician Assistant's Collaborating Physician*

Nurse practitioners (NPs) and physician assistants (PAs) must be collaborating with an active Medicaid enrolled physician to participate in the Medicaid program. The NP's and PA's collaborating physician must align with records from the Alabama Board of Medical Examiners (ALBME). In addition, the NP or PA, the group, and the collaborating physician must all be linked under the same group enrollment NPI. Inconsistent or incorrect collaborating physician information on the NP's or PA's Medicaid file may cause claims to deny. To add or update the collaborating physician on the NP's or PA's Medicaid file, a request must be submitted on letterhead requesting the addition or update. The letter must include the NP's name, NPI, Medicaid ID (for each location), the collaborating physician's name, collaborating physician's NPI, collaborating physician's Medicaid ID, and signature. A copy of the current collaborating license must be attached to the letter. The letter and license must be submitted through the secure web portal. For assistance with updating the NP's or PA's collaborating physician, contact Provider Enrollment at 1-888-223-3630.

40.4 PCP Determination

To be identified as a PCP a provider must be one of the following:

- A Teaching Facility
- A County Health Department
- A PCP group or individual participating with an ACHN
- An OB/GYN
- An FQHC
- An RHC

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

40.5 Requirements for PCP Active Participation with the ACHN

PCP requirements for "active participation" with one of the seven ACHNs are described below:

- In person or virtual attendance over a 12-month period to at least three (3) quarterly medical management meetings with the ACHN's medical director (one PCP or nurse practitioner/physician assistant from the group may attend to meet attendance requirements)
- Engagement in ACHN initiatives centered around Quality Measures
- Data review with the ACHN to help achieve Agency and ACHN Quality goals
- Engagement as appropriate in the ACHN's multidisciplinary care team and the development of an individualized and comprehensive care plan

If a PCP stops actively participating or terminates their agreement with the ACHN they signed the original agreement with, then the PCP Group must sign another agreement to actively participate with a different ACHN to continue receiving Participation Rates and Bonus payments.

In the absence of these agreements, PCP Groups will not be eligible to receive enhanced Participation Rates or Bonus Payments for Quality, Cost Effectiveness, and Patient Centered Medical Home (PCMH) recognition. If a provider chooses not to engage in active participation, they will receive regular fee-for-service rates and, if eligible, current BUMP rates.

40.6 Provider Directory

A Provider Directory is available via the Medicaid Web site to all providers and recipients to assist in selecting physicians/clinics in their regions. The Provider Directory can be used by recipients to help locate a doctor. The Provider Directory can also be used by providers to obtain contact information. Providers and recipients can filter to search by name, city, county, specialty or a combination of all. The Provider Directory is mobile and print friendly.

40.7 PCP Group/ PCP Disenrollment

The Agreement to participate in the ACHN program may be terminated by either the PCP Group or Agency, with cause or by mutual consent; upon at least 30 days written notice and will be effective on the first day of the month, pursuant to processing deadlines.

If a PCP dies, moves out of the service area, or loses Medicaid and/or **ACHN** provider status, the Agency must be notified by submitting a Disenrollment Form within 30 days of the PCP's departure.

NOTE:

For all Disenrollment situations listed above, a Disenrollment Request Form must be completed. You may obtain the form at:
http://medicaid.alabama.gov/content/9.0_Resources/9.4_Forms_Library/9.4.16_Provider_Enrollment_Forms.aspx

Disenrollment forms must be electronically uploaded to the Web Portal in PDF format. Failure to provide a 30-day notice may preclude future participation opportunities.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

40.8 PCP Group Responsibilities, Functions, and Duties

In order to participate as a PCP Group, the following requirements must be met. Detailed information is provided on specific requirements in subsequent sections.

The PCP Group shall comply with all applicable federal and state statutes and regulations, and all amendments thereto, that are in effect when the ACHN Agreement became into effect during the term of the ACHN Agreement. This includes, but is not limited to, the Alabama State Plan and Title 42 of the Code of Federal Regulations (CFR).

The PCP Group agrees to the following:

- Enter a Participation Agreement with an Entity;
- Actively Participates (refer to section 40.5) with an Entity;
- Each PCP Group physician must be a licensed physician enrolled in the Alabama Medicaid Program who has not been sanctioned.
- Be listed as a Group in the ACHN Directory for the purpose of providing care to recipients and managing their health care needs as agreed in the ACHN agreement.
- Provide services to recipients pursuant to the terms of the ACHN Agreement.
- Provide or arrange for primary care coverage, twenty-four (24) hours per day and seven (7) days per week as defined in Attachment A of the PCP Group Agreement, for services, consultation, management or referral, and treatment for emergency medical conditions. Referral (by answering service staff, voice response, or medical practitioner without triage) to the hospital emergency department for services does not satisfy this requirement. The PCP Group must have at least one telephone line that is answered by the office staff during regular office hours.
- Provide EPSDT preventive care screenings to Medicaid eligible children age birth through 20. PCP Groups serving this population who do not provide EPSDT services are required to sign an agreement with another provider to provide EPSDT services. PCP Groups must retain a copy of this agreement in their files and must ensure that their records include information regarding the extent of these services.
    - Provide hospital admissions. (Refer to section 40.8.1: Hospital Admitting Privileges Requirement)
    - Maintain a unified patient medical record for each recipient following the medical record documentation guideline as defined by Medicaid Policy in Rule No. 560-X-1-.21 of the Alabama Medicaid Administrative Code and policy.
    - Promptly arrange referrals for medically necessary health care services that are not provided directly and document referral for specialty care in the medical record. Provide the NPI to the consulting provider.
    - Transfer the recipient medical record to the receiving PCP Group at the request of the new PCP Group and as authorized by the recipient within thirty (30) days of the date of the request. Recipients cannot be charged for copies of medical records.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Patients must request their records be transferred to the new PCP Group and must not be charged a fee for this service.

- Authorize care for the recipient or see the recipient based on the standards of appointment availability as defined by policy.
- Refer for a second opinion as defined by policy.
- Review and use all recipient utilization, quality improvement, and other reports provided by the Agency and/or Entity for the purpose of practice level utilization management, quality of care improvement, and advise the Agency of errors, omissions, or discrepancies.
- Participate with Agency utilization management, quality assessment, complaint and grievance, and administrative programs.
- Provide the Agency or its duly authorized representatives and appropriate Federal Agency representatives unlimited access (including onsite inspections and review) to all records relating to the provision of services under the PCP Group agreement as required by Medicaid policy in Rule No. 560-X-1-.21 of the Alabama Medicaid Administrative Code and 42 C.F.R. § 431.107.
- Maintain reasonable standards of professional conduct and provide care in conformity with generally accepted medical practice following national and regional clinical practice guidelines.
- Notify the Agency of all changes to information provided on the initial application for participation in the ACHN Program. If such changes are not reported within thirty (30) days of change, future participation may be limited.
- Give written notice of termination of ACHN Agreement to each recipient who received his or her primary care from, or was seen on a regular basis, by the PCP Group within thirty (30) days after receipt of the termination notice or within thirty (30) days of notice of termination.
- Retain records in accordance with requirements of Rule No. 560-X-1-.21 of the Alabama Medicaid Administrative Code after the final payment is made and all pending matters closed, plus additional time if an audit, litigation, or other legal action involving the records is started before the original retention period ends.
- Comply with all Federal and State laws and regulations including Title VI of the Civil Rights Act of 1964, Title IX of the Education of Amendments of 1972 (regarding education programs and activities), the Age Discrimination Act of 1975, the Rehabilitation Act of 1973, and the Americans with Disabilities Act.
- Receive prior approval from the Agency of any ACHN specific, or education materials prior to distribution.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Make oral interpretation services available free of charge to each potential enrollee and enrollee. This applies to all non-English languages.

NOTE:

Recipients can obtain assistance with language interpretation by calling the Recipient Call Center at 1(800) 362-1504.

- Provide the Agency with at least thirty (30) days prior notice of PCP Group disenrollment, change in practice site, Medicaid Group Billing ID, or NPI changes to allow for notification to recipients. Failure to provide thirty (30) day notice may preclude future participation.
- Have the ability to provide comprehensive whole-person care that includes a comprehensive health care assessment (including mental health and substance use), coordination and access to preventive and health promotion services, including prevention of mental illness and substance use disorders, medical and health care services informed by evidence-based clinical practice guidelines, mental health, substance abuse, and developmental services, and chronic disease management, including self-management support to individuals and their families, and interventions.
- Have the ability to provide continuity of personal clinician assignment and clinician care, organization of clinical information, clinical information exchange, and specialized care settings.
- Have the capacity to provide culturally appropriate, and person- and family-centered services, coordinate and provide access to individual and family supports, including referral to community, social support, and recovery services, and provide a positive experience of care.
- Upon termination of the Agreement, the PCP Group must supply all information necessary for reimbursement of outstanding Medicaid claims.

The PCP Group is prohibited from the following:

- Discriminating against Recipients on the basis of health status or the need for health care services.
- Discriminating against Recipients on the basis of race, color, or national origin and will refrain from using any policy or practice that has the effect of discriminating on the basis of race, color, or national origin.
- Refrain from knowingly engaging in a relationship with the following:
  1. An individual who is debarred, suspended or otherwise excluded from participating in procurement activities under the Federal Acquisition Regulation or from participating in non-procurement activities under regulations issued under Executive Order No. 12549 or under guidelines implementing Executive Order No. 12549; or
  2. An individual who is an affiliate, as defined in the Federal Acquisition Regulation.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Note: The relationship is described as follows:

a. As a director, officer, partner of the PCP Group; or

b. A person with beneficial ownership of more than five percent (5%) or more of the PCP Group's equity; or

c. A person with an employment, consulting or other arrangement with the PCP Group for the provision of items and services which are significant and material to the PCP Group's contractual obligation with the Agency.

40.8.1 *Hospital Admitting Privileges Requirement*

- PCP Group is required to establish and maintain hospital admitting privileges or have a formal arrangement with a hospitalist group or another physician or group for the management of inpatient hospital admissions that addresses the needs of all recipients. If a Group does not admit recipients, then the Hospital Admitting Agreement must be submitted to the Agency to address this requirement for participation. If the PCP Group has entered a formal arrangement for inpatient services, this form must be completed by both parties, and the applicant must submit the original form with the Application for enrollment or resubmit within ten (10) days of when a change occurs regarding the PCP Group's management of inpatient hospital admissions.
- A formal arrangement is defined as a voluntary agreement between the PCP Group and the agreeable physician/group. The agreeable party is committing in writing to admit and coordinate medical care for the recipient throughout the inpatient stay. Admitting privileges or the formal arrangement for inpatient hospital care must be maintained at a hospital that is within a forty-five (45) minutes' drive time from the PCP Group's practice. If there is no hospital that meets the above geographical criteria, the hospital geographically closest to the PCP Group's practice will be accepted.
- Exception may be granted in cases where it is determined the benefits of a PCP Group's participation outweigh the PCP Group's inability to comply with this requirement.

See Attachment B of Alabama Medicaid Primary Care Physician Group Enrollment Agreement for more information on the Hospital Admitting Requirements.

40.8.2 *24/7 Coverage Requirement*

- The PCP Group must provide recipients with after-hours coverage. It is important that recipients be able to contact their PCP Group to receive instruction or care at all times, so that care will be provided in the most appropriate manner to the recipient's condition. After hours coverage must be available 24 hours a day every day of the year. The PCP Group can meet this requirement through a variety of methods. To qualify as an ACHN PCP Group, one of the following must be met:
  - The after-hours telephone number must connect the patient to the PCP Group's physician or an authorized medical practitioner.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The after-hours telephone number must connect the recipient to a live voice call center system or answering service who will either direct the recipient to the appropriate care site or contact the PCP Group's physician or PCP Group's authorized medical practitioner. If the PCP Group's physician or authorized medical practitioner is contacted, then the recipient should receive instructions within one (1) hour.
- The after-hours telephone number can connect to a hospital if the PCP Group has standing orders with the hospital to direct recipients to the appropriate care site. (For example, if the recipient's symptoms are such that the recipient can be seen the next morning, the hospital should direct the recipient to contact the PCP Group in the morning to make an appointment).

An office telephone line that is not answered after hours or answered after hours by a recorded message instructing recipients to call back during office hours or to go to the emergency department for care is not acceptable. It is not acceptable to refer recipients to the PCP Group's home telephone if there is not a system in place as outlined above to respond to calls. Instructions that refer all requests to go physically to the Emergency Room are not acceptable. Failure to comply with the 24/7 coverage requirements may affect future participation opportunities. See Attachment A of Alabama Medicaid Primary Care Physician Group Enrollment Agreement for more information on the 24/7 Coverage Requirements.

40.8.3 *EPSDT Requirement*

For recipients of Medicaid, birth to age 21, the EPSDT Screening is a comprehensive preventive service at an age appropriate recommended schedule. It is the only reimbursable preventive medical service for this age group. There are numerous components of the EPSDT, all of which are required in the Federal Early Periodic Screening Diagnosis Treatment (EPSDT) program. All age appropriate components must be performed at the time of a screening exam. These components are listed and described in Appendix A of the Alabama Medicaid Provider Manual.

PCP's are requested to either perform or make arrangements for EPSDT screenings. The PCP is responsible for ensuring that age appropriate EPSDT screenings are provided. If a PCP cannot or chooses not to perform the comprehensive EPSDT screenings, the PCP may authorize another provider to perform the screenings for enrollees in the birth to 21 age group.

If the PCP enters into an agreement with a screener in order to meet this ACHN requirement for participation, the agreement containing the original signatures of the PCP or the authorized representative and the screener or an authorized representative must be submitted within the enrollment application. The PCP must keep a copy of this agreement on file. If this agreement is executed after enrollment a copy must be submitted within ten (10) days of execution.

The agreement can be entered into or terminated at any time by the PCP or the screener. The Agency and Gainwell must be notified immediately of any change in the status of the agreement.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

If there is an agreement between the PCP and a Screener to provide EPSDT services, the PCP agrees to:

- Refer patients for EPSDT screenings. If the patient is in the office, the physician/office staff will assist the patient in making a screening appointment with the Screener within ten (10) days.
- Maintain, in the office, a copy of the physical examination and immunization records as part of the patient's permanent record.
- Monitor the information provided by the Screener to assure that children in the ACHN program are receiving immunizations as scheduled and counsel patients appropriately if found in noncompliance with well child visits or immunizations.
- Review information provided by the Screener to coordinate any necessary treatment and/or follow-up care with patients as determined by the screening.
- Notify the Agency and Gainwell immediately of any changes to this agreement.

The Screener must agree to:

- Provide age appropriate EPSDT examinations and immunizations within sixty (60) days of the request for patients who are referred by the PCP or are self-referred.
- Send EPSDT physical examination and immunization records within 30 days to the PCP.
- Notify the PCP of significant findings on the EPSDT examination or the need for immediate follow-up care within 24 hours. Allow the PCP to direct further referrals for specialized testing or treatment.
- Notify the Agency and Gainwell immediately of any changes to this agreement.

40.9 Standards of Appointment Availability and Office Wait Times

The PCP Group must conform to the following standards for appointment availability:

- Emergency care – immediately upon presentation or notification
- Urgent care – within 24 hours of presentation or notification
- Routine sick care – within 3 days of presentation or notification
- Routine well care – within 90 days of presentation or notification (15 days if pregnant)

The PCP Group must conform to the following standards for office wait times:

- Walk-ins – within two hours or schedule an appointment within the standards of appointment availability
- Scheduled appointment – within one hour
- Life-threatening emergency – must be managed immediately

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

If these standards cannot be met due to extenuating circumstances, then the recipient should be informed within a reasonable amount of time and given an opportunity to reschedule the appointment.

40.10 PCP Medical Records Guidelines

Medical records should reflect the quality of care received by the recipient. However, many times medical records documentation for the level of care provided varies from provider to provider. Therefore, in order to promote quality and continuity of care, a guideline for medical record keeping has been established. All ACHN PCP Groups must implement the following guidelines as the standards for medical record keeping:

1. Each page, or electronic file in the record, contains the recipient's name or recipient's Medicaid identification number.
2. All entries are dated.
3. All entries are identified as to the author.
4. The record is legible to someone other than the writer, including the author.
5. Medication allergies and adverse reactions are prominently noted and easily identifiable as well as the absence of allergies.
6. Personal and demographic data is recorded and includes age, sex, address, employer, home and work telephone numbers, and marital status.
7. Past medical history is easily identified including serious accidents, operations, and illnesses. For children, past medical history relates to prenatal care and birth.
8. There is a completed immunization record.
9. Diagnostic information, medication, medical conditions, significant illnesses, and health maintenance concerns are recorded in the medical record.
10. Notation concerning smoking, alcohol, and other substance abuse is present.
11. Notes from consultations are in the record. Consultation, lab, and X-ray reports filed in the chart have the ordering provider's initials or other documentation signifying review. Consultation and significantly abnormal lab and imaging results have an explicit notation in the record of the follow-up plans.
12. Emergency care is documented in the record.
13. Discharge summaries are included as part of the medical record for hospital admissions.
14. Documentation of individual encounters that provide adequate evidence of appropriate history, physical examination, diagnosis, diagnostic test, therapies, and other prescribed regimen, follow-up care, referrals and results thereof, and all other aspects of patient care, including ancillary services.

40.11 Recipient Education

Recipient education will be an integral part of the ACHN Program to help the recipients understand the program and their responsibilities. It is also imperative to stress the importance of contacting the ACHN and/or the Recipient Call Center (RCC) (1-800-362-1504) number anytime there is a question.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

In addition, as the coordinator of care, it is important for PCP Groups to be actively involved in patient education. PCP Groups are encouraged to contact all new recipients by telephone or in writing.

Providers should address the following subjects with each new recipient:

- The PCP Group's requirement to provide medical advice and care 24 hours per day, 7 days per week and the preferred method for contacting the PCP Group
- The requirement that the recipient must contact the PCP Group before going to the emergency room unless the recipient feels that his/her life or health is in immediate danger
- The importance of regular preventive care visits such as Well Child Check-ups EPSDT screenings for children, immunizations, check-ups, mammography, cholesterol screenings, adult health assessments, and diabetic screenings
- The availability of additional information for recipients from the ACHN or the Agency's Recipient Call Center

40.12 Agreement Violation Provisions

Failure to meet the terms outlined in the ACHN PCP Group Enrollment Agreement or other provisions of the Medicaid Program governed under Social Security Act Sections 1932, 1903(m) and 1905(t) may result in the following actions by the Agency:

- Referral to the Agency's Program Integrity for investigation of potential fraud
- Referral to the Board of Medical Examiners or other appropriate licensing board
- Termination of the PCP Group from the Alabama Medicaid Program

40.13 BMI Requirement

Primary Care Physicians (PCPs), nurse practitioners and physician assistants collaborating with a PCP, a PCP group or individual participating with an ACHN, Federally Qualified Health Centers (FQHCs), Rural Health Centers (RHCs), Public Health Departments, and OB/GYNs that bill procedure codes 99202-99205, 99211-99215, and 99242-99245 must include an annual BMI diagnosis on the claim or the claim will be denied. EPSDT procedure codes 99382-99385 and 99392-99395 must also include an annual BMI diagnosis on the claim or the claim will be denied. If a BMI has been reported on a recipient for the current calendar year (January 1 – December 31), the claim will pay without a new BMI. If the BMI has not been reported on the recipient for the current calendar year, a BMI will be required for the claim to pay. For additional information on changes to the BMI Requirement, see the *Changes to BMI Requirement* ALERT on the Alabama Medicaid Agency's website.
Medicaid ALERTs: https://medicaid.alabama.gov/alerts.aspx

BMI Requirement during Telemedicine/Telehealth Visits

The BMI will be required for all visits including the telemedicine visits. (Refer to Chapter 112, Telemedicine Services, for general benefit information and limitations.)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The table below provides a description of procedure codes and ICD-10 codes that require a percentile on the CMS 1500 claim form for **recipient's age 3-19 years**:

Procedure Code Description	ICD-10 Diagnosis Code Description for Ages 3-19
99202 Office/Outpatient Visit New 99203 Office/Outpatient Visit New 99204 Office/Outpatient Visit New 99205 Office/Outpatient Visit New 99211 Office/Outpatient Visit Est 99212 Office/Outpatient Visit Est 99213 Office/Outpatient Visit Est 99214 Office/Outpatient Visit Est 99215 Office/Outpatient Visit Est 99242 Office Consultation 99243 Office Consultation 99244 Office Consultation 99245 Office Consultation 99382 EPSDT New Patient 99383 EPSDT New Patient 99384 EPSDT New Patient 99385 EPSDT New Patient 99392 EPSDT Est Patient 99393 EPSDT Est Patient 99394 EPSDT Est Patient 99395 EPSDT Est Patient	Z6851 BMI Pediatric, Less Than 5th Percentile for Age Z6852 BMI Pediatric, 5th Percentile to Less Than 85% for Age Z6853 BMI Pediatric, 85% To Less Than 95th Percentile for Age Z6854 BMI Pediatric, 95th Percentile for Age to less than 120% of the 95th Percentile for Age Z68.55 BMI Pediatric, 120% of the 95th Percentile for Age to less than 140% of the 95th Percentile for Age Z68.56 BMI Pediatric, greater than or equal to 140% of the 95th Percentile for Age

Deleted: Greater Than or…95% for Age
Added: 95th Percentile for…Percentile for Age

NOTE:

For Pediatric BMI reporting: The same BMI code may be appended to the claim until the next well child check (where a BMI is typically determined) unless the physician considers the clinical need for a BMI redetermination sooner than the next well child check.

The table below provides a description of procedure codes and ICD-10 codes that require a BMI on the CMS 1500 claim form for **recipients age 20 and older**:

Procedure Code Description	ICD-10 Diagnosis Code Description For Ages 20 and Older
99202 Office/Outpatient Visit New 99203 Office/Outpatient Visit New 99204 Office/Outpatient Visit New 99205 Office/Outpatient Visit New 99211 Office/Outpatient Visit Est 99212 Office/Outpatient Visit Est 99213 Office/Outpatient Visit Est 99214 Office/Outpatient Visit Est 99215 Office/Outpatient Visit Est	Z681 Body Mass Index (BMI) 19 Or Less, Adult Z6820 Body Mass Index (BMI) 20.0-20.9, Adult Z6821 Body Mass Index (BMI) 21.0-21.9, Adult Z6822 Body Mass Index (BMI) 22.0-22.9, Adult Z6823 Body Mass Index (BMI) 23.0-23.9, Adult

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

99242 Office Consultation 99243 Office Consultation 99244 Office Consultation 99245 Office Consultation	Z6824 Body Mass Index (BMI) 24.0-24.9, Adult Z6825 Body Mass Index (BMI) 25.0-25.9, Adult Z6826 Body Mass Index (BMI) 26.0-26.9, Adult Z6827 Body Mass Index (BMI) 27.0-27.9, Adult Z6828 Body Mass Index (BMI) 28.0-28.9, Adult Z6829 Body Mass Index (BMI) 29.0-29.9, Adult Z6830 Body Mass Index (BMI) 30.0-30.9, Adult Z6831 Body Mass Index (BMI) 31.0-31.9, Adult Z6832 Body Mass Index (BMI) 32.0-32.9, Adult Z6833 Body Mass Index (BMI) 33.0-33.9, Adult Z6834 Body Mass Index (BMI) 34.0-34.9, Adult Z6835 Body Mass Index (BMI) 35.0-35.9, Adult Z6836 Body Mass Index (BMI) 36.0-36.9, Adult Z6837 Body Mass Index (BMI) 37.0-37.9, Adult Z6838 Body Mass Index (BMI) 38.0-38.9, Adult Z6839 Body Mass Index (BMI) 39.0-39.9, Adult Z6841 Body Mass Index (BMI) 40.0-44.9, Adult Z6842 Body Mass Index (BMI) 45.0-49.9, Adult Z6843 Body Mass Index (BMI) 50-59.9, Adult Z6844 Body Mass Index (BMI) 60.0-69.9, Adult Z6845 Body Mass Index (BMI) 70 or Greater, Adult

Some specialties are exempt from the BMI requirement. The table below lists provider specialties that are excluded from the BMI requirement:

Spec	Description	Spec	Description
021	Cardiac Electrophysiology	332	Otologist, Laryngologist, Rhinologist
023	Sports Medicine	337	Plastic Surgeon
180	Optometrist	339	Psychiatrist
310	Allergist	340	Pulmonary Disease Specialist
311	Anesthesiologist	341	Radiologist
312	Cardiologist	342	Thoracic Surgeon
313	Cardiovascular Surgeon	343	Urologist
314	Dermatologist	750	Colon and Rectal Surgery

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

317	Gastroenterologist	760	EENT
319	General Surgeon	770	Endocrinologist
321	Hand Surgeon	780	Hematology
324	Nephrologist	790	Infectious Disease
325	Neurological Surgeon	810	Orthopedic
326	Neurologist	830	Rheumatology
329	Oncologist	922	Perinatologist High-Risk Pregnancy
331	Orthopedic Surgeon		

NOTE:
Pregnant women with a pregnancy diagnosis code are excluded from the BMI requirement.

40.14 Referral Requirements

PCP to PCP referrals are not required. Under the ACHN program for specialty services, a referral from a PCP or an ACHN Network is no longer required (with the exception of Lock-in and EPSDT programs). EPSDT referrals will continue to be required. (Refer to Appendix A for EPSDT referral requirements.)

40.14.1 *Referrals for Specialty Providers Associated with Teaching Facilities*

Alabama Medicaid providers who are considered teaching specialty providers may provide services to Medicaid recipients without a Primary Care Physician (PCP) referral. Medicaid claims can be processed for payment without a referral, however, the absence of communication between PCPs and specialists may hinder optimal coordination of medical care. Therefore, communication is encouraged. The Early Periodic Screening, Diagnosis, and Treatment (EPSDT) referral remains in place to assist with managing the fourteen-office visit limit. For more information regarding referrals for Specialty Providers Associated with Teaching Facilities, you may access the Teaching Facility Referrals in the ACHN one-pager with the following link: https://medicaid.alabama.gov/documents/5.0_Managed_Care/5.1_ACHN/5.1.3_ACHN_Providers/5.1.3_Teaching_Facility_Referrals_ACHN_10-31-19.pdf.

40.14.2 *Referral Form*

All referrals must be documented on the *Alabama Medicaid Agency Referral Form (Form 362). (Applies to EPSDT and Lock-in programs)* Please refer to the Appendix A of the Medicaid Provider Manual for further information on EPSDT.

40.14.3 *EPSDT Screening Referrals*

Please refer to the Appendix A of the Medicaid Provider Manual for further information on EPSDT.

40.15 Override Requests

In extenuating circumstances, on a case-by-case basis, and after thorough review, Medicaid may determine that an override may be prudent in some situations. There may also be instances where a BMI cannot be determined (e.g. wheelchair bound recipients). In these cases, providers may request a BMI override using the **PCP Override Request form** to obtain payment. A copy of the **PCP Override Request**

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

form is in Appendix E of the Medicaid Provider Manual. An Override Request Form and a clean Red Drop Ink claim form (CMS Form 1450 (UB-04) or CMS Form 1500) must be submitted to the Network Provider Assistance Unit by mail within 90 days of the date of service. CMS Form 1450 (UB-04) or CMS Form 1500 must be an original and must be signed or the override request will not be approved and returned to the provider. Requests will be evaluated within 60 days of receipt. Overrides will not be approved for well visits.

The override request must be mailed to:

Alabama Medicaid Agency
Network Provider Assistance Unit
501 Dexter Avenue
P.O. Box 5624
Montgomery, AL 36103-5624

40.16 Reimbursements and Payments to PCP Groups

PCP Groups are eligible to earn higher payments for 13 Evaluation and Management (E&M) codes if they participate with the ACHNs. This higher payment is called the ACHN Participation Rate and includes the following E&M codes: 99202-99205, 99211-99215, and 99242-99245. Nurse Practitioners and Physician Assistants who are enrolled in the PCP Group will receive 80% of the physician rate for these E&M codes. FQHCs and RHCs are excluded from this payment as they receive encounter rates.

Definitions for Different Rates PCPs may earn:

Fee-For-Service Rates: This is the base fee-for-service rate a physician will receive for E&M codes if he/she chooses not to participate with the ACHN.

BUMP Rates: PCPs must qualify for the BUMP rates as described by the Physician Program. Follow the same attestation process as currently exists. (Refer to Chapter 28, Physician Program, for additional information.)

Participation Rates: Participation Rates are higher than BUMP rates and will be paid to providers that actively participate with the ACHN (refer to section 40.5). FQHCs and RHCs will not receive these rates, however, but will continue to receive encounter rates.

Bonus Payments: These payments will be made to all participating providers (including FQHCs and RHCs) during the start-up phase of the program and will be based on the attribution of recipients to providers (refer to section 40.19). After the start-up phase, bonuses will be based on performance. Nurse Practitioners, Physician Assistants, and Nurse Midwives will receive 80% of the physician rate for these Bonus Payments. These Bonus Payments also apply to FQHCs and RHCs.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Bonus payments will be made on the second or third checkwrite of the 1st month of the quarter (January, April, July, and October) unless otherwise noted.

Payment Types and Payment Cycles are described in the table below:

Type of Payment	When Paid
Fee-For-Service	Every checkwrite
ACHN Participation Rate	Every checkwrite
Bonus Payment	The second or third checkwrite of the first month of the quarter.
BUMP Payments	Every checkwrite

The table below shows four different scenarios for PCP Group Payments:

Alabama Medicaid Agency

ACHN Primary Care Physician Payment Chart

Primary Care Physician Scenarios	Base FFS Rates	Bump Rates	Participation Rates	Bonus Payments
PCP Scenario 1: PCPs not eligible for Bump Rates & not participating with ACHN	√	X	X	X
PCP Scenario 2: PCPs not eligible for Bump Rates & participating with ACHN	√	X	√	√
PCP Scenario 3: PCPs eligible for Bump Rates & not participating with ACHN	X	√	X	X
PCP Scenario 4: PCPs eligible for Bump Rates & participating with ACHN	X	√	√	√

The table below further describes the four different PCP Group payment scenarios listed above:

EXAMPLE
Participation Rate (PR) = Enhanced Rates for fifteen E & M codes
PCP Scenario 1 Example: Receive only Base FFS Rates for all codes, including the fifteen PR codes
PCP Scenario 2 Example: Receive PR for the fifteen E&M codes, FFS Rates for all other codes, and Bonus Payments
PCP Scenario 3 Example: Receive Bump Rates only (no Participation Rates or Bonus Payments)
PCP Scenario 4 Example: Receive PR for the fifteen E & M codes, Bump Rates for all other codes, and Bonus Payments

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

BUMP Rates vs. ACHN Participation Rates are described in the table below:

BUMP Rates vs. Participation Rates				
Procedure	**Procedure Description**	**BUMP Rate**	**ACHN Participation Rate**	**Amount Increase**
99202	OFFICE/OUTPATIENT VISIT NEW	$69.27	$73.00	$3.73
99203	OFFICE/OUTPATIENT VISIT NEW	$100.52	$107.00	$6.48
99204	OFFICE/OUTPATIENT VISIT NEW	$155.25	$166.00	$10.75
99205	OFFICE/OUTPATIENT VISIT NEW	$194.18	$210.00	$15.82
99211	OFFICE/OUTPATIENT VISIT EST	$18.46	$19.00	$0.54
99212	OFFICE/OUTPATIENT VISIT EST	$40.36	$41.00	$0.64
99213	OFFICE/OUTPATIENT VISIT EST	$68.17	$72.00	$3.83
99214	OFFICE/OUTPATIENT VISIT EST	$100.91	$108.00	$7.09
99215	OFFICE/OUTPATIENT VISIT EST	$135.59	$146.00	$10.41
99242	OFFICE CONSULTATION	$85.87	$88.00	$2.13
99243	OFFICE CONSULTATION	$117.58	$122.00	$4.42
99244	OFFICE CONSULTATION	$175.38	$184.00	$8.62
99245	OFFICE CONSULTATION	$214.62	$226.00	$11.38

40.17 Urban/Rural Counties (for Providers)

A map showing urban and rural counties for providers may be accessed on the Medicaid website at: www.medicaid.alabama.gov, then select the ACHN tab, ACHN Providers, Medicaid's Designated Urban and Rural Map.

40.18 Agency Monitoring

Active Participation requirements will be monitored monthly by the Agency and the ACHN. The Agency will remove a PCP or PCP Group from the ACHN for not meeting requirements. Before a PCP Group is removed from ACHN participation, the Agency will confirm with the ACHN and the PCP Group that the Group did not meet the requirements.

40.19 Attribution

Under the ACHN Program, Medicaid recipients will be attributed to physicians based on historical claims data utilization. ***To determine the provider types that are identified as PCPs, refer to section 40.4: PCP Determination.*** Reference Rule No. 560-X-37-.09, "Attribution under the Alabama Coordinated Health Network Program." Attribution is the process that will be used to associate a Medicaid recipient to the PCP Group that provides primary care to that recipient. Attribution is a critical factor in determining distribution of Bonus Payments among eligible providers. On a quarterly basis, the Medicaid Agency will determine attribution for each Medicaid recipient under the ACHN Program in accordance with the following process:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The Medicaid Agency will review the previous two-year history of provider visit utilization for each Medicaid recipient. Utilization will consider both preventive visits and regular office visits.
- Points will only be awarded for claims that are in a paid status before the end of the attribution run period.
- If a specialist group has the highest number of points, then the specialist group will be attributed the Medicaid recipient; however, a specialist group shall not be eligible to receive the bonus payments described above.
- The Medicaid Agency will review the previous 12-month history of filled prescriptions for chronic care conditions for each Medicaid recipient.
- The point values described below associated with the visits and prescriptions will be assigned to the individual doctor that performed the service. The individual PCP scores will be combined to form the PCP Group's total point score for each patient.
- PCP Groups will receive points based on the number of preventive visits (CPT 99381-99387, 99391-99397) and regular office visits (CPT 99202-99205, 99211-99215) conducted by the PCP Group. Points will be awarded as follows:

	Type of Visit	0-6 Months Ago	6-12 Months Ago	12-18 Months Ago	18-24 Months Ago
PCP	Standard	4	4	2	2
	Preventative	8	4	4	2
Non-PCP Specialist	Standard	2	2	1	1
	Preventative	4	2	2	1

- PCP Groups will receive points based on the number of prescriptions filled for chronic care conditions. For the purposes of this rule, prescriptions for chronic care conditions shall mean more than one prescription filled for a chronic condition (e.g., asthma) and must correspond to an office visit from the prescribing provider within the previous two (2) years.
- The PCP Group with the highest number of points will have the Medicaid recipient attributed to that PCP Group. The Medicaid recipient must have met criteria for the ACHN Program for three (3) out of the previous twenty-four (24) months to be attributed.

40.19.1 *Attribution Report*

The attribution report is a listing of attributed recipients issued to providers that have recipients attributed to their group. The report is produced quarterly after the attribution process is complete. The report will list new attributions, continuing attributions, and terminated attributions. The report is available to providers from the Alabama Medicaid Interactive Services Web Site (web portal).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The following table lists the timeframe in which attribution reports will be available via the secure web portal for fiscal year 2025:

Attribution Period	Attribution Run Month	Attribution Reports Available
October 1, 2024 – December 31, 2024 (Quarter 1)	August 2024	First or second week of September 2024
January 1, 2025 – March 31, 2025 (Quarter 2)	November 2024	First or second week of December 2024
April 1, 2025 – June 30, 2025 (Quarter 3)	February 2025	First or second week of March 2025
July 1, 2025 – September 30, 2025 (Quarter 4)	May 2025	First or second week of June 2025

Each quarter, the provider group can obtain a listing of new recipients, continuing recipients, and terminated recipients. The listing will include the recipient's demographic information, Medicaid number, aid category, and county code. The recipient status will be noted at the top of each page as new, continuing or terminated.

- New Attributions– recipients that are new to your attribution.
- Continuing Attributions – recipients that have been previously attributed and continue to be attributed to the PCP.
- Terminated Attributions – recipients that have been deleted from the PCP's attribution. A termination code will be listed on the report indicating the reason the recipient was terminated from the provider's attribution list. Below is the code legend that will be listed on the last sheet of the attribution report explaining the recipient's reason for termination.

Termination Reason Code	Description
1	RECIPIENT HAS BEEN ATTRIBUTED TO A NEW PROVIDER
2	RECIPIENT NO LONGER ASSIGNED TO AN ACHN NETWORK
3	RECIPIENT NOT MET MONTHS OF ELIGIBILITY REQUIRED
4	RECIPIENT HAD NO CLAIMS IN THE EVALUATION PERIOD
5	RECIPIENT HAS BEEN REKEYED. THIS ID IS NO LONGER ACTIVE

40.19.2 *Reconsideration of Attribution*

A PCP Group may request the attribution calculation for any Medicaid recipient who has received care from the group. If a PCP Group believes the Medicaid Agency has not properly attributed one or more Medicaid recipients to the PCP Group, it may request the Medicaid Agency reconsider its attribution calculation.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- A request for reconsideration must be submitted to the Medicaid Agency in writing and within seven business days of the quarterly attribution notification. The written request for reconsideration must contain:
    - the period of attribution
    - the name(s) of the Medicaid recipient(s) that the PCP Group believes was/were not properly attributed
    - supporting information and/or documentation demonstrating that the Medicaid Agency either failed to or improperly considered information which had a material impact on the result of the attribution
- The PCP Group that has been attributed the Medicaid recipient(s) subject to the request for reconsideration shall be notified by the Medicaid Agency of the request and be permitted to submit information for Medicaid Agency consideration within three business days of the notice. If the PCP Group that has been attributed the Medicaid recipients subject to the request for reconsideration does not respond to Medicaid within the three-day time frame—Medicaid will continue the review without additional information from the attributed group.
- The Medicaid Agency will review all relevant information and complete any adjustments to the PCP Group's Medicaid recipient attribution within seven business days of receipt of the request for reconsideration.

  Reconsideration requests must be submitted to Patricia Toston at patricia.toston@medicaid.alabama.gov.

40.20 Quality Assurance Activities

Quality assurance activities and program monitoring will be the responsibility of the Managed Care Operations Division. Monitoring efforts will look at all facets of the program including measuring the PCP against established program goals, determining contract compliance, and focusing on program outcomes – all of which involve both administrative and performance measures.

Bonus Payments for the PCP Group will be available if the PCP Group:

- Enters into a Participation Agreement with an ACHN
- Actively participates with an ACHN
- Meets the criteria established by the Agency for quality
- Meets the criteria established by the Agency for cost effectiveness
- Achieves (or working towards) Patient Centered Medical Home (PCMH) Recognition.

Bonus Payments for Quality, Cost Effectiveness, and PCMH Recognition

This is a Bonus pool in the amount of $15 million annually to fund three (3) Bonus payments for eligible Participating PCP Groups. The Bonus Payment pool is allotted as follows:

- 50% for Quality
- 45% for Cost Effectiveness
- 5% for PCMH Recognition

The quarterly bonus payments will be made on the second or third checkwrite of the 1st month of the quarter (January, April, July, October).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The Alabama Medicaid Agency will set aside funds from the annual Alabama Coordinated Health Network (ACHN) bonus payment pool. The reserved funds will help assist with unforeseen situations that would cause the Agency to recoup and redistribute the bonus pool. The Agency will reserve a total of $400,000 from the annual $15 million bonus pool. This is equivalent to a reserve of $100,000 per quarter. If a primary care physician (PCP) group is inadvertently omitted from the bonus payment distribution, the Agency will use the reserve funds to pay the PCP group(s). In addition, if funds are recouped from a PCP group, the recouped amount will be added to the reserve funds. During the last quarter of the fiscal year, the Agency will distribute any remaining reserve funds to actively participating ACHN PCP groups.
For more information about the reserve funds, refer to the Changes to the Alabama Coordinated Health Network (ACHN) Bonus Payment Distribution ALERT on the Medicaid website.
Medicaid ALERTs: https://medicaid.alabama.gov/alerts.aspx

Quality Bonus Payments: PCP Groups will be eligible for a Quality Bonus Payment if the PCP Group meets the requirements described below:

- The Group must achieve at least half of the annual quality benchmarks determined by the Medicaid Agency
- Quality benchmarks are statewide, updated annually, and will be posted to the Agency's website at www.medicaid.alabama.gov (Click the ACHN tab/Provider).

PCP Quality Measures are listed below:

CHL-CH	Chlamydia Screening in Women (Ages 16 - 20)
CIS-CH	Childhood Immunization Status (Combo 3)
IMA-CH	Immunizations for Adolescents (Combo 2)
WCV-CH1	Child and Adolescent Well-Care Visits (Ages 3 - 11)
WCV-CH2	Child and Adolescent Well-Care Visits (Ages 12 - 17)
CHL-AD	Chlamydia Screening in Women (Ages 21 - 24)
HBD-AD	Hemoglobin A1C Control for Patients with Diabetes (Ages 18-75)
PPC-AD	Postpartum Care Visits

Deleted: ~~WV~~
Added: WCV
Added:2

Added: (Ages 18-75)

Cost Effectiveness Bonus Payments:

PCP Groups will be eligible for a Cost Effectiveness bonus payment if the PCP group meets or exceeds the Cost Effectiveness criteria established by the Agency. Payments will be distributed to each PCP group that has met criteria. The Cost Effectiveness bonus calculation payment is described below:

- Compares a 12-month per member per month (PMPM) to a risk-adjusted expected PMPM based on the costs of similar PCP groups that treat Medicaid recipients
- Groups ranked by an efficiency score that is derived from actual PMPM versus the expected PMPM
- Bonus payment is paid for PCP groups with a cost effectiveness score of less than 1.0

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Recipients with total costs more than $250,000 will be removed from the PCP group's PMPM calculations and the ACHN statewide PMPM calculations
- Calculation occurs three months after the previous twelve (12) month's performance has been derived.

The Cost Effectiveness calculation includes a statewide PMPM calculation for the ACHN population. The Cost Effectiveness calculation excludes the most recent three (3) months of data, hospital access payments, entity case management costs, other bonus payments in the waiver, and drug rebates.

Recipients with total costs more than $250,000 will be removed from the PCP group's PMPM calculations and the ACHN statewide PMPM calculations.

A Cost Effectiveness Q&A document is available on the ACHN providers section of the Medicaid website, by visiting https://medicaid.alabama.gov/content/5.0_Managed_Care/5.1_ACHN/5.1.3_ACHN_Providers.aspx. The Cost Effectiveness Q&A document is a great resource for commonly asked questions and formulas used for cost effectiveness calculations.

Patient Centered Medical Home (PCMH) Recognition Bonus Payments:

The purpose of the PCMH Recognition Bonus payment is to incentivize providers to attain PCMH recognition ensuring Medicaid recipients are receiving care through a nationally recognized medical home model. Participating PCP groups can obtain PCMH recognition or certification through nationally recognized entities such as National Committee for Quality Assurance (NCQA), the Compliance Team, or the Joint Commission among others. The PCP group's PCMH Recognition certification of achievement and/or supporting documentation (proof) as adequate progress towards achievement must be in an active status on the last day in September of the (current) fiscal year in order to receive approval for the next fiscal year.

Details from NCQA can be found at: https://www.ncqa.org/programs/health-care-providers-practices/patient-centered-medical-home-pcmh/?utm_source=ncqa&utm_medium=homepage-link&utm_campaign=pcmh&utm_content=left .

Details from the Compliance Team can be found at: https://thecomplianceteam.org/our-accreditation-programs/patient-centered-medical-home-pcmh/

Details from the Joint Commission can be found at:https://www.jointcommission.org/certification/primary_care_medical_home_certification.aspx

All PCP groups will be required to attest to Medicaid no later than October 1st **annually**. All PCP groups will be required to submit the PCMH Attestation Form, regardless of which PCMH certifying agency the provider used to become PCMH recognized.

The PCMH Recognition bonus payment attestation and proof of (achievement or progress towards achievement) are due to Medicaid **annually**, **no later than the deadline date/time of October 1, by 5:00 P.M. (CST)**.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

PCMH Recognition (**adequate progress**) towards achievement is defined as follows:

a. National Committee for Quality Assurance (NCQA)- PCP groups must have completed at least 1 (one) check-in and met 1 or more Cores within the qualifying timeline for the upcoming fiscal year. Core met proof of supporting documentation must show continued progress until full PCMH Recognition has been obtained. Providers can send a screen print of the 'transforming' page in their dashboard from the NCQA website.

b. The Compliance Team- PCP groups must provide proof that progress has been made on their Quarterly PCMH Quality Reporting. Progress is defined as improvement in numbers as the months proceed. A blank PCMH Quality Reporting is unacceptable. The PCP group must have completed at least one (1) quarter with said entity and show continued progress towards PCMH Recognition accreditation.

c. The Joint Commission- PCP groups must provide proof that they have reached the 'Prepare for Survey' stage and/or beyond of the PCMH process. Additionally, at least 1 (one) of the tools within 'Prepare for Survey' must have been utilized or accessed to demonstrate progress.

PCMH achievement or progress toward PCMH achievement will be required from all PCP Groups that would like to receive a bonus payment for PCMH recognition.

PCP Groups that received or making progress towards PCMH Recognition through NCQA, the Joint Commission, the Compliance Team or another certifying entity must submit an Attestation Form and proof of their PCMH Recognition certification to the Medicaid Agency.

For those PCP Groups who are working toward PCMH Recognition with a nationally recognized entity, progress toward completion of PCMH Recognition must be shown. The Agency will determine the appropriate level of progress to receive the 5% bonus payment. A screen print of this progress must be attached to the attestation form and can be obtained from the nationally recognized entity. The Agency will review the Attestation Form with the required attachments and will process based on established guidelines. If the Agency disapproves the submitted Attestation Form and attachments, a formal letter will be mailed to the PCP Group explaining the reason(s) for the disapproval.

Send the completed PCMH Attestation Form and its supporting documentation (proof) by:

Email: ACHN@medicaid.alabama.gov

or

Fax: 334-353-3856

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Bonus Payment Timeline & Schedule

The timeline below represents the schedule the Agency will use to capture data and calculate bonus payments:

ACHN Physician Incentive Payment Timeline (begins October 2024)

				FY25Q1			FY25Q2			FY25Q3			FY25Q4			FY26Q1			FY26Q2			FY26Q3		
Base Timeline Model For Initial Calculated Payment	July-24	August-24	September-24	October-24	November-24	December-24	January-25	February-25	March-25	April-25	May-25	June-25	July-25	August-25	September-25	October-25	November-25	December-25	January-26	February-26	March-26	April-26	May-26	June-26
Patient Attribution	*Rolling 24 Month Lookback*																							
Quality	*12 Months Data w 9 Months Roll Out*																							
Cost Effectiveness *																								
PCMH																								
			Data Source Month									*First Calculated Payment*												

Note:

**12 Months Data w 3 Months Roll Out*

40.21 The Profile Report

The Profile Report (Profiler) is the scorecard for providers to easily determine why they receive or did not receive quality bonus payments. This report is based on claims information and one is produced for each PCP Group. The data in the report is collected from paid claims and is processed to produce a visual representation of how providers are performing within a peer group. More information on the Profile Report is posted on the Medicaid Agency's website.

40.22 Eligible Recipients

The Agency is responsible for recipient enrollment in Managed Care programs. ACHN is mandatory for most Medicaid recipients. Medicaid recipients that must participate in **ACHN** are those for whom eligibility has been determined as listed below. Eligibility categories include but are not limited to:

- Maternity Care recipients;
- Blind/Disabled children and adults;
- Aged and related populations;
- Children under age 19;
- Parents or other caretaker relatives (POCR);
- Foster children;
- Former Foster Care;
- Breast and Cervical Cancer; and
- American Indians (note: may opt-out at any time).

Medicaid recipients listed in the below categories of Medicaid eligibility / in the following circumstances are **excluded from participation in ACHN:**

- Medicaid Dual Eligibles (covered by Medicare & Medicaid);
- Long-term institutional care;

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Home and Community-Based Services Waiver;
- Children in the custody of the Department of Youth Services;
- Inmates and people living in Institutions for Mental Diseases (IMDs);
- Aged, blind or disabled individuals receiving only optional state supplements;
- Individuals participating in the Program of All-Inclusive Care for the Elderly (PACE);
- Individuals utilizing hospice services;
- Individuals receiving Refugee Medical Assistance;
- Individuals with other commercial managed care insurance or participating in the Health Insurance Premium Payment (HIPP) program; and
- Individuals with limited or no Medicaid coverage (e.g., some non-citizens only eligible for emergency services, or individuals receiving short-term hospital presumptive eligibility).

40.23 Lock-in Recipients

The Alabama Medicaid Agency closely monitors program usage to identify recipients who may be potentially overusing or misusing Medicaid services and benefits. For those identified recipients, qualified Alabama Medicaid staff performs medical desk reviews to determine overuse and/or misuse of services. If the review indicates overuse and/or misuse of services, the recipient may be locked in to one physician and/or one pharmacy. Additional limitations may be placed on certain medications such as controlled drugs and/or other habit-forming drugs.

Recipients who are placed on lock-in status are notified by letter of the pending restriction. They are asked to contact the Recipient Review Unit or the Clinical Services and Support Division at the Alabama Medicaid Agency with the names of their chosen physician and/or pharmacy. The physician and pharmacy are contacted by the Recipient Review Unit or the Clinical Services and Support Division to determine if they will agree to serve as primary care physician/designated pharmacy while the recipient is restricted.

40.23.1 *Referring Recipients with Lock-in Status*

Physicians who serve as a restricted recipient's lock-in provider should use the Alabama Medicaid Agency Referral Form (Form 362) when referring the restricted recipient to another physician. The referral may cover one visit or multiple visits so long as those visits are part of the plan of care and are medically necessary. No referral can last more than one year. This form can be obtained by accessing Medicaid’s website.

NOTE:
The message indicating the recipient is restricted is part of the general eligibility response provided AVRS or Provider Electronic Solutions software.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

40.24 Eligibility Verification

Always verify eligibility. It is the provider's responsibility to verify that a person is eligible for Medicaid at the time of service. There are three sources available for obtaining recipient information:

- The Provider Electronic Solution (PES) is a point of service device or PC based software system, which accesses recipient information.
- The Automated Voice Response System may be accessed by dialing 1 (800) 727-7848 using a touch-tone telephone. This is an automated telephone system available approximately 24 hours a day, 7 days a week unless down for maintenance.
- The Web User Guide provides instructions for performing recipient eligibility verification via the web portal. Instructions for accessing and login are also included in the guide. The Web Portal verification system will provide contact information for the recipient's attributed PCP. Providers can access the Web User Guide at the following link: https://www.medicaid.alabamaservices.org/ALPortal.

40.25 Emergency Services

Access to certified emergency services will not be restricted by the **ACHN** Program. Certified emergencies in outpatient emergency room settings do not require referral or prior authorization by the PCP. However, documentation should be maintained by the provider of service to support emergency certification.

40.26 Certified Emergency Services

Hospitals and physicians who provide "certified emergency" services in the Emergency Room (ER) are not required to have a referral from the PCP. Please note that follow-up care should not be certified as an emergency.

For certified emergencies, there must be an "E" indicator in the appropriate claim block. Refer to the Chapter Five of the Billing Manual for further instructions.

Providers should bill certified emergency services separately from those of non-certified emergency services.

The Agency stresses the importance of coordinating with the PCPs and ACHNs regarding the care of Medicaid recipients in order to preserve the continuity of care and the "medical home" concept.

40.27 Immunizations

Immunizations do not require PCP referral; however, the PCP must maintain documentation of immunizations received. Documentation must include the following: the date the immunization was given, the type of immunization, and who provided the immunization. PCPs are required to ensure that immunizations are up-to-date for children.

Providers should be aware that the parent/guardian of children will be looking to the PCP for immunizations and/or documentation of immunizations, especially in the months prior to school starting. PCPs should be prepared to immunize these children or make arrangements to get appropriate information from the immunizing provider to meet the school rush. **ALL PCPs SHOULD MAKE EVERY EFFORT TO WORK**

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

WITH OTHER PROVIDERS IN THE COMMUNITY TO ENSURE THAT ALL CHILDREN ARE FULLY AND APPROPRIATELY IMMUNIZED.

40.28 Program Enhancements

The following enhancements are designed to help the PCP achieve the overall program goal of establishing a medical home for our recipients that is accountable and cost-effective:

40.28.1 *Remote Patient Monitoring (RPM)*

Refer to Chapter 111 for more information on Remote Patient Monitoring (RPM).

40.29 Obtaining Educational Materials

Some materials that are available for download from the website include:

"Your Guide to Alabama Medicaid". This booklet describes the services covered, co-payments, the different types of eligibility, patient responsibilities, as well as other useful information.

"Alabama Medicaid Covered Services and Co-Payments" Handout (English or Spanish). Describes services covered by Medicaid and associated co-payments.

"EPSDT Brochure". This is a colorful pamphlet that encourages Well-Child checkups and outlines the periodicity schedule.

NOTE:

Educational materials are also available for use by providers and may be obtained using the online ordering form on the Agency's website at www.medicaid.alabama.gov. A catalog listing these materials is also on the website. Educational materials can be provided in other languages.

40.30 Medicaid Forms

The following forms can be found in Appendix E and/or on the Medicaid website www.medicaid.alabama.gov under Resources/Forms Library/ACHN/PCP Forms:

Form ID	Form Description
Form 172	EPSDT Child Health Medical Record
Form 284	To enroll children of Medicaid-eligible mothers (including SSI mothers) from birth to first birthday - with instructions
Form 391	PCP Override Request Form
ACHN Disenrollment Request Form	Group/PCP Disenrollment Requests
Immunization Documentation	Link to ADPH website regarding Pediatric, Adolescent and Adult Immunization Records

40.31 PCP Billing Instructions

Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

40.32 Primary Care Case Management Entity (PCCM-e) Providers

PCCM-e Overview

Each region's Primary Care Case Management entity (PCCM-e) is responsible for developing and implementing a comprehensive person-centered care management program that includes case management and care coordination services. Each program must include information, education and focused service delivery as it relates to population health management, health literacy, and the identification of social determinants of health (SDoH). The ACHN program will provide the Agency and providers a more effective platform for service delivery and improved quality statewide for Medicaid recipients.

Application Assistance
Application assistance can be offered to anyone that is interested in applying for Medicaid. The PCCM-e will have Certified Application Assisters available to assist individuals with completing the Medicaid application process, and follow-up with the person until Medicaid eligibility is determined.

The PCCM-e shall submit names to the Agency's Networks Division of all certified application assisters and the name(s) of the Certified Application Assisters trainers served by the Region at program implementation, within forty-five (45) calendar days of the end of the year and within thirty (30) calendar days of any change.

The PCCM-e has flexibility in determining how to perform the application assister function. Care managers are not required to be Certified Application Assisters; however, the application assister function must be performed by Agency approved staff who meet the qualification as outlined in the Key Staff and Other Positions Requirements.

The Certified Application Assisters Eligibility Encounter must include the following:

- Documentation of eligibility status at screening intake.
- Assistance with completing the application electronically or paper format.
- Follow-up with the person until a Medicaid eligibility determination is made.
- Assistance with any other barriers to the application process.
- Completion of the initial screening; and
- Documentation of activities associated with the encounter in the Health Information Management System (HIMS), when applicable

40.33 Enrollments, Disenrollments and Reenrollments

The PCCM-e must have policies established to identify processes for enrolling, disenrolling and re-enrolling recipients. These policies must in accordance all applicable federal and state regulations and guidelines. Below details regarding the Agency's expectations.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Enrollment

The PCCM-e must not, on the basis of health status or need for health care services, discriminate against recipients. This includes but is not limited to, termination of enrollment or refusal to reenroll a recipient except as permitted under this contract, or any practice that would reasonably be expected to discourage enrollment or reenrollment by recipients whose medical condition or history indicates probable need for substantial future medical services. Violation of this requirement may result in sanctions listed in the RFP.

- The PCCM-e must not discriminate against recipients to enroll with the PCCM-e on the basis of any protected category listed in 42 C.F.R. § 438.3(d) and must not use any policy or practice that has the effect of discriminating on the basis of any protected category listed in 42 C.F.R. § 438.3(d).

- The PCCM-e must accept new enrollment from individuals in the order in which they apply without restriction, unless authorized by the Center for Medicare and Medicaid Services (CMS), up to the limits set under the contract in accordance with 42 C.F.R § 438.3(d)(1).

Disenrollment

In accordance with 42 C.F.R. § 438.56(b)(1), the PCCM-e may request disenrollment of a recipient for the following reasons:

- The recipient loses Medicaid eligibility;
- The recipient's eligibility category changes to a category ineligible for the ACHN (e.g., recipient becomes dually eligible for Medicare and Medicaid);
- The recipient otherwise becomes ineligible to participate in the ACHN
- The recipient has become incarcerated;
- The recipient has died; or
- The recipient moves out of the Region.

The recipient exhibits uncooperative or disruptive behavior which inhibits the PCCM-e's ability to provide services. The PCCM-e must be able to demonstrate, to the Agency's satisfaction, that it has exhausted all reasonable efforts to effectively coordinate the recipient's care.

- The PCCM-e may not request disenrollment because of:
- An adverse change in the recipient's health status;
- The recipient's utilization of medical services;
- The recipient's diminished mental capacity; or
- The recipient's uncooperative or disruptive behavior resulting from his or her special needs (except when his or her continued enrollment seriously impairs the PCCM-e's ability to furnish services to the recipient or other recipients).

The PCCM-e must not request disenrollment for reasons other than those permitted under this RFP or Contract.

- A recipient has the right to disenroll from a PCCM-e:
- For cause, at any time;

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Without cause ninety (90) calendar days after initial enrollment or during the ninety (90) calendar days following notification of enrollment, whichever is later;
- Without cause at least once every twelve (12) months; or
- Without cause upon reenrollment if a temporary loss of enrollment has caused the recipients to miss the annual disenrollment period.
- A recipient has the right to disenroll from a PCCM-e without cause when the Agency imposes intermediate Sanctions on the PCCM-e.

A recipient may request disenrollment if, the recipient moves out of the Region; or the plan does not cover the service the recipient seeks, because of moral or religious objections.

A recipient may request disenrollment if the recipient needs related services to be performed at the same time and not all related services are available within the Region.

The recipient's PCP or another provider must determine that receiving the services separately would subject the recipient to unnecessary risk.

A recipient may request disenrollment for other reasons, including poor quality of care, lack of access to services covered under the RFP, or lack of access to Providers experienced in dealing with the recipient's care needs.

A recipient (or his or her representative) must request disenrollment by submitting an oral or written request to the Agency.

The PCCM-e shall refer any disenrollment request it receives to the Agency. The effective date of an approved disenrollment must be no later than the first day of the second month following the month in which the recipient requests disenrollment or the PCCM-e refers the request to the Agency.

If the Agency fails to make a disenrollment determination within the specified timeframes (i.e., the first day of the second month following the month in which the recipient requests disenrollment or the PCCM-e refers the request to the Agency), the disenrollment is considered approved for the effective date that would have been established had the Agency made a determination in the specified timeframe.

Reenrollment

A recipient is automatically reenrolled if the recipient is disenrolled solely because he or she loses Medicaid eligibility for a period of two (2) months or less.

A recipient may choose to reenroll at any time.

Enrollee Rights.

The PCCM-e must have written policies guaranteeing each enrollee's right to:

- Receive information on the PCCM-e into which he/she is enrolled.
- Be treated with respect and with due consideration for his or her dignity and privacy.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Receive information on available treatment options and alternatives, presented in a manner appropriate to the enrollee's condition and ability to understand.
- Participate in decisions regarding his or her health care, including the right to refuse treatment.
- Be free from any form of restraint or seclusion used as a means of coercion, discipline, convenience or retaliation.
- Request and receive a copy of his or her medical records, and to request that they be amended or corrected.
- Freely exercise his or her rights without the PCCM-e treating the recipient adversely.

Recipient Refusal of Services
The recipient has the right to refuse care management services. If the recipient refuses care management, the PCCM-e will notify the recipient, via postal letter, that they may request care management services at any time. Proof of postal service mailing must be maintained and documented in HIMS for auditing and compliance purposes. A hand-delivered or mailed notification to the recipient are acceptable routes of notifications. The delivery format, when the letter was mailed or hand delivered to the recipient, a copy of the letter and the recipient's refusal must be documented and maintained in HIMS.

40.34 Referrals

The PCCM-e shall receive referrals for care management, which must be screened no later than five business days from the receipt of the referral, from the following but not limited to:

- PCPs;
- Medical or psychiatric facilities;
- State or Community Agencies; and/or
- Recipients

The PCCM-e shall use a process to screen and stratify recipients who are determined to need care management services. The PCCM-e must use the results of the screening and risk stratification to assign an initial risk level to each recipient and place those recipients into appropriate categories of risk which will determine the timeframe of the assessment and assignment to a Care Manager.

For recipients identified as needing care management services and stratified as indicated by the screening and assessment results, the PCCM-e shall provide the level of care management service for the indicated health risk in accordance with the Agency's established criteria. The health risk levels are high, medium, and low.

Once a recipient who needs care management services has been identified, contact must be attempted by the PCCM-e within five business days of screening. At least three attempts must be made at a minimum of 30 calendar days, including a written letter, mailed via postal service, to offer care management services. Proof of postal service mailing and other attempted contact methods must be maintained and documented in the

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

HIMS for auditing and compliance purposes. A hand-delivered or mailed notification to the recipient are acceptable routes of notifications. The delivery format, when the letter was mailed or hand delivered to the recipient, and a copy of the letter must be documented and maintained in HIMS. The documentation must show all efforts to contact up to closure of the case file.

40.35 PCP Selection Process

The PCCM-e must have policies and procedures in place to assist the recipient in selecting his/her choice of a PCP, to include changes in PCP selection.

Recipients must be allowed to change a PCP once without cause within the first ninety (90) calendar days of selecting an PCP and at any time for just cause, which is defined as a valid complaint submitted verbally or in writing to the PCCM-e.

- The PCCM-e must inform the recipient of the recipient's rights to change PCPs, with and without cause at the initial contact and at least once per year.
- The PCCM-e must provide, at the time of initial contact, all required information regarding rights and responsibilities, and appropriate telephone numbers.

40.36 Network Adequacy Development and Maintenance

The PCCM-e must develop, maintain and distribute a provider directory to recipients as detailed in the Recipient Materials Requirements, Provider Directory documents located in the Procurement Library. The Provider Directory must meet the requirements in 42 C.F.R. § 438.10(h).

40.37 Non-Emergency Transportation (NET) Coordination.

The PCCM-e does not provide NET services; however, the entity may assist recipients in arranging transportation or coordinating with the Agency's NET program for transportation services. A recipient or his/her representative may arrange transportation for the recipient receiving care management services, or request assistance through the PCCM-e by contacting their assigned care management staff. Any staff member with the PCCM-e may assist with coordinating NET services.

The PCCM-e must:

- Ensure the Agency does not pay for NET services if the recipient has access to free transportation;
- Determine availability of and least costly means of transportation to include, but not limited to, free transportation, including the recipient's vehicle, transportation by relative or friend, or volunteer services;
- Establish recipient's eligibility for date of service five (5) calendar days prior to appointments or within twenty-four (24) hours after

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

urgent care appointments to ensure transportation is provided for Medicaid covered services only;
- Confirm the least expensive mode of transportation that meets the needs of the recipient, such as: Automobile; Transporter; or Other
- Contact the NET Coordinator in the area or the Medicaid Recipient Call Center to arrange transportation if the recipient cannot make the contact on their own;
- Assist recipients in submitting the necessary receipts or confirmation of expenses required for reimbursement for overnight travel;
- Coordinate in-state and out-of-state commercial, bus, train, or air transportation for review to Medicaid on a case-by-case basis to include but not limited to requesting and receiving necessary support documentation from the PCP for any out-of-state services to assure that such services cannot be obtained in-state; and
- Validate appointment with provider by confirming the date, time, and attendance of appointment with the Medicaid provider.

40.38 Recipient Assignment and Stratification

Recipient Assignment and Stratification

Each month, the Medicaid Agency's fiscal agent will share a list of assigned recipients for each PCCM-e. The Agency will also provide historical medical claims information, enrollment information, and recipient contact information. Additionally, the Agency will provide supplemental files with a list of recipients that might benefit from case management or care coordination. The goal will be to provide a list sufficient to reach active care management targets set by the Agency, provide fiscal stability for the PCCM-e and reside within the budget limitations.

The list of recipients in the supplemental files will be based on the Agency's criteria for Medical Complexity and High Risk. The lists will use the previously outlined stratification criteria and available claims data. This means that the lists will not include data unknown to Agency, which the PCCM-e will need to document the additional information appropriately.

From the assignment list, recipients will be assessed for care management assignment as indicated by the stratification mandates and/or criteria established by the Agency.

These stratification criteria have been developed with the intention of delineating areas where care coordination and case management can garner the greatest impact on cost and recipients' health. All recipients must be assessed and provided care management services at the intensity that correlates with their risk stratification level as outlined in the Care Management Activity Criteria and the ACHN Payment, Activity, & staffing documents.

The needs identified in this assessment will be the basis for the recipient's comprehensive care plan. It is not anticipated that each of these recipients will be appropriate for case management and care coordination. From the provided list, recipients will be assessed for care management assignment

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

as indicated by the stratification mandates and/or criteria established by the Agency.

If the PCCM-e is exceeding targets and fiscal limitations, the Agency will limit assignments. The Agency may also change or update the algorithm, or create a new algorithm, as needed to best identify recipients.

All data and reports will be provided directly to the PCCM-e through the HIMS. The Population Health Data Analyst, Quality Care Director and applicable staff should work closely to ensure recipients are stratified and managed appropriately.

All recipients must be assessed and provided care management services at the intensity that correlates with their risk stratification level as outlined in the Care Management Activity Schedule, Care Management Activity Criteria, and the ACHN Payment, Activity, & staffing documents.

The needs identified in this assessment will be the basis for the recipient's comprehensive care plan.

The recipient's comprehensive care plan shall be current and contain five components: the assessment of identified needs, goals, interventions, rationales, and evaluations. The care plan shall be evaluated and/or updated as applicable, with documentation to support a completion of an update and/or evaluation process.

As the recipient's needs are identified or goals are met, the recipient's risk level may change. The PCCM-e will complete a risk reassessment including a Social Determinants of Health (SDoH) assessment to redetermine the recipient's risk level.

A risk assessment using the Agency approved reassessment tool(s) must be completed in accordance with the Care Management Activity Schedule, Care Management Activity Criteria, and the ACHN Payment, Activity, & staffing documents.

Documentation to support the need for a change in the risk level not captured during the risk assessment/reassessment, must be appropriately documented within the HIMS, with new goals and interventions documented in the care plan.

Additional assessments required for each recipient receiving care management include:

- PHQ-A for recipients ages 12-17;
- PHQ-2 for recipients age 18 and older;
- PHQ-9 for recipients age 18 and older that score a four (4) or higher on the PHQ-2;
- Substance abuse screening tool approved by the Agency; and
- CRAFFT – A health screening tool designed to identify substance abuse, substance-related riding/driving risk, and substance use disorder among youth between the ages 12 and 18, or
- UNCOPE – A six question screening tool used as a quick means of identifying whether a person, age 18 and over, is at risk for abuse or dependence for alcohol and other drugs.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

If the recipient is between the ages of 18 and 21 but is still in high school or otherwise considered a dependent, then the ACHN should use CRAFFT and recommendations would be made for adolescent treatment. If the recipient is between the ages of 18 and 21 but has graduated high school or obtained a GED, use UNCOPE to provide a recommendation for adult treatment services.

40.39 Comprehensive Care Management Program

The PCCM-e is responsible for developing and implementing a comprehensive person-centered care management program which includes case management and care coordination components with emphasis on population health management, health literacy and identification of Social Determinant of Health (SDoH). Case management and care coordination under the ACHN Program shall be provided under a triaged, tiered down approach.

The Agency will identify recipients in need of screening for possible case management and care coordination and forward on a monthly basis, to the vendor, the identified recipients for prioritization. The Vendor will also receive case management and care coordination referrals from physicians, other providers, community agencies, etc. The Vendor must evaluate the identified and referred recipients and provide care management services to those in need based on their prioritization.

ACHN Care Management Services

Case management and care coordination under the ACHN Program shall be provided under a triaged, tiered down approach.

The Agency will identify recipients in need of screening for possible case management and care coordination and forward monthly, to the PCCM-e, the identified recipients for prioritization. The PCCM-e will also receive case management and care coordination referrals from physicians, other providers, community agencies, etc. The PCCM-e must evaluate the identified and referred recipients and provide care management services to those in need based on their prioritization.

- The PCCM-e shall establish processes to support case management and care coordination for recipients, primarily those that are at highest risk and cost. The processes shall include, but are not limited to, the following:
- Developing and implementing person centered holistic plans of care;
- Improving health literacy, health outcomes, and self-management;
- Promoting effective use of the healthcare system and community resources;
- Reducing the potential for risks of catastrophic or severe illness;
- Preventing disease exacerbations and complications;
- Minimizing inappropriate utilization;
- Working to identify additional key resources and incorporate these into the strategies such as partnerships with Alabama Department of

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Public Health (ADPH), Alabama Department of Mental Health (ADMH), and Children's Rehabilitation Services (CRS);
- Utilizing evidence-based clinical practice guidelines; and
- Promoting the importance of the Medical Home through recipient education.
- Included and Excluded Populations

The following groups of eligible Medicaid recipients shall be included for care management services under the ACHN Program:

- Medically complex recipients
- Maternity care recipients
- Children under age 19;
- Parents or other caretaker relatives (POCR);
- Foster children;
- Former Foster Care;
- Breast and Cervical Cancer; and
- American Indians (note: may opt-out at any time).

The following groups of eligible Medicaid recipients shall be excluded for care management services under the ACHN Program:

- Medicare/Medicaid dual-eligible population;
- Long-term institutional care;
- Home and Community-Based Services waiver;
- Children in the custody of the Department of Youth Services;
- Inmates and people living in Institutions for Mental Diseases (IMDs);
- Aged, blind or disabled individuals receiving only optional state supplements;
- Individuals participating in the Program of All-Inclusive Care for the Elderly (PACE);
- Individuals utilizing hospice services;
- Individuals receiving Refugee Medical Assistance;
- Individuals with other commercial managed care insurance or participating in the Health Insurance Premium Payment (HIPP) program; and
- Individuals with limited or no Medicaid coverage (e.g., some non-citizens only eligible for emergency services, or individuals receiving short-term hospital presumptive eligibility).

The Agency may also provide additional lists of recipients or other Medicaid recipients that are categorized as a member of a population that is of concern or interest of the Agency (e.g., recipients with sickle cell disease). It is the expectation of the Agency that the PCCM-e provide care management services or focused monitoring of these recipients in collaboration with the Agency.

Care Management Populations

General Population

The General population mostly consists of children and adult recipients who have or who are at risk of having certain chronic conditions: asthma, diabetes, cancer, hepatitis C, COPD, HIV, mental health conditions, SUD, transplants, SCD, BMI >25, and/or heart disease.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Maternity (includes postpartum)

The maternity population includes all pregnant and postpartum women from the following benefit types: full Medicaid (TXIX) and full Medicaid/Pregnancy through Postpartum (SBRW). All pregnant recipients must be risk stratified as high for the first three (3) months of care management.

The Agency extended postpartum coverage to twelve (12) months after end of pregnancy for pregnant recipients. The postpartum recipient will continue to receive care management services throughout the postpartum period. The intensity of the care management will be determined by the assigned risk stratification level. Additionally, the PCCM-e must ensure that the recipient has been informed of their need to apply for Medicaid to determine if they qualify for Plan First (family planning services) eligibility.

Medically Complex

The Medically Complex population includes, but is not limited to, children with medical complexities, those recipients with a substance use disorder (SUD) and/or other mental illness diagnosis and those recipients with a Sickle Cell Disease (SCD) diagnosis.

- ACHN entities to target 100% of the population of Medicaid recipients with a diagnosis of SCD for focused intensive care coordination.
- Children with medical complexities (CMCs) require the highest level of intensity of care, and frequently numerous pediatric specialists are required to care for their conditions.
- These children are generally medically fragile with congenital/acquired multi-system disease.
- They also must have a qualifying diagnosis/condition and/or social assessment to meet CMC criteria for this program.
- Primary Care Provider (PCPs), in concurrence with the PCCM-e Medical Director, may also identify additional recipients for this group.

Training Requirements for Staff Who Provide Care Management Services for the Medically Complex Population

The PCCM-e shall provide training for staff providing Care Management services to the Medically Complex Population. The basis of this training will be modules produced by The National Center of Care Coordination Technical Assistance. A description of these modules are as follows:

Introduction to New Models of Care and Healthcare Trends

- Overview of the U.S. Healthcare System
- Introduction to Care Coordination
- New models of care

Interdisciplinary Teams

- Working on interdisciplinary teams
- Building positive relationships on a team
- Communication with team members

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Participating in team huddles
- Dealing with team conflicts

Person-centered and Communication

- Defining person-centered Care Planning
- Recognizing family and patient needs
- Communication and patient engagement techniques (part 1)
- Communication and patient engagement techniques (part 2)

Health literacy

Complex Medical Conditions

- Overview of complex medical conditions (part 1)
- Overview of complex medical conditions (part 2)
- Social determination of health
- Self-management

Cultural Competence

- Recognizing patients' families' cultural needs/factors that may affect their choices or engagement.
- Communicating with patients and families in a culturally competent manner

Ethics and Professional Boundaries

- Ethical and professional responsibilities
- Professional boundaries

Quality Improvement

- The quality improvement process
- Quality improvement methods and processes

Community Orientation

- Connecting patients and families to community resources
- Supporting families as they seek resources in the community.

Health Information Technology, Documentation and Confidentiality

- Basic technology skills and electronic health records
- Documentation
- Confidentiality and guidelines

Family Planning

Family planning promotes the well-being of families, responsible behavior, and healthy mothers and babies. Appropriate family planning care management is paramount to a recipient's life outcomes. Although the PCCM-e will not provide family planning care management services, it is expected that the PCCM-e will refer recipients to family planning services providers when needed. The PCCM-e is also expected to follow up with the recipient to determine compliance or other issues that may have developed since the initial and on-going referrals.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Care Management Program Components

Care Management is a collaborative process that facilitates communication and care coordination along a continuum that includes those connected to and/or directly involved in the care of a recipient. Members of the collaboration can include the recipient, nurses, social workers, counselors, physicians, other practitioners, caregivers, and the community.

The Agency's care management model is comprised of the following components: case management, care coordination, application assistance and medical monitoring review. Care management activities can be provided in person, virtually and telephonically as indicated in each population's Care Management Activity Schedule, Care Management Activity Criteria, and the ACHN Payment, Activity, & staffing documents.

Care management activities rendered to the recipients must be documented in accordance with the applicable chapters in the Agency's Administrative Code (Chapter 1: General) and Provider Manual. When provided by the state, forms, models, templates and Agency-provided data must be used.

Case Management

Case management is a set of activities designed to assist recipients in managing health conditions and related psychosocial problems with the goals of improving or maintaining patients' functional health status, enhancing the coordination of care, eliminating the duplication of services, and reducing the use of unnecessary services. It also recognizes the significance of the SDoH, the complexities of care and the importance of recipients to be involved in care decisions and their right to participate in the process.

Case management services must be provided by appropriately credentialed and state governing board licensed staff. Examples of appropriately credentialed staff include, but are not limited to, counselors, nurses, social workers and therapists.

Examples of duties to be completed by these staff members include but are not limited to assessments, reassessments, care plan development and monitoring, referrals, case documentation, face-to-face and virtual or telephonic encounters with recipients.

Case management activities will be provided to ACHN participants who are stratified as high risk and therefore, require a more intensive level of care management activity.

The PCCM-e will be given stratification criteria by the Agency to determine the appropriate stratification levels for the recipients. However, the recipients within the categories below must be stratified as high:

- Maternity for the first three months of pregnancy or initial enrollment; and
- Medically complex for the first three (3) months of eligible diagnosis(es)/conditions or initial enrollment or engagement

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Care Coordination

Care Coordination is a process through which assessment, planning and interventions appropriately integrate, ensure, and advance the plan of care to support positive health outcomes and successful transitions. Care coordination is the deliberate organization of health and related support activities between two or more participants (including the Medicaid recipient) involved in the recipient's care to facilitate the appropriate delivery of needed services. Organizing care involves arranging personnel and other resources needed to carry out all required activities and is often managed by the exchange of information among participants responsible for different aspects of care.

Care coordination activities will be provided to ACHN recipients who are risk stratified as medium or low and therefore, require a moderate or low level of care management activity.

Care coordination services can be provided by appropriately credentialed professional staff.

Medical Monitoring Review

Medical monitoring is the review and analysis of claims and electronic medical records (EMR) data for recipients outside of the top twenty percent (20%) who are not currently receiving care coordination services to determine cost efficiency, clinical appropriateness and the need for other services. The PCCM-e will be given stratification criteria by the Agency to determine when the medical monitoring review is the appropriate assignment for the recipients.

Guidelines for Care Management Encounters

The following components of care management visits/encounters maybe provided telephonically, face to face, or virtually according to the applicable Care Management Activity Schedule. Below is more information on these components.

Telephonic Encounters

The Agency's expectation for telephonic encounters requires a team approach to the delivery of thorough, conscientious, and person-centered care management that is consistent with that of face-to-face visits. Telephonic encounters may be provided as outlined in each population's Care Management Activity Schedule.

Prior to providing services a verbal consent to receive care management services shall be discussed and obtained from the recipient. Documentation of a verbal consent shall be maintained in the HIMS for each date of service for which payment is requested.

Some case management tasks can be completed via text messages (e.g., texting a recipient to notify them of a scheduled call, or to advise them of your attempts to reach). However, no paid care management activity is allowed via text messaging. The PCCM-e must adhere to all HIPAA standards regarding texting recipients for the provision of health care services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Face-to-Face Encounters (F2F)

Face-to-face encounters are those with the recipient that are in-person at a location of the recipient's choosing. This encounter allows for a more personable approach that supports the gathering of objective and subjective data. Documentation must include the location of the encounter and a recipient signature for the date of service for which payment is requested in the HIMS.

Virtual Encounters

Virtual encounters are an alternate method of providing care to recipients in lieu of face-to-face visits and should not be construed as a more convenient or simpler method of coordinating the care of recipients. Recipient signatures for virtual encounters must be attained within seven calendar days of the encounter. Visits without a valid recipient signature maybe subject to recoupment.

Virtual encounters include audio and visual capabilities and must be HIPAA compliant. The Agency does not support the use of Facebook, including instant messaging for contacting the recipient or for conducting any ACHN care management related activities. Texting is not a paid care management activity.

PCCM-e staff may opt for virtual encounters in the following instances:

- To maintain contact with recipients when a previously scheduled in-person/face-to-face encounter cannot occur due to recipient's illness, illness in the recipient's home or other unforeseen circumstances.
- Care plan reviews
- Multidisciplinary Care Team (MCT) meetings
- Maternity delivery encounters
- To maintain contact with recipients when a previously scheduled in-person/face-to-face encounter cannot occur due to transportation related issues.

Note the examples listed above are not intended as an all-inclusive list. Documentation explaining the choice of a virtual visit must be included in the HIMS.

Encounters that require the recipient to attend F2F or virtually, for which the recipient is not in attendance, are not eligible for payment. Payments made in error are subject to recoupment.

40.40 Documentation

Care management activities provided and not supported with documentation according to
Agency guidelines are recoupable and will require completion of a Corrective Action Plan.
The PCCM-e must make available to Medicaid, at no charge, all information describing services provided to eligible recipients. The provider must also permit access to all records and facilities for the purpose of claims audit,

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

program monitoring, and utilization review by duly authorized representatives of Federal and State agencies.

Required HIMS Documentation includes but is not limited to:

- Recipient's name and Medicaid Id number
- Medical and Psychological diagnosis
- Individualized person -centered care plan
- Verification that the recipient's Medicaid Eligibility was checked at enrollment and at least once a month, thereafter.
- Documentation must include the type of service rendered (i.e. activity code, method of contact, place of service),
- The date of service for which payment is requested.
- Progress notes for each care management encounter must be documented as outlined within the Agency's policies and procedures.
- Documentation of each encounter must be complete, signed, and dated according to Agency guidelines before a request for payment is requested.
- Progress notes must not be prepopulated or pre/postdated.
- The progress note must summarize the care plan and the interaction with the recipient for the date of service for which payment is submitted.
- Progress Notes must provide enough detail and explanation to justify the request for payment.
- There must be clear continuity between the documentation.
- All documentation must be legible, signed and dated by the person (identified by name and discipline) who is responsible for providing or evaluating the service furnished.
- Additionally, the author of each entry must either, personally or electronically sign his or her entry. A stamped signature is not acceptable.
- Care Plans (as described in the Care Management Care Plan Requirements Policy).
- Consent for services
- Recipient signature when applicable
- Referrals
- Letters/notices

All documentation must be present and complete in an Agency approved HIMS and meet all program guidelines for sufficient documentation standards including but not limited to:

Electronic Records

- When a hard copy is generated from an electronic record the recipient's name and at a minimum date of birth or Medicaid Id number must be visible.
- Contain name, signature, and credentials of the person completing the entry.
- The entry must lock upon submission and indicate time and date of edits.
- Correction of electronic records should follow the same principles of tracking both the original entry and the correction with the current

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

date, time, reason for the change and initials of person making the correction.
- When a hard copy is generated from an electronic record, both records must show the correction.
- Any corrected record submitted must make clear the specific change made, the date of the change, and the identity of the person making that entry.

Mistaken Entry

A mistaken entry in the record shall be corrected by a method that does not obliterate, white-out, or destroy the entry. Corrections to a record shall have the name or initials of the individual making the correction and the date of the correction.

Amended Records

Documentation submitted for review may include amended records. Amended records are legitimate occurrences in the documentation of clinical services and include a late entry, an addendum and/or a correction to the medical record.

Amended records must:

- clearly and permanently identify any amendment, correction or delayed entry as such,
- clearly indicate the date and author of any amendment, correction or delayed entry,
- clearly identify all original content, without deletion, and
- be amended prior to claims submission and/or medical record request. Records that have been amended and do not meet the Agency standards will be subject to recoupment.
- Records that have been incorrectly amended during an audit period will be subject to recoupment.

Signatures

- The PCCM-e must obtain a signature to be kept on file, (such as release forms or sign-in sheets) as verification that the recipient was present on the date of service for which the provider seeks payment for face-to-face encounters.
- When payment has been made on claims for which a signature is not available and one of the Agency accepted exceptions is not applicable, the funds paid to the provider covering this claim will be recouped.
- The recipient's signature is only required one time per day that services are provided.
- Any non-face-to-face services that can be provided by telephone do not require recipient signatures, yet recipient consent must be documented.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

40.41 Care Management Care Plan Requirements

Each recipient receiving care management services with the ACHN shall have a care plan documented in an Agency approved Health Information Management System (HIMS). The PCCM-e shall apply evidence-based guidelines and best practices when developing and implementing the care plan. The process shall involve the recipient, their caregiver/family member (when appropriate and/or requested by the recipient), applicable healthcare providers, and community-based providers as appropriate.

- The care plan shall be current, person-centered, individualized and identify
- and address each of the recipient's diagnoses and needs.
- Staff shall specify those services necessary to meet the client's needs (The needs may include functional, social, spiritual, cognitive, educational, barriers to care such as
- cultural and language, community resources or lack thereof, transition of care,
- access to care, and self-care.
- Include referrals as appropriate for needed services and identify the expected outcomes for each specific issue.
- The care plan shall include, at a minimum, five components: an assessment of
- identified needs, goals, intervention, rationale, and evaluation.
- The care plan shall be evaluated for the recipient's progress to the goals and
- the effectiveness of the established interventions with each encounter.

- The care plan will be updated with new goals and/or interventions as needed with
- documentation in the Agency approved HIMS to support the completion of an
- update and evaluation process.

Care Management Records Requirements
Provider's records must contain, but is not limited to, the following information:

- Name of recipient
- Date of service
- Name of provider agency and person (including credentials) providing services
- Type of services provided.
- Method of service provided.
- Place of service
- The identification of the specific services rendered.
- The signature of the staff person who rendered the services.
- A written assessment of the client's progress, or lack thereof, related to each of the identified issues discussed.
- Documented Referral Source
- Medical and Psychological diagnosis
- Individualized person -centered care plan

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Verification that the recipient's Medicaid Eligibility was checked at enrollment and at least once a month, thereafter.
- Family history
- Educational history
- Medical history
- Substance use history.

All entries must be legible and complete and must be authenticated and dated (prior to being submitted for reimbursement) by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. The author of each entry must be identified and must authenticate his or her entry. Authentication may include handwritten signatures, written initials (for treatment plan reviews), or computer entry (associated with electronic records—not a typed signature). A stamped signature is not acceptable.

PCCM-e providers must maintain the following documentation in the recipient's record when billing for care management activities:

- A current psychosocial assessment
- Any required additional assessments and screenings
- Progress notes
- A current comprehensive individualized care plan that identifies the medical, nutritional, social, educational, transportation, housing and other service needs that have not been adequately accessed.
- A time frame to reassess service needs.

Services must consist of at least one of the following activities:

- Establishment of a comprehensive case file for development and implementation of an individualized care plan to meet the assessed services and needs of the recipient.
- Assistance for the recipient in locating needed service providers and making the necessary linkages to assure the receipt of services identified in the care plan.
- Assessment of the recipient and service providers to determine that the services received are adequate in meeting the identified needs.
- Reassessment of the recipient to determine services needed to resolve any situation resulting from changes in the family structure, living conditions, or other events.
- Documentation of referrals to medical and community resource services, with follow-up denoting if the services were received and the outcome of the referral.

40.42 Care Management Progress Notes Requirements

Progress notes should not be prepopulated or predated each recipient must have individualized documentation that is specific to his/her interaction with the PCCM-e as it relates to their care. The progress note should match the goals on the care plan and the care plan should match the needs of the recipient. The actions should be appropriate to meet the goals.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Documentation must provide enough detail and explanation to justify the reimbursement requested. If care management services are rendered to more than one eligible recipient in a household on the same day, the case management documentation must include the following information:

- All documentation must be individualized to each eligible recipient's visit.
- There must be enough documentation in the recipient's file that support that the services rendered are specific to his/hers care plan.
- Documentation must meet all other requirements.

Documentation should not be repetitive. Examples include, but are not limited to the following:

- Progress notes that look the same for other recipients.
- Progress notes that state the same words with no evidence of progression, maintenance, or regression.
- Care plans that look the same for other recipients.
- Care plans with goals and actions that stay the same and have no progression.

40.43 Components of the Care Plan

At a minimum, the care plan shall include the following components:

Assessment of Identified Needs

The PCCM-e shall identify and assess the clinical and psychosocial issue that will be the focus of care management. The recipient's individualize needs are based on the recipient's psychosocial assessment and through the collection of objective and subjective data during recipient encounters. The identified needs shall also include documenting of the recipient's risk stratification. The assessment of identified needs process shall include, but not be limited to:

- Engaging the recipient, recipient's family and /or caregiver in the care plan process. Identified persons shall have the opportunity to participate in the care plan process during the development,
- implementation, and ongoing assessment of the recipient's care plan.
- Meeting and addressing communication barriers.
- Engaging the Primary Care Provider (PCP), Maternity Care Provider (MCP), other Providers, and/or a legal representative, as applicable and appropriate. Identified persons shall have the opportunity to participate in the care plan process during the development, implementation, and ongoing assessment of the recipient's care plan.
- Identify and form support systems as needed.
- Identifying and addressing the recipient's personal or cultural preferences related to the types or amounts of services.
- Identifying and addressing the recipient's preference of providers and any preferred characteristics, such as gender or language.
- Identifying and addressing barriers and obstacles that may impede the recipient achieving optimal physical, mental, or social health outcomes.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Identifying and arranging a back-up plan for receiving critical services (i.e., emergency health issues, behavioral health issues, substance use relapse).
- Identifying and establishing crisis plans for a recipient with behavioral health conditions, as applicable.
- Identifying and addressing other needs through ongoing care management

Goals

Goals are recipient centered actions specifically chosen to resolve an identified need or achieve a want or desire. The recipient's goals should be SMART Goals:

- Specific,
- Measurable,
- Achievable,
- Relevant,
- and Time based.

Interventions

Interventions are actions taken by the care management staff to assist the recipient in achieving their goal(s). The intervention process shall include, but not be limited to:

- Referrals to community or social service agencies, as needed (calling or submitting a written request on behalf of the recipient, provider, caregiver/family) and validate the recipient received the service.
- Linking recipient to needed resources or healthcare providers (Perform activities to assist the recipient connect to the resource or provider, and validate the recipient received the service).
- Conducting timely follow-up with the recipient, referral resources, and his/ her providers as appropriate.
- Performing medication reconciliation, as applicable.
- Establishing support systems.
- Providing relevant education
- Conducting transitions of care between care settings which may include obtaining the discharge / transition plan/summary.

Rationale

The rationale is the "why" of the care plan. It is the explanation a Care Manager provides for choosing an intervention.

Evaluation

The evaluation process includes documenting follow-up and monitoring of the recipient's progress toward the goals and determining if the interventions were appropriate. This process includes determining if the goal and or intervention will improve the recipient's quality of health (mental physical, social, etc.) and meet their needs. Care management staff shall:

- Document the recipient's progress toward accomplishing each goal.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Documentation shall include the status of each goal i.e., met, unmet, or in progress along with a summary what was (un)accomplished and why.
- Document the effectiveness of the intervention; determine if new or revised interventions are needed along with the need for continued management.
- The care plan shall be evaluated with each recipient encounter with documentation to support the completion of an evaluation process.

Revisions

Care plan revisions include modifying the goals and interventions based on the evaluation of the recipient's progress and needs to ensure the appropriateness of the services to suit the recipient's needs. Revisions are required when:

- There is a change in the recipient's health status or needs.
- There is a change in recipient's diagnosis.
- There is a change in recipient's caregiver status.
- The recipient experiences a significant health care event (e.g., hospital admission or transition between care settings).
- There is a request or need identified by the recipient or the recipient's caregiver.
- There is a request of need identified and by the recipient's healthcare providers.
- There is a change to the recipient's goals.
- The intervention chosen is not suitable to aid in achieving the goal.
- There is a lack of progress with achieving a goal after 90 days (modify/change the goal and or intervention).
- During reassessments.
- After a change stratification level

The care plan is valid when the recipient/legally responsible person and the person who developed the plan sign and date it. Unless clinically contraindicated, the recipient will sign or mark the care plan to document the recipient's participation in developing /revising the plan. If the recipient is under the age of 14 or adjudicated incompetent, the parent, foster parent or legal guardian must sign the care plan.

40.44 MULTIDISCIPLINARY CARE TEAM (MCT)

The PCCM-e must establish a Multidisciplinary Care Team (MCT), a group of health care professionals (such as physicians, nurses, social workers, pharmacists), who are members of different disciplines, each providing specific services to the recipient. The recipient, caregiver, or designated family member shall have the right to participate in the recipient's MCT meeting and the planning of the meeting(s).

The MCT allows for health professionals from different disciplines to work together to provide coordinated and individualized care to patients with complex or chronic needs. The team collaborates on a detailed care plan of care, communicates regularly, and accesses a range of health and community services to support the recipient's goals and well-being. The

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

team also works to prevent unnecessary hospital care and adapts to the changing needs and circumstances of the recipient over time.

MCT Meeting

A MCT meeting is defined as a setting where all of the attendees are present at the same time to discuss the identified issue(s) collaboratively. Examples of an appropriate MCT meeting setting:

- In-person/face-to-face
- Virtual with, at a minimum, audio capability; audio and visual preferred
- MCT meetings are held in accordance with the Care Management Activity Schedule.

The MCT shall meet at an appropriate location or venue in the Region such as the PCCM-e's office, hospital, community mental health center, clinical practice or clinical group practice, an academic health center, or virtual platform.

The following criteria must be met to be eligible for payment:

- Recipient or their designee must be present.
- If the recipient chooses to not attend prior to the meeting being scheduled, the PCCM-e must maintain attestation documentation within the HIMS to support the refusal. In these instances, Agency approval will be needed prior to payment. This approval must be granted prior to the meeting being conducted.
- If the recipient had agreed to attend but due to unforeseen circumstances cannot attend, the PCCM-e must maintain attestation documentation within the HIMS and document the unforeseen circumstance. In these instances, the MCT meeting can still occur and be eligible for payment.
- Primary care provider or their designee must be present.
- Attendee presence must be documented.
- If face-to-face, signatures are required.
- If virtual, documentation of presence required.
- Document in detail, activities of the MCT and subsequent meetings, in an approved HIMS, including the name and title of participating MCT members and method of participation.

Additionally, the MCT must:

- Include the recipient as an integral member of the MCT meetings.
- Include multi-disciplines.
- Hold meetings that are person-centered, built on the recipient's specific preferences, needs, and input.
- Discuss recipient's needs, solutions, and potential outcomes and timelines for addressing such needs.
- Document, in detail, issues as described above and participating staff; and
- Be an essential component of the care plan process and documented as care plan activities in an approved HIMS.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

PCCM-e Responsibilities

The PCCM-e must:

- Assign a Care Manager or Transitional Care Management staff to establish and coordinate a MCT for eligible actively managed recipients.
- Inform the recipient, in writing, of their rights and responsibilities to participate in the MCT meeting. The PCCM-e shall notify the recipient, in writing, of the date, time, location, and purpose of the MCT at least 10 business days before the date of the recipient's MCT meeting. The notification can be telephonic but must be followed-up with a written recipient MCT meeting notification letter via postal service.
- Maintain documentation that a recipient MCT meeting notification letter was generated and mailed to the recipient. Documentation shall be maintained in an approved HIMS for auditing and compliance purposes.
- Organize a MCT that will develop a comprehensive person-centered care plan to meet the needs of the recipient and independently address various issues a recipient may have, focusing on the issues in which each professional specializes.

The PCCM-e shall ensure that the MCT includes the following:

- transparency,
- individualization,
- support,
- acknowledgement and respect for linguistic and cultural differences, competences, and
- Preservation of dignity.

The PCCM-e's designated care manager shall serve as the lead professional in the MCT process. The care manager shall:

- Coordinate the recipient's MCTs by connecting with healthcare professionals who were an essential part of the recipient's care and who would be instrumental in contributing to the recipient's health outcomes.
- Review the each MCT member's documentation related to the recipient.
- Ensure delivery of the care plan to each MCT member to assist the recipient with achieving goals documented within the care plan.
- Be present at various meetings / appointments, if requested.
- Assist the recipient and/or their caregiver by answering questions pertaining to their care plan and its related services, as well as, helping the recipient obtain the treatment and services needed.
- Correspond with the recipient's family or caregiver as needed and/or requested by the recipient when appropriate.
- Determine when additional MCT meetings are needed with other specialized professionals.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Engage the PCP in the MCT process. The care manager shall determine the best way to engage the PCP and communicate with the PCP to support a collaborative, seamless process. A nurse, nurse practitioner (NP) or physician assistant (PA) or physician extender employed by the provider can serve for the PCP as an active participant in the MCT process. A general office staff, clerk, receptionist, lab technician or any other personnel, employed, contracted or a volunteer, cannot participate in the MCT process on the PCP's behalf. Active participation of PCPs is required for all MCT meetings.
- Ensure the person-centered care plan exhibits a team approach, supported through documentation. The care plan shall serve as the center of the MCT process.
- Review all specialty and MCT entries in the care plan, collaborate with other disciplines as needed for reviews and updates, ensure the care plan is current, interventions are implemented, and goals are identified and evaluated timely. Documentation of completion of this requirement shall be maintained in HIMS for auditing and compliance purposes.
- Ensure the recipient's needs are addressed based on care plan documentation in HIMS.

Ensure care plans are reviewed by MCT members as specified in the Care Management Activity Schedule:

Ensure the care plan is updated when:

- there is a change in the recipient's health status or needs,
- there is a change in diagnosis(es),
- there is a change in caregiver status,
- changes in functional status or a significant health care event occurs (e.g., hospital admission or transition between care settings), or
- as requested by the recipient's caregiver and/or the recipient's provider; and
- Close care plan when goals are met.

MCT Composition

The MCT, under the ACHN Program, may consist of the recipient and at least six different disciplines or professionals. The disciplines/professionals may include, but not limited to, the following:

- PCCM-e Care Manager (required): The leader of the MCT and care plan process.
- Primary Care Provider or appropriate representative (required): The PCP, through review of medical record documentation, shall contribute to the care plan process through consulting with the PCCM-e staff, other members of the team and the recipient, as applicable and documenting identified needs, goals and intervention in the care plan.
- Pharmacist (required): Through the medication list and medication reconciliation process, the pharmacist shall contribute to the care

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

plan process through consulting with the PCCM-e staff, other members of the team and the recipient, as applicable and documenting identified needs, goals and intervention in the care plan.

- Transitional Care Staff (when applicable): Through the transitional care process, the transitional care nurse shall contribute to the care plan by addressing the recipient identified needs, consulting with the PCCM-e staff and other members of the MCT and documenting identified needs, goals and intervention in the care plan.
- Behavior Health Staff (when applicable): Through the behavior health process and contact with the recipient, the Behavior Health staff shall contribute to the care plan and address the recipient's needs through consulting with the PCCM-e staff, substance use disorder screening processes, reflecting goals, needs and interventions in the care plan.
- Community Health Worker (when applicable): Through working with the recipient and identifying recipient needs, valuable information can be shared to support the MCT process.

To be considered a valid MCT meeting, the meeting shall consist of any three of the six disciplines/ professionals based on the recipient's needs. At least one of the three disciplines must be the recipient's PCP or appropriate PCP representative. The recipient, his or her family member, or caregiver cannot be counted as one of the three levels of disciplines.

Recipient Participation

If the recipient cannot attend the MCT meeting in person or virtually on the scheduled date and time of the MCT, the PCCM-e's care manager shall review with the recipient notes from the MCT and the recipient's care plan during the next face-to-face encounter. This encounter must be documented in the HIMS and the recipient's signature for the encounter is required. The documentation must be maintained in an approved HIMS for monitoring and compliance purposes. Should the recipient choose not to sign, all efforts to attempt to collect the signature must be documented in the PCCM-e's HIMS.

40.45 Medical Management Meeting

Each PCCM-e Medical Director is required over a 12-month period to host at least three quarterly Medical Management Meetings with the Regional Medical Management Committee to discuss and when appropriate, resolve any issues the Primary Care Provider (PCP) or the PCCM-e may encounter in providing care to recipients. These meetings maybe in-person or virtual.

Regional Medical Management Committee
Each PCCM-e is responsible to establish a Regional Medical Management Committee.
The Committee must satisfy the following requirements:

- Chaired by the Medical Director.
- Composed of at least one representative (PCP, Physician Assistant, or Nurse Practitioner) from all participating providers within the Region.
- Medical Management Meeting Objectives:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Assist in developing and implementing initiatives centered around quality measures.
- Reviews data provided by the PCCM-e to help achieve and improve the Agency and PCCM-e quality goals.
- Review and assist the PCCM-e in implementing and evaluating its Quality Improvement Projects (QIPs).
- Discuss and when appropriate, resolve any issues the PCPs or the PCCM-e may encounter while providing services to recipients.

Recipients with abnormal lead levels, newborn metabolic screenings, and newborn hearing screenings will continue to receive Care Coordination from the Alabama Department of Public Health.

40.46 ACHN Call Center

Services Telephone Line
The PCCM-e shall provide and maintain a number allowing toll-free calls from PCPs, potential and current recipients in the PCCM-e. This is to provide health related support and access. This line shall be available on Business Days, between the hours of 8:00 a.m. and 5:00 p.m. CT (central time). The PCCM-e must also have policies and procedures for handling emergency calls.

The PCCM-e must develop, implement, and maintain policies and procedures, which must be submitted to the Agency for prior written approval, for operating the toll-free recipient services telephone line, or equivalent, that include, but are not limited to, staffing, hours of operation, call response and hold times, abandonment rate, transfer protocols and monitoring.

The PCCM-e shall develop, implement, and monitor performance standards for the toll-free recipient services telephone line. Such standards and monitoring activities must be submitted to the Agency for approval.

Call Center Reports

The Agency shall monitor the Vendor call center through call center reports. The Vendor shall submit to the Agency quarterly call center reports using an Agency approved template. The call center report shall be due no later than the fifteenth (15th) Business Day of the month following the end of the quarter.

The PCCM-e must conduct ongoing call quality assurance to ensure these minimum performance standards are met. If the Agency determines, in its sole discretion, that it is necessary to conduct onsite monitoring of the PCCM-e's recipient services telephone line functions, the PCCM-e will be responsible for all reasonable costs incurred by the Agency or its authorized designee(s) relating to such monitoring.

The toll-free recipient services telephone line must have the capability to handle calls from any language for non-English speaking recipients, as well as recipients with communications impairment, including the use of translators, auxiliary aids such as the telecommunications relay service

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

(TRS), and text telephone (TTY)/telecommunication device for the deaf (TDD) lines.

The PCCM-e shall have an automated system available every Business Day between the hours of 5:00 p.m. and 8:00 a.m. CT and during weekends and legal holidays. The automated system must include a voice mailbox for callers to leave messages. The PCCM-e shall ensure that the voice mailbox has adequate capacity to receive the reasonably anticipated maximum volume of messages.

The PCCM-e must return messages on the next Business Day. This automated system must provide callers with operating instructions on what to do in case of an emergency which must include, at a minimum, the following information in accordance with 42 C.F.R. § 438.10(g)(2)(v):

- What constitutes an Emergency Medical Condition and Emergency Services; and
- The fact that the recipient has a right to use any hospital or other setting for emergency care.
- Noncompliance with requirements for the recipient services telephone line may result in Sanctions.

41

41 Nurse-Family Partnership (NFP)

Nurse-Family Partnership (NFP) is a nationally recognized, evidence-based program that provides prenatal, postpartum and infant home visiting services for the family unit until the child reaches age two. NFP nurse visiting services are available to eligible pregnant Medicaid recipients for intensive targeted case management rendered by specially trained nurses.

NFP nurse visiting services include care coordination, assessments and screenings, case management, and preventative health education and counseling. These nursing services are tailored to each woman's needs and delivered in-person or via telehealth in the home setting, or in an alternative community setting as indicated by recipient's need. The goals/objectives of the NFP program include:

- improved health outcomes for mother and child,
- reduced maternal and infant mortality rates, and
- an increase in healthy spacing between births to 24 months.

Referral by an Alabama Coordinated Health Network (ACHN) provider of an eligible Medicaid recipient to an Alabama Medicaid enrolled NFP entity is required. This referral is needed before the NFP entity submits for reimbursement to the Agency for services rendered to Alabama Medicaid recipients. Recipient participation in NFP is voluntary. Additionally, recipients can choose the Alabama Medicaid enrolled NFP provider in their region.

41.1 Provider Enrollment

Medicaid's fiscal agent enrolls providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the State of Alabama, the Code of Federal Regulations, the Alabama Medicaid Agency Administrative Code, and the Alabama Medicaid Provider Manual.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will receive a notification when it is time to re-validate. Failure to re-validate and provide appropriate documentation to complete the enrollment process will result in an end-date being placed on the provider file. A new enrollment application must be submitted once a provider enrollment file has been closed due to failure to timely re-validate.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

41.1.1 *National Provider Identifier, Type, and Specialty*

A provider who contracts with Medicaid as an NFP provider is added to the Medicaid system with the National Provider Identifiers provided to the Agency at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for NFP-related claims.

NOTE:
The 10-digit NPI is required when filing a claim

Nurse-Family Partnership providers are assigned a provider type of 21 (Targeted Case Management), and specialty code 923 (NFP).

41.1.2 *Enrollment Policy for NFP Providers*

Nurse-Family Partnership (NFP) provider entities may enroll with the Agency beginning April 1, 2022. An NFP provider entity must be certified by the National Service Organization (NSO) prior to enrolling with Alabama Medicaid. NFP certification requires, at a minimum, that each entity's appropriate personnel have NSO approved training in the prenatal, postpartum, and new parent topics.

Certified NFP entities must submit their NSO model fidelity letter when enrolling with Alabama Medicaid. Additionally, NFP provider entities will be required to pay an application fee in compliance with CMS requirements.

For information regarding becoming a certified NFP entity, please reference the information on the Agency's website on the NFP page.

41.1.3 *Provider Termination and/or Change of Ownership*

1. A participating Nurse-Family Partnership (NFP) provider has the right to withdraw from the Medicaid program after submitting written notice to Medicaid of its intent at least thirty (30) days in advance.
2. Medicaid may terminate the NFP provider's participation in the Medicaid program if the provider loses NSO certification for any reason, as well as in cases involving fraud or willful or grossly negligent non-compliance with all applicable program, State and federal guidelines.
3. Medicaid must be notified in writing within thirty (30) days of the date of an NFP entity's owner and/or name change. The existing contract will be terminated, and a new contract must be signed to continue participation in the Medicaid program.

41.2 Benefits and Limitations

41.2.1 *Benefits*

Nurse Family Partnership (NFP) services are available to Medicaid eligible persons who:

1. Are referred to a qualified, Agency enrolled, NFP entity/provider by the recipient's assigned ACHN.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

2. Recipients must meet the following NFP criteria for participation:

   - First time mother
   - High-risk as defined by the National Service Organization (NSO), and
   - Enrolls and receives her first home visit no later than the end of the 28th week of pregnancy, unless otherwise specified by NSO.

   NFP services include, but are not limited to:

   - Prenatal Services
     - Monitoring for high blood pressure or complications
     - Diet/nutrition education
     - Infant care education
     - Family stress guidance
     - Stress management
     - STD prevention education
     - Tobacco/alcohol education
     - Intimate partner violence screening/education
     - Anxiety and depression screening/referrals
     - Needs assessing/screening
     - Making referrals for care
     - Monitoring and follow up
   - Postpartum Services
     - Assessment of mom's health
     - Diet and nutrition education
     - Stress management
     - STD prevention education
     - Tobacco/alcohol education
     - Emotional/physical changes
     - Infant care and parenting
     - Partner relationship support
     - Breastfeeding support
     - Education for well-woman visits for preventive services
     - Anxiety and depression screening/referrals
     - Needs assessing/screening
     - Making referrals for care
   - Infant-Related Care
     - Infant health assessment, development and referrals
     - Child developmental screening at major developmental milestones from birth to age two (2).

41.2.2 *Limitations*

Medicaid will not separately reimburse for any direct care services, such as wound care, rendered by an NFP nurse in the course of their NFP case management visit.

41.3 Documentation Requirements

Nurse-Family Partnership (NFP) is a Targeted Case Management (TCM) service, and as such NFP providers must adhere to all core elements of TCM.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

For more information regarding these core elements, refer to TCM Chapter, Chapter 106, Section 106.2.1 of this Provider Billing Manual.

The NFP provider must maintain complete and accurate medical, mental health, case management, and fiscal records that fully disclose the extent of the services provided.

All documentation must be legible, signed and dated by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. Additionally, the author of each entry must either, personally or electronically sign his or her entry. A stamped signature is not acceptable.

In addition to all National Service Organization (NSO) mandated data elements and documentation requirements, NFP records must contain documentation of:

(a) name of recipient,

(b) the recipient Medicaid ID,

(c) the NSO Client ID,

(d) dates of services,

(e) name of NFP provider and person providing services,

(f) nature, start and end time, extent or units of services provided,

(g) place(s) of service,

(h) weeks of gestation or weeks postpartum at time of visit, and

(i) a written assessment of the client's progress.

The NFP provider's records must also contain the following information:

- Documented referral source
- A systematic, recipient-coordinated Plan of Care (POC).
- Verification that the recipient's Medicaid Eligibility was checked at admission and at least once a month, thereafter. NOTE: There are times when a recipient's eligibility status may change throughout the month. It is the provider's responsibility to ensure that a recipient has the applicable Alabama Medicaid coverage for the date(s) of service for which services will be provided. All providers must maintain a paper copy of the eligibility response in the patient's file. For more information, refer to the Provider Manual, Chapter 3: Verifying Recipient Eligibility.
- Family history
- Medical history
- Educational/vocational history
- Mental health treatment history, when applicable
- Legal history
- Substance abuse history

The NFP provider must make available to Medicaid, at no charge, all information describing services provided to eligible recipients. The provider must also permit access to all records and facilities for the purpose of claims audit, program monitoring, and utilization review by duly authorized representatives of Federal and State agencies.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

41.4 Reimbursement

1. Nurse-Family Partnership (NFP) provider entities may submit a claim to Medicaid once each month for each family unit designated by the NSO Client ID. At least one qualifying visit must occur prior to the submission of the claim. However, it is expected that at least two visits per month with the recipient will occur and there must be documentation in the recipient's record for each visit performed. Additional visit dates must be listed on the claim as separate details. All visits beyond the first must be filed with an XE modifier appended to the corresponding NFP service (e.g., T2023 HD U1 XE). If at least two visits cannot be completed during the month, there must be documentation in the recipient's record to explain why. The dates of service must be listed on the claim. NOTE: Claims paid in error will be subject to recoupment.

NOTE:
Effective January 1, 2024, at least one of the minimal two monthly visits must be in-person or face-to-face to be eligible for reimbursement by Medicaid.

2. All NFP claims must have a referral from the recipient's assigned ACHN to receive payment from Medicaid. The Alabama Coordinated Health Network Nurse-Family Partnership (NFP) Referral Form must be completed in accordance to the instructions, ensuring the recipient's 13-digit Medicaid ID number is on the form. When filing an electronic claim using Medicaid's web portal, the ACHN NPI should be entered into the "referring physician" field. If using a vendor/clearinghouse software, the provider will need to confirm with the vendor on where to enter the ACHN NPI.
3. All NFP claims must include the NSO Client ID to receive payment from Medicaid. When filing an electronic claim using Medicaid's web portal, the NSO Client ID should be entered in the "referral number" field. If using a vendor/clearinghouse software, the provider will need to confirm with the vendor on where to enter the NSO ID as the referral number.
4. NFP claims for prenatal services must include the Date of Last Menstrual Period (LMP) to receive payment from Medicaid. When filing an electronic claim using Medicaid's web portal, the LMP should be entered in the "Last Menstrual Period" field. If using a vendor/clearinghouse software, the provider will need to confirm with the vendor on where to enter the LMP (date qualifier code = 484).
5. NFP claims for post-partum services must include the Date of Delivery to receive payment from Medicaid. When filing an electronic claim using Medicaid's web portal, the Date of Delivery should be entered in the "Initial Treatment Date" field. If using a vendor/clearinghouse software, the provider will need to confirm with the vendor on where to enter the Date of Delivery/Initial Treatment Date (date qualifier code = 454).
6. The NFP provider agrees to accept payment in full as the amount paid for covered NFP services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

41.4.1 *Completing the Claim Form*

To enhance the effectiveness and efficiency of Medicaid processing, providers are encouraged to bill Medicaid claims electronically.

NFP providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NFP providers must include the following information on the claim:

- The dates on which the NFP services were rendered,
- The recipient's ACHN NPI as referring provider,
- The NSO Client ID assigned to the family unit (referral number),
- The weeks of gestation or weeks postpartum at time of visit ,
- The ACHN referral number, and
- The Z71.9 (counseling, unspecified) diagnosis code

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

41.4.2 *Procedure Codes and Modifiers*

Medicaid uses the Healthcare Common Procedure Coding System (HCPCS). HCPCS is composed of the following:

- American Medical Association's Current Procedural Terminology (CPT)
- Nationally assigned codes developed for Medicare
- Locally assigned codes issued by Medicaid. Effective for dates of service on or after 01/01/2004, use national codes.

The CPT manual lists most procedure codes required by Medicaid. This manual may be obtained by contacting the Order Department, American Medical Association, 515 North State Street, Chicago, IL 60610-9986.

The following procedure code and applicable modifiers are required on each filed claim for NFP services:

Procedure Code	***First Modifier***	***Second Modifier***	***Date Required***
T2023 – Targeted Case Management (Monthly Billing)	HD – Pregnant and parenting women's program	U1 – Prenatal Case Management	LMP (date qualifier code = 484).
T2023 – Targeted Case Management (Monthly Billing)	HD – Pregnant and parenting women's program	U2 – Postpartum Period (delivery through 12 months postpartum)	Delivery Date (date qualifier code = 454).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Procedure Code	*First Modifier*	*Second Modifier*	*Date Required*
T2023 – Targeted Case Management (Monthly Billing)	HD – Pregnant and parenting women's program	U3 – Postpartum Period (12 months through 2-years postpartum)	Delivery Date (date qualifier code = 454).

NOTE:

Postpartum services (U3) can be billed under the Mother or Child's Medicaid ID. Prenatal services (U1)and Postpartum (U2) MUST be billed under the mother's Medicaid ID.

NOTE:

Use of both a first and second modifier will be required for reimbursement.

41.4.3 *Diagnosis Codes*

Effective April 1, 2023, all Nurse-Family Partnership (NFP) claims submitted to Medicaid must include a diagnosis code of Z71.9 (counseling, unspecified) for reimbursement. Claims with dates of service prior to April 1, 2023 do not require the Z71.9 diagnosis code.

41.4.4 *Cost Sharing (Copayment)*

Copayment does not apply to services provided by NFP providers.

41.4.5 *Time Limit for Filing Claims*

Medicaid requires claims for NFP service to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

100

100 Children’s Specialty Clinics

Children's Specialty Clinic Services are specialty-oriented services provided by an interdisciplinary team to children who are eligible for EPSDT services and who experience developmental problems. Children's Specialty Clinic Services include preventive, diagnostic, therapeutic, rehabilitative, or palliative services provided in a clinic setting that is not part of a hospital but is operated to provide medical care on an outpatient basis to children with special health care needs.

Clinic services include the following outpatient services:

- Services furnished at the clinic by or under the direction of a physician or dentist
- Services furnished outside the clinic, by clinic personnel under the direction of a physician, to an eligible individual who does not reside in a permanent dwelling or does not have a fixed home or mailing address

  Clinics include:

Arthritis	Multiple Disabilities
Augmentative Communication	Neurology
Behavior Assessment (Sparks only)	Neuromotor
Biochemical Genetics (Sparks only)	Neurosurgery
Cerebral Palsy	Orthopedic
Child Development (Sparks only)	Pediatric Communication
Cleft Palate	Pediatric Evaluation
Cystic Fibrosis	Pediatric Orthopedic
Dentistry (Sparks only)	Pediatric Surgery
Eye	Psycho-education
Feeding (OT)	Scoliosis
Genetics	Seating, Positioning & Mobility
Hearing	Seizure
Hearing Aid	Speech Pathology
Hearing Assessment	Spina Bifida
Hemophilia	Teen Transition
Limb Deficiency	Urology

Eligible persons may receive Children's Specialty Clinic Services through providers who contract with Medicaid to provide services to children eligible for EPSDT services.

The policy provisions for clinic providers can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 61.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

100.1 Enrollment

The Alabama Medicaid Agency fiscal agent enrolls children's specialty clinics and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Administrative Code,* and the *Alabama Medicaid Provider Manual.*

In order to meet federal enrollment criteria, all Children's Rehabilitation Services providers must have a NPI with ADRS/CRS identified as payee. Sparks Rehab Center shall submit claims for clinic services to Medicaid under the physician's clinic NPI or (if no physician is present) under the clinic NPI.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a clinic is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for clinic-related claims. The 10-digit NPI is required when filing a claim.

Clinics are assigned a provider type of 57(Clinics). Valid specialties for clinics include the following:

- Children's Rehabilitation Service (015)
- EPSDT (560)
- Hemophilia (990)
- Orthodontia (273)
- Radiology Clinics (995)
- Sparks Rehab Center (850)
- Optometry (180)
- United Cerebral Palsy (UCP) (840)

Physicians and certified registered nurse practitioners affiliated with children's specialty clinics are enrolled with their own NPI, which links them to the clinic. The provider type for the physician and certified registered nurse practitioner is 57 (Clinics). The valid specialties are any of those specialties valid for physicians and certified registered nurse practitioner. Please refer to Chapter 28, Physician, for a listing of valid specialties.

All other personnel affiliated with the children's specialty clinic bill using the clinic's NPI and are not assigned individual NPIs.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Enrollment Policy for Children's Specialty Clinics

Providers are clinics organized apart from any hospital that operate to provide specialty care through an interdisciplinary team approach.

Clinics must meet recognized standards of care for children with special health care needs and provide services in their clinics for the following disciplines, at a minimum:

- Specialty physicians
- Certified Registered Nurse Practitioners
- Nurses
- Social workers/service/care coordinators
- Physical therapists/Occupational therapists
- Audiologists
- Nutritionists
- Speech/language pathologists

All providers serving children must meet state and federal criteria for participation in the Medicaid program.

100.2 Benefits and Limitations

All Children's Specialty Clinic Services must be furnished by or under the direction of a physician directly affiliated with the clinic. "Under the direction of" means the physician must see the patient at least once, prescribe the type of care, and periodically (at least annually, unless the scope of services requires more frequent review) review the need for continued care.

Providers must develop a patient care plan that provides medical and rehabilitative services as well as coordination and support services to children with special health care needs.

Case management/service/care coordination is an integral part of ADRS/CRS clinic activities. Case managers/service/care coordinators provide services such as assessment, care plan development, linking/coordination of services, and parent counseling, parent and child education, and follow-up. Types of services provided include assisting the family with surgery/hospital arrangements, scheduling and coordinating appointments for evaluation and treatment, referral to appropriate resources as needed, home visits, school visits, patient and parent counseling/anticipatory guidance, and patient support. Individual case managers must meet the following criteria at a minimum: a four-year college degree or a registered nurse, and all case managers/service/care coordinators must meet state licensure requirements at the appropriate educational level and receive training appropriate to the need of the target population.

Children's Specialty Clinic Teams

The clinic teams are usually comprised of physicians, certified registered nurse practitioners, registered nurses, social workers, therapists, audiologists, and rehabilitation assistants, clerical and/or support personnel. Clinic composition may vary depending on the type of clinic; however, clinic team protocol must be furnished to and approved by Medicaid. Clinic team protocol will be updated on an as-needed basis, but annually at a minimum. The team

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

will establish a written patient care plan. The case management team then implements this plan.

100.2.1 Covered Services

Children's Specialty Clinic Services do not include services rendered under other Medicaid programs.

Children's Specialty Clinic Services are covered when provided by a Medicaid-enrolled children's specialty clinic provider.

Types of covered services provided in clinics include:

- Diagnosis of medical condition
- Completion of durable medical equipment assessments to include augmentative communication technology assessments
- Development of a patient care plan
- Therapy (physical, speech/language, occupational)
- Patient/parent education
- Audiology services
- Physician services
- Psychological services
- Multidisciplinary evaluations
- Orthotic services
- Prosthetic services
- Optometrical services
- Dental services
- Nutrition services
- Prescriptions for services or medications
- Nursing and social work services
- Case management/Care coordination
- Hearing aid services
- Vision services

For details of dental services covered in children's specialty clinics see Rule No. 560-X-15.06 (3) of the *Alabama Medicaid Administrative Code.*

A patient care plan is required for each child and a service coordinator is responsible for arranging specialty and needed social services for the family.

100.2.2 Reimbursement

Children's Specialty Clinics will be reimbursed by an encounter rate.

Governmental providers of Children's Specialty Clinic Services will be reimbursed by an encounter rate based on reasonable allowable cost, as defined by OMB Circular A-87, established by the Medicaid Agency based on completion of the required cost report documentation. The cost report must be received by Alabama Medicaid Agency on or before February 28.

Non-governmental providers will be paid their usual and customary charge not to exceed the maximum allowable rate established by Medicaid.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Claims may be submitted for reimbursement for only one clinic visit per date of service per recipient, except in the case of dental visits. A dental encounter may be billed in conjunction with only one other clinic visit for the same date of service for the same recipient.

NOTE:

Procedure code D8080 is limited to once per year with prior authorization.

Procedure code D8680 is limited to once every two years with prior authorization.

Procedure code D9310 is limited to once per recipient per lifetime with prior authorization.

100.2.3 Encounters

Covered encounters are face-to-face clinic contacts during which a health professional team provides medical services to a patient. They are identified based on the data from clinic sign-in sheets and the individual medical records.

The definition of a health professional depends upon the type of clinic.

Clinics must be attended either by a physician or a certified registered nurse practitioner. Some examples include:

- Arthritis
- Cerebral palsy
- Cleft palate
- Clubfoot
- Craniofacial
- Cystic fibrosis
- Eye
- Genetics
- Hearing
- Hemophilia
- Limb Deficiency
- Multi-specialty
- Neurology
- Neuromotor
- Neurosurgical
- Orthopedic
- Pediatric Evaluation
- Pediatric surgery
- Scoliosis
- Seizure
- Spina bifida
- Teen Transition
- Urology clinics

To be counted as a non-physician encounter, the health professional(s) must be qualified to perform the service, and although a physician is not present, the service must be provided under the direction of a physician. Examples of non-physician clinics include augmentative communication, feeding, hearing assessment, hearing aid orientation/maintenance, infant/toddler functional evaluation, speech, and seating, positioning & mobility.

Multiple contacts with the same health professional(s) that take place on the same day at a single location constitute a single encounter. Services incident

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

to an encounter, or subsequent to the clinic encounter, such as social services, case management, nursing, writing of prescriptions, clerical, therapy, and pre-certification evaluations are inclusive in the encounter and should not be billed separately.

For example, if a client comes to the limb deficiency clinic, the minimum staffing standards must be met in order for the contact to be counted as an encounter. In this case, the orthopedist, physical therapist, and social worker must be present. Their face-to-face contact with the client constitutes an encounter. Subsequent visits for purposes of physical therapy only by the therapist do not constitute an encounter since these costs are included in the encounter rate that is billed only when the minimum staffing standards for a clinic are met.

100.2.4 Maintenance of Records

The provider must make available to the Alabama Medicaid Agency at no charge all information regarding claims for services provided to eligible recipients. The provider will permit access to all records and facilities for the purpose of claims audit, program monitoring, and utilization review by duly authorized representatives of federal and state agencies. The provider maintains complete and accurate fiscal records that fully disclose the extent and cost of services.

The provider maintains documentation of Medicaid clients' signatures. These signatures may be entered on a sign-in log, service receipt, or any other record that can be used to indicate the clients' signatures and dates of service.

The provider maintains all records for a period of at least three years plus the current fiscal year. If audit, litigation, or other legal action by or on behalf of the state or federal government has begun but is not completed at the end of the three-year period, the provider retains the records until the legal action is resolved. The provider must keep records in a format that facilitates the establishment of a complete audit trail in the event the items are audited.

100.3 Prior Authorization and Referral Requirements

In general, clinic procedure codes generally do not require prior authorization; however, an exception to this requirement includes services for orthodontia. Refer to the Dental, Chapter 13 for guidelines.

For services outside of the encounter that require prior authorization, refer to Obtaining Prior Authorization, Chapter 4 for guidelines..

For services provided to recipients enrolled in the Alabama Coordinated Health Network (ACHN) Program, refer to Chapter 40, for guidelines.

100.4 Cost Sharing (Copayment)

Copayment does not apply to services provided by Children's Specialty Clinics.

100.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Children's specialty clinics that bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Online adjustment functions
- Enhanced access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare Related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

100.5.1 Time Limit for Filing Claims

Medicaid requires all claims for clinics to be filed within one year from the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

100.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes.

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

100.5.3 Procedure Codes and Modifiers

Medicaid uses the Healthcare Common Procedure Coding System (HCPCS). HCPCS is composed of the following:

- American Medical Association's Current Procedural Terminology (CPT)
- Nationally assigned codes developed for Medicare
- Locally assigned codes issued by Medicaid. Effective for dates of service on or after 01/01/2004, use national codes.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The CPT manual lists most procedure codes required by Medicaid. The (837) Professional, Institutional and Dental electronic claims and the paper claim have been modified to accept up to four Procedure Code Modifiers.

The following procedure codes have been approved for billing by children's specialty clinics.

Clinic Services

Procedure Code	*Description*	*Who Can Bill*	*Sparks Clinic*
99203-HT	Neurology, also known as Pediatric Assessment, Pediatric Neurology, Neuromotor, Cerebral Palsy/Neuro Ortho, Cleft Palate, Craniofacial, Hemophilia, Limb Deficiency, Pediatric Orthopedic Specialty, Seizure, Speech, Pathology, and Spina Bifida/Multispecialty.	CRS	
99204-HT	Arthritis, Genetics, and Limb Deficiency.	CRS	
99212-HT	Arthritis, Cerebral Palsy/Neuro Ortho, Cleft Palate, Craniofacial, Craniofacial Orthodontia, Eye, Hearing, Hearing Aid, Hemophilia, Neuromotor, Neurosurgery, Orthopedic, Scoliosis, Spina Bifida/Multispecialty, Urology	CRS, Sparks	
99213-HT	Cerebral Palsy/Neuro Ortho, Cleft Palate, Craniofacial, Craniofacial Orthodontia, Hemophilia, Limb Deficiency, Neurology, also known as Pediatric Assessment, Pediatric Neurology; Neuromotor, Pediatric Orthopedic Specialty, Seizure, Speech Pathology, Spina Bifida/Multispecialty	CRS	
99214-HT	Cystic Fibrosis, Genetics, Arthritis	CRS, Sparks	Communicati on Clinic
99205-HT	Cystic Fibrosis, Pediatric Evaluation	CRS, Sparks

Non-Clinic Services

Children's Specialty Clinics also provide, or arrange provision of, non-clinic services. The following procedure codes shall be utilized and will be reimbursed on a fee-for-service basis.

Procedure Code	*Who Can Bill*	*Description*
70010-79999	CRS	Radiology
J7188 J7189 J7190 J7191 J7192	CRS	Injection, Von Willebrand factor complex, per i.u. Factor ViiA, per 1mcg. Factor viii (antihemophilic factor, human), per i.u. Factor viii (antihemophilic factor, porcine), per i.u. Factor viii (antihemophilic factor, recombinant), per i.u.
J7197 J7198 J7199	CRS	Antithrombin iii (human), per i.u. Anti-inhibitor, per i.u. Hemophilia clotting factor, not otherwise classified
J7193 J7194 J7195	CRS	Factor ix (antihemophilic factor, purified, non-recombinant) Factor ix, complex, per i.u. Factor ix (antihemophilic factor, recombinant), per i.u.
D8080	CRS	Comprehensive Orthodontic Treatment of the Adolescent Dentition (requires prior authorization)
D8680	CRS	Orthodontic Retention (removal of appliances, construction, and placement of retainer(s)) (requires prior authorization)
D9310	CRS	Consultation
L3650	CRS	Shoulder orthosis (SO), figure of "8" design abduction restrainer
L3660	CRS	SO, figure of "8" design abduction restrainer, canvas and webbing
L3670	CRS	SO, acromio/clavicular (canvas and webbing type)
L3700	CRS	Elbow orthoses (EO), elastic with stays
L3710	CRS	EO, elastic with metal joints
L3720	CRS	EO, double upright with forearm/arm cuffs, free motion
L3730	CRS	EO, double upright with forearm/arm/cuffs, extension/flexion assist
L3740	CRS	EO, double upright with forearm/arm cuffs, adjustable position lock with active control
L3800	CRS	Wrist-hand-finger-orthoses (WHFO), short opponens, no attachments

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Procedure Code	*Who Can Bill*	*Description*
L3805	CRS	WHFO, long opponens, no attachment
L3810	CRS	WHFO, addition to short and long opponens, thumb abduction ("C") bar
L3815	CRS	WHFO, addition to short and long opponens, second M.P. abduction assist
L3820	CRS	WHFO, addition to short and long opponens, IP extension assist, with M.P. extension stop
L3825	CRS	WHFO, addition to short and long opponens, M.P. extension stop
L3830	CRS	WHFO, addition to short and long opponens, M.P. extension assist
L3835	CRS	WHFO, addition to short and long opponens, M.P. spring extension assist
L3840	CRS	WHFO, addition to short and long opponens, spring swivel thumb
L3845	CRS	WHFO, addition to short and long opponens, thumb IP extension assist with M.P. stop
L3850	CRS	WHFO, addition to short and long opponens, action wrist, with dorsiflexion assist
L3855	CRS	WHFO, addition to short and long opponens, adjustable M.P. flexion control
L3860	CRS	WHFO, addition to short and long opponens, adjustable M.P. flexion control and I.P.
L3900	CRS	WHFO, dynamic flexor hinge, reciprocal wrist extension/flexion, finger flexion/extension, wrist or finger driven
L3901	CRS	WHFO, dynamic flexor hinge, reciprocal wrist extension/flexion, finger flexion/extension, cable driven
L3906	CRS	WHO, wrist gauntlet, molded to patient model
L3907	CRS	WHFO, wrist gauntlet with thumb spica, molded to patient model
L3908	CRS	WHO, wrist extension control cock-up, non-molded
L3910	CRS	WHFO, Swanson design
L3912	CRS	HFO, flexion glove with elastic finger control
L3914	CRS	WHO, wrist extension cock-up
L3916	CRS	WHFO, wrist extension cock-up with outrigger
L3918	CRS	HFO, knuckle bender
L3920	CRS	HFO, knuckle bender, with outrigger
L3922	CRS	HFO, knuckle bender, two segments to flex joints
L3924	CRS	WHFO, Oppenheimer
L3926	CRS	WHFO, Thomas suspension
L3928	CRS	HFO, finger extension, with clock spring
L3930	CRS	WHFO, finger extension, with wrist support
L3932	CRS	FO, safety pin, spring wire
L3934	CRS	FO, safety pin, modified
L3936	CRS	WHFO, Palmer
L3938	CRS	WHFO, dorsal wrist
L3940	CRS	WHFO, dorsal wrist, with outrigger attachment
L3942	CRS	HFO, reverse knuckle bender
L3944	CRS	HFO, reverse knuckle bender, with outrigger
L3946	CRS	HFO, composite elastic
L3948	CRS	HFO, finger knuckle bender
L3950	CRS	WHFO, combination Oppenheimer, with knuckle bender and two attachments
L3952	CRS	WHFO, combination Oppenheimer, with reverse knuckler and

Procedure Code	*Who Can Bill*	*Description*
		two attachments
L3954	CRS	HFO, spreading hand
L3960	CRS	Shoulder-elbow-wrist-hand orthosis (SEWHO), abduction positioning, airplane design
L3962	CRS	SEWHO, abduction positioning, erbs palsy design
L3964*	CRS	SEO, mobile arm support attached to wheelchair, balanced, adjustable – **Requires Prior Authorization**
L3965*	CRS	SEO-mobile arm support. Attached to wheelchair, balanced, adjustable rancho type – **Requires Prior Authorization**
L3966*	CRS	SEO, mobile arm support attached to wheel chair, balanced, reclining – **Requires Prior Authorization**
L3968*	CRS	SEO, mobile arm support attached to wheelchair, balanced, friction arm support (friction dampening to proximal and distal joints) – **Requires Prior Authorization**
L3969*	CRS	SEO, mobile arm support, monosuspension arm and hand support, overhead elbow forearm hand sling support, yoke type arm suspension support – **Requires Prior Authorization**
L3970*	CRS	SEO, addition to mobile arm support, elevating proximal arm – **Requires Prior Authorization**
L3972*	CRS	SEO, addition to mobile arm support, offset or lateral rocker arm with elastic balance control – **Requires Prior Authorization**
L3974*	CRS	SEO, addition to mobile arm support, supinator – **Requires Prior Authorization**
L3980	CRS	Upper extremity fracture orthosis, humeral
L3982	CRS	Upper extremity fracture orthosis, radius/ulnar
L3984	CRS	Upper extremity fracture orthosis, wrist
L3985	CRS	Upper extremity fracture orthosis, forearm, hand with wrist hinge
L3986	CRS	Upper extremity fracture orthosis, combination of humeral, radius/ulnar, wrist, (example-colles fracture)
L3995	CRS	Addition to upper extremity orthosis, sock, fracture or equal, each
L3999*	CRS	Upper limb orthosis, not otherwise specified – **Requires Prior Authorization**
L4000	CRS	Replace girdle for Milwaukee orthosis
L4010	CRS	Replace trilateral socket brim
L4020	CRS	Replace quadrilateral socket brim, molded to patient model
L4030	CRS	Replace quadrilateral socket brim, custom fitted
L4040	CRS	Replace molded thigh lacer
L4045	CRS	Replace non-molded thigh lacer
L4050	CRS	Replace molded calf lacer
L4055	CRS	Replace non-molded calf lacer
L4060	CRS	Replace high roll cuff
L4070	CRS	Replace proximal and distal upright for KAFO
L4080	CRS	Replace metal bands KAFO proximal thigh
L4090	CRS	Replace metal band KAFO-AFO, calf or distal thigh
L4110	CRS	Replace leather cuff, KAFO, calf or distal thigh
L4130	CRS	Replace pretibial shell
L4205	CRS	Repair pretibial shell
L4210	CRS	Repair of orthotic device, repair or replace minor parts
L8692-CG**	CRS	Auditory osseointegrated device, external sound processor, used without osseointegration, body worn, includes headband or other means of external attachment

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

*Requires PA
**Effective January 1, 2014 and thereafter, procedure code L8692 must be filed with modifier CG

NOTE:
Refer to Chapter 37, Therapy (Occupational, Physical, and Speech) for the therapy codes.

100.5.4 Place of Service Codes

The place of service code 99 (Other Unlisted Facility) applies when filing claims for clinic services, except for dental and orthodontia services. For dental and orthodontia services, use place of service 11.

100.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

Refer to Section 5.8, Required Attachments, for more information on attachments.

100.6 Covered Services Eligible for Telemedicine

Refer to Chapter 112, Telemedicine Services, for general information and limitations.

100.7 For More Information

This section contains a cross-reference to other relevant sections in the manual.

Resource	Where to Find It

101

101 County Health Departments

Medicaid contracts with the State of Alabama Department of Public Health to reimburse services provided by County Health Departments.

101.1 Enrollment

The Alabama Medicaid Agency fiscal agent enrolls county health departments and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Administrative Code*, and the *Alabama Medicaid Provider Manual.*

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a county health department is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for health department-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

County health departments are assigned a provider type of 13 (County Health). Valid specialties for county health departments that employ physicians include the following:

- Family Planning (083)
- Environmental Lead Assessment (980)
- EPSDT (560)
- Immunizations (900)
- Primary Care Clinic (720)
- Prenatal Clinic (181)
- Preventive Education (183)

County health departments that are enrolled to provide hospice services are assigned a provider type of 06 (Hospice). The valid specialty is Hospice (060).

County health departments that are enrolled to provide home health services are assigned a provider type of 05 (Home Health). The valid specialty is Home Health (050).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Physicians affiliated with county health departments are assigned their own NPI, which links them to the health department. The provider type for the physician is 13 (County Health Department). The valid specialties are any of those specialties valid for physicians. Refer to Section 28.1, Enrollment, for a listing of valid physician specialties.

All other personnel affiliated with the county health department, such as physician assistants or nurse practitioners, bill using the health department's NPI.

101.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Consent of a Minor

Any minor who is 14 years of age or older; has graduated from high school; or is married, divorced, or pregnant may give effective consent to any legally authorized medical, dental, health, or mental health services for himself or herself. The consent of another person is not necessary.

101.2.1 EPSDT

County health departments providing EPSDT services should refer to Appendix A, EPSDT, for specifics regarding benefits and limitations.

EPSDT off-site screening providers must follow the protocols and procedures for EPSDT off-site services listed in the EPSDT appendix. Failure to comply may result in recoupment of the funds paid to the provider.

101.2.2 EPSDT Care Coordination

Effective March 1, 2004, the Alabama Medicaid Agency initiated an EPSDT care coordination service available for private and public providers. The goal for EPSDT Care Coordination Services is to provide children with opportunities to maximize their health and development by ensuring the availability and accessibility of comprehensive and continuous preventive health services throughout childhood.

The EPSDT Care Coordination services are available to any provider, at no cost, who wishes to utilize these services. The Agency, along with the Department of Public Health, has identified children at greatest risk and with the potential for effective intervention. These Medicaid eligible recipients will be targeted for outreach.

Scope of Services

The scope of services include and are designed to support physician's office personnel with identifying, contacting, coordinating, and providing follow up

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

for children who identified with elevated blood lead levels, failed his/her initial hearing screening, or failed the required newborn screenings.

Reports

The following reports provided by the Alabama Medicaid Agency will be utilized by the Alabama Department of Public Health (ADPH) to assist with the following items.

- Monthly Eligibles Report – enables Care Coordinators the ability to track eligible recipients
- Monthly Selected Services Report – enables Care Coordinators to ascertain utilization of EPSDT services, immunizations, elevated blood lead levels, dental services, and high utilization of emergency room visits.

In addition, the Agency and ADPH has developed strategies to identify the children at greatest risk and with the potential for effective intervention utilizing diagnosis codes. Care Coordinators can track referrals, missed appointments, and follow up appointments utilizing the reports listed above.

The following information obtained from ADPH will be utilized as follows:

- Metabolic and Sickle Cell Screening – enables Care Coordinators the ability to track eligible recipients with abnormal results
- Newborn Hearing Screening - enables Care Coordinators the ability to track eligible recipients with abnormal results
- Immunizations - enables Care Coordinators the ability to track eligible recipients with inadequate or delayed immunizations

Measurement Criteria

- ADPH will provide a monthly Summary Report by county.
- EPSDT screenings, immunizations, dental screenings, follow up on elevated blood lead levels, referred visits, kept appointments will increase after the first two years of implementation.

Participation

Participation of qualified EPSDT Care Coordination services is available to the state of Alabama's designated Title V agency, Alabama Department of Public Health. Public Health's primary role is that of care coordinator. Public Health will provide clinical EPSDT services only where those services are not available through the private sector. Public Health will identify health problems. Procedure code G9008, type of service 1 with modifier "EP" (e.g., G9008-EP) will be utilized for billing purposes. Active physician involvement for treatment is vital. EPSDT Care Coordination services are available by contacting your local county health department. Please visit our website at www.medicaid.alabama.gov and select "Programs", then select "Medical Services". A list of EPSDT Care Coordinators by county and telephone numbers is available to support physician office personnel.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

101.2.3 Family Planning

County health departments providing family planning services should refer to Appendix C, Family Planning, for specific benefits, limitations, covered services and family planning diagnosis codes.

101.2.4 Prenatal

Prenatal services listed below are the services provided to a pregnant woman during the period of gestation, including obstetrical, psycho-social, nutrition, health education, and related coordination directed toward protecting and ensuring the health of the woman and the fetus.

Medicaid provides prenatal services to persons who are eligible for Medicaid benefits and are deemed pregnant through laboratory tests or physical examination, without regard to marital status.

Prenatal services provided by county health departments must conform to the Program Guidelines for prenatal services under the Maternal and Child Health Services Block Grant Programs (Title V of the Social Security Act), Migrant Health Centers, or Community Health Centers.

Procedure	***Description***
99212-HD	Prenatal Clinic Visit – Includes diagnosis of pregnancy, comprehensive history, complete physical examination, preparation of medical record, risk assessment, diabetic and genetic screening, referral services, counseling services, collection of specimens for lab tests, hemoglobin or hematocrit and chemical urinalysis. Also includes reevaluation of the pregnancy during the prenatal period.
59430	Postpartum Clinic Visit – An in-depth evaluation of a patient in a stage of recovery from childbirth, requiring the development of or complete reevaluation of medical data, including history of labor and delivery, complications and/or pregnancy outcome, a complete physical examination, and the ordering of appropriate diagnostic tests and procedures. Patient education to include formal conference with the patient to review findings and contraceptive services.

101.2.5 Preventive Health

Refer to Chapter 30, Preventive Health Education, for specifics regarding benefits and limitations. Services are **limited** to the billing of the following two procedure codes:

Procedure Code	***Description***
S9445	Prenatal Education – Limited to pregnant female recipients. Limited to diagnosis codes V220 - V222 for ICD-9 and Z34.00, Z34.80, or Z33.1 for ICD-10.
99412	Adolescent Pregnancy Prevention Education – Limited to recipients ages 10-20. Limited to diagnosis code V2509 for ICD-9 and Z30.09 for ICD-10.

101.2.6 Environmental Lead Investigators

A qualified investigator must have graduated from a four-year college or university with a minimum of 30 semester hours or 45 quarter hours of continued coursework in biology, chemistry, environmental science, mathematics, physical science, or a minimum of at least five years of permanent employment in an environmental health field. Any person

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

employed must have successfully completed the training program for environmentalists conducted by the Alabama Department of Public Health before being certified by the Alabama Department of Public Health.

Environmental Lead Investigations are billable as a unit of service. A unit of service is the investigation of the home or primary residence of an EPSDT-eligible child who has an elevated blood lead level. Testing of substances that must be sent off-site for analysis, or any non-medical activities such as removal or abatement of lead sources, or relocation efforts, are not billable as part of an Environmental Lead Investigation.

Please refer to Appendix A, EPSDT, for further information regarding lead levels and children.

101.2.7 Adult Immunizations

County health departments that provide immunizations to Medicaid-eligible recipients who are 19 years old and older must submit a claim for the appropriate HCPCS code. Vaccines are reimbursable on a fee-for-service basis. The administration fee is included in the price of the vaccine. Do not bill a separate procedure code for administration of the vaccine.

County health departments may bill only for the vaccine administration fee if the vaccine is provided at no cost to the provider from federal resources.

Refer to Appendix H, Alabama Medicaid Injectable Drug List, for procedure codes.

101.2.8 Home Health

County health departments providing home health care services should refer to Section 17.2, Benefits and Limitations, for specifics regarding home health benefits and limitations.

101.2.9 Hospice

County health departments providing hospice care services should refer to Section 18.2, Benefits and Limitations, for specifics regarding hospice benefits and limitations.

Refer to Section 18.5.3, Procedure Codes, Revenue Codes and Modifiers, for hospice procedure codes.

101.2.10 Physicians/Practitioners

Physicians and practitioners practicing within a county health department should refer to Section 28.2, Benefits and Limitations, for specifics regarding physician benefits and limitations.

Physicians have a NPI for each health department clinic/clinic type for which they provide services. Billable charges depend on the clinic, for example, Prenatal, EPSDT screening clinic, Family Planning, etc.

101.2.11 *Vaccines for Children (VFC)*

The Vaccines for Children (VFC) program offers free vaccines to qualified health care providers for children 18 years of age and under who are Medicaid eligible, American Indian or Alaskan Native, uninsured, or under-

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

insured. The Alabama Department of Public Health (1(800) 469-4599) administers this program.

Refer to Appendix A, EPSDT, for information about the VFC program.

101.3 Prior Authorization and Referral Requirements

County health department procedure codes generally do not require prior authorization. Any service provided outside of these codes must have prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

When filing claims for recipients enrolled in the Alabama Coordinated Health Network (ACHN) Program, refer to Chapter 40, to determine whether your services require a referral from the Primary Care Physician (PCP).

101.4 Cost Sharing (Copayment)

The copayment amount for office visit* including crossovers is:

$3.90 for procedure codes reimbursed $50.01 and greater
$2.60 for procedure codes reimbursed between $25.01 and $50.00
$1.30 for procedure codes reimbursed between $10.01 and $25.00

* The following CPT codes are considered office visits and the copayment is based on Medicaid's allowed amount (fee schedule) for each procedure:

90847, 90849, 90853, 90865, 92002, 92004, 92012, 92014, 99201, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99241, 99242, 99243, 99244, 99245, 99281, 99282, 99283, 99284, 99285, 99341, 99342, 99343, 99344, 99345, 99347, 99348, 99349, 99350

If one of these CPT codes is applicable for your practice, then copay applies.

Copayment does not apply to services provided for pregnant women, nursing facility residents, recipients less than 18 years of age, emergencies, and family planning. Native American Indians that present an "active user letter" issued by Indian Health Services (IHS) will be exempt from the Medicaid required copayment.

The provider may not deny services to any eligible Medicaid recipient because of the recipient's inability to pay the cost-sharing (copayment) amount imposed.

101.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claims processing turnaround
- Ability to immediately correct claim errors
- Online adjustments capability

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Enhanced access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When an attachment is required, a hard copy CMS-1500 claim form must be submitted.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

101.5.1 Time Limit for Filing Claims

Medicaid requires all claims for county health departments to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

101.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals are updated annually, and providers should use the current version. The ICD-9-CM manual may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

101.5.3 Procedure Codes and Modifiers

Medicaid uses the Healthcare Common Procedure Coding System (HCPCS). HCPCS is composed of the following:

- American Medical Association's Current Procedural Terminology (CPT)
- Nationally assigned codes developed for Medicare
- Locally assigned codes issued by Medicaid. Effective for dates of service on or after 01/01/2004, use national codes.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The CPT manual lists most procedure codes required by Medicaid. This manual may be obtained by contacting the Order Department, American Medical Association, 515 North State Street, Chicago, IL 60610-9986. The (837) Professional, Institutional, and Dental electronic claims and the paper claim have been modified to accept up to four Procedure Code Modifiers.

101.5.4 Place of Service Codes

The following place of service codes apply when filing claims for health department services:

POS Code	*Description*
11	Office
12	Home
34	Hospice
71	State or Local Public Health Clinic
81	Independent Laboratory

101.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

Refer to Section 5.8, Required Attachments, for more information on attachments.

101.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

102

102 Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID)

An Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF-IID) is an institution that primarily provides the diagnosis, treatment or rehabilitation of individuals with Intellectual Disabilities or persons with related conditions. ICF-IIDs provides a protected residential setting, ongoing evaluations, planning, 24-hour supervision, and coordination and integration of health or rehabilitative services to help each individual function at their greatest ability.

The policy provisions for ICF-IID facilities can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 10.

102.1 Enrollment

Gainwell enrolls ICF-IID facilities and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code* and the *Alabama Medicaid Provider Manual.*

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as an ICF-IID provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. The appropriate provider specialty code is assigned to enable the provider to submit requests and receive reimbursements for ICF-IID related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

ICF-IID facilities are assigned a provider type of 3 (Intermediate Care Facility for Individuals with Intellectual Disabilities). The valid specialty for ICF-IID facilities is Intermediate Care Facility (030).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Enrollment Policy for ICF-IID Facilities

To participate in the Alabama Medicaid Program, ICF-IID facilities must meet the following requirements:

- Possess certification through the Department of Public Health for Medicare Title XVIII and Medicaid XIX
- Submit a letter to the Long Term Care Division requesting enrollment
- Submit a budget to the Provider Audit Division for the purpose of establishing a per diem rate
- Execute a Provider Agreement and a Nursing Facility/Patient Agreement with Medicaid

The Provider Agreement presents in detail the requirements imposed on each party to the agreement.

Change of Ownership (CHOW) and Closures

Medicaid will mirror Medicare's Change of Ownership (CHOW) policy. Refer to Chapter 19, Hospital for additional information on Change of Ownership.

102.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Providers should refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

ICF-IID must be administered in a manner that enables them to use their resources effectively and efficiently to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident.

102.2.1 Therapeutic Visits

Payments to ICF-IID facilities for therapeutic visits are limited to 14 days per calendar month.

Medicaid will track the use of therapeutic leave through the claims processing system.

An ICF-IID must provide written notice to the resident and a family member or legal representative of the resident specifying the Medicaid policy upon a resident taking therapeutic leave and at the time of transfer of a resident to a hospital.

An ICF-IID must establish and follow a written policy under which a resident who has been hospitalized or who exceeds therapeutic leave policy is readmitted to the facility.

102.2.2 Review of Medicaid Residents

The Alabama Medicaid Agency or its designated agent will perform a retrospective review of ICF/IID facility records to determine appropriateness of admission on a monthly basis.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

102.2.3 Utilization Review

The Utilization Review function in the ICF-IID facilities is a facility-based review and will be performed by Medicaid or its designee every six months.

The facility staff must provide necessary administrative support to the review team during the review.

102.2.3 Resident Medical Evaluation

The admitting and attending physician must certify the necessity for admission of a resident to an intermediate care facility and make a comprehensive medical evaluation. The facility maintains this evaluation as part of the resident's permanent record.

Each Medicaid resident in an intermediate care facility must have a written medical plan of care established by his physician. The plan of care must be periodically reviewed and evaluated by the physician and other personnel involved in the individual's care.

102.2.4 Periods of Entitlement

The earliest date of entitlement for Medicaid is the first day of the month of application for assistance when the applicant meets all requirements for medical and financial eligibility.

102.3 ICF-IID Applications

The medical determination for admission or continued care in an ICF-IID is made by the facility designated Qualified Intellectual Disabilities Professional (QIDP).

The facility must maintain the following documents for the retrospective review:

- A fully completed written application form 361 (Formerly XIX-LTC-18)
- The resident's physical history
- The resident's psychological history
- The resident's interim rehabilitation plan
- A social evaluation of the resident

Before the ICF-IID may admit an individual, it must determine that his or her needs can be met. The interdisciplinary professional team must do the following:

- Conduct a comprehensive evaluation of the individual, covering physical, emotional, social and cognitive factors.
- Define the individual's need for service without regard to the availability of these services.
- Review all available and applicable programs of care, treatment, and training and record its findings.

If the ICF-IID determines that admission is not the best plan but that the individual must be admitted, it must clearly acknowledge that admission is inappropriate and actively explore alternatives for the individual. An otherwise

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

eligible recipient or the recipient's sponsor cannot be billed when the ICF-IID fails to submit all forms in a timely manner.

102.4 Cost Sharing (Copayment)

Copayment does not apply to services provided by ICF-IID facilities.

102.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claims processing turnaround
- Ability to immediately correct claim errors
- Online adjustments capability
- Enhanced access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When an attachment is required, a hard copy UB-04 claim form must be submitted.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims for general claims filing information and instructions.

102.5.1 Time Limit for Filing Claims

Medicaid requires all claims for ICF-IID facilities to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

102.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision -Clinical Modification (ICD-10-CM)* manual lists required diagnosis codes. These manuals may be obtained by contacting the
American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

102.5.3 Covered Revenue Codes

Claims for ICF-IID facilities are limited to the following revenue codes:

Code	*Description*
101	All inclusive room & board
184	Leave of Absence/ICF/IID

102.5.4 Place of Service Codes

Place of service codes do not apply when filing the UB-04 claim form.

102.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to Claims with Third Party Denials.

Refer to Chapter 5, Section 5.8, Required Attachments, for more information on attachments.

102.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

103

103 Local Education Agencies (LEAs)

Federal law has made it possible for state education agencies to finance health-related education services through Medicaid and private insurance companies. Medicaid works with the State Department of Education, Special Education Services (SES), and the Local Education Agencies (LEAs) throughout the state to reimburse for these services.

Background Information

In 1975, the Individuals with Disabilities Education Act, formerly the Education for All Handicapped Children Act (P.L. 94-142) was signed into law, guaranteeing every child the right to a free, appropriate public education (FAPE) and related services in the least restrictive environment possible. Section 300.301 (a) (b) of the 34 Code of Federal Regulations states the following:

- Each State may use whatever state; local, federal, and private sources of support are available in the State to meet the requirements of this part. For example, when it is necessary to place a handicapped child in a residential facility, a State could use joint agreements between agencies involved for sharing the cost of that placement.
- Nothing in this part relieves an insurer or similar third party from an otherwise valid obligation to provide or to pay for services provided to a handicapped child.

In 1986, a General Accounting Office report recommended that Medicaid law be amended to allow Medicaid to pay for related services they typically would have covered if P.L. 94-142 were not in effect (GAO HRD 86-62BR). Congress acted on this recommendation through the Medicare Catastrophic Coverage Act (P.L. 100-360), which was signed into law on July 1, 1988.

A provision of P.L. 100-360 amended Section 1903 of the Social Security Act specifying that Medicaid was not restricted from covering services furnished to a child with disability simply because the services are included in the child's Individualized Education Program (IEP) or Individualized Family Service Plan (IFSP). Congress further clarified that federal Medicaid matching funds are available for the cost of health services that are furnished to a child with disabilities, even though the services are included in the child's IEP or IFSP.

Regulations implementing the Individuals with Disabilities Education Act of 2004 require that school districts secure parental permission prior to billing Medicaid for services provided by the school districts. The regulation can be found at 34CFR 300.154(d).

In summary, Congress has established that while State education agencies are financially responsible for educational services, in the case of a Medicaid-eligible child, State Medicaid agencies remain responsible for the "related services" identified in a child's IEP if the services are covered under the State's Medicaid plan.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

In November 1989, the Omnibus Budget Reconciliation Act of 1989 (OBRA '89) was passed requiring Medicaid to cover all medically necessary services allowed under Section 1905(a) to "correct and ameliorate defects and physical and mental illnesses and conditions discovered by the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) screening, regardless of whether these services are included in the Medicaid State Plan." This act provides a mechanism for the local education agencies, through their professional staff, to bill Medicaid for health-related services that meet Medicaid's criteria for reimbursement.

Participation

Effective 04/01/12, the scope of services that can be reimbursed through the LEA was expanded. The LEA will need to have qualified subcontractors or employees in place to perform direct services. Refer to Section 103.5 for details on covered services. As explained in Section 103.5, the Cost Report is the mechanism that will be used to determine LEA interim payments and annual cost settlement amounts. However, LEAs may elect to continue to submit electronic claims through the MMIS vendor for additional documentation purposes. Reimbursement rates through the MMIS system have been set to zero to enable payments to be processed through the quarterly Cost Report and annual settlement process. If an LEA elects to submit claims through the MMIS vendor for documentation purposes, they will need to enroll as a Medicaid Provider. Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

The LEA must verify that no practitioner providing service has been terminated, suspended, or barred from the Medicaid or Medicare Program. The lists of terminated, suspended and barred practitioners are available on Medicaid's website at www.medicaid.alabama.gov.

LEA National Provider Identifier

A provider who contracts with Alabama Medicaid as an LEA is added to the Medicaid system with the National Provider Identifiers (NPI) provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for LEA-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

The qualifications for direct service providers are delineated in the scope of services. It is the responsibility of the LEA to ensure that direct service providers meet these qualifications. RNs, LPNs and School nurses must practice within the scope of the Standards of Nursing Practice as defined in Rule 610-X-6. Other practitioners must meet their own licensing requirements and practice within the scope of those licenses or credentials.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

103.1 Records and Samples

Providers of service are required to keep the following records and, upon request, furnish these records to authorized State representatives of the Alabama Medicaid Agency, the Department of Health and Human Services, the State Examiners of Public Accounts, the State Attorney General, the Comptroller General, the General Accounting Office, and the State Department of Education:

- A copy of the original and all updates of the Individualized Education Program (IEP), including parental signature. The IEP should be updated yearly.
- Description of specific professional services and activities provided with the date, the duration of services and activities rendered, and the name and title of the professional providing services and activities
- Dated updates/progress notes describing the student's progress, or lack thereof, signed or initialed by the professional providing services and activities
- The School's Official Attendance Record
- Discharge notes from services completed/treatment summary
- Description of the provider's activity during sampled time study moments

All records shall be completed promptly, filed, and retained for a minimum of five years from the date of services or until all audit questions, appeal hearings, investigations, or court cases are resolved, whichever is longer.

NOTE:

Failure to furnish records upon request may result in recoupment of funds paid.

103.1.1 Progress Notes

Medicaid highly recommends that therapists follow the SOAP method for recording appropriate documentation. The letters SOAP outline the four parts of documentation:

Subjective comment
Objective or goal
Assessment
Plan: Continue, Add, or Delete

An example of a progress note developed using the SOAP method would be:

Date *Student progressing in all areas. Auditory discrimination tasks are improving (50 to 70%). Single word level production for new goals continues to be difficult. Continue present plan.*
Signature of Therapist

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

After the initial date of treatment, it is recommended that the therapist also SOAP all additional visits.

Date	*Showed marked improvement aud-dis (l) and blends; otherwise about the same. Encouraged to continue notebook. Continue present plan.* *Signature of Therapist*

NOTE:

Progress notes must be written after each service. Each progress note must be dated and signed or initialed. Electronic signatures on electronic medical records are acceptable.

103.1.2 Recipient Signature Requirement

Medicaid recognizes that the parents do not take their children to school each day; therefore, it would be impossible to obtain a parental signature for each date of service. To meet Medicaid's recipient signature requirement, the LEA must have the following:

- An IEP signed by the parent or responsible guardian that indicates the services the student will receive (for example, speech therapy three times a week for nine months)
- An attendance record that reflects the student was in attendance for the date of service

103.2 Prior Authorization and Referral Requirements

Services provided through an LEA do not require EPSDT, prior authorization or Alabama Coordinated Health Network (ACHN) referral.

103.3 Cost Sharing (Copayment)

Copayment does not apply to services provided through LEA providers.

103.4 New Cost Report Reimbursement Methodology

As approved by the Centers for Medicare and Medicaid Services (CMS) in August 2013 and effective as of April 1, 2012, the Alabama Medicaid Agency will begin calculating Medicaid reimbursement for direct medical services, through a Cost Report mechanism, for all Local Education Agencies. The Cost Report program is a cost-based, provider-specific methodology. LEAs complete a quarterly cost report with an annual Cost Settlement.

The reimbursement process for the direct medical services is comprised of the following parts:

- LEAs identify direct service providers on a quarterly basis (Participant List)
- LEAs participate in a Random Moment Time Study on a quarterly basis

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- LEAs complete a quarterly Cost Report
- Annual cost reconciliation and cost settlement is completed

103.5 FFS Interim Billing Process

The Cost Report is the mechanism that will be used to determine LEA interim payments and annual cost settlement amounts. However, LEAs may elect to continue to submit electronic claims through the MMIS vendor for additional documentation purposes. Reimbursement rates through the MMIS system have been set to zero to enable payments to be processed through the quarterly Cost Report and annual settlement process.

Refer to Appendix B, Electronic Media Claims Guidelines, for information.

103.5.1 Performing and Billing National Provider Identifiers

BILLING: In block 33 of the CMS-1500 claim form, enter the billing provider NPI and the billing provider's name.

PERFORMING: In block 24J of the CMS-1500 claim form, enter the School District's individual NPI.

The 10-digit NPI reflects services provided, per school district. A separate NPI will not be needed for each specialty that is providing services at each school district.

103.5.2 Place of Service

Claims should be filed with Place of Service (POS) Code 11 – office.

103.5.3 Time Limit for Filing Claims

Medicaid requires all claims for local education agencies to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

103.5.4 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335. The diagnosis code must come from the direct provider of service unless a diagnosis code is listed.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

103.5.5 Required Claim Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

Refer to Section 5.7, Required Attachments, for more information on attachments.

103.6 Covered Services

Covered services are face-to-face health related services provided to a student, group of students, or parent/guardian on behalf of the student. Covered services are listed in the Alabama State Plan of Medical Assistance and are medically necessary for the development of the IEP or fully documented in the IEP. An IEP must be completed in order for services to be billed. Covered services are:

- Audiology Services
- Counseling Services
- Occupational Therapy
- Physical Therapy
- Personal Care Services
- Speech/Language Services
- Nursing Services
- Transportation Services

The CPT manual lists most required procedure codes. Certain CPT codes must be billed with the SE modifier as indicated. The services in this section may be covered by Medicaid when provided by an authorized provider according to an IEP. **Annual limitations are based on calendar year.**

The following paragraphs provide a detailed list of covered services, grouped by service.

103.6.1 Audiology Services

Service Description: Audiology services or documented in the IEP includes, but is not limited to evaluations, tests, tasks and interviews to identify hearing loss in a student whose auditory sensitivity and acuity are so deficient as to interfere with normal functioning.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Professional Qualifications:

Audiology services must be provided by:

- A qualified audiologist who meets the requirements of, and in accordance with, 42 CFR §440.110(c), and other applicable state and federal law or regulation;

- A licensed/certified audiology assistant when the services are provided in a school setting and when these providers are acting under the supervision or direction of a qualified Audiologist in accordance with 42 CFR §440.110 and other applicable state or federal law.

Procedure Codes:

Procedure Code/ Modifier	*Description*	*Daily Limits*	*Annual Limits*
92551 SE	Screening test, pure tone, air only	1	12
92552 SE	Pure tone audiometry (threshold); air only	1	12
92553 SE	Pure tone audiometry (threshold); air and bone	1	12
92555 SE	Speech audiometry threshold	1	12
92556 SE	Speech audiometry threshold with speech recognition	1	12
92567 SE	Tympanometry (impedance testing)	1	12
92592 SE	Hearing aid check; monaural	1	12
92593 SE	Hearing aid check; binaural	1	12

103.6.2 Counseling Services

Counseling services are available to Medicaid-eligible recipients under the age of 21 years, who are eligible for Early and Periodic Screening, Diagnosis, and Treatment (EPSDT), and for whom the services are medically necessary. Medically necessary EPSDT services are health care, diagnostic services, treatment, and other measures described in section 1905(a) of Title XIX of the Social Security Act and, 42 CFR 440.130, that are necessary to correct or ameliorate any defects and physical and mental illnesses and conditions. These services are intended for the exclusive benefit of the Medicaid eligible child, documented in the IEP, and include but are not limited to:

1. Services may include testing and/or clinical observations as appropriate for chronological or developmental age. Such services are provided to:

    a. Assist the child and/or parents in understanding the nature of the child's disability;
    b. Assist the child and/or parents in understanding the special needs of the child;
    c. Assist the child and/or parents in understanding the child's development

2. Health and behavior interventions to identify the psychological, behavioral, emotional, cognitive, and social factors important to the prevention, treatment, or management of physical health problems. Qualified professionals may incorporate the following examples as a form of service. These examples are also recognized by the American Psychological Association as a therapeutic form of service. Qualified

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

providers can determine the type of modalities that can be utilized based on the condition and treatment requirements of each individual and are not limited to these examples.

a. Cognitive Behavior Modification- This is a therapeutic approach that combines the cognitive emphasis on the role of thoughts and attitudes influencing motivations and response with the behavioral emphasis on changing performance through modification of reinforcement contingencies.
b. Rational-emotive therapy- A comprehensive system of personality change based on changing irrational beliefs that cause undesirable, highly charged emotional reactions such as severe anxiety.

c. Psychotherapy- Any of a group of therapies, used to treat psychological disorders, that focus on changing faulty behaviors, thoughts, perceptions, and emotions that may be associated with specific disorder. Examples include. individual interactive psychotherapy using play equipment, physical devices, language interpreter or other mechanisms of non-verbal communication, family therapy and sensory integrative therapy.

3. Assessing needs for specific counseling services.

Professional Qualifications:
Counseling services may be provided by:

- Licensed Psychologist;
- Licensed Psychological Associate;
- Licensed Certified Social Worker;
- Licensed Marriage and Family Therapist;
- Licensed Professional Counselor;
- Licensed Psychiatrist
- Registered nurse who has completed a master's degree in psychiatric nursing;
- Licensed School Psychologist when the services are provided in a school setting; or
- Licensed Specialist in School Psychology when the services are provided in a school setting.

Procedure Code/ Modifier	***Description***
96152 UB	Health and behavior intervention, each 15 minutes, face-to-face; individual
96153 UB	Intervention – group (per person)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

103.6.3 Occupational Therapy

Service Description: Occupational Therapy services, for the development of the students IEP or documented in the IEP include, but are not limited to:

1. Evaluation of problems which interfere with the student's functional performance
2. Implementation of a therapy program or purposeful activities which are rehabilitative, active or restorative as prescribed by a licensed physician,

   These activities are designed to:

   a) improve, develop or restore functions impaired or lost through illness, injury or deprivation,

   b) improve ability to perform tasks for independent functioning when functioning is impaired or lost,

   c) prevent, through early intervention, initial or further impairment or loss of function,

   d) correct or compensate for a medical problem interfering with age appropriate functional performance.

Professional Qualifications:

- Must be licensed by the Alabama State Board of Occupational Therapy and meet the requirements of, and in accordance with, 42 CFR §440.110(b);

- Occupational therapy assistants may assist in the practice of occupational therapy only under the supervision of an OT. Occupational therapy assistants must have an Associate of Arts degree and must be licensed by the Alabama State Board of Occupational Therapy. Supervision of certified OT assistants must include one-to-one on-site supervision at least every sixth (6th) visit. Each supervisory visit must be documented and signed by the OT making the visit.

All services must be performed within the scope of services as defined by the licensing board.

Procedure Codes:

Medicaid **does not** cover group occupational therapy. Covered occupational therapy services do not include recreational and leisure activities such as movies, bowling, or skating. Use the following procedure codes for services prescribed by a physician and provided by a qualified occupational therapist:

Procedure Code/ Modifier	*Description*	*Daily Limits*	*Annual Limit*
97003 SE	Occupational therapy evaluation	1	1
97004 SE	Occupational therapy re-evaluation	1	1
97110 SE	Therapeutic procedure, one or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility*	4	96

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

*If additional services are needed, provider of service must use modifier 22. Medicaid monitors the use of this modifier. Documentation in medical record must support use of modifier 22 by reflecting continued improvement of condition for which therapy is ordered.

103.6.4 Physical Therapy

Service Description: Physical Therapy services, necessary for the development of the student's IEP or documented in the IEP include, but are not limited to:

1. Evaluations and diagnostic services
2. Therapy services which are rehabilitative, active, restorative. These services are designed to correct or compensate for a medical problem and are directed toward the prevention or minimization of a disability, and may include:
    a. developing, improving or restoring motor function
    b. controlling postural deviations
    c. providing gait training and using assistive devices for physical mobility and dexterity
    d. maintaining maximal performance within a student's capabilities through the use of therapeutic exercises and procedures.

Professional Qualifications: Must be licensed by the Alabama Board of Physical Therapy. Physical therapy assistants may provide services only under the supervision of a qualified physical therapist. PT assistants must be licensed by the Alabama Board of Physical Therapy. Supervision of licensed PT assistants must include one-to-one on-site supervision at least every sixth (6^{th}) visit. Each supervisory visit must be documented and signed by the PT.

All services must be performed within the scope of services as defined by the licensing board.

Procedure Codes:

Use the following procedure codes for services prescribed by a physician and provided by a qualified physical therapist. Physical therapy is not covered for groups. Physical therapy services may not be span billed.

Procedure Code/Modifier	***Description***	***Daily Limits***	***Annual Limit***
97001 SE	Physical therapy evaluation	1	1
97002 SE	Physical therapy re-evaluation	1	1
97110 SE	Therapeutic procedure, one or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility*	4	96

*If additional services are needed, provider of service must use modifier 22. Medicaid monitors the use of this modifier. Documentation in medical record must support use of modifier 22 by reflecting continued improvement of condition for which therapy is ordered.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

103.6.5 Personal Care Services

Service Description: EPSDT services are health care, diagnostic services, treatments, and other measures necessary to correct or ameliorate defects and physical and mental illnesses and conditions.

Personal care services are support services furnished to a client who has physical, cognitive, or behavioral limitations related to the client's disability or chronic health condition that limit the client's ability to accomplish activities of daily living ADLs), instrumental activities of daily living (IADLs), or health-related functions. Personal care services provided to students on specialized transportation vehicles are covered under this benefit. Services must be authorized by a physician in accordance with a plan of treatment or (at the State's option) in accordance with a service plan approved by the State. Personal care services may be provided in an individual or group setting, and must be documented in the IEP/IFSP.

Individuals providing personal care services must be a qualified provider in accordance with 42 CFR *5* 440.167, who is 18 years or older, has a high school diploma or GED, and has been trained to provide the personal care-services required by the client. Training is defined as observing a trained employee on a minimum of three patients and verbalization of understanding the personal care service. When competence cannot be demonstrated through education and experience, individuals must perform the personal assistance tasks under supervision.

Personal care services will not be reimbursed when delivered by someone who is a legally responsible relative or guardian. Service providers include: individual attendants, attendants employed by agencies that meet the state requirements. Special education teachers and special education teacher's aides can qualify as personal care worker. They must demonstrate the services they are providing meet the personal care service definition that the personal care service is documented in the IEP, and their services are to assist the student is accomplishing ADL and IADL and not activities that support education or instruction.

Procedure Code/ Modifier	***Description***	***Unit of Service***
T1019 U5	Individual, school	15 minutes
T1019 U5 & UD	Group, school	15 minutes
T1019 U6	Individual, bus	Per one-way trip
T1019 U6 & UD	Group, bus	Per one-way trip

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). 103.6.6 Speech/Language Services

Service Description: Speech/language therapy services necessary for the development of the student's IEP or documented in the student's IEP include, but are not limited to:

1. Diagnostic services
2. Screening and assessment
3. Preventive services
4. Corrective services

Speech therapy services may be provided in an individual, group or family setting. The number of participants in the group should be limited to assure effective delivery of service.

Professional Qualifications:

Speech and language services must be provided by:

- A qualified speech/language pathologist (SLP) who meets the requirements of, and in accordance with, 42 CFR §440.110(c), and other applicable state and federal law or regulation;
- American Speech-Language-Hearing Association (ASHA) certified SLP with Alabama license and ASHA-equivalent SLP (i.e., SLP with master's degree and Alabama license) when the services are provided in a school setting; or
- A provider with a state education agency certification in speech language pathology or a licensed SLP intern when the services are provided in a school setting and when these providers are acting under the supervision or direction of a qualified SLP in accordance with 42 CFR §440.110 and other applicable state or federal law

All services must be performed within the scope of services as defined by the licensing board.

Procedure Codes:

Use the following procedure codes for services provided by a qualified speech pathologist for individuals with speech disorders. Speech therapy services may not be span-billed.

Procedure Code/ Modifier	***Description***	***Daily Limits***	***Annual Limits***
92506 SE	Evaluation of speech, language, voice, communication, and/or auditory processing	1	4
92507 SE	Treatment of speech, language, voice, communication, and/or auditory processing disorder; individual	1	300
92508 SE	Treatment of speech, language, voice, communication, and/or auditory processing disorder; group 2 or more individuals	1	300

All rights reserved. Applicable FARS/DFARS apply.

103.6.7 Nursing Services

Service Description: Nursing services outlined in this section of the state plan are available to Medicaid eligible recipients under the age of 21 years, who are eligible for Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) services and for whom the service is medically necessary, and these services must be documented in the IEP/IFSP.

Nursing services are defined as the promotion of health, prevention of illness, and the care of ill, disabled and dying people through the provision of services essential to the restoration of health.

Professional Qualifications:

The Registered Nurse and Licensed Practical Nurse shall be licensed by the State of Alabama to provide the services and practice within the scope as outlined by the Alabama Board of Nursing. Nursing services must be provided by a qualified nurse who meets qualification requirements of, and in accordance with, 42 CFR 440.60 and, on a restorative basis, under 42 CFR 440.130(d), including services delegated in accordance with the Alabama Board of Nursing to individuals who have received appropriate training from an RN , including nursing services delivered by advanced practice nurses (APNs) including nurse practitioners (NPs) and clinical nurse specialists (CNSs), registered nurses (RNs), licensed practical nurses (LPNs) and licensed vocational nurses (LVNs).

Procedure Code/ Modifier	***Description***	***Unit of Service***
T1002 TD	RN services up to 15 minutes/Individual	15 minutes
T1002 TD & UD	RN services up to 15 minutes /Group	15 minutes
T1502 TD	Medication admin visit/RN	Medication administration, per visit
T1002 U7	RN services up to 15 minutes /Delegation, Individual	15 minutes
T1002 U7 & UD	RN services up to 15 minutes /Delegation, Group	15 minutes
T1502 U7	Medication admin visit	Delegation, medication administration, per visit
T1003 TE	LPN/LVN services up to 15min/individual	15 minutes
T1003 TE & UD	LPN/LVN services up to 15min /Group	15 minutes
T1502 TE	Medication admin visit/LPN or LVN	Medication, administration per visit

103.6.8 Transportation

Service Description: Specialized transportation services include transportation to receive Medicaid approved school health services. This service is limited to transportation of covered, authorized services in an IEP or IFSP.

1) The special transportation is Medicaid reimbursable if:

   a. It is provided to a Medicaid eligible EPSDT child who is a student in a public school in Alabama;
   b. It is being provided on a day when the child receives a prior authorized covered service;
   c. The student's need for specialized transportation services is documented in the child's plan of care, IEP or IFSP; and
   d. The driver has a valid driver's license

2) Specialized transportation services are defined as transportation that requires a specially equipped vehicle, or the use of specialized equipment to ensure a child is taken to and from the child's residence to school or to a community provider's office for prior authorized related services:

   a. Medical Services provided in School: Transportation provided by or under contract with the school, to and from the students place of residence, to the school where the student receives one of the health related services covered by Title XIX;
   b. Medical Service provided off- site: Transportation provided by or under contract with the school from the students place of residence to the office of a medical provider who has a contract with the school to provide one of the health related services covered by the Title XIX;

      i. Transportation from school to the offsite service and back to school is reimbursable. No home to school transportation is reimbursed when the ride is from school to the medical service and back to school.
      ii. Transportation from school to the offsite medical service and to home is reimbursable if the offsite medical appointment takes place and it is not feasible to return to school in time for child to be transported back home.

3) Specialized transportation services will not be Medicaid reimbursable if the child does not receive a Medicaid covered service on the same day. When claiming these costs as direct services, each school district is responsible for maintaining written documentation, such as a trip log, for individual trips provided. No payment will be made to, or for parents providing transportation.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

4) In cases where Personal Care Services are provided as part of the Specialized Transportation Service for a student, the cost of this service is covered under the Personal Care Services benefit described in Section 103.6.5; provided that the personal care service provider meets the qualifications defined in this section.

Procedure Code/ Modifier	***Description***	***Unit of Service***
T2003 U5	Non-emergency transportation; encounter/trip	Per one-way trip

The recommended maximum billable units for procedure code T2003 is a total of four one-way trips per day.

104

104 Psychiatric Hospital (Recipients 65 & Over)

For purposes of this chapter, an inpatient is a person, age 65 or over, who has been admitted to a free-standing psychiatric facility specializing in the diagnosis, treatment, and care of geriatric patients, for the purpose of maintaining or restoring them to the greatest possible degree of health and independent functioning.

The policy provisions for psychiatric hospitals can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 5.

104.1 Enrollment

Gainwell enrolls psychiatric hospital providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a psychiatric hospital is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for psychiatric-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

Psychiatric hospitals are assigned a provider type of 01 (Hospital). The valid specialty for psychiatric hospitals is Inpatient Psychiatric Hospital Over 65 (011).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Enrollment Policy for Psychiatric Hospital Providers

To participate in the Alabama Medicaid Program, psychiatric hospital providers must meet the following requirements:

- Receive certification for participation in the Medicaid/Medicare program
- Possess a license as a free-standing acute geriatric psychiatric hospital by the state of Alabama in accordance with current rules contained in the *Rules of Alabama State Board of Health Division of Licensure and Certification,* Chapter 420-5-7. State hospitals that do not require licensing as per state law are exempt from this provision.
- Be accredited by the Joint Commission on Accreditation of Healthcare Organizations
- Specialize in the care and treatment of geriatric patients with serious mental illness
- Have on staff at least one full-time board certified geriatric psychiatrist/geriatrician; or a full-time board certified adult psychiatrist with a minimum of 3 years' experience caring for geriatric patients 65 or older.
- Employ only staff who meet training certification standards in the area of adult psychiatry as defined by the State's mental health authority
- Be recognized as a teaching hospital affiliated with at least one four-year institution of higher education that employs a multi-disciplinary approach to the care and treatment of geriatric patients with serious mental illness
- Provide outpatient and community liaison services throughout the state of Alabama directly or through contract with qualified providers
- Submit a written description of an acceptable utilization review plan currently in effect
- Submit a budget of cost for its inpatient services for its initial cost reporting period, if a new provider
- Exist under the jurisdiction of the State's mental health authority

It is the facility's responsibility to ensure compliance with all federal and state regulations and to ensure that all required documentation is included in the recipient's record. Failure to comply will result in denial of payment and possible recoupment of reimbursements made previously.

Change of Ownership (CHOW) and Closures

Medicaid will mirror Medicare's Change of Ownership (CHOW) policy. Refer to Chapter 19, Hospital for additional information on Change of Ownership.

104.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

The number of days of care charged to a recipient of inpatient psychiatric service is always a unit of a full day. A day begins at midnight and ends 24

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

hours later. The midnight to midnight method is used in reporting days of care for the recipient, even if the facility uses a different definition of day for statistical or other purposes.

Medicaid reimbursement is available for the day of admission, but not the day of discharge.

Inpatient psychiatric services for recipients age 65 or over, are covered services when provided under the following circumstances:

- Psychiatric services are provided in a free-standing psychiatric hospital exclusively for the treatment of persons age 65 or over with serious mental illness.
- Psychiatric services are provided under the direction of a geriatric psychiatrist.
- The psychiatric facility providing services is enrolled as a Medicaid provider.
- The recipient is admitted to the psychiatric facility during the entire hospitalization.
- The recipient is age 65 years or older.

Inpatient psychiatric services for recipients age 65 and over are unlimited if medically necessary and the admission and/or the continued stay reviews meet the approved psychiatric criteria.

Therapeutic visits away from the psychiatric facility to home, relatives, or friends are authorized if certified by the attending physician as medically necessary in the treatment of the recipient. An admission to a general hospital does not count as a therapeutic visit.

- Therapeutic visits may be authorized up to 14 days per admission if certified by the attending physician as medically necessary in the treatment of the recipient. No part of the time spent on any therapeutic leave may be billed to Medicaid.
- Return to inpatient status from therapeutic visits exceeding 14 days per admission will be considered a readmission with the required certification of need for treatment documented in the patient's record.
- Therapeutic visit records will be reviewed retrospectively by the Quality Assurance Division at Medicaid. Providers who have received payments for therapeutic visits will have funds recouped.

NOTE:

A recipient may temporarily transfer to a nursing facility for a two-week trial period. This trial period is not a therapeutic visit. Refer to Chapter 26, Nursing Facility for additional information on admission to a nursing facility from an inpatient psychiatric hospital.

Certification of Need for Service

Certification of need for services is a determination that is made by a physician regarding the Medicaid recipient's treatment needs for admission to the facility.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The physician must certify for each applicant or recipient that inpatient services in a mental hospital are needed.

The certification must be made at the time of admission. No retroactive certifications will be accepted.

For individuals applying for Medicaid while in the hospital, the certification must be made before Medicaid can authorize payment.

The physician must complete the PSY-5 form, which is the certification of need for care. This form must be kept in the patient's record.

The PSY-6 form, which is the recertification of need for continued inpatient services, or acceptable equivalent approved by Medicaid, must be completed by a physician, a physician assistant, or a nurse practitioner acting under the supervision of a physician. The PSY-6 form or equivalent must be completed at least every 60 days after initial certification. This form must be kept in the patient's record.

The physician must complete an assessment note in the patient's record within 24 hours of a patient's return from any leave status.

Medical, Psychiatric, and Social Evaluation

Before admission to a psychiatric facility or before authorization for payment, the attending physician, psychiatrist, or staff physician must make a medical evaluation of each individual's need for care in the facility. Appropriate professional personnel must make a psychiatric and social evaluation.

Each medical evaluation must include:

- Diagnosis
- Summary of present medical findings
- Medical history
- Mental and physical functional capacity
- Prognosis
- A recommendation by the physician concerning admission to the psychiatric facility or continued care in the psychiatric facility, for individuals who apply for Medicaid while in the facility

Plan of Care

The attending physician or staff physician must establish a written plan of care for each individual before admission to a mental hospital and before authorization of payment.

The plan of care must include the following:

- Diagnosis, symptoms or complaints indicating a need for admission to inpatient care
- Description of the functional level of the patient
- Treatment objectives
- Orders for medications, treatments, therapies, activities, restorative/rehabilitative services, diet, social services, and special procedures needed for health and safety of the patient
- Continuing care plans that include post-discharge plans and coordination of inpatient services with partial discharge plans and related community

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

services to ensure continuity of care with the recipient's family and community service providers upon discharge

The attending or staff physician and other appropriate staff involved in the care of the recipient must review the plan of care at least every 90 days or when significant changes occur in patient functioning or acuity.

The plan of care is evaluated to ensure that the recipient receives treatment that maintains or will restore the patient to the greatest possible level of health and independent functioning.

A written report of the evaluations and the plan of care must be in the individual's record at the time of admission or immediately upon completion of the report if the individual is already in the facility.

Utilization Review (UR) Plan

As a condition of participation in the Alabama Medicaid program, each psychiatric facility must do the following:

- Have in effect a written UR Plan that provides for review of each recipient's need for services that the facility furnishes to the recipient.
- Maintain recipient information required for UR, which includes the certification of need for service and the plan of care.
- Provide a copy of the UR Plan and any subsequent revisions to Medicaid for review and approval.

Provider Preventable Conditions (PPCs)

Provider Preventable Conditions (PPCs) are clearly defined into two separate categories: Healthcare Acquired Conditions and Other Provider Preventable Conditions (OPPCs)

Healthcare Acquired Conditions include Hospital Acquired Conditions (HACs).

OPPCs include but are not limited to the following; surgery on a wrong body part, wrong surgery on a patient, surgery on a wrong patient.

Non- payment of PPCs shall not prevent access to services for Medicaid beneficiaries.

To be reportable, PPCs must meet the following criteria:

- The PPC must be reasonably preventable as determined by a root cause analysis or some other means.
- The PPC must be within the control of the provider.
- The PPC must be clearly and unambiguously the result of a preventable mistake made and hospital procedures not followed, and not an event that could otherwise occur.
- The PPC must result in significant harm. The OPPCs for consideration should be limited to those that yield a serious adverse result. Serious adverse result is defined as one that results in death, a serious disability or a substantial increase in the duration and/or complexity of care that is well beyond the norm for treatment of the presenting condition. A serious disability is defined as a major loss of

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

function that endures for more than 30 days, is not present at the time services were sought and is not related to the presenting condition.

- Any process for identifying non-payable events must actively incorporate some element of case-by-case review and determination. While the source and cause of some OPPCs may be clear, most would require further investigation and an internal root cause analysis to determine the cause of the serious preventable event and to assign ultimate accountability.

Pursuant to these guidelines, hospitals will not seek payments for additional days directly resulting from a PPC.

Reporting Other Provider-Preventable Conditions (OPPCs).

The following OPPCs must be reported to Medicaid by encrypted emailing of the required information to:

AdverseEvents@medicaid.alabama.gov. Each hospital will receive a password specifically for e-mail reporting. Reportable "OPPCs" include but are not limited to:

- Surgery on a wrong body part
- Wrong surgery on a patient
- Surgery on a wrong patient

Reports will require the following information: Recipient first and last name, date of birth, Medicaid number, date event occurred and event type.
A sample form is on the Alabama Medicaid Agency website at
http://medicaid.alabama.gov/content/4.0_Programs/4.4_Medical_Facilities/4.4.1_Hospital_Services/4.4.1.3_Adverse_Events.aspx
www.medicaid.alabama.gov although hospitals may submit their own form as long as it contains all required information.

NOTE:

***Reporting is required only when not filing a UB-04 claim.**

Reporting Hospital–Acquired Conditions (HAC) and Present on Admission (POA) on the UB-04 Claim Form

Psychiatric hospitals and Psychiatric Residential Treatment Facilities (PRTF's) should use the POA indicator on claims for these HACs as identified by Medicare other than Deep Vein Thrombosis (DVT)/Pulmonary Embolism (PE) following total knee replacement or hip replacement surgery in pediatric and obstetric patients. If no claim is submitted for the event or the event cannot be filed on a UB-04 claim form, then the Alabama Medicaid Agency is to be notified via encrypted e-mail at AdverseEvents@medicaid.alabama.gov. The following information will be required: Recipient first and last name, date of birth, Medicaid number, date of event occurrence and event type. A sample form can be found on the Alabama Medicaid Agency website or a hospital may submit their own form as long as it contains all of the required

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). Iatrogenic Pneumothorax with Venous Catheterization	512.1 (CC) And the following procedure code 38.93	J95.811 and one of the following procedure codes: 05HM33Z

For ICD-10, please use the CMS Diagnosis Listing for POA Exempt Diagnosis Codes at: https://www.cms.gov/Medicare/Coding/ICD10/index.html

Select the appropriate fiscal year ICD-10-CM POA Exempt file for the dates of service of the claim. These codes are for recipient encounters occurring between October 1st through September 30th of each fiscal year.

All Diagnosis codes NOT present in the listing require POA indicator.

The psychiatric hospital or PRTF may use documentation from the physician's qualifying diagnoses to identify POA which must be documented within 72 hours of the occurrence. Medicaid also recommends that the event be reported to Medicaid on the claim or via e-mail within 45 days of occurrence.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Non-payment of provider preventable conditions shall not prevent access to services for Medicaid beneficiaries.

No reduction in payment for a PPC will be imposed on a hospital provider when the condition defined as a PPC for a particular patient existed prior to the initiation of treatment for that patient by that provider.

Reductions in Provider payment may be limited to the extent that the following apply:

- The Identified PPC would otherwise result in an increase in payment.
- Psychiatric hospitals and PRTF's are paid based on a daily per diem rate. It is the responsibility of the hospital to identify any Health Care-Acquired Condition and not seek payment for any additional days that have lengthened a recipient's stay due to a PPC.

  In reducing the amount of days: Hospitals are to report a value code of '81' on the UB-04 claim form along with any non-covered days and the amount field must be greater than '0'.

It is the responsibility of the psychiatric hospital or PRTF to identify these events, report them, and not seek any additional payment for additional days. Medicaid will accept all POA indicators as listed below:

- **Y**-Yes. Diagnosis was present at time of inpatient admission.
- **N**-No. Diagnosis was not present at time of inpatient admission.
- **U**-No information in the record. Documentation insufficient to determine if the condition was present at the time of inpatient admission.
- **W**-Clinically undetermined. Provider unable to clinically determine whether the condition was present at the time of inpatient admission.

It is the psychiatric hospital or RTF's responsibility to include all supporting documentation with the chart for a review to be conducted by Medicaid's contracted Quality Improvement Organization (QIO). Submission of a root cause analysis is not required but may be submitted as part of the documentation to support billing.

A document with frequently asked questions has been posted on the Agency's website under Programs/Hospital Services.

Payment

Payment for inpatient services provided by psychiatric facilitates for individuals age 65 and older shall be the per diem rate established by Medicaid for the hospital. The per diem rate is based on the Medicaid cost report and all the requirements expressed in the *Alabama Medicaid Administrative Code,* Chapter 23. Ancillary charges (lab, x-ray, etc.) may not be billed in addition to the facility per diem rate.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Patient liabilities, if applicable, are deducted from the per diem. The hospital is responsible for collecting the liability amount from the patient and/or the patient's sponsor.

Providers are required to file a complete uniform Medicaid cost report for each fiscal year. Medicaid must receive two copies of this report within three months after the Medicaid year-end cost report.

Hospitals that terminate participation in the Medicaid program must provide a final cost report within 120 days of the date of termination of participation.

NOTE:

If a complete uniform cost report is not filed by the due date, the hospital shall be charged a penalty of $100 per day for each calendar day after the due date.

104.3 Inpatient Utilization Review

1. The determination of the level of care will be made by a licensed nurse of the hospital staff.
2. Five percent of all admissions and concurrent stay charts will be retrospectively reviewed by the Medicaid Agency or designee on a monthly basis.
3. For an individual who applies for Medicaid while in the facility, a Psychiatric Admission form must be signed by the attending physician at the time application for Medicaid is made.
4. The following information shall be included on the Psychiatric Admission Form:
   (a) Recipient information:
      1. Admitting diagnosis;
      2. Events leading to hospitalization;
      3. History of psychiatric treatment;
      4. Current medications;
      5. Physician orders;
      6. Presenting signs and symptoms.
   (b) Events leading to present hospitalization
   (c) History and physical
   (d) Mental and physical capacity
   (e) Summary of present medical findings including prognosis
   (f) Plan of care.

104.4 Continued Stay Reviews

The hospital's utilization review personnel are responsible for performing continued stay reviews on recipients who require continued inpatient hospitalization.

The initial continued stay review should be performed on the date assigned by Medicaid. Later reviews should be performed at least every 90 days from the initial CSR date assigned, provided the patient is approved for continued stay. Each continued stay review date assigned should be recorded in the patient's record.

If the facility's utilization review personnel determine that the patient does not meet the criteria for continued stay, the case should be referred to the

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

facility's psychiatric advisor. If the advisor finds that the continued stay is not needed, the hospital's utilization review procedure for denial of a continued stay should be followed.

If a final decision of denial is made, the hospital notifies the recipient and the attending physician within two days of the adverse determination. Medicaid should be notified in writing within 10 days after the denial is made.

The facility's utilization review personnel are responsible for notifying Medicaid whenever patients are placed on leave status or return from leave. A brief summary describing the outcome of the therapeutic leave should be addressed at this time for patients returning from any leave status.

104.5 Cost Sharing (Copayment)

The copayment amount for an inpatient admission (including crossovers) is $50.00 per admission. Copayment does not apply to services provided for pregnant women, nursing home residents, recipients less than 18 years of age, emergencies, or family planning. Native American Indians that present an “active user letter” issued by Indian Health Services (IHS) will be exempt from the Medicaid required copayment.

The provider may not deny services to any eligible Medicaid recipient because of the recipient’s inability to pay the cost-sharing (copayment) amount imposed.

NOTE:

Copayment is not a third party resource. Do not record copayment on the UB-04.

104.6 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Psychiatric hospital providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claims processing turnaround
- Ability to immediately correct claim errors
- Online adjustments capability
- Enhanced access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When an attachment is required, a hard copy UB-04 claim form must be submitted.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

104.6.1 Time Limit for Filing Claims

Medicaid requires all claims to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

104.6.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

104.6.3 Revenue Codes

Refer to the Alabama UB-04 Manual, published by the Alabama Hospital Association, for a complete list of revenue codes.

104.6.4 Place of Service Codes

Place of service codes do not apply when filing the UB-04 claim form.

104.6.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to claims with third party denials.

Refer to Section 5.8, Required Attachments, for more information on attachments.

104.7 For More Information

This section contains a cross-reference to other relevant sections in the manual.

105

105 Rehabilitative Services – DMH, DHR, DYS, DCA

Rehabilitative services are specialized medical services delivered by uniquely qualified practitioners designed to treat or rehabilitate persons with mental illness, substance abuse, or co-occurring mental illness and substance abuse diagnoses. These services are provided to recipients on the basis of medical necessity.

Direct services may be provided in the recipient's home, a supervised living situation, or organized community settings, such as community mental health centers, public health clinics, nursing homes, etc. Direct services can be provided in any setting, except in licensed hospital beds, that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Rehabilitative services will be provided to Medicaid recipients on the basis of medical necessity. Although limits are provided for guidance, the limitation(s) noted can be exceeded based on medical necessity. While it is recognized that involvement of the family in the treatment of individuals with mental illness or substance use disorders is necessary and appropriate, provision of services where the family is involved clearly must be directed to meeting the identified recipient's treatment needs. Services provided to non-Medicaid eligible family members independent of meeting the identified recipient's treatment needs are not covered by Medicaid. An asterisk denoting this restriction will appear in each service description that makes reference to a recipient's collateral defined as a family member, legal guardian or significant other. Rehabilitation services that are delivered face to face can either be in person or via telemedicine/telehealth, as approved by the Alabama Medicaid Agency.

The policy provisions for rehabilitative services providers can be found in the Alabama Medicaid Agency Administrative Code, Chapter 47.

105.1 Enrollment

Gainwell enrolls rehabilitative services providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the State of Alabama, the Code of Federal Regulations, and the Alabama Medicaid Agency Administrative Code.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

National Provider Identifier, Type, and Specialty

A provider who contracts with the Alabama Medicaid Agency as a rehabilitative services provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for rehabilitation-related claims.

NOTE:

The 10-digit NPI is required when filing a claim.

Rehabilitative services providers are assigned a provider type of 11 (State Rehabilitative Services). The valid specialties for State Rehabilitative Services are:

- Rehabilitative Services - DMH (111)
- Rehabilitative Services – DHR, DYS, DCA (118)
- Psychiatry (Psychiatrist only) (339)

Enrollment Policy for Rehabilitative Services Providers

To participate in the Alabama Medicaid Program, rehabilitative services providers must meet the following requirements. Service providers must demonstrate that they meet the criteria in either (1), (2), OR (3) and both (4) AND (5) below.

1. A provider must be certified as a 310-board community mental health center by DMH and must have demonstrated the capacity to provide access to the following services through direct provision or referral arrangements:
    - Inpatient services through referral to community hospitals and through the attending physician for community hospitalizations
    - Substance abuse services including intensive outpatient services and residential services
    - Must submit an application to and receive approval from DMH to provide mental health rehabilitative services under the Medicaid Rehabilitative Option program.
2. For the provision of Substance Abuse Rehabilitative Services an entity:
    - Must be an organization that is currently certified by the Alabama Department of Mental Health (DMH) to provide alcohol and other drug treatment services under the provisions of Chapter 580 of the Alabama Administrative Code; and

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Must submit an application to and receive approval by DMH to provide Substance Abuse Rehabilitative Services under the Medicaid Rehabilitative Option program.

3. The Department of Human Resources (DHR), the Department of Youth Services (DYS), and the Department of Children's Services (DCA) are eligible to be rehabilitative services providers for children under age 21 if they have demonstrated the capacity to provide an array of medically necessary services, either directly or through contract.

   Additionally, DHR may provide these services to adults in protective service status. At a minimum, this array includes the following:

   - Individual, group, and family counseling
   - Crisis intervention services
   - Consultation and education services
   - Case management services Assessment and evaluation

4. A provider must demonstrate the capacity to provide services off-site in a manner that assures the recipient's right to privacy and confidentiality and must demonstrate reasonable access to services as evidenced by service location(s), hours of operation, and coordination of services with other community resources.

5. A provider must ensure that Medicaid recipients receive quality services in a coordinated manner and have reasonable access to an adequate array of services delivered in a flexible manner to best meet their needs. Medicaid does not cover all services listed above, but the provider must have demonstrated the capacity to provide these services.

105.1.1 Minimum Qualifications for Rehabilitative Services Professional Staff (DMH/DHR/DYS)

A Rehabilitative Services Professional is defined as the following:

- Rehabilitative Services Professional:
- A psychologist licensed under Alabama law
- A professional counselor licensed under Alabama law
- An associate licensed counselor under Alabama law
- An independent Clinical social worker licensed under Alabama law
- A licensed master social worker licensed under Alabama law
- A marriage and family therapist licensed under Alabama law
- A marriage and family therapist associate licensed under Alabama law
- A registered nurse licensed under Alabama law who has completed a master's degree in psychiatric nursing
- A Masters Level Clinician is an individual possessing a master's degree or above from a university or college with an accredited program for the respective degree in psychology, social work, counseling or other human service field areas and is under the supervision of a master's level or above clinician with two years of postgraduate clinical experience.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- QSAP I (Substance Abuse): A Qualified Substance Abuse Professional I shall consist of: (i) An individual licensed in the State of Alabama as a: (I) Professional Counselor, Graduate Level Social Worker, Psychiatric Clinical Nurse Specialist, Psychiatric Nurse Practitioner, Marriage and Family Therapist, Clinical Psychologist, Physician's Assistant, Physician; or (ii) An individual who: (I) Has a master's Degree or above from a nationally or regionally accredited university or college in psychology, social work, counseling, psychiatric nursing, and * (II) Has successfully completed a clinical practicum or has six month's post master's clinical experience; and * (III) Holds a substance abuse counselor certification credential from the Alabama Association of Addiction Counselors, National Association of Alcoholism and Drug Abuse Counselors, Alabama Alcohol and Drug Abuse Association, or International Certification and Reciprocity Consortium/Alcohol and Other Drug Abuse, Inc. which shall be obtained within thirty (30) months of date of hire.

105.1.2 Minimum Qualifications for Rehabilitative Services Other Eligible Service Providers (DMH Mental Illness, DMH Substance Abuse, DHR, and DYS)

Rehabilitative Services Mental Illness Professional Staff Other Eligible Service Providers qualifications are as follows (in addition to the practitioners listed in Section 105.1.1):

- A physician licensed under Alabama law
- A physician assistant licensed under Alabama law and practicing within the guidelines as outlined by the Alabama Board of Medical Examiners
- A Certified Registered Nurse Practitioner (CRNP) licensed under Alabama law practicing within the scope as defined by the Joint Committee of the Alabama Board of Nursing and the Alabama Board of Medical Examiners for Advanced Practice Nurses or multistate licensure privilege
- A pharmacist licensed under Alabama state law may provide medication monitoring
- A Registered Nurse licensed under Alabama state law
- A Practical Nurse licensed under Alabama state law
- Qualified Mental Health Provider – Bachelor's – A person with a Bachelor's Degree in a human services field
- Qualified Mental Health Provider– Non-Degreed – A person with a high school diploma or GED supervised by a Rehabilitative Services Professional
- A Nursing Assistant certified pursuant to Alabama State Law.
- A Certified Medical Assistant certified through the American Association of Medical Assistants (AAMA) or the American Medical Technologists (AMT).
- Medication Assistant Certified (MAC) Worker – A person working under a Medication Assistance Supervising (MAS) nurse that meets the Alabama Board of Nursing requirements.
- A Certified Mental Health Youth Peer Specialist - Youth who has personal verified lived experience with children and adolescent's mental health, who is willing to share his/her personal experiences,

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

who has at least a high school diploma or GED, and who has satisfactorily completed a Mental Health Youth Peer Specialist training program approved by the state within six (6) months of date of hire. Certified Mental Health Peer Specialist must be supervised by a Rehabilitative Services Professional.

- A Certified Mental Health Adult Peer Specialist who has personal verified lived experience with recovery from mental illness, who is willing to share his/her personal experiences, who has at least a high school diploma or GED, and who has satisfactorily completed a Mental Health Peer Specialist training program approved by the state within six (6) months of date of hire. A Mental Health Certified Adult Peer Specialist must be supervised by a Rehabilitative Services Professional.
- A Mental Health Youth Parent Peer Support Specialist provider who is parenting or has parented a child experiencing mental, emotional or behavioral health disorders and can articulate the understanding of their lived experience with another parent or family member. This individual may be a birth parent, adoptive parent, family member standing in for an absent parent, or other person chosen by the family or youth to have the role of parent. This individual has at least a high school diploma or GED and has satisfactorily completed a Mental Health Youth Parent Peer Support Provider training program approved by state within six (6) months of date of hire. A Mental Health Youth Parent Peer Support Specialist must be supervised by a Rehabilitative Services Professional.

Rehabilitative Other Eligible Services Substance Abuse Service Providers are as follows (in addition to the practitioners listed in Section 105.1.1):

- QSAP II shall consist of: (i) An individual who: (I) Has a Bachelor's Degree from a nationally or regionally accredited university or college in psychology, social work, community-rehabilitation, pastoral counseling, family therapy, or other behavioral health area that requires equivalent clinical course work, and (II) Is licensed in the State of Alabama as a Bachelor Level Social Worker; or (III) Has a Bachelor's Degree from a nationally or regionally accredited college or university in psychology, social work, community-rehabilitation, pastoral counseling, family therapy, or other behavioral health area that requires equivalent clinical course work, and (IV) Holds a substance abuse counselor certification credential from the Alabama Association of Addiction Counselors, National Association of Alcoholism and Drug Abuse Counselors, Alabama Alcohol and Drug Abuse Association, or International Certification and Reciprocity Consortium.
- QSAP III shall consist of: (i) An individual who: (I) Has a Bachelor's Degree from a nationally or regionally accredited university or college in psychology, social work, community-rehabilitation, pastoral counseling, family therapy, or other behavioral health area that requires equivalent clinical course work, and (II) Participates in ongoing supervision by a certified or licensed QSAP I for a minimum of one (1) hour individual per week until attainment of a substance abuse counselor certification credential from the Alabama Association of Addiction Counselors, National Association of Alcoholism and Drug Abuse Counselors, or Alabama Alcohol and Drug Abuse Association,

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

or International Certification and Reciprocity Consortium/Alcohol and Other Drug Abuse, Inc. which shall be obtained within thirty (30) months of hire.

- Qualified Paraprofessionals (QPP) shall have the following minimum qualifications: (i) A high school diploma or equivalent, and (ii) One (1) year of work experience directly related to job responsibilities and (iii) Concurrent participation in clinical supervision by a licensed or certified QSAP I.
- Certified Recovery Support Specialist (CRSS) must meet the following minimum qualifications: (i) Certified by ADMH as a Certified Recovery Support Specialist (CRSS) within six (6) months of date of hire, (ii) and has 2 years verified lived experience and (iii) Concurrent participation in clinical supervision by a licensed or certified QSAP I.
- A Certified Registered Nurse Practitioner (CRNP) licensed under Alabama law practicing within the scope as defined by the Joint Committee of the Alabama Board of Nursing and the Alabama Board of Medical Examiners for Advanced Practice Nurses
- A Pharmacist licensed under Alabama state law.
- A Registered Nurse licensed under Alabama state law or multistate licensure privilege.
- A Practical Nurse licensed under Alabama state law or multistate licensure privilege.
- Medication Assistant Certified (MAC) Worker – A person working under a Medication Assistance Supervising (MAS) nurse that meets the Alabama Board of Nursing requirements.

Rehabilitative Services DHR/DHR Adult Protective Services Professional Staff qualifications are as follows (in addition to the practitioners listed in Section 105.1.1 and Other Eligible Mental Illness Service Providers above)

- A physician licensed under Alabama law to practice medicine or osteopathy
- A physician assistant licensed under Alabama law and practicing within the guidelines as outlined by the Alabama Board of Medical Examiners
- A pharmacist licensed under Alabama state law may provide medication monitoring
- Senior Social Work Supervisor – Master’s degree in Social Work from a social work program accredited by the Council on Social Work Education. Two years of professional social work experience in child welfare and/or adult services in a public welfare agency.
- Service Supervisor – Bachelor’s degree from an accredited* four year college or university in any major AND three (3) years of professional social work experience in child protective services, adult protective services, child/adult foster care, and/or adoption operations OR Bachelor’s degree from an accredited* four year college or university AND 30 semester or 45 quarter hours in social or behavioral science courses AND two (2) years of professional social work experience in child protective services, adult protective services, child/adult foster care, and/or adoption operations. A Master’s Degree in Social Work from a social work program accredited* by the Council on Social Work Education will substitute for one year of the required professional

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

experience in child protective services, adult protective services, child/adult foster care, and/or adoption operations.

- Senior Social Worker - Master's degree in Social Work from a social work program accredited by the Council on Social Work Education. Eligibility for Licensure as issued by the Alabama Board of Social Work Examiners.
- Social Worker - Bachelor's degree in Social Work from a social work program accredited by the Council on Social Work Education. Eligibility for Licensure as issued by the Alabama Board of Social Work Examiners
- Social Service Caseworker- Bachelor's degree from an accredited* college or university in any major.

105.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Treatment eligibility is limited to individuals with a primary diagnosis within the range of F0150-F69 and F90-F99 for ICD-10, assigned by a licensed physician, a licensed psychologist, a licensed physician's assistant, a certified nurse practitioner, or a licensed professional counselor of mental illness or substance abuse as listed in the most current International Classification of Diseases - 10th Revision - Clinical Modification (ICD-10-CM). Medicaid will cover diagnostic testing, status exam even if the resulting diagnosis is intellectual/developmental disability secondary to a primary mental health diagnoses. Medicaid does not cover the Z codes for adult treatment services; however, it does cover intake evaluation, crisis intervention, the behavioral health placement assessment needs, and diagnostic assessment even if the resulting diagnosis is a Z code. For treatment services provided to children under 21, or those adults receiving DHR protective services, the only Z code Medicaid covers for reimbursement is Z65.9 unspecified psychosocial circumstance.

105.2.1 Covered Services

While Medicaid recognizes that family involvement in the treatment of individuals in need of rehabilitative services is necessary and appropriate, provision of services where the family is involved clearly must be directed to meeting the recipient's treatment needs. Medicaid does not cover services for non-Medicaid eligible family members independent of meeting the recipient's treatment needs.

Only the following rehabilitative services qualify for reimbursement under this program:

- Intake Evaluation
- Medical Assessment and Treatment
- Diagnostic Testing
- Crisis Intervention

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Individual Counseling
- Family Counseling
- Group Counseling
- Medication Administration
- Medication Monitoring
- Partial Hospitalization Program
- Adult Intensive Day Treatment
- Adult Rehabilitative Day Program
- Child and Adolescent Mental Illness Day Treatment
- Treatment Plan Review
- Mental Health Care Coordination
- Adult In-home Intervention
- Child and Adolescent In-Home Intervention
- Mental Health and Substance Use Disorders Update
- Behavioral Health Placement Assessment
- Basic Living Skills
- Psychoeducational Services
- Assertive Community Treatment (ACT)
- Program for Assertive Community Treatment (PACT)
- Opioid Use Disorder Treatment
- Child and Adolescent Peer Support Services
- Adult Peer Support Services
- Youth Peer Support Services
- Family Peer Support Services
- Psychosocial Rehabilitation Services – Working Environment
- Screening
- Brief Intervention
- Nursing Assessment and Care
- Outpatient Detoxification
- Therapeutic Mentoring
- Mobile Crisis Team (MCT)

This section contains a complete description of each covered service along with benefit limitations.

Services must be provided in a manner that meets the supervisory requirements of the respective certifying authority or as authorized by state law.

Telehealth Billing Guidelines

Refer to Chapter 112, Telemedicine Services, for general benefit information and limitations.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Intake Evaluation (90791-HE 90791-HF)

HE = Mental Illness HF = Substance Abuse

Definition

Initial clinical evaluation of the recipient's request for assistance. Substance abuse recipients undergo standardized psychosocial assessment. The intake evaluation presents psychological and social functioning, recipient's reported physical and medical condition, the need for additional evaluation and/or treatment, and the recipient's fitness for rehabilitative services.

Key service functions include the following:

- A clinical interview with the recipient and/or collateral
- Screening for needed medical, psychiatric, or neurological assessment, as well as other specialized evaluations
- A brief mental status evaluation
- Review of the recipient's presenting problem, symptoms, functional deficits, and history
- Initial diagnostic formulation
- Development of an initial plan for subsequent treatment and/or evaluation
- Referral to other medical, professional, or community services as indicated

Eligible Provider Type -- DMH Mental Illness/DMH Substance Abuse

Clinical evaluation and assessments of a recipient may be performed by a person who possesses any one or more of the following qualifications:

- Rehabilitative Services Professional (all types)

Eligible Provider Type – DYS

- Rehabilitative Services Professional as defined in 105.1.1

Eligible Provider Type – DHR

- Rehabilitative Services Professional (all types)
- Social Services Caseworker

Eligible Provider Type – DHR / DHR Adult Protective Services

Services may be provided by an individual employed by a public provider department who meets the state merit system qualifications for Social Service Caseworker or above, or an employee of an agency or entity under contract to serve the target population of one of the same public provider agencies who meets an approved equivalency for Social Service Caseworker, or above.

Billing Unit:	Episode
Maximum Units:	Unlimited (Mental Illness)
	1 per year (Substance Abuse)
Billing Restrictions:	May not be billed in combination with Treatment Plan Review (H0032), Individual Counseling

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

(90832-HF, 90834-HF, 90837-HF), Group Counseling (90853-HF), Family Counseling (90846-HF, 90847-HF), Multi Family Group Psychotherapy (90849-HF).

Location

Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment and that protects the recipient's rights to privacy and confidentiality, to include inpatient hospitals and inpatient psychiatric residential facilities.

Additional Information

An intake evaluation must be performed for each recipient considered for initial entry into a treatment program. This requirement applies to any organized program or course of covered services that a recipient enters or attends to receive scheduled or planned rehabilitative services. Individuals who are transferred between programs within an agency **do not** require a new intake at the time of transfer.

The intake evaluation process determines the recipient's need for rehabilitative services based upon an assessment that must include relevant information from the following areas:

- Family history
- Educational history
- Relevant medical background
- Employment/Vocational history
- Psychological/psychiatric treatment history
- Military service history
- Legal history
- Alcohol/Drug use history
- Mental status examination
- A description/summary of the significant problems that the recipient experiences

The intake evaluation process also results in the development of a written treatment plan (service plan, individualized family service plan, plan of care, etc.) that includes elements defined, completed by the fifth face-to-face outpatient client visit or within ten working days after admission in all day programs or residential program for mental illness recipients; and, completed by the tenth day after admission to an outpatient program or by the fifth day after admission to a residential program, prior to provision of SA treatment services, except as noted below, or within other time limits that may be specified under program specific requirements. The treatment plan will do the following:

- Identify the clinical issues that will be the focus of treatment.
- Specify those services necessary to meet the recipient's needs.
- Include referrals as appropriate for needed services not provided directly by the agency.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Identify expected processes/outcomes toward which the recipient and therapist will be working to impact upon the specific clinical issues.
- Be approved in writing by a licensed psychologist, graduate level certified licensed social worker, licensed professional counselor, a licensed marriage and family therapist, a Certified Registered Nurse Practitioner (CRNP) licensed under Alabama law practicing within the scope as defined by the Joint Committee of the Alabama Board of Nursing and the Alabama Board of Medical Examiners for Advanced Practice Nurses, a registered nurse licensed under Alabama law with master's degree in psychiatric nursing, a physician licensed under Alabama law, or a physician assistant licensed under Alabama law and practicing within the guidelines as outlined by the Alabama Board of Medical Examiners. For SA services, the patient, counselor, and licensed staff as noted above must all approve the treatment plan prior to the provision of SA treatment services.
- Except as noted above face-to-face services may be provided and billed between the initial Intake service and the development of the treatment plan within the allowed time frames. Once the Treatment Plan is developed, service types must be specified in the treatment plan in order to be paid by Medicaid, with the exception of crisis intervention and resolution, mental health care coordination, behavioral health placement assessment, and treatment plan review. Changes in the treatment plan must be approved by a person licensed under Alabama law to practice psychology, certified social work, professional counseling, marriage and family therapy, or medicine; or a registered nurse licensed under Alabama law with master's degree in psychiatric nursing. For child and adolescent services or adults receiving DHR protective services, the person who approves the treatment plan must meet the criteria in Requirements for Recipient Intake, Treatment Planning, and Service Documentation section.
- For DMH Mental Illness providers, Z04.6 is covered for this service.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Medical Assessment and Treatment (H0004-HE H0004-HF)

Definition

Contact with a recipient during which a qualified practitioner provides psychotherapy and/or medical management services. Services may include physical examinations, evaluation of co-morbid medical conditions, development or management of medication regimens, the provision of insight oriented, behavior modifying, supportive, or interactive psychotherapeutic services, or the provision of educational services related to management of a physical, mental health, or substance use disorder.

Key service functions include the following:

- Specialized medical/psychiatric assessment of physiological phenomena
- Psychiatric diagnostic evaluation
- Medical/psychiatric therapeutic services
- Assessment of the appropriateness of initiating or continuing the use of psychotropic or detoxification medication

Added: State

Eligible Provider Type -- All State Agencies

Physician medical assessment and treatment may be performed by a physician licensed under Alabama law to practice medicine or osteopathy, a physician assistant licensed under Alabama law and practicing within the guidelines as outlined by the Alabama Board of Medical Examiners, or a Certified Registered Nurse Practitioner (CRNP) licensed under Alabama law practicing within the scope as defined by the Joint Committee of the Alabama Board of Nursing and the Alabama Board of Medical Examiners for Advanced Practice Nurses.

Billing Unit:	15 minutes
Maximum Units:	6 per day, 52 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), ACT (H0040), PACT (H0040-HQ), Outpatient Detoxification – Ambulatory Detoxification with Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014).

Location

The only excluded settings are hospitals. Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Additional Information

All services rendered by a physician, physician assistant, or nurse practitioner that meet the definition above should be billed under this code including those rendered via teleconference with a direct service or consultation recipient. Please refer to the section titled **Telehealth Billing Guidelines** for more information.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Diagnostic Testing done by physician or psychologist (96130-HE 96130-HF 96131-HE 96131-HF 96136-HE 96136-HF, 96137-HE 96137-HF)

Deleted: ~~(Previously 96101)~~

Definition

Psychological testing evaluation services by physician or other qualified health care professional,
including integration of patient data, interpretation of standardized test results and clinical data, clinical decision making, treatment planning and report and interactive feedback to the patient, family member(s) or caregiver(s), when performed; **first hour** in a face-to-face (in person or via telemedicine) interaction between the recipient and the psychologist or psychiatrist and interpretation of the test results to assist with a definitive diagnosis. Once the diagnosis has been confirmed, this information is used to guide proper treatment by the development of an individualized, person-centered treatment plan.

Eligible Staff – All State Agencies

Procedure codes 96130, 96131, 96137, 96138 -Diagnostic testing may only be performed by:

- A psychiatrist licensed under Alabama law

OR

- A psychologist licensed under Alabama law

Billing Unit:	One hour (96130, 96131)
	Thirty Minutes (96136, 96137)
Maximum Units:	96130 1 per year 96131 7 per year
	96136 1 per year, 96137 11 per year
Billing Restrictions:	None

Location

The only excluded settings are hospitals. Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Additional Information

Professional and Technical Activities Performed by the Psychologist
Please note that the new codes **do not** crosswalk on a one-to-one basis with the deleted codes. The single code, 96101, will now be billed using up to four (4) codes; two (2) codes for Psychological Evaluation Services (96130, 96131) and two (2) for Test Administration and Scoring (96136, 96137).

- Evaluation services include interpretation of test results and clinical data, integration of patient data, clinical decision-making, treatment planning, report generation, and interactive feedback to the patient, family member(s) or caregiver(s).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

  - The **first hour** of psychological evaluation is billed using 96130 and **each additional hour** needed to complete the service is billed with the add-on code 96131.
  - CPT Time Rules allow an additional unit of a time-based code to be reported as long as the mid-point of the stated amount of time is passed. Beyond the first hour (96130), at least an additional 31 minutes of work must be performed to bill the first unit of the add-on code 96131.

- Evaluation services must always be performed by the professional prior to test administration, and must be billed on the last date of service, but documented in the medical record the actual date(s) the service is performed.
- Test administration and scoring services **performed by the psychologist** includes time spent to administer and score a minimum of two (2) psychological tests.
  - The first **30 minutes** of test administration and scoring is billed using 96136 and **each additional 30-minute** increment needed to complete the service is billed with code 96137.
  - CPT time rules apply to the add-on code if, beyond the first 30 minutes, at least an additional 16 minutes of work is performed.

Diagnostic testing may be billed at any time during treatment so long as the annual cap is not exceeded.

The time started and time ended of service delivery will not include time spent for scoring, interpretation and report writing (at this time). Billing should reflect the **total** time for face-to-face (in person or via telemedicine) administration, scoring, interpretation and report writing. The test(s) given on the date of service billed must be documented in the treatment note for post payment review purposes.

Intellectual Disability and Developmental Disability/Autism Spectrum diagnosis codes (ICD-10 F70-F89) are not covered for treatment services; however, Medicaid will cover diagnostic testing, status exam (96130/96131, 96136/96137,96138/96139, 96116 and 96146), even if the resulting diagnosis is intellectual/developmental disability secondary to a primary mental health diagnoses.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Diagnostic Testing done by technician (96130-HE 96130-HF 96131-HE 96131-HF 96138-HE 96138-HF 96139-HE 96139-HF)

Deleted: ~~{Previously 96102}~~

Definition

Psychological testing evaluation services by physician or other qualified health care professional, including integration of patient data, interpretation of standardized test results and clinical data, clinical decision making, treatment planning and report and interactive feedback to the patient, family member(s) or caregiver(s), when performed; **first hour** in a face-to-face (in person or via telemedicine) interaction between the recipient and the technician and interpreted by a qualified health care professional to assist with a definitive diagnosis. Once the diagnosis has been confirmed, this information is used to guide proper treatment by the development of an individualized, person-centered treatment plan.

Crisis Intervention (H2011-HE)

Definition

Immediate emergency intervention with a recipient, or the recipient's collateral* (in person or by telephone) to ameliorate a maladaptive emotional/behavioral reaction by the recipient. Service is designed to resolve crisis and develop symptomatic relief, increase knowledge of resources to assist in mitigating a future crisis, and facilitate return to pre-crisis routine functioning. Interventions include a brief, situational assessment; verbal interventions to de-escalate the crisis; assistance in immediate crisis resolution; mobilization of natural and formal support systems; and referral to alternate services at the appropriate level.
Key service functions include the following:

- Specifying factors that led to the recipient's crisis state, when known
- Identifying the maladaptive reactions exhibited by the recipient
- Evaluating the potential for rapid regression
- Resolving the crisis
- Referring the recipient for treatment at an alternative setting, when indicated

Eligible Provider Type – DMH Mental Illness/DMH Substance Abuse

Crisis intervention and resolution may be performed by a person who possesses any one or more of the following qualifications:

- Rehabilitative Services Professional (all types)
- Licensed Registered Nurse
- Licensed Practical Nurse
- Certified Nursing Assistant
- Certified Medical Assistant
- Qualified Mental Health Provider – Bachelor's
- Social Service Caseworker (DHR only)
- Certified Mental Health Peer Specialist (Youth, Adult, and Parent)
- QSAP II (DMH Substance Abuse only)
- QSAP III (DMH Substance Abuse only)
- Certified Recovery Support Specialist (CRSS) (DMH Substance Abuse only)

Eligible Provider Type - DYS

Crisis intervention and resolution may be performed by a person who possesses any one or more of the following qualifications:

- Rehabilitative Services Professional as defined in 105.1.1
- Licensed Registered Nurse

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Eligible Provider Type - DHR/ DHR Adult Protective Services

Services may be provided by an individual employed by a public provider department who meets the state merit system qualifications for Social Service Caseworker or above, or an employee of an agency or entity under contract to serve the target population of one of the same public provider agencies who meets an approved equivalency for Social Service Caseworker, or above.

Billing Unit:	15 minutes
Maximum Units:	20 per day, 7300 per calendar year
Billing Restrictions:	MI: May not be billed in combination with In-Home Intervention (H2021,H2022-HA), ACT(H0040), PACT (H0040-HQ) SA: May not be billed in conjunction with Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification With Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014)

Location

The only excluded settings are hospitals. Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Additional information

If the recipient is unable to sign a receipt for service or if the service is rendered by phone, the documentation in the recipient's record should so indicate. The Z code unspecified psychosocial circumstance is covered only for children and adolescents, or adults receiving DHR protective services. For DMH Mental Illness providers, Z04.6 is covered for this service.

Individual Counseling - (90832-HE, 90834-HE, 90837-HE 90832-HF, 90834-HF, 90837-HF)

Definition

The utilization of professional skills by a qualified practitioner to assist a recipient in a face-to-face (in person or via telemedicine), one-to-one psychotherapeutic encounter in achieving specific objectives of treatment or care for a mental health and/or a substance use disorder. Services are generally directed toward alleviating maladaptive functioning and emotional disturbances relative to a mental health and/or substance use disorder, and restoration of the individual to a level of functioning capable of supporting and sustaining recovery. Individual Counseling may consist of insight oriented, behavior modifying, supportive, or interactive psychotherapeutic services.

Key service functions include the following:

- Interaction where interventions are tailored toward achieving specific goals and/or objectives of the recipient's treatment plan
- On-going assessment of the recipient's presenting condition and progress made in treatment

Eligible Provider Type – DMH Mental Illness/DMH Substance Abuse/DHR

- Rehabilitative Services Professional (all types)
- QSAP II (DMH Substance Abuse only)

Eligible Provider Type – DYS

- Rehabilitative Services Professional as defined in 105.1.1

Billing Unit:	1 unit
Maximum Unit:	1 per day, 52 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), Adult Intensive Day Treatment (H2012), Child & Adolescent Day Treatment (H2012-HA), In-Home Intervention (H2021, H2022-HA), ACT (H0040), PACT (H0040-HQ), Intake (90791-HF), Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification With Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014).

Location

The only excluded settings are hospitals. Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Additional information

The Z code unspecified psychosocial circumstance is covered only for children and adolescents, or adults receiving DHR protective services.

Max Unit = **1 per day**

Billing = 1 of the following codes:

- Code 90832 = therapy given for 16 to 37 minutes
- Code 90834 = therapy given for 38 to 52 minutes
- Code 90837 = therapy given for 53 minutes or greater

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). Family Counseling 90846-HE 90846-HF (without patient present)
90847-HE 90847-HF (with patient present)
90849-HE 90849-HF (multiple family group)

Definition

A recipient focused intervention that may include the recipient, his/her collateral* and a qualified practitioner. This service is designed to maximize strengths and to reduce behavior problems and/or functional deficits stemming from the existence of a mental health and/or substance use disorder that interferes with the recipient's personal, familial, vocational, and/or community functioning.
Key service functions include the following:

- Interaction where interventions are tailored toward achieving specific goals and/or objectives of the recipient's treatment plan
- On-going assessment of the recipient's presenting condition and progress being made in treatment

Eligible Provider Type – DMH Mental Illness/DMH Substance Abuse/DHR

Family counseling may be performed by a person who possesses any one or more of the following qualifications:

- Rehabilitative Services Professional (all types)
- QSAP II (DMH Substance Abuse only)

Eligible Staff – DYS

- Rehabilitative Services Provider as defined in 105.1

MI:

Billing Unit:	1 episode=minimum of 60 minutes
Maximum Units:	1 episode per day, 104 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), Adult Intensive Day Treatment (H2012), Child and Adolescent Day Treatment (H2012-HA), In-Home Intervention (H2021, H2022-HA), ACT (H0040), PACT (H0040-HQ).

SA:

Billing Unit:	1 episode=minimum of 60 minutes (90846-HF/ 90847HF)
	1 episode=minimum of 90 minutes (90849-HF)
Maximum Units:	1 episode per day, 104 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), Intake (90791-HF), Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification with Extended On-Site Monitoring

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

(II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014).

Location

The only excluded settings are hospitals. Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Additional information

Family therapy is defined as the treatment of family members as a family unit, rather than an individual patient. When family therapy without the patient present (90846) or family therapy with the patient present (90847) is provided, the session is billed as one service (one family unit), regardless of the number of individuals present at the session.

When a family consists of a Medicaid eligible adult and child(ren) and the therapy is not directed at one specific child, services may be directed to the adult for effective treatment of the family unit to address the adult's issues and impact on the family. If the adult is not eligible and the family therapy is directed to the adult and not the child, the service may not be billed using the child's recipient id number.

A family is not a group and providers may not submit a claim for each eligible person attending the same family therapy session.
All members of the family in attendance for the session will sign/mark the signature log or progress note to document their participation in the session (in addition to the therapist documenting their presence/participation).

The Z code unspecified psychosocial circumstance is covered only for children and adolescents, or adults receiving DHR protective services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Group Counseling (90853-HE, 90853-HF)

Definition

The utilization of professional skills by a qualified practitioner to assist two or more recipients in a group setting in achieving specific objectives of treatment or care for mental health or substance use disorder. Services are generally directed toward alleviating maladaptive functioning and behavioral, psychological, and/or emotional disturbances, and utilization of the shared experiences of the group's members to assist in restoration of each participant to a level of functioning capable of supporting and sustaining recovery. Group Counseling may consist of insight oriented, behavior modifying, supportive, or interactive psychotherapeutic service strategies. Key service functions include the following:

- Interaction where interventions are tailored toward achieving specific goals and/or objectives of the recipient's treatment plan
- On-going assessment of the recipient's presenting condition and progress being made in treatment

Eligible Provider Type– DMH Mental Illness/DMH Substance Abuse/DHR

Group counseling may be performed by a person who possesses any one or more of the following qualifications:

- Rehabilitative Services Professional (all types)
- QSAP II (DMH Substance Abuse only)

Eligible Provider Type – DYS

- Rehabilitative Services Professional as defined by 105.1.1

MI:

Billing Unit:	1 episode=minimum of 60 minutes
Maximum Units:	1 episode per day, 104 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), Adult Intensive Day Treatment (H2012), Child & Adolescent Day Treatment (H2012-HA), ACT (H0040), PACT (H0040-HQ).

SA:

Billing Unit:	1 episode=minimum of 90 minutes
Maximum Units:	1 episode per day, 104 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), Intake (90791-HF), Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification with Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification –

Medication Administration 96372-HE 96372-HF (Injectable meds) H0033-HE H0033-HF (oral meds)

Definition

Administration of oral or injectable medications under the direction of a physician, physician assistant, or certified registered nurse practitioner.

Eligible Provider Type– All State Agencies

Medication administration may be performed by a person who possesses any one or more of the following qualifications:

- A registered nurse licensed under Alabama law
- A licensed practical nurse licensed under Alabama law under the direction of a physician
- Certified Medical Assistant
- MAC Worker (Oral Medications Only)

Billing Unit	Episode
Maximum Units	3 per day, 1095 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), ACT (H0040), PACT (H0040-HQ), Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification With Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014), Vivitrol (J2315).

Location

The only excluded settings are hospitals. Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Additional Information

- This service does not include the intravenous administration of medications, nor does it include the preparation of medication trays in a residential setting. Procedure codes 96372 HE, 96372 HF, H0033 HE, or H0033 HF may be span-billed by multiplying the appropriate number of units for the month by the daily rate. Benefits are limited to 365 units per year. Utilization will be monitored through retrospective reviews. For SA recipients, this service cannot be billed if the MAS nurse has determined they are capable of self-administration.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Medication Monitoring (H0034-HE)

Definition

Contact between the recipient and a rehabilitative services, or child and adolescent services/adult protective services professional, monitoring compliance with dosage instructions; educating the recipient and/or collateral of expected effects of medications; and/or identifying changes in the medication regimen.

Eligible Provider Type – DMH Mental Illness/DMH Substance Abuse/DHR

Medication monitoring for recipients may be performed by a person who possesses any one or more of the following qualifications:

- Rehabilitative Services Professional (all types)
- Qualified Mental Health Provider – Bachelor's
- QSAP II (DMH Substance Abuse only)
- QSAP III (DMH Substance Abuse only)
- Registered Nurse licensed under Alabama law
- Licensed Practical Nurse licensed under Alabama law
- Pharmacist licensed under Alabama law
- Certified Nursing Assistant
- Certified Medical Assistant

Eligible Provider Type – DYS

- Rehabilitative Services Professional as defined in 105.1.1
- Registered Nurse Licensed under Alabama Law
- Licensed Practical Nurse licensed under Alabama law
- Pharmacist licensed under Alabama Law

Billing Unit	15 minutes
Maximum Units	2 per day, 52 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), In-Home Intervention (H2021, H2022-HA), ACT (H0040), PACT (H0040-HQ), Opioid Use Disorders Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification with Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification without Extended On-Site Monitoring (I-D) (H0014) , or Vivitrol (J2315).

Location

The only excluded settings are hospitals. Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Additional Information

Medicaid covers this service for mental illness diagnoses only. The code Z 65.9 unspecified psychosocial circumstance is covered only for children and adolescents, or adults receiving DHR protective services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). Partial Hospitalization Program (H0035-HE, H0035-HF)

Definition

A physically separate and distinct organizational unit that provides intensive, structured, active, clinical treatment, less than 24 hours per day, with the goal of acute symptom remission, immediate hospital avoidance, and/or reduction of inpatient length of stay, or reduction of severe persistent symptoms and impairments that have not responded to treatment in a less intensive level of care.

Key service functions include the following services, which must be available with the program as indicated by individual recipient need:

- Initial screening to evaluate the appropriateness of the recipient's participation in the program
- Development of an individualized program plan
- Individual, group, and family counseling
- Coping skills training closely related to presenting problems (e.g., stress management, symptom management, assertiveness training, and problem solving; as opposed to basic living skills, such as money management, cooking, etc.)
- Medication administration
- Medication monitoring
- Psychoeducational services
- Patient education closely related to the presenting problems, such as diagnosis, symptoms, medication, etc., rather than academic training

Eligible Provider Type – DMH MI/DMH SA:
MI: The program must have a multi-disciplinary treatment team under the direction of a psychiatrist, certified registered nurse practitioner, or physician's assistant. The program staff are required to follow the current Community Mental Health Program Standards Manual or subsequent revisions.

Intensive Family Intervention by a Multi-Person Team (H0037)

Definition

This service is intended to improve family functioning by clinically stabilizing the living arrangement, promoting reunification, or preventing the utilization of out-of-home therapeutic venues (i.e. psychiatric hospitals, psychiatric residential treatment facilities, or residential treatment services) for the identified youth. Services are delivered by a multi-person team staffed as defined below and are provided primarily to youth in their living arrangement and within the family system. Services are designed to address both the mental health needs of the youth and the interactions among family members that contribute to an unstable living environment as identified in the Individualized Treatment Plan.

The service array, frequency, and duration must conform to the respective team model and include resource coordination/acquisition to achieve the youth's and their family's goals and aspirations of self-sufficiency, resiliency, permanency, and community integration. At a minimum, the following service types are included:

Individual Counseling

Family Counseling

Psychoeducation

Basic Living

Crisis Intervention (24 hours a day availability)

Medication Monitoring

Mental Health Care Coordination

Treatment Plan Review

Therapeutic Mentoring

Case Management

Eligible Provider Type Multi-Person Team – DYS and DHR

The Intensive Family Intervention team is staffed and functions consistent with the evidence-based criteria of a nationally recognized intensive family intervention model such as Multi-Systemic Therapy (MST), Functional Family Therapy (FFT), or Multi-Dimensional Family Therapy (MDFT). The specific model of Intensive Family Intervention must be approved by the respective state agency. The team must be approved by the respective credentialing oversight body as having the staff, training, operation, and quality assurance measures required by the model.

Billing Unit: One day

Maximum Units: 180 per year

Billing Restrictions: May not be billed in combination with Crisis Intervention (H2011), Individual Counseling (90832, 90834, 90837), Family Counseling ((90846, 90847, 90837), Treatment Plan Review (H0032), Mental Health Care Coordination (H0046), Psychoeducation (H2027), Basic Living Skills (H0036), Medication Monitoring (H0034), Case Management, or

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Therapeutic Mentoring (H2019) while a family is enrolled in Intensive Family Intervention

Location

Please note that Intensive Family Intervention, while by definition and practice is usually provided in the child or adolescent consumer's home, infrequently may be provided in a non-traditional setting including educational, child welfare, family court, local parks, or clinic, etc. Such exceptions will not render the service ineligible for billing.

Additional Information:

The eligibility criteria for this service are as follows:

The recipients (DYS ages 12-19th birthday) and DHR 5- through 21st birthday) must have 1. a mental illness diagnosis and related functional impairment which interferes with or limits the child's role or functioning in the family, school, or community and/or a Substance-Related Disorder and 2. the youth and/or family has one or more of the following characteristics:

- insufficient or severely limited resources or skills necessary to cope with the youth's behavioral health crisis
- are involved in or at serious risk of involvement with the juvenile justice system
- have anti-social, aggressive/violent, substance abusing behaviors
- are at risk of out-of-home placement and require intensive, coordinated clinical and supportive intervention
- are returning from out of home placement where the above behaviors received treatment

These services should be billed on a per diem basis while the family is enrolled and receiving this service even though a service may not be provided every day. Span-billing may be utilized by multiplying the appropriate number of units for the month by the daily rate.

Youth participation in group counseling consistent with the Individualized Treatment Plan may be separately billed. Siblings who are each authorized to receive this service must receive individualized services, but family interventions can be provided jointly.

The service documentation must include the way in which the team works with the family and other agencies/support systems to build a clinically oriented transition and discharge plan.

Each included service type must be documented consistent with the requirements for that service type, i.e. individual counseling, family counseling, etc.

The intensive nature of this service should be reflected in the average hours of direct service per family per week.

Treatment Plans must be completed with 30 days of the first face-to-face contact with the youth and family. The Treatment Plan should address the treatment needs identified by a thorough assessment of the youth and family.

Signatures for services are secured on the day the service is delivered.

Utilization will be monitored through the quality assurance measures required by the respective model.

Adult Mental Illness Intensive Day Treatment (H2012-HE)

Definition

An identifiable and distinct program that provides highly structured services designed to bridge acute treatment and less intensive services, such as Rehabilitative Day Program and Outpatient services, with the goals of community living skills enhancement, increased level of functioning, and enhanced community integration. Intensive Day Treatment shall constitute active, intermediate level treatment that specifically address the recipient's impairments, deficits, and clinical needs.

The following services must be available within the program as indicated by individual recipient need:

- Initial screening to evaluate the appropriateness of the recipient's participation in the program
- Development of an individualized program
- Individual, group, and family counseling
- Coping skills training (e.g., stress management, symptom management, assertiveness training, problem solving)
- Utilization of community resources
- Family education closely related to the presenting problems such as diagnosis, symptoms, medication, coping skills, etc.)
- Basic living skills (e.g., Adult Basic Education, GED, shopping, cooking, housekeeping, grooming)
- Recipient education closely related to presenting problems, such as diagnosis, symptoms, medication, etc. rather than academic training

Eligible Provider Type – DMH Mental Illness Services

The program staff are required to follow the current Community Mental Health Program Standards Manual or subsequent revisions.

At a minimum, there must be a program coordinator:

- Rehabilitative Services Professional (all types)
- As outlined in Community Mental Health Program Standards Manual, the multi-disciplinary treatment team may also include the following practitioners:
  - Qualified Mental Health Provider – Bachelor's
  - Qualified Mental Health Provider – Non-Degreed
  - Certified Mental Health Peer Specialist - Adult

Billing Unit:	One hour
Maximum Units:	4 per day, 1040 hours per year
Billing Restrictions:	May not be billed in combination with Individual (90832), Family (90846, 90847, 90849), or Group Counseling (90853), Partial Hospitalization Program (H0035), and Rehabilitative Day Program (H2017). These restrictions apply while a recipient is attending/actively enrolled in

Adult Rehabilitative Day Program (H2017 HE)

Definition

An identifiable and distinct program that provides long-term recovery services with the goals of improving functioning, facilitating recovery, achieving personal life goals, regaining feelings of self-worth, optimizing illness management, and helping to restore a recipient to productive participation in family and community life. The Rehabilitative Day Program constitutes active structure, rehabilitative interventions that specifically address the individual's life goals, builds on personal strengths and assets, improves functioning, increases skills, promotes a positive quality of life, and develops support networks. The Rehabilitative Day Program should provide (1) and (2) below and at least one more service from the following list of services based on the needs and preferences of recipients participating in the program.

Key service functions include the following:

1. Initial screening to evaluate the appropriateness of the recipient's participation in the program
2. Development of an individualized treatment plan
    - Psychoeducational services
    - Basic living Skills
    - Coping skills training closely related to presenting problems (e.g., stress management, symptom management, assertiveness training, a problem solving)
    - Utilization of community resources

Eligible Provider Type – DMH Mental Illness

The program staff are required to follow the current Community Mental Health Program Standards Manual or subsequent revisions.

At a minimum, there must be a program coordinator:

- Qualified Mental Health Provider – Bachelor's
- As outlined in Community Mental Health Program Standards Manual, the multi-disciplinary treatment team may also include the following practitioners:
    - Qualified Mental Health Provider – Bachelor's
    - Qualified Mental Health Provider – Non-Degreed
    - Certified Mental Health Peer Specialist - Adult

Billing Unit:	15 minutes
Maximum Units:	16 per day, 4160 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization Program (H0035) or Adult Mental Illness Intensive Day Treatment (H2012).

Location

The only excluded settings are hospitals. Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Child and Adolescent Mental Illness Day Treatment (H2012-HE:HA)

Definition

A combination of goal-oriented rehabilitative services designed to improve the ability of a recipient to function as productively as possible in their regular home, school, and community setting when impaired by the effects of a mental or emotional disorder. Programs that provide an academic curriculum as defined by or registered with the State Department of Education and that students attend in lieu of a local education agency cannot bill Medicaid for the time devoted to academic instruction.

Key service functions include the following:

- Initial screening to evaluate the appropriateness of the recipient's participation in the program
- Development of an individualized treatment plan
- Individual, group, and family counseling
- Psychoeducational Services.
- Basic Living Skills
- Coping skills training closely related to presenting problems (e.g., stress management, assertiveness training, and problem solving)

Eligible Provider Type – DMH Mental Illness, DHR

The program staff are required to follow the current Community Mental Health Program Standards Manual or subsequent revisions.

At a minimum, there must be a program coordinator:

- Rehabilitative Services Professional (all types)

As outlined in Community Mental Health Program Standards Manual, the multi-disciplinary treatment team may also include the following practitioners:

- Qualified Mental Health Provider – Bachelor's
- Qualified Mental Health Provider – Non-Degreed
- Certified Mental Health Peer Specialist - Youth
- Certified Mental Health Peer Specialist - Parent

Billing Unit:	One hour
Maximum Units:	4 per day, 1040 per year
Billing Restrictions:	May not be billed in combination with Individual (90832), Family (90846, 90847, 90849), or Group Counseling (90853). These restrictions apply while a recipient is actively enrolled in Day Treatment whether or not the restricted services occur on the same day as Day Treatment.

Location

The only excluded settings are hospitals. Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Treatment Plan Review (H0032-HE)

Definition

Review and/or revision of a recipient's individualized mental health and/or substance use disorder treatment plan by a qualified practitioner who is not routinely directly involved in providing services to the recipient. This review will evaluate the recipient's progress toward treatment objectives, the appropriateness of services being provided, and the need for a recipient's continued participation in treatment. This service does not include those activities or costs associated with direct interaction between a recipient and his or her primary therapist regarding the recipient's treatment plan. That interaction must be billed through an alternative service, such as individual counseling.

Eligible Provider Type – All State Agencies

Treatment plan review, for mental illness, substance abuse, and child and adolescent services/adult protective services recipients, may be performed by a person who possesses any one or more of the following qualifications:

- Physician
- Physician Assistant
- Certified Registered Nurse Practitioner (CRNP)
- Rehabilitative Services Professional
- Service Supervisor (DHR only)
- Senior Social Work Supervisor (DHR only)

Billing Unit:	15 minutes
Maximum Units:	1 event with up to 2 units every 6 months, 4 per year
Billing Restrictions:	May not be billed in combination with Intake Evaluation (90791), Child and Adolescent In-Home Intervention (H2022-HA), ACT (H0040), and PACT (H0040-HQ).

Location

This service may be provided wherever the recipient's clinical record is stored. This service may be billed while a recipient is in an inpatient setting since it is not a face-to-face service.

Additional Information

The recipient's treatment plan must be reviewed at least every six months. In cases where only an intake or diagnostic assessment is provided with no further treatment, treatment plan reviews are not covered. One treatment plan review will be covered following a six-month interval of no services delivered; any subsequent reviews with no intervening treatment are disallowed.

Providers must document this review in the recipient's clinical record by noting on the treatment plan that it has been reviewed and updated or continued without change. Medicaid covers this service for mental illness and substance use disorder diagnoses only. The Z code unspecified psychosocial circumstance is covered only for children and adolescents, or adults receiving DHR protective services. The person who completes the treatment plan review for DHR children, adolescents, or adults must meet the criteria in Section 105.2.3.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Mental Health Care Coordination (H0046-HE) (Previously mental health case consultation)

Definition

Services to assist an identified Medicaid recipient to receive coordinated mental health services from external agencies, providers or independent practitioners.

Key service functions include written or oral interaction in a clinical capacity in order to assist another provider in addressing the specific rehabilitative needs of the recipient, as well as to support continuation of care for the recipient in another setting.

Deleted: ~~Mental Illness Services~~
Added: MI
Deleted: ~~Substance Abuse Services~~
Added: SA

Eligible Provider Type – DMH MI/DMH SA/DHR

- Rehabilitative Services Professional (all types)
- Licensed Registered Nurse
- Licensed Practical Nurse
- Certified Nursing Assistant
- Certified Medical Assistant
- Qualified Mental Health Provider – Bachelor's
- Social Service Caseworker

Eligible Provider Type – DYS

- Rehabilitative Services Professional as defined in 105.1.1
- Licensed Registered Nurse

Eligible Provider Type – DHR / DHR Adult Protective Services

Services may be provided by an individual employed by a public provider department who meets the state merit system qualifications for Social Service Caseworker or above, or an employee of an agency or entity under contract to serve the target population of one of the same public provider agencies who meets an approved equivalency for Social Service Caseworker, or above.

Billing Unit:	15 minutes
Maximum Units:	24 per day, 312 per year
Billing Restrictions:	ACT (H0040), PACT (H0040-HQ), In-Home Intervention (H2021, H2022-HA)

Location

There are no excluded settings. This service may be billed while a recipient is in an inpatient setting since it is not a face-to-face service.

Additional Information

Medicaid covers this service for mental illness diagnoses only. The Z code unspecified psychosocial circumstance is covered only for children and adolescents, or adults receiving DHR protective services.

Consults may be billed for the staff time spent obtaining prior authorizations and overrides for prescription medications. In addition to the eligible staff listed above LPNs may bill for their time directly related to performing this activity. LPNs **are not** eligible to bill for consults for any other type of activity. Acceptable documentation can be a progress note entered in the recipient's record or the approved authorization/override form filed in the record and dated and signed by the staff member performing the work.

(Adult) In-Home Intervention (H2021-HE)

Definition

Home based services provided by a treatment team (two-person team) to serve individuals who refuse other outpatient services and/or who need temporary additional support due to increased symptoms or transition from a more intense level of services, to defuse an immediate crisis situation, stabilize the living arrangement, and/or prevent out of home placement of the recipient.

Key service functions include the following when provided by a team composed of a Rehabilitative Services Professional (master's level clinician) and either a Qualified Mental Health Provider – Bachelor's or a Certified Peer Specialist - Adult:

- Individual or family counseling
- Crisis intervention
- Mental Health Care Coordination
- Basic Living Skills
- Psychoeducational Services
- Case Management
- Medication Monitoring
- Peer Services (only when team member is a Certified Mental Health Peer Specialist – Adult)

Key service functions include the following when provided by a team composed of a Registered Nurse and a Qualified Mental Health Provider – Bachelor's or a Certified Mental Health Peer Specialist - Adult:

- Crisis Intervention
- Mental health Care Coordination
- Basic Living Skills
- Psychoeducational Services
- Case Management
- Medication Monitoring
- Medicaid Administration
- Peer Services (only when team member is a Certified Mental Health Peer Specialist – Adult)

Eligible Provider Type – DMH Mental Illness

In-home intervention for mental illness recipients are provided by a two-person team minimally composed of the following:

- A rehabilitative services professional (Master's level) or
- A registered nurse licensed under Alabama law AND EITHER
- A Qualified Mental Health Provider – Bachelor's or
- A Certified Mental Health Peer Specialist - Adult

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

All team members must successfully complete an approved case management-training program.

Billing Unit	15 minutes
Maximum Units:	24 per day, 2016 per year
Billing Restrictions: When team is a Rehab Services Professional AND either a Qualified MH Provider – Bachelor's OR CPS-Adult	May not be billed in combination with Individual Counseling (90832, 90834, 90837), Family Counseling (90846, 90847, 90849), Mental Health Care Coordination (H0046), Case Management, Psychoeducational Services (H2027), Basic Living Skills (H0036), or Medication Monitoring (H0034). Also, CPS-Adult (H0038-HE) and Therapeutic Mentoring (H2019) when the team member is a Certified Mental Health Peer Specialist – Adult.
Billing Restrictions: When team is a Registered Nurse AND either a Qualified MH Provider – Bachelor's OR CPS-Adult	May not be billed in combination with Mental Health Care Coordination (H0046), Case Management, Psychoeducational Services (H2027), Basic Living Skills (H0036), Medication Administration (**96372**), Medication Monitoring (H0034). Also, CPS-Adult (H0038-HE) and Therapeutic Mentoring (H2019) when the team member is a Certified Mental Health Peer Specialist – Adult.

Location

Please note that in-home intervention, while by definition and practice is usually provided in the recipient's home, infrequently may be provided in other locations. Such exceptions will not render the service ineligible for billing as In-Home Intervention.

When the Adult In-Home Intervention team members are together in the same location providing services as a team, H2021 must be billed and unbundled services cannot be billed for that time period. When the team members work independently of each other, each team member must document as to the specific service rendered and bill under the applicable code [i.e. Individual Counseling (90832, 90834, 90837), Mental Health Care Coordination (H0046), etc.] and the billing restrictions will not apply. Travel time to and from the service location must be excluded from the billing.

Utilization will be monitored through retrospective reviews.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Child and Adolescent In-Home Intervention (H2022-HE:HA)

Definition

Structured, consistent, strength-based therapeutic intervention provided by a team for a child or youth with a serious emotional disturbance (SED) and his or her family for the purpose of treating the child's or youth's behavioral health needs. In-Home Intervention also addresses the family's ability to provide effective support for the child or youth, and enhances the family's capacity to improve the child's or youth's functioning in the home and community. Services are directed towards the identified youth and his or her behavioral health needs and goals as identified in the treatment plan or positive-behavior support plan are developed by a qualified behavioral clinician where appropriate. Services include therapeutic and rehabilitative interventions, including counseling and crisis intervention services, with the individual and family to correct or ameliorate symptoms of mental health conditions and to reduce the likelihood of the need for more intensive or restrictive services.

These services are delivered in the family's home or other community setting and promote a family-based focus in order to evaluate the nature of the difficulties, defuse behavioral health crises, intervene to reduce the likelihood of a recurrence, ensure linkage to needed community services and resources, and improve the individual child's/adolescent's ability to self-recognize and self-managed behavioral health issues, as well as the parents' or responsible caregivers' skills to care for their child's or youth's mental health conditions. The In-Home Intervention team provides crisis services to children and youth served by the team.

Key service functions include the following:

- Psychosocial Assessment/Intake – If not previously assessed with completion of a Psychosocial Assessment/Intake, the IHI team can perform the Psychosocial Assessment/Intake as part of the bundled service delivery.
- Individual Counseling
- Family Counseling
- Psychoeducation
- Basic Living Skills
- Crisis intervention (24 hour availability)
- Medication Monitoring
- Mental Health Care Coordination
- Treatment Plan Review

Eligible Provider Type – DMH Mental Illness

In-home intervention for mental illness recipients may be provided by a two-person team minimally composed of the following:

- A rehabilitative services professional staff (all types)
- AND either
- A Qualified Mental Health Provider – Bachelor's

OR

- Certified Mental Health Peer Specialist - Youth

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

All team members must successfully complete an approved Child and Adolescent In-Home Intervention training program.

A Certified Mental Health Peer Specialist- Youth must successfully complete an approved Certified Peer Specialist Youth training program authorized by the appropriate state agency department within six (6) months of the date of hire.

Billing Unit:	One day (children)
Maximum Units:	140 per year
Billing Restrictions:	May not be billed in combination with Crisis Intervention (H2011), Individual Counseling (90832, 90834, 90837), Family Counseling (90846, 90847, 90849), Treatment Plan Review (H0032), Mental Health Care Coordination (H0046), Psychoeducation (H2027), Basic Living Skills (H0036), Medication Monitoring (H0034), or Therapeutic Mentoring (H2019-HN) while a family is enrolled in In-Home intervention.

Location

This cannot be provided in an Inpatient hospital setting or Inpatient Psychiatric Residential Treatment Facility. Please note that In-Home intervention, while by definition and practice is usually provided in the child or adolescent consumer's home, infrequently may be provided in non-traditional settings including educational, child-welfare, family court, local parks, or clinic, etc. Such exceptions will not render the service ineligible for billing.

Additional Information

- Medicaid covers this service for mental illness diagnoses only.
- Only persons who meet the definition for Serious Emotional Disturbance (SED) and meet the criteria are eligible for this service.
- The team will primarily be together during the provision of services to children and their families, but some of the services have to be provided separately.
- These services should be billed on a per diem basis while the family is enrolled and receiving in-home intervention services even though a service might not be provided every day.
- Span-billing may be utilized by multiplying the appropriate number of units for the month by the daily rate.
- Covered for children and adolescents only (age 5 to 18 years of age).
- Covered for transitional age young adults (age 18 to 26 years of age).
- The active caseload for a team will not exceed six (6) families.
- In-home must be available other than 8:00 A.M. to 5:00 P.M.
- The intensive nature of this service should be reflected in the average hours of direct service per family per week.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- In-Home Intervention should follow service delivery patterns taught in the DMH approved In-Home Training Program to maintain the consistency and fidelity of the model.
- Treatment Plan must be completed within 30 days of the first therapeutic contact with the consumer. The Treatment Plan should address the treatment needs identified by the DMH approved assessment tool.
- In-Home Intervention Services are discontinued and enrollees are referred to other services when the team is no longer a two-person team. Examples would include the loss of one of the team members, extended illness, maternity leave, etc. exceeding a two week period.
- Utilization will be monitored through retrospective reviews.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Mental Health and Substance Use Disorders Assessment Update (H0031:HF)

HF = Substance Abuse

Definition

A structured interview process that functions to evaluate a recipient's present level of functioning and/or presenting needs. The assessment is used to establish additional or modify existing diagnoses, establish new or additional rehabilitation service goals, assess progress toward goals, and/or to determine the need for continued care, transfer, or discharge. The use of the ADMH Update Assessment tool is a required element.

Deleted: ~~Mental Illness Services~~

Behavioral Health Placement Assessment (H0002-HE) (formerly Pre-Hospitalization Screening)

Definition

A structured interview process conducted by a qualified professional for the purpose of identifying a recipient's presenting strengths and needs and establishing a corresponding recommendation for placement in an appropriate level of care. This process may incorporate determination of the appropriateness of admission/commitment to a state psychiatric hospital or a local inpatient psychiatric unit.

Key service functions include the following:

- A clinical assessment of the recipient's need for local or state psychiatric hospitalization
- An assessment of whether the recipient meets involuntary commitment criteria, if applicable
- Preparation of reports for the judicial system and/or testimony presented during the course of commitment hearing
- An assessment of whether other less restrictive treatment alternatives are appropriate and available
- Referral to other appropriate and available treatment alternatives

Eligible Provider Type – DMH Mental Illness, DHR/ DHR Adult Protective Services

Behavioral Health Placement Assessment may be performed by a person who possesses any one or more of the following qualifications:

- Rehabilitative Services Professional (all types)
- Licensed registered nurse

Billing Unit:	30 minutes
Maximum Units:	4 per day, 16 per year
Billing Restrictions:	None

Location

Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Additional Information

- Providers may bill for time spent in court testimony while a recipient is in an inpatient unit.
- For DMH Mental Illness providers, Z04.6 is covered for this service.
- For DMH Mental Illness providers, this service also covers children/adolescents assessments for appropriate level of care and/or appropriate community-based services to divert from out of home placement.

Basic Living Skills (H0036-HE – Individual; H0036-HE:HQ – Group)

Definition

Psychosocial services provided to an individual or group to restore skills that enable a recipient to establish and improve community tenure and to increase his or her capacity for age-appropriate independent living. This service also includes training about the nature of illness, symptoms, and the recipient's role in management of the illness.

Key services functions include the following:

- Training and assistance in restoring skills such as personal hygiene, housekeeping, meal preparation, shopping, laundry, money management, using public transportation, medication management, healthy lifestyle, stress management, and behavior education appropriate to the age and setting of the recipient
- Patient education about the nature of the illness, symptoms, and the recipient's role in management of the illness

Deleted: ~~Mental Illness Services~~
Added: MI
Deleted: ~~Substance Abuse Services~~
Added: SA

Eligible Provider Type – DMH MI/DMH SA/DHR

Basic living skills may be provided by an individual **SUPERVISED** by a staff member who meets at least one of the following qualifications:

- Rehabilitative Services Professional (all types),
- Licensed Registered nurse,
- Social Service Caseworker (DHR only),

Eligible Provider Type – DYS

Basic living skill may be provided by an individual with at least a high school diploma or GED who is supervised by a staff member who meets at least one of the following qualifications:

- Rehabilitative Services Professional as defined in 105.1.1
- Licensed Registered Nurse

Eligible Provider Type – DHR / DHR Adult Protective Services

Services may be provided by an individual employed by a public provider department who meets the state merit system qualifications for Social Service Caseworker or above, or an employee of an agency or entity under contract to serve the target population of one of the same public provider agencies who meets an approved equivalency for Social Service Caseworker, or above.

Billing Unit:	15 minutes
Maximum Units:	2080 units per year
	20 per day (individual)
	8 per day (group)
Billing Restrictions:	May not be billed in combination with In-Home Intervention (H2021,H2022-HA), ACT (H0040), PACT (H0040-HQ), Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification With Extended On-Site

Psychoeducational Services (H2027-HE – Individual; H2027-HE:HQ – Group) (formerly Family Support and Education)

Definition

Structured, topic specific educational services provided to assist the recipient and the families* of recipients in understanding the nature of the identified behavioral health disorder, symptoms, management of the disorder, how to help the recipient be supported in the community and to identify strategies to support restoration of the recipient to his/her best possible level of functioning.

Key service functions include, as appropriate, but are not limited to education about the following:

- The nature of the illness
- Expected symptoms
- Medication management
- Ways in which the family member can cope with the illness
- Ways in which the family member can support the recipient

Eligible Provider Type– DMH Mental Illness/DHR

Psychoeducational services may be provided by an individual **SUPERVISED** by a staff member who meets at least one of the following qualifications:

- Rehabilitative Services Professional (all types),
- Social Service Caseworker (DHR only),
- Licensed Registered Nurse

Eligible Provider Type – DMH-Substance Abuse

Services may be provided by an individual who meets one of the following eligible provider types:

- Rehabilitative Services Professional I (all types)
- QSAP II
- QSAP III
- CRSS

Eligible Provider Type – DYS

Psychoeducational services may be provided by an individual with at least a high school diploma or GED who is supervised by a staff member who meets at least one of the following qualifications:

- Rehabilitative Services Professional as defined in 105.1.1
- Licensed Registered Nurse

Eligible Provider Type – DHR / DHR Adult Protective Services

Services may be provided by an individual employed by a public provider department who meets the state merit system qualifications for Social Service Caseworker or above, or an employee of an agency or entity under contract to serve the target population of one of the same public provider agencies who meets an approved equivalency for Social Service Caseworker, or above.

Assertive Community Treatment (ACT) (H0040-HE) (H0040-HE:HA)
Program for Assertive Community Treatment (PACT) (H0040-HE:HQ)

Definition

Treatment services provided primarily in a non-treatment setting by a member of an ACT or PACT team, staffed pursuant to ADMH regulations promulgated in the Alabama Administrative Code for adult recipients with serious mental illness or co-occurring substance use and mental health disorders who are in a high-risk period due to an exacerbation of the behavioral health disorder and/or returning from an episode of inpatient/residential psychiatric care, or who are consistently resistant to traditional clinic-based treatment interventions and are difficult to engage in an ongoing treatment program.

Key service functions include, but are not limited to, the following:

- Intake
- Medical assessment and treatment
- Medication administration
- Medication monitoring
- Individual, group, and/or family counseling
- Crisis intervention
- Mental health care coordination
- Case management
- Psychoeducational Services
- Basic living skills

The only services that may be billed in addition to ACT or PACT are Partial Hospitalization (H0035), Intensive Day Treatment (H2012), and Rehabilitative Day Program (H2017).

Eligible Provider Type– DMH Mental Illness

The program must be staffed by an assigned team with a minimum of three FTE staff. The program staff are required to follow the current Community Mental Health Program Standards Manual or subsequent revisions.

Of the three FTE staff, it is required to have a least:

- 1 full-time Rehabilitative Services Professional (master's level clinician)
- 1 full-time Qualified Mental Health Provider – Bachelor's, and
- .50 FTE of either an RN or LPN.

There must be an assigned (ACT or PACT) team that is identifiable by job title, job description, and job function. The team must be staffed in accordance with DMH certification standards. Each member of the team must be known to the recipient and must individually provide services to each recipient in the team's caseload. The team will conduct a staffing of all assigned cases at least twice weekly. The caseload cannot exceed a 1:12 staff to recipient ratio on an ACT team where the part-time psychiatrist is not counted as one staff member or a 1:10 staff to recipient ratio on a PACT team.

All rights reserved. Applicable FARS/DFARS apply.

Billing Unit:	One day
Maximum Units:	365 days per year
Billing Restrictions:	May not be billed in combination with Intake Evaluation (90791), Medical Assessment and Treatment (H0004), Medication Administration (96372-HE), Medication Monitoring (H0034), Basic Living Skills (H0036), Psychoeducation (H2027), Individual (90804-HE), Family (90846-HE, 90847-HE, 90849-HE), Group Counseling (90853-HE), Crisis Intervention (H2011), Mental Health Care Coordination (H0046) , or Treatment Plan Review (H0032) .

Location

The only excluded settings are nursing homes. ACT and PACT services may be billed on a daily basis even though the recipient might not be seen or contacted by the team each day. ACT and PACT services may be billed while a recipient is hospitalized briefly for stabilization or medical treatment. Services can be delivered in any setting that is convenient for both the family and staff member, that affords an adequate service environment, and that protects the recipient's rights to privacy and confidentiality.

Additional Information

- Documentation of the required staffing and all recipient contacts by ACT and PACT team members shall be included in the recipient's medical record. All service documentation shall follow the guidelines in Section 105.2.3.
- Recipient signatures are not required for ACT and PACT key service functions; however, services which are provided outside the ACT and PACT benefit will require recipient signatures.
- H0040 HE, H0040 HE:HA, and H0040-HE:HQ may be span-billed by multiplying the appropriate number of units for the month by the daily rate. Benefits are limited to 365 units per calendar year.
- H0040, H0040 HE:HA, and H0040 HE:HQ services delivered by the psychiatrist or physician extender (CRNP and PA) can be delivered both face to face and their telemedicine (virtual).
- Utilization will be monitored through retrospective reviews.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). Opioid Use Disorder Treatment (H0020: HF - Methadone, H0020: HF:AM – Buprenorphine, J2315:HF - Vivitrol)

Definition

The administration of medication, including the use of FDA approved medications for the use of opioid use disorders, to recipients who have a diagnosed opioid use disorder. Medication is administered to support the recipient's efforts to restore adequate functioning in major life areas that have been debilitated as a result of opioid addiction. This service includes medication administration and concurrent related medical and clinical services.

Eligible Provider Type – DMH SA

The program must be staffed as specified in current and subsequent revisions of:

(1) State regulations established for this service by the Alabama Department of Mental Health and published in the Alabama Administrative Code; and

(2) Federal regulations established for this service by the Substance Abuse and Mental Health Services Administration

Eligible Provider Type for Administration of Medication:

- Physician
- Physician's Assistant
- CRNP
- RN
- LPN

Billing Unit:	One day
Maximum Units:	365 per year for H0020. 1 per month for J2315

Location

Services can be delivered in any setting that is acceptable for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality. Location should be in compliance with all applicable federal, state, and local codes.

Additional Information

H0020 may be span billed by multiplying the appropriate number of units for the month by the daily rate. Benefits are limited to 365 units per year. Please utilize the AM modifier when billing for Buprenorphine. Utilization will be monitored through retrospective reviews.

Peer Support Services (Youth: H0038-HE:HA- or HE:HA:HQ (Group), Adult: H0038 HE or HE:HQ (Group) or- HF or HF:HQ (Group), Parent; HE:HS or HE:HS:HQ (Group)

Definition

Peer Support Service (Adult/Child and Adolescent/Family/Recovery Support Specialist) – Peer Support services provides structured, scheduled activities that promote socialization, recovery, self-advocacy, development of natural supports, and maintenance of community living skills, by Certified Peer Specialists (Adult, Youth, Family Peer Specialists, Recovery Support Specialist). Peer Support service actively engages and empowers an individual and his/her identified supports in leading and directing the design of the service plan and thereby ensures that the plan reflects the needs and preferences of the individual (and family when appropriate) with the goal of active participation in this process. Additionally, this service provides support and coaching interventions to individuals (and family when appropriate) to promote recovery, resiliency and healthy lifestyles and to reduce identifiable behavioral health and physical health risks and increase healthy behaviors intended to prevent the onset of disease or lessen the impact of existing chronic health conditions. Peer supports provide effective techniques that focus on the individual's self-management and decision making about healthy choices, which ultimately extend the members' lifespan. Family peer specialists assist children, youth, and families to participate in the wraparound planning process, access services, and navigate complicated adult/child-serving agencies.

Psychosocial Rehabilitation Services – Working Environment (H2025-HE, H2025-HF)

Definition

Psychosocial services that provide rehabilitative supports with the goal of restoring skills needed to be prepared for community-living activities that may result in employability, promote recovery/wellness, prevent the escalation of a mental health condition into a crisis situation or into a chronic/significantly disabling disorder, improve community-based functioning, alleviate symptoms, and decreasing isolation. The goal of the service is to help recipients be prepared for community-living/activities that may ultimately result in employability. This service does not include educational, vocational or job training services.

Screening (H0049-HF)

Definition

An encounter in which a brief, valid, questionnaire is administered by trained personnel to examine the context, frequency, and amount of alcohol or other drugs used by a recipient. This process seeks to identify recipients who have an alcohol or drug use disorder or are at risk for development of such. The service includes feedback on the screening results, and recommendations and referral for additional services, if indicated. This is a covered service for recipients whose use of alcohol and/or drugs has adversely impacted functioning in a major life area.

Therapeutic Mentoring (H2019-HE:HA, H2019-HE:HA:HQ)

Definition

Therapeutic Mentoring Services provide a structured one on one intervention to a child or youth and their families that is designed to ameliorate behavioral health-related conditions that prevent age-appropriate social functioning. This service includes supporting and preparing the child or youth in age-appropriate behaviors by restoring daily living, social and communication skills that have been adversely impacted by a behavioral health condition. These services must be delivered according to an individualized treatment plan and progress towards meeting the identified goals must be monitored and communicated regularly to the clinician so that the treatment plan can be modified as necessary. Therapeutic mentoring may take place in a variety of settings including the home, or other community settings. The therapeutic mentor does not provide social, educational, recreational or vocational services.

Component Services include:

- Basic Living Skills
- Social Skills Training
- Coping Skills Training
- Assessment
- Plan Review
- Progress Reporting
- Transition Planning

Eligible Provider Type – All State Agencies

- Rehabilitative Services Professional (all types)
- Social Service Caseworker
- Licensed Registered Nurse
- Licensed Practical Nurse
- Qualified Mental Health Provider – Bachelor's Or,
- Qualified Mental Health Provider – Non-Degreed

Therapeutic Mentors must successfully complete an approved AMA Therapeutic Mentor training program authorized by the appropriate participating state agency within six (6) months of date of hire.

Billing Unit:	15 minutes
	8 units (unit = 15 minutes) per day, individual
	8 units (unit = 15 minutes) per day, group

Community-Based Adults Mobile Crisis Response and Stabilization – Adult Mobile Crisis Team (MCT) (S9485-HE)

Definition

Adult Mobile Crisis Teams (MCT) are designed to specifically diffuse and mitigate a behavioral health crisis. Adult MCT services offer community-based interventions to adults and their families experiencing a behavioral health crisis-whether in their homes, schools, or communities. The Adult MCT provides crisis stabilization services to adults and their families/caregivers, experiencing a behavioral health crisis. The Adult Mobile Crisis Services (MCS) may be delivered in-person, in-home, and/or in community settings, and is available within a timely manner. . Telemedicine and telephonic support may be provided until in-person response arrives and or as follow-up post crisis regarding coordination and referrals.

Services to be provided may include:

- Intake Evaluation
- Crisis Intervention
- Behavioral Health Placement Assessment
- Psychoeducational Services
- Individual Counseling
- Family Counseling
- Mental Health Care Coordination
- Adult Peer Support Services

Response from MCTs is in teams of two; however, this may differ if the team is dispatched from a staffed facility or if, as in rural communities, telemedicine services are utilized. The two-person team is available 24 hours a day, 7 days per week and can travel throughout the state to respond on location. The stabilization service supports the adult's ability to manage daily activities and establishes clear connections to treatment services and community supports to reduce the likelihood of ongoing behavioral health crises. Services may also include follow up interventions for a period of up to 72 hours after the initial response that may include, where appropriate, additional MCS and/or behavioral health crisis intervention services, de-escalation, and coordination with and referrals to health, social, emergency management, and other services and supports as needed to effect symptom reduction and harm reduction. If continued stabilization services are identified after 72 hours, a stabilization plan must be developed for coordination with referrals for continued stabilization services.

Eligible Provider Type – DMH Mental Illness

Adult MCT ("Team") must include a team of at least two of the following licensed and/or credentialed clinician, one of whom is in a supervisory role who has expertise and experience using evidence-based assessment tools with target populations:

- Rehabilitative Service Professional (Masters' Level and Above)
- Qualified Mental Health Provider (Bachelors' Level)
- Mental Health Certified Adult Peer (CPS-A)
- Certified Recovery Support Specialist (CRSS)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

In order to claim enhanced Federal Medical Assistance Percentage (eFMAP) for services using the 'community based mobile crisis intervention services' model, the requirements described in section 1947(b) of the Act must be met, including providing services to persons outside of a hospital or other facility setting, through a multidisciplinary team, trained in trauma-informed care, de-escalation strategies, and harm reduction.
The team must include, at a minimum, at least one individual who may conduct an assessment within their authorized scope of practice under state law and other professionals or paraprofessionals with appropriate expertise in behavioral health care.
Certified Mental Health Peer Specialists (DMH-MI) – Adult and Certified Recovery Support Specialists (DMH-SA) must successfully complete an approved AMA Peer training program authorized by the appropriate state agency department within six (6) months of date of hire.

Billing Unit:	1 episode
Maximum Units:	1 episode per 72 hours, 96 per year
Billing Restrictions:	May not be billed in combination with Intake Evaluation (90791), Crisis Intervention (H2011), Individual Counseling (90832, 90834, 90837), Family Counseling (90846, 90847, 90849), Mental Health Care Coordination (H0046), Psychoeducational Services (H2027), Behavioral Health Placement Assessment (H0002), and Mental & Substance Use Disorders Assessment (H0031-HF). Also, CPS-Adult (H0038-HE) and CRSS (H2019) when the team member is a Certified Mental Health Peer Specialist – Adult or CRSS.

Location

Services can be delivered in any setting that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment and that protects the recipient's rights to privacy and confidentiality.

Additional Information

Utilization will be monitored through retrospective reviews.

Community-Based Youth Mobile Crisis Response and Stabilization – Youth Mobile Crisis Team (MCT) S94f85-HE:HA

Definition

Youth Mobile Crisis Teams (MCT) are designed to specifically diffuse and mitigate a behavioral health crisis. Youth MCT services offer community-based interventions to youth and their families experiencing a behavioral health crisis-whether in their homes, schools, or communities. The Youth Mobile Crisis Services (MCS) may be delivered in-person, in-home, and/or in community settings, and is available within a timely manner. Telemedicine and telephonic support may be provided until in-person response arrives and or as follow-up post crisis regarding coordination and referrals.

Services to be provided may include:

- Intake Evaluation
- Crisis Intervention
- Behavioral Health Placement Assessment
- Psychoeducational Services
- Individual Counseling
- Family Counseling
- Mental Health Care Coordination
- Youth Peer Support Services

Response from MCTs is in teams of two; however, this may differ if the team is dispatched from a staffed facility or if, as in rural communities, telemedicine services are utilized. The two-person team is available 24 hours a day, 7 days per week and can travel throughout the state to respond on location. The stabilization service supports the child/adolescent's ability to manage daily activities and establishes clear connections to treatment services and community supports to reduce the likelihood of ongoing behavioral health crises. Services may also include follow up interventions for a period of up to 72 hours after the initial response that may include, where appropriate, additional MCS and/or behavioral health crisis intervention services, de-escalation, and coordination with and referrals to health, social, emergency management, and other services and supports as needed to effect symptom reduction and harm reduction. If continued stabilization services are identified after 72 hours, stabilization plan must be developed for coordination with referrals for continued stabilization services.

Eligible Provider Type – DMH Mental Illness

Youth MCT ("Team") must include a team of at least two of the following licensed and/or credentialed clinician, one of whom is in a supervisory role who has expertise and experience using evidence-based assessment tools with target populations:

- Rehabilitative Service Professional (Masters' Level and Above)
- Qualified Mental Health Provider (Bachelors' Level)
- Mental Health Certified Youth Peer (CPS-Y)
- Certified Recovery Support Specialist (CRSS)

105.2.2 Reimbursement

The Medicaid reimbursement for each service provided by a rehabilitative services provider is based on the following criteria and does not exceed the lowest of the following amounts:

- The customary charges of the provider but not more than the prevailing charges in the locality for comparable services under comparable circumstances
- The amount billed
- The fee schedule established by Medicaid as the maximum allowable amount
- Reimbursement for services provided by state agencies is based on actual costs as follows:
- Agencies must submit an annual cost report not later than 60 days following the close of the fiscal year. This report must indicate not only the costs associated with providing the services, but also statistical data indicating the units of service provided during the fiscal year.
- Medicaid will review cost reports for reasonableness and an average cost per unit of service will be computed.
- Medicaid will use the average cost, trended for any expected inflation, as the reimbursement rate for the succeeding year.
- If the cost report indicates any underpayment or overpayment for services during the reporting year, Medicaid will make a lump sum adjustment.
- New rates are effective January 1 of each year.

Actual reimbursement is based on the rate in effect on the date of service. Only those services that qualify for reimbursement are covered under this program.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

105.2.3 Requirements for Recipient Intake, Treatment Planning, and Service Documentation

An intake evaluation must be performed for each recipient considered for initial entry into organized programs or course of covered services. Individuals who are transferred between programs within an agency do not require a new intake at the time of transfer.

To determine a recipient's need for rehabilitative services, providers must perform an intake evaluation based on assessment of the following information:

- Family history
- Educational history
- Relevant medical background
- Employment/vocational history
- Psychological/psychiatric treatment history
- Military service history
- Legal history
- Alcohol/drug use history
- Mental status examination
- A description of the significant problems that the recipient is experiencing

Providers use the standardized substance abuse psychosocial assessment as the intake instrument for substance abuse recipients.

Eligible Provider Type -- DMH Mental Illness

A written treatment plan (service plan, individualized family service plan, plan of care, etc.) must be completed by the fifth outpatient service, within ten working days after admission in all day programs or residential program, or within other time limits that may be specified under programs specific requirements.

The treatment plan must include the following:

- Represents a person-centered, recovery-oriented treatment planning process through which consumers are assisted to articulate their vision and hope for how their lives will be changed for the better within three to five years (long term recovery vision), to identify short-term outcomes that will assist in achieving the recovery goal (treatment goals), and to specify services and supports including referrals to outside agencies necessary to overcome barriers to achieving the outcomes (necessary services and supports)
- Identifies needed safety interventions based on history of harm to self or others
- Uses a strengths-based approach to treatment planning by identifying consumer and environmental positive attributes that can be used to support achievement of goals and objectives
- Identifies psychiatric, psychological, environmental, and skills deficits that are barriers to achieving desired outcomes

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Identifies treatment and supports that are needed to address barriers to achieving desired therapeutic goal

Deleted: ~~Substance Abuse Services~~
Added: SA

Eligible Provider Type – DMH SA/DHR/DYS/DHR Adult Protective Services

A written treatment plan (service plan, individualized family service plan, plan of care, etc.

Must be completed by the fifth outpatient services, within ten working days after admission in all day programs or residential program, or within other time limits that may be specified under programs specific requirements. For SA services, the patient, counselor, and licensed staff as noted above must all approve the treatment plan prior to the provision of SA treatment services.

- Identification of the clinical issues that will be the focus of treatment
- Specific services necessary to meet the recipient's needs
- Referrals as appropriate for needed services not provided directly by the agency
- Identification of expected outcomes toward which the recipient and therapist will be working to impact upon the specific clinical issues

  Unless clinically contraindicated, the recipient will sign/mark the treatment plan to document the consumer's/recipient's participation in developing and/or revising the plan. If the recipient is under the age of 14 or adjudicated incompetent, the parent/foster parent/legal guardian must sign the treatment plan.

Eligible Provider Type - All State Agencies:

The treatment plan must be approved in writing by any one of the following:

- Physician
- Physician Assistant
- Certified Registered Nurse Practitioner (CRNP)
- Rehabilitative Services Professional (licensed only)

Eligible Provider Type – DHR/DHR Adult Protective Services

- Service Supervisor
- Senior Social Work Supervisor

For SA services, the patient, counselor, and licensed staff as noted above must all approve the treatment plan prior to the provision of SA treatment services.

Services may be provided and billed between the initial intake service and the development of the treatment plan if provided within the allowed timeframe for treatment plan development. Once the treatment plan is developed, service types must be specified in the treatment plan in order to be paid by Medicaid, with the exception of intake evaluation, crisis intervention and resolution, mental health care coordination, behavioral health placement assessment, mental health and substance use disorders assessment update, and

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

treatment plan review. Changes in the treatment plan must be approved as described above.

The preferred course of treatment for persons with co-occurring disorders (MI/SA) is integrated services where both mental illness and substance abuse clinical issues are addressed in the same treatment setting, whether that setting primarily provides mental illness or substance abuse treatment. In cases where integrated services are not possible, a co-occurring recipient may receive mental illness and substance abuse services simultaneously from one or more certified providers. In cases where mental illness and substance abuse services are provided independently, the daily caps specific to each service are cumulative for the day and are not interactive.

In all cases, the diagnosis and treatment plan should reflect both disorders and the interventions needed for both.

After completion of the initial treatment plan, staff must review the recipient's treatment plan once every three months to determine the recipient's progress toward treatment objectives, the appropriateness of the services furnished, and the need for continued treatment. Providers must document this review in the recipient's clinical record by noting on the treatment plan that it has been reviewed and updated or continued without change. Staff, as specified above, must perform this review. For DMH MI and SA services, the treatment plan review must be completed and signed by the appropriate staff in the required time frame in order to continue billing for services

Treatment plan reviews are not covered in cases where only an intake or diagnostic assessment is provided with no further treatment. One treatment plan review is covered following a three-month interval of no services delivered. Any subsequent reviews with no intervening treatment are disallowed.

Documentation in the recipient's record for each session, service, or activity for which Medicaid reimbursement is requested must comply with any applicable certification or licensure standards and must include the following, at a minimum:

- The identification of the specific services rendered
- The date and the amount of time that the services were rendered (to include the time started and the time ended)
    - For Mental Health Care Coordination, Diagnostic Testing, Behavioral Health Placement Assessment, Basic Living Skills, and Crisis Intervention which can be provided in multiple, non-continuous times during the same day, it is permissible to aggregate the billable hours that are delivered at different times during the day and to write one note that covers all the different times showing one beginning and ending time covering the time span from start to finish with that consumer and service for that day.
    - Partial Hospitalization (for DMH MI providers only), Adult Intensive Day Treatment, Rehabilitative Day Program, Child and Adolescent Day Treatment, Assertive Community Treatment, Program for Assertive Community Treatment, and In-Home Intervention which are billed either hourly up to a daily maximum or per diem will show the time the service is started for the day and ended for the day.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The signature of the staff person who rendered the services
- The identification of the setting in which the services were rendered
- A written assessment of the recipient's progress, or lack thereof, related to each of the identified clinical issues discussed

All entries must be legible and complete, and must be signed and dated by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. The author of each entry must be identified and must sign his or her entry.

Documentation of Medicaid recipients' signatures may be entered on a sign-in log, service receipt, or any other record that can be used to indicate the recipient's signature and the date of service. The recipient's signature is only required one time per day that services are provided (for DMH MI, DHR, and DYS providers only). Treatment plan review, mental health care coordination, behavioral health placement assessment, crisis intervention, psychoeducational services, ACT, PACT, C&A In-Home Intervention, and any non-face-to-face services that can be provided by telephone do not require recipient signatures.

ACT and PACT services are billed as a bundled service on a daily rate even though the recipient might not be seen or contacted by the team each day. Documentation of the required staffing and any service provided to or on behalf of a recipient must be included in the recipient's medical record.

When clinical records are audited, Medicaid will apply the list of required documentation to justify payment. Documentation failing to meet the minimum standards noted above will result in recoupment of payments.

Additional Information

Documentation

Documentation should not be repetitive (examples include, but are not limited to the following scenarios):

- Progress Notes that look the same for other recipients.
- Progress notes that state the same words day after day with no evidence of progression, maintenance or regression.
- Treatment Plans that look the same for other recipients.
- Treatment Plans with goals and interventions that stay the same and have no progression.

Progress Notes

- Progress Notes should not be **preprinted** or predated with the exception that a group therapy note may have a general section that identifies the participants (i.e. the number of participants, etc.), the topic, and a general description of the session which is copied for each participant. However, each participant must also have individualized documentation relative to his/her specific interaction in the group and how it relates to their treatment plan.

- The progress note should match the goals on the plan and the plan should match the needs of the recipient. The interventions should be

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

appropriate to meet the goals. There should be clear continuity between the documentation.

- Progress Notes must provide enough detail and explanation to justify the amount of billing.

Treatment Plan

- The Treatment Plan should not be signed or dated prior to the plan meeting date.

Authentication

- Authors must always compose and sign their own entries (whether handwritten or electronic). An author should never create an entry or sign an entry for someone else or have someone else formulate or sign an entry for them. If utilizing a computer entry system, the program must contain an attestation signature line and time/date entry stamp.
    - If utilizing a computer entry system, there must be a written policy for documentation method in case of computer failure/power outage.

Corrections

Corrections must be made legally and properly by drawing a line through the entry and making sure that the inaccurate information is still legible. Write "error" by the incorrect entry and initial. Do not obliterate or otherwise alter the original entry by blacking out with marker, using whiteout, or writing over an entry. White Out, Liquid Paper, or any form of correctional fluid or correctional tape is not acceptable on **any** records whether being used as a corrective measure or to individualize an original template or for any other reason.

If Rehab Services are rendered to more than one eligible recipient in a household, the service documentation must include the following information:

All documentation must be individualized to each eligible recipient's visit.

There must be enough documentation in the recipient's file that support that the services rendered are specific to his/hers Treatment Plan.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

105.2.4 Requirements for Supervision/Monitoring and Complaint Procedure for Unlicensed Providers

Supervision/Monitoring

In order to regulate the quality of services performed by unlicensed allied mental health providers, all behavioral health services rendered by non-licensed individuals are required to be authorized by and performed under the supervision of a qualified supervisor as determined by the participating state agency (DMH/DHR/DYS).

Services provided by an individual in a clinical practicum authorized by the respective degree-granting institution will be supervised as required by that institution and by the supervising agency. Services provided by an individual with an approved master's degree that did not have a practicum or who are in the required post-master's internal practicum period must be supervised as required by the respective certifying state agency and the supervising agency's policies and procedures. Documentation of services provided by these individuals must meet all documentation requirements and be co-signed by the supervisor. Services rendered by individuals in these specific categories of supervision are billable under the supervisor's credential

Each participating state agency (DMH/DHR/DYS) must abide by their policy/guidelines that have been developed outlining any service billed to Medicaid under this chapter.

NOTE:
The permitting of unlicensed allied mental health professionals to provide services does not authorize as party to hold themselves out as a licensed professional or as titled professional for which a license is required.

Complaints

Complaints received to the Alabama Medicaid Agency against unlicensed providers will be forwarded to the appropriate state agency (employing the unlicensed provider) for investigation. Each participating state agency (DMH/DHR/DYS) must abide by their policy/guidelines that have been developed outlining complaint investigation procedure and submit a report of findings and actions taken (if any) to the Alabama Medicaid Agency. The Alabama Medicaid Agency may also conduct an investigation in reference to the received complaint.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

105.3 Prior Authorization and Referral Requirements

Rehabilitative services procedure codes generally do not require prior authorization. (PA), except for circumstances when a Rehab Option provider determines that it is medically necessary to provide treatment services that goes beyond the indicated service limits for a recipient eligible under EPSDT (under age 21). Medical necessity will be established from the recipient's condition at the time of the request, not the diagnosis alone. PA requests for such EPSDT service limits must be submitted to Gainwell within the designated timeframe for services requested utilizing the process as outlined at: www.medicaid.alabama.gov. To receive approval for a PA request, you must submit a complete request using the approved submission form(s) found at www.medicaid.alabama.gov. Form(s) must be legible, include physician's signature and must provide clinical documentation to support the requested EPSDT coverage request. It is the responsibility of the Rehabilitation Option service provider to obtain authorization prior to rendering the service. Direct all inquiries and requests relating to prior authorization for recipients eligible for EPSDT (under age 21) to the fiscal agent Provider Assistance Center at 1-800-688-7989.

This process applies to DMH (MI/SA) and DYS rehabilitative services providers only. DHR providers will continue with the EPSDT process that is currently in place.

Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines. Rehabilitative services do not require an Alabama Coordinated Health Network (ACHN) referral.

105.4 Cost Sharing (Copayment)

Copayment does not apply to rehabilitative services.

105.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Rehabilitative services providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claims processing turnaround
- Ability to immediately correct claim errors
- Online adjustments capability
- Enhanced access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:
When an attachment is required, a hard copy CMS-1500 claim form must be submitted.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

105.5.1 Time Limit for Filing Claims

Medicaid requires all claims for rehabilitative services to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions for more information regarding timely filing limits and exceptions.

105.5.2 Diagnosis Codes

The International Classification of Diseases - 10th Revision - Clinical Modification (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

NOTE:

ICD-10 diagnosis codes, within the range of F0150-F69 and F90-F99 must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field. The Z code unspecified psychosocial circumstance is covered only for children and adolescents or adults receiving DHR protective services. Claims filed for pregnant women (SOBRA) must include V222 (pregnant state, incidental) as well as the appropriate MI/SA diagnosis code.

105.5.3 Procedure Codes and Modifiers

The (837) Professional and Institutional electronic claims and the paper claim have been modified to accept up to four Procedure Code Modifiers. Use the modifiers to distinguish mental illness/substance abuse, adult/child and adolescent, individual/group services.

Modifier 59 (Distinct Procedural Service)

Under certain circumstances eligible DMH MI-SA/DHR/DYS staff may need to indicate that a procedure or service was distinct or independent from other services performed on the same day. Modifier 59 is used to identify procedures/services that are not normally reported together, but are appropriate under the circumstances. This may represent a different session or patient encounter, not ordinarily encountered or performed on the same day by the same eligible DMH MI-SA/DHR/DYS staff. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used.

According to the CPT book, modifier 59 is described as being necessary to describe a distinct procedural service. This modifier should only be used to show a distinct procedural service when a comprehensive/component coding pair is billed. Modifier 59 should not be billed to represent that multiple services of the same procedure code were performed.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A comprehensive/coding pair occurs when one code is considered a component procedure and the other code is considered a comprehensive procedure. These code pairs are frequently referred to as bundled codes thus meaning the component code is usually considered an integral part of the comprehensive code. Therefore, in most instances the most comprehensive code only should be billed and the component code should be denied as re-bundled or mutually exclusive.

Modifier 59 should only be used in conjunction with a comprehensive/ coding pair procedure when appropriately unbundling the code pair. This modifier 59 should not be billed with the comprehensive code. The component code can be unbundled or allowed separately, in certain situations. If the two services are performed at two different times of day, then modifier 59 can be submitted with the component procedure code.

In order to communicate the special circumstances of the component/ comprehensive code pair unbundling, diagnoses codes must be utilized as appropriate on the claim form. In some cases, it may be necessary to attach a detailed explanation of services rendered to further explain the reason for the unbundling of code pairs.

CMS publishes the National Correct Coding Initiative Coding Policy Manual for Medicare and Medicaid Services (https://www.medicaid.gov/medicaid/program-integrity/ncci/index.html) and this may be used as a reference for claims-processing edits. The manual is updated annually, and the NCCI edits are updated quarterly. It is the responsibility of the provider to check the site quarterly for any billing-related updates.

105.5.4 Place of Service Codes

The following place of service codes applies when filing claims for rehabilitative services:

POS Code	Description
03	School
11	Office
12	Home
31	Skilled Nursing Facility or Nursing Home
32	Nursing Facility
33	Custodial Care Facility
34	Hospice
52	Psychiatric Facility Partial Hospitalization
53	Community Rehabilitative Services Center
55	Residential Substance Abuse Treatment Facility
56	Psychiatric Residential Treatment Center
99	Other Unlisted Facility

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

105.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to Claims with Third Party Denials.

Refer to Section 5., Required Attachments, for more information on attachments.

105.5.6 Billing Instructions for Medical-related Services

Instructions for Claims with Dates of Service August 1, 2000 and Thereafter

1. Bill Medicare on a UB-04.
2. Services covered by Medicare should be automatically crossed over to Medicaid as a UB-04 outpatient crossover. If for some reason the claim never crosses over or the claim is denied after crossing over, send an Institutional Medicaid/Medicare-related claim form to Medicaid using the same information as it was sent to Medicare. Indicate coinsurance, deductible, and allowed amounts as applied by Medicare.
3. If Medicare does not pay on any part of the services, bill the amount due for the services on a CMS-1500 claim form using procedure codes listed in the provider manual. Please refer to the latest edition of the Provider Electronic Solutions User Manual for more information on submitting an override electronically. For paper claims, enter “key TPL input code M” in block 19 of the CMS-1500 form.

105.5.7 Billing Instructions for Medicare-Related Services

A. Partial Hospitalization Program – Medicare covers such services as education training, group therapy, activity therapy, etc. These services are billed to Medicare on a UB-04 claim using procedures codes (e.g. G0177, G0176, 90853, 90816, 90818, 90791, etc.).

1. Services **covered** by Medicare should be filed with Medicaid on a **Medical Medicaid/Medicare-related crossover claim form**, either electronically or on paper. Bundle all Medicare paid services together and use H0035-HE procedure code/modifier. Indicate the total coinsurance, deductible, allowed, and paid amounts as applied by Medicare.
2. Services **not covered** by Medicare should be filed with Medicaid as a straight Medicaid claim on a CMS-1500 claim form using the procedure codes listed in the provider manual since Medicaid covers these services. These claims must be submitted with an override code in order for Medicaid to consider payment and not reject the claim for Medicare coverage. For paper claims, enter “key TPL input code M” in block 19 of the CMS-1500 form. For an electronic override, submit a delay reason code of ‘11’. Please refer to the latest edition of the Provider Electronic Solutions User Manual for more information on submitting an override electronically.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

B. Service covered by Medicare rendered by Medicare enrolled provider (e.g., LCSW):

1. For the recipient with Medicaid/Medicare (non-QMB), the LCSW is covered by Medicare; but not Medicaid. After the payment has been received by Medicare; file Medicaid on **Medical Medicaid/Medicare-related crossover claim form** with the provider (clinic's) NPI and the clinic's secondary provider number. Do not file these claims using any of the LCSW's provider number.
2. For the recipient with QMB coverage, the LCSW is covered by Medicare and Medicaid. These claims will crossover from Medicare and Medicaid will process with the enrolled LCSW's provider number if billed appropriately to Medicare.

C. Medicaid Covered Service either not covered by Medicare or rendered by provider not allowed to enroll in Medicare:

1. For services not covered by Medicare or for services rendered by a provider not enrolled in Medicare, claims should be filed with Medicaid as a straight Medicaid claim on a CMS-1500 claim form using the procedure codes listed in the provider manual since Medicaid covers these services. These claims must be submitted with an override code in order for Medicaid to consider payment and not reject the claim for Medicare coverage. For paper claims, enter "key TPL input code M" in block 19 of the CMS-1500 form. For an electronic override, submit a delay reason code of '11'. Please refer to the latest edition of the Provider Electronic Solutions User Manual for more information on submitting an override electronically.

106

106 Targeted Case Management

Case management services are comprehensive services that assist eligible individuals in gaining access to needed medical, social, educational and other services. Targeted Case Management (TCM) services assist specific eligible recipients, or targeted individuals, to access other services.

Targeted Case Management cannot provide services in total care environments, such as nursing facilities, hospitals, and residential programs unless the recipients are in Adult Protective Services Target Group 7, or this target group includes individuals transitioning to a community setting. Case management services will be available for up to 180 consecutive days of a covered stay in a medical institution. The target group does not include individuals between ages 22 and 64 who are served in Institutions for Mental Disease or individuals who are inmates of public institutions. (State Medicaid Letter (SMDL), July 25, 2000). Also excluded are adults 21 and older receiving services in an Institution for Mental Disease (IMD).

Medicaid recipients may receive TCM services in more than one target group, or case management services from another program if the Agency determines this would not present a duplication of services. Refer to the section, “Duplicate Billing” in this chapter for additional information.

Target Group	***Recipients***	***Description***
Target Group 1	Mentally ill adults	Medicaid-eligible individuals age 18 and over who have been diagnosed with mental illness
Target Group 2	Intellectually Disabled Adults	Medicaid-eligible individuals age 18 and over who have been diagnosed with an intellectual disability.
Target Group 3	Disabled children	Medicaid-eligible individuals age 0-21 who are considered disabled
Target Group 4	Foster children	Medicaid-eligible individuals age 0-20 or until the individual reaches age 21 who are in the care, custody, or control of the state of Alabama
Target Group 5	Pregnant women	Medicaid-eligible women of any age in need of maternity services
Target Group 6	AIDS/HIV-positive individuals	Medicaid-eligible individuals of any age who have been diagnosed as having AIDS or being HIV-positive
Target Group 7	Adult protective service individuals	Medicaid-eligible individuals age 18 and over who are at risk of abuse, neglect, or exploitation
Target Group 8	Technology Assisted (TA) Waiver for adults	Medicaid-eligible individuals age 21 and over who meet the eligibility criteria for the TA Waiver
Target Group 9	Individuals with a Diagnosed Substance Use Disorder	Medicaid-eligible individuals of any age who have been diagnosed with a substance use disorder.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Target Group	*Recipients*	*Description*
Target 10	Disabled Children with ASD or SED and SMI Adults – High Intensity Care Coordination	Medicaid-eligible individuals age 0-20 or until the individual reaches age 21 who have Autism Spectrum Disorder (ASD) or a Serious Emotional Disturbance (SED) or an adult with a Severe Mental Illness (SMI) and requires High Intensity Care Coordination.

The policy provisions for TCM providers can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 40.

106.1 Enrollment

Providers/Subcontractors will submit a written request to the State Agency/Contractor for enrollment to the Targeted Case Management (TCM) Services Program. The request must contain the TCM target group to be covered: the name, address, and phone number of the provider agency; the name, address, and phone number of the payee (if different from the provider); the name and phone number of the contact person; and the tax ID number of the payee.

Subcontract providers must have a contract with the primary provider and be certified through the appropriate State Agency. A copy of this contract will be submitted with the request to enroll as a TCM provider.

A memo along with the Provider File Update Request Form must be forwarded to the Targeted Case Management (TCM) Unit with the assigned NPI, procedure code, and rate with the enrollment request information. This information will be sent to the Fiscal Agent Liaison and will be loaded to the pricing file.

The TCM Unit will notify the State Agency/Contractor of the effective date of enrollment in writing when the enrollment process has been completed.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a TCM provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for case management-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

TCM providers, with the exception of Target Group 9 providers, are assigned a provider type of 21 (Targeted Case Management). The assigned provider type for Target Group 9 is 11 (Mental Health). Valid specialties for TCM providers include the following:

- Mentally Ill Adults (209)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Intellectually Disabled Adults (229)
- Disabled Children (650)
- Foster Child (217)
- Pregnant Women (210)
- AIDS/HIV Positive Individuals (211)
- Adult Protective Services (640)
- Technology Assisted (TA) Waiver Eligible Adults (590)
- Individuals with a Diagnosed Substance Use Disorder (113)
- Autism Spectrum Disorder – High Intensity Care Coordination (212)

Enrollment Policy for TCM Providers

To participate in the Alabama Medicaid Program, Targeted Case Management providers must meet the following requirements:

- Demonstrate the capacity to provide the core elements of case management, including assessment, care and services plan development, linking and coordination of services, and reassessment and follow-up
- Demonstrate case management experience in coordinating and linking community resources as required by the target population
- Demonstrate experience with the target population
- Provide the administrative capacity to ensure quality of services in accordance with state and federal requirements
- Maintain a financial management system that provides documentation of services and costs
- Demonstrate the capacity to document and maintain individual case records in accordance with state and federal requirements
- Demonstrate the ability to ensure a referral process consistent with Section 1902(a)23 of the Social Security Act, freedom of choice of provider
- Demonstrate the capacity to meet the case management service needs of the target population
- Provide an approved training program certified by Medicaid to address the needs and problems of the recipients served
- Provide a quality assurance program for case management services approved and certified by Medicaid. The quality assurance program includes record reviews at a minimum of every six months.
- Fully comply with Title VI and VII of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans with Disabilities Act of 1990
- Fully comply with applicable federal and state laws and regulations

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

106.1.1 Minimum Qualifications for Individual Targeted Case Managers

Individual Targeted Case Managers for target groups 1, 2, 3, 9, and 10 must meet the following minimum educational qualifications:

- Possess a Bachelor of Arts or a Bachelor of Science degree, preferably in a human services related field or social work program, or possess certification as a registered nurse.

Individual Case Managers for Foster Children (Target Group 4) and Adult Protective Service individuals (Target Group 7) must be employed by DHR and meet the following qualifications:

- Possess a Bachelor of Arts or a Bachelor of Science degree, preferably in a human service field, or
- Possess certification as a registered nurse

In addition to the minimum educational requirements, Targeted Case Managers must complete training in a case management curriculum approved by Medicaid and other applicable state agencies. Specific requirements for each target group are listed in the following paragraphs.

106.1.2 Minimum Qualifications for Each Target Group

Minimum Qualifications for Target Group 1 Providers

TCM providers for Mentally Ill Adults (Target Group 1) must meet the minimum educational qualifications listed in Section 106. 1.1 and must complete training in a case management curriculum approved by Medicaid and the Department of Mental Health.

TCM providers for Mentally Ill Adults (Target Group 1) must be Regional Boards incorporated under Act 310 of the 1967 Alabama Acts & Comprehensive Community Health Centers who have demonstrated the ability to provide targeted case management services directly, or the Alabama Department of Mental Health. TCM providers for Mentally Ill Adults must be certified and provide services through a contract with the Department of Mental Health.

Minimum Qualifications for Target Group 2 Providers

TCM providers for Intellectually Disabled Adults (Target Group 2) must meet the minimum educational qualifications listed in Section 106. 1.1 and must complete training in a case management curriculum approved by Medicaid and the Department of Mental Health.

The Alabama Department of Mental Health(ADMH) case management providers for Intellectually Disabled Adults (Target Group 2) will be Regional Boards incorporated under Act 310 of the 1967 Alabama Acts who has demonstrated the ability to provide targeted case management services directly, be ADMH employees or other contractors of ADMH.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Minimum Qualifications for Target Group 3 Providers

TCM providers for Disabled Children (Target Group 3) must meet the minimum qualifications listed in Section 106.1.1 and must complete training in a case management curriculum approved by Medicaid.

The Alabama Department of Mental Health (ADMH) case management providers for Disabled Children (Target Group 3, Subgroup B-SED) must be Regional Boards incorporated under Act 310 of the 1967 Alabama Acts who have demonstrated the ability to provide targeted case management directly or be ADMH employees. TCM providers for Disabled Children through DMH must be certified and provide services through a contract with "DMH." Act 310 provides for the formation of a public corporation to contract with ADMH in constructing facilities and operating programs for mental health services. A 310 Board has the authority to directly provide: planning, studies and services for mental illness.

The ADMH case management provider for Disabled Children (Target Group 3, Subgroup A- Intellectually Disabled and Target 3, Subgroup D14- Children with Autism Spectrum Disorder) must be Regional Boards incorporated under Act 310 of the 1967 Alabama Act who have demonstrated ability to provide targeted case management services directly, be ADMH employees, or other contractors of ADMH. Act 310 provides for the formation of a public corporation to contract with ADMH in constructing facilities and operating programs for mental health services. A 310 Board has the authority to directly provide: planning, studies and services for mental illness.

Minimum Qualifications for Target Group 4 Providers

TCM providers for Foster Children (Target Group 4) must meet the minimum educational qualifications listed in Section 106.1.1 and must complete training in a case management curriculum approved by Medicaid.

Minimum Qualifications for Target Groups 5 and 6 Providers

TCM providers for Pregnant Women (Target Group 5) and AIDS/HIV-Positive Individuals (Target Group 6) must meet the minimum qualifications listed in Section 106.1.1 and must complete training in a case management curriculum approved by Medicaid.

Minimum Qualifications for Target Group 7 Providers

TCM providers for Adult Protective Services (Target Group 7) must meet the minimum educational qualifications listed in Section 106.1.1 and must complete training in a case management curriculum approved by Medicaid.

Targeted Case Management Service Providers for Adult Protective Service Individuals (Target Group 7) must demonstrate experience with the target population in investigating abuse, neglect, or exploitation in domestic settings and in providing follow-up services to victims of abuse, neglect, or exploitation.

Minimum Qualifications for Target Group 8 Providers

TCM providers for Technology Assisted Waiver eligible adult individuals (Target Group 8) must meet the minimum qualifications listed in Section

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

106.1.1 and must complete training in a case management curriculum approved by Medicaid.

Minimum Qualifications for Target Group 9 Providers

TCM providers for Individuals with a Diagnosed Substance Use Disorder (Target Group 9) must meet the minimum educational qualifications listed in Section 106.1.1 and must complete training in a case management curriculum approved by Medicaid and the Department of Mental Health.

TCM providers for Individuals with a Diagnosed Substance Use Disorder (Target Group 9) must be certified and provide services through a contract with the Department of Mental Health.

Minimum Qualifications for Target Group 10 Providers

TCM providers for Disabled Children with Autism Spectrum Disorder, Disabled Children with Serious Emotional Disturbance, and adults with Severe Mental Illness – High Intensity Care Coordination (Target Group 10) must meet the qualifications listed in Section 106.1.1 and must complete training in a case management curriculum approved by Medicaid.

The Alabama Department of Mental Health (ADMH) case management provider (for Target 10, Autism Spectrum Disorder (ASD)) must be Regional Boards incorporated under Act 310 of the 1967 Alabama Acts who have demonstrated the ability to provide targeted case management services directly, be ADMH employees, or other contractors of ADMH. Providers must be certified by the DMH and provide services through a contract with ADMH. Act 310 provides for the formation of a public corporation to contract with ADMH in constructing facilities and operating programs for mental health services. A 310 Board has the authority to directly provide: planning, studies and services for mental illness.

The ADMH case management provider (for Target 10, Serious Emotional Disturbance (SED) and Severely Mentally Ill (SMI) must be either Regional Boards incorporated under Act 310 of the 1967 Alabama Act who have demonstrated ability to provide targeted case management services directly or be ADMH employees. Providers must be certified by the Alabama Department of Mental Health and provide services through a contract with ADMH. Act 310 provides for the formation of a public corporation to contract with the Alabama Department of Mental Health in constructing facilities and operating programs for mental health services. A 310 Board has the authority to directly provide: planning, studies and services for mental illness.

106.2 Benefits and Limitations

This section describes benefits and limitations for Targeted Case Management providers. It contains the following subsections:

- Core Elements of Targeted Case Management
- Target Group Definitions
- Documentation Requirements
- Limitations
- Billable/Non-Billable Services

106.2.1 Core Elements of Targeted Case Management

Case management services assist Medicaid-eligible recipients in gaining access to needed medical, social, educational, and other services. The case manager provides these services through telephone contact with recipients, face-to-face contact with recipients, telephone contact with collaterals, or face-to-face contact with collaterals. Collaterals are the Medicaid-eligible recipient's immediate family and/or guardians, federal, state, or local service agencies (or agency representatives), and local businesses who work with the case manager to assist the recipient.

Targeted Case Management services consist of the following six core elements, they are considered direct activities and are billable:

- Needs assessment
- Case planning
- Service arrangement
- Social support
- Reassessment and follow-up
- Monitoring

Needs assessment

A TCM provider performs a written comprehensive assessment of the recipient's assets, deficits, and needs. The completed assessment must be maintained in the recipient's file.

The TCM provider gathers the following information:

- Identifying information
- Socialization and recreational needs
- Training needs for community living
- Vocational needs
- Physical needs
- Medical care concerns
- Social and emotional status
- Housing and physical environment
- Resource analysis and planning

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Case planning

TCM providers must develop a systematic, recipient-coordinated Plan of Care (POC). The POC lists the recipient's needs, strengths, and goals. The POC also lists the actions required to meet the identified needs of the recipient. It is based on the needs assessment and is developed through a collaborative process involving the recipient, their family or other support system and the case manager. It must be completed in conjunction with the needs assessment within the first **30 days** of contact with the recipient.

Service arrangement

Through linkage and advocacy, the case manager coordinates contacts between the recipient and the appropriate person or agency. These contacts may be face to face, phone calls, or electronic communication.

The POC lists the recipient's needs, strengths, and goals. The POC also lists the actions required to meet the identified needs of the recipient. It is based on the needs assessment and is developed through a collaborative process involving the recipient, their family or other support system and the case manager

A copy of the safety and/or crisis plan must be kept in the recipient's file.

Social Support

Through interviews with the recipient and significant others, the case manager determines whether the recipient possesses an adequate personal support system. If this personal support system is inadequate or nonexistent, the case manager assists the recipient in expanding or establishing such a network through advocacy and linking the recipient with appropriate persons, support groups, or agencies.

Reassessment and Follow-up

Through interviews and observations, the case manager evaluates the recipient's progress toward accomplishing the goals listed in the case plan at intervals of six months or less. In addition, the case manager contacts persons or agencies providing services to the recipient and reviews the results of these contacts, together with the changes in the recipient's needs shown in the reassessments and revises the case plan if necessary.

Monitoring

The case manager determines what services have been delivered and whether they adequately meet the needs of the recipient. The POC may require adjustments as a result of monitoring.

106.2.2 Target Group Definitions

This section defines the eight target groups served by TCM providers.

Target Group 1 – Mentally Ill Adults

Target Group 1 consists of functionally limited individuals age 18 and over with multiple needs who have been assessed by a qualified professional and have been found to require mental health case management. Such persons

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

have a diagnosis included in the ICD-10 as appropriate to date of service (other than intellectual/developmental disabilities, autism spectrum disorder, organic mental disorder, traumatic brain injury, or substance abuse), impaired role functioning, and a documented lack of capacity for independently accessing and sustaining involvement with needed services.

Target Group 2 – Intellectually Disabled Adults

Target Group 2 consists of individuals who are 18 years of age or older with a diagnosis of intellectual disability, as defined by the American Association of Intellectually Disabled (formerly AAMD). The individual's diagnosis must be determined by a Qualified Intellectually Disabled Professional (QIDP) and must include a primary determination of both intellectual and adaptive behaviors indicating the individual's primary problems are due to being Intellectually Disabled. Such persons may have other or secondary disabling conditions.

Target Group 3 – Disabled Children

Target Group 3 consists of individuals, age 0-21 considered to be disabled as defined in the following six subgroups:

- Intellectually Disabled/related conditions
- Seriously emotionally disturbed
- Sensory impaired
- Disabling health condition(s)
- Developmentally disabled

Disabled Intellectually Disabled/Related Conditions

All recipients in this subgroup must be age 0-17. A recipient is considered Intellectually Disabled when a diagnosis of an intellectual disability is determined. This determination must include a primary determination of both intellectual and adaptive behaviors indicating the individual's primary problems are due to an intellectual disability.

Recipients with related conditions are individuals who have a severe chronic disability described by all of the following criteria:

- Attributable to Cerebral palsy or epilepsy; or any other condition, other than mental illness, found to be closely related to being Intellectual Disabled because this condition results in impairment of general intellectual functioning or adaptive behavior similar to that of an intellectual disability persons, and requires treatment or services similar to those required for these persons
- Likely to continue indefinitely
- Results in substantial functional limitations in three or more of the following areas of major life activity:
  - Self-care
  - Understanding and use of language
  - Learning
  - Mobility

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Self-direction or capacity for independent living

Seriously Emotionally Disturbed (SED)

In order to meet the definition of Seriously Emotionally Disturbed, the recipient must meet the following criteria (Diagnosis and Jeopardy of being Separated from Family) or (Diagnosis and Functional Impairment):

Diagnosis:

Must have a DSM/ICD diagnosis. A primary diagnosis of a "Z" code, substance use, autism spectrum disorder, developmental/intellectual disability, organic mental disorder, or traumatic brain injury does not meet the criteria.

Jeopardy of being Separated from Family (Out-of-Home Placement):

Still residing in the community, but in jeopardy of being separated from family as the result of a serious emotional disturbance.

Functional Impairments/Symptoms/Risk of Separation – Must have one of the following as the result of a serious emotional disturbance:

-Functional Impairment – Must have substantial impairment in one of the following capacities to function (corresponding to expected developmental level):

-Autonomous Functioning: Performance of the age appropriate activities of daily living, e.g., personal hygiene, grooming, mobility;

-Functioning in the community – e.g., relationships with neighbors, involvement in recreational activities;

-Functioning in the Family or Family Equivalent – e.g., relationships with parents/parent surrogates, siblings, relatives;

-**Functioning in School/work** – e.g., relationships with peers/teachers/co-workers, adequate completion of school work.

Symptoms – Must have one of the following:

-**Features associated with Psychotic Disorders**

-Suicidal or Homicidal Gesture or Ideation

-Risk of Separation: Without treatment, there is imminent risk of separation from the family/family equivalent or placement in a more restrictive treatment setting.

Sensory Impaired

Blind recipients have no usable vision after the best possible correction. They must rely on tactile and auditory senses to obtain information.

Partially sighted recipients have a visual acuity of 20/70 or less in the better eye with the best possible correction. They also have a peripheral field so

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

restricted that it affects their ability to learn, or a progressive loss of vision which may in the future affect their ability to learn.

Deaf recipients have a hearing impairment that is so severe that they are impaired in processing linguistic information through hearing, with or without amplification. This impairment adversely affects educational performance.

Blind disabled recipients have a visual impairment (either blind or partially sighted as defined above) and a concurring disabling condition.

Deaf disabled recipients have a hearing impairment (deaf as defined above) and a concurring disabling condition.

Deaf-blind recipients have both hearing and visual impairments. The combination of sensory impairments causes such severe communication and other developmental and educational problems that the recipient cannot be properly accommodated in the educational programs offered by the Alabama School for the Blind or the Alabama School for the Deaf.

Disabling Health Condition(s)

Recipients are eligible for Targeted Case Management services if they have the following disabling conditions, which are severe, chronic, and physical in nature and require extensive medical and habilitative/rehabilitative services.

- Central nervous system dysraphic states such as spina bifida, hydranencephaly, and encephalocele
- Cranio-facial anomalies such as cleft lip and palate, Apert's syndrome, and Crouzon's syndrome
- Pulmonary conditions such as cystic fibrosis
- Neuro-muscular conditions such as cerebral palsy, arthrogryposis, and juvenile rheumatoid arthritis
- Seizure disorders such as those poorly responsive to anticonvulsant therapy and those of mixed seizure type
- Hematologic/immunologic disorders such as hemophilia, sickle cell disease, aplastic anemia, and agammaglobulinemia
- Heart conditions such as aortic coarctation, and transposition of the great vessels
- Urologic conditions such as exstrophy of bladder
- Gastrointestinal conditions such as Hirschsprung's Disease, omphalocele, and gastroschisis
- Orthopedic problems such as clubfoot, scoliosis, fractures, and poliomyelitis
- Metabolic disorders such as panhypopituitarism
- Neoplasms such as leukemia, and retinoblastoma
- Multisystem genetic disorders such as tuberous sclerosis, and neurofibromatosis
- Autism Spectrum Disorder for a child or youth ages 0 to 21. In order to meet the definition of ASD, the recipient must meet the following criteria:
    - Must have a diagnosis of Autism Spectrum Disorder.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The individual has adaptive and/or maladaptive needs identified by established assessment criteria that require a multi-disciplinary service team from more than one eligible child-serving agency and/or are related to one or more co-occurring diagnoses.

Developmentally Disabled

A child age birth to three years is eligible for TCM services if they are experiencing developmental disabilities greater than or equal to 25 percent as measured by appropriate diagnostic instruments and procedures in one or more of the following areas:

- Cognitive development
- Physical development, including vision and hearing
- Language and speech development
- Psychosocial development
- Self-help skills

A recipient is also eligible if they have been diagnosed with a physical or mental condition that has a high probability of resulting in a developmental disability.

Disabled

A disabled individual who has a combination of two or more disabling conditions as described above is considered disabled. Each condition, if considered separately, might not be severe enough to warrant case management, but a combination of the conditions adversely affects development.

Target Group 4 – Foster Children

Target Group 4 consists of children age birth to 21 who receive preventive, protective family preservation or family reunification services from the State, or any of its agencies, as a result of State intervention or upon application by the child's parent(s), custodian(s), or guardian(s).

The group also consists of children age birth to 21 who are in the care, custody, or control of the State of Alabama, or any of its agencies, due to one of the following three situations.

- The judicial or legally sanctioned determination that the child must be protected by the State as dependent, delinquent, or a child in need of supervision as those terms are defined by the Alabama Juvenile Code, Title 12, Chapter 15, Code of Alabama 1975
- The judicial determination or statutorily authorized action by the State to protect the child from actual or potential abuse under the Alabama Juvenile Code, Title 26, Chapter 14, Code of Alabama 1975, or other statute
- The voluntary placement agreement, voluntary boarding house agreement, or an agreement for foster care, between the State and the child's parent(s), custodian(s), or guardian

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Target Group 5 – Pregnant Women

Target Group 5 consists of Medicaid-eligible women of any age in need of maternity services.

Target Group 6 – AIDS/HIV-Positive Individuals

Target Group 6 consists of Medicaid-eligible individuals of any age who have been diagnosed with AIDS or are HIV-positive as evidenced by laboratory findings.

Target Group 7 – Adult Protective Service Individuals

Target Group 7 consists of individuals 18 years of age or older who meet either of the following criteria:

- At risk of abuse, neglect, or exploitation
- At risk of institutionalization due to their inability or their caretaker's inability to provide the minimum sufficient level of care in the home

Target Group 8 - Technology Assisted (TA) Waiver for Adults

Target Group 8 individuals consist of Medicaid eligible individuals age 21 and older, who meet the eligibility criteria for the Technology Assisted (TA) Waiver for Adults.

Target Group 9 – Individuals with a Diagnosed Substance Use Disorder

Target Group 9 consists of Medicaid-eligible individuals who have a diagnosed substance use disorder or substance induced disorder, in accordance with criteria set forth by the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM) published by the American Psychiatric Association, and who meet the following additional criteria.

Individuals who:

- Have been unable to independently maintain a sustained period of recovery after repeated treatment episodes; or
- Have little or no access to community resources necessary to support sustained recovery efforts; or
- Have co-morbid conditions, as mental illness, emotional disorders, intellectual disabilities, medical conditions, sensory impairments, or mobility impairments; or
- Have significant responsibility for the care of dependents, as well as themselves

Target Group 10 – High Intensity Care Coordination.

Intensive Care Coordination (ICC)—means a single case manager (and/or a single treatment team) and a treatment plan that guides the provision of all behavioral health and related support services.

Target Group 10 consists of individuals considered to be disabled as defined in the following three subgroups:

- Autism Spectrum Disorder (ASD) consists of individuals with Autism Spectrum Disorder, age 0-21.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Seriously Emotionally Disturbed (SED) – consists of disabled children with Serious Emotional Disturbance, age 0-21.
- Severely Mentally Ill (SMI) – consists of disabled individuals with Serious Mental Illness, age 18 and older.

The population to be served consists of individuals age 0 to 20 or until the individual reaches age 21 considered to be disabled as defined in the following two subgroups and who require a multi-disciplinary service team from more than one child-serving agency or who have one or more co-occurring diagnoses;

Autism Spectrum Disorder

All recipients in this subgroup consists of individuals age 0 to 20 or until the individual reaches age 21.

In order to meet the definition of Autism Spectrum Disorder, the recipient must meet the following criteria:

- **Must have a diagnosis of Autism Spectrum Disorder.**

- **The individual has adaptive and/or maladaptive needs and caregiver needs identified by established assessment criteria that require a multi-disciplinary service team from more than one eligible child-serving agency and/or are related to one or more co-occurring diagnoses.**

Seriously Emotionally Disturbed

All recipients in this subgroup consists of individuals age 0 to 20 or until the individual reaches 21.

In order to meet the definition of Seriously Emotionally Disturbed, the recipient must meet the following criteria for (Diagnosis and Jeopardy of being Separated from Family) or Diagnosis and Functional Impairment) and require a multi-disciplinary service team from more than one child-serving agency or who have one or more co-occurring diagnoses.

- **Diagnosis**:

  - Must have a DSM/ICD diagnosis. A primary diagnosis of a "Z" code, substance use, autism spectrum disorder, developmental/intellectual disability, organic mental disorder, or traumatic brain injury does not meet the criteria.

- **Jeopardy of being Separated from Family (Out-of-Home Placement):**

  - Still residing in the community but in jeopardy of being separated from family as the result of a serious emotional disturbance:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- **Functional Impairments/Symptoms/Risk of separation** – Must have one of the following as the result of a serious emotional disturbance:

- **Functional Impairment** – Must have substantial impairment in one of the following capacities to function (corresponding to expected developmental level):

    1. **Autonomous Functioning**: Performance of the age appropriate activities of daily living, e.g., personal hygiene, grooming, mobility;

    2. **Functioning in the community** – e.g., relationships with neighbors, involvement in recreational activities;

    3. **Functioning in the Family or Family Equivalent** – e.g. Relationships with parents/parent surrogates, siblings, relatives;

    4. **Functioning in School/work** – e.g., relationships with peers/teachers/co-workers, adequate completion of school/work.

-**Symptoms** – Must have one of the following:

    1. **Features associated with Psychotic Disorders**

    2. **Suicidal or Homicidal Gesture or Ideation**

    3. **Risk of Separation:**
    Without treatment, there is imminent risk of separation from the family/family equivalent or placement in a more restrictive treatment setting.

Severely Mentally Ill

All recipients in this subgroup consists of individuals age 18 and older considered to be disabled as defined in the following subgroup and who require a multi-disciplinary service team from more than one agency or who have one or more co-occurring diagnosis:

- Severely Mentally Ill (SMI): The population to be served consists of functionally limited individuals 18 years of age or older with multiple needs who have been assessed by a qualified professional and have been found to require mental health case management. Such persons have a diagnosis included in the ICD-10 as appropriate to date of service (other than primary developmental/intellectual disabilities, autism spectrum disorder, organic mental disorder, traumatic brain injury, or substance abuse), impaired role functioning, and a documented lack of capacity for independently accessing, and sustaining involvement with needed services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

106.2.3 Documentation Requirements

The TCM provider must make available to Medicaid at no charge all information describing services provided to eligible recipients. The provider must also permit access to all records and facilities for the purpose of claims audit, program monitoring, and utilization review by duly authorized representatives of Federal and State agencies.

The TCM provider must maintain complete and accurate medical, psychiatric and fiscal records that fully disclose the extent of the service. **All documented entries must be legible, signed and dated by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. The author of each entry must be identified and must, either personally or electronically sign his or her entry. A stamped signature is not acceptable.**

Record retention for TCM files will remain three years plus the current year. Records for TCM provided through waivers shall be retained for three years during the initial waiver period and five years after renewal of the waivers.

Provider's records must contain the following information:

- Documented Referral Source
- Copy of completed Alabama Child and Adolescent Needs and Strengths Assessment (CANS), when applicable
- Medical and Psychological diagnosis
- Psychological and Medical test results performed by a qualified professional
- A systematic, recipient-coordinated Plan Of Care (POC). The POC should contain all 6 (six) core elements of TCM
- Verification that the recipient's Medicaid Eligibility was checked at admission and at least once a month, thereafter. NOTE: There are times when a recipient's eligibility status may change throughout the month. It is the provider's responsibility to ensure that a recipient has the applicable Alabama Medicaid coverage for the date(s) of service for which services will be provided. Providers may use various resources to verify recipient's eligibility. (For more information, refer to the Provider Manual, Chapter 3: Verifying Recipient Eligibility)
- Family history
- Educational history
- Medical history
- Educational/vocational history
- Psychiatric treatment history
- Legal history
- Substance abuse history
- Mental status exam

TCM providers must maintain the following documentation in the recipient's record when billing for Foster Children (Target Group 4) and Adult Protective Service Individuals (Target Group 7):

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- A current comprehensive service plan that identifies the medical, nutritional, social, educational, transportation, housing and other service needs that have not been adequately accessed
- A time frame to reassess service needs

Services must consist of at least one of the following activities:

- Establishment of a comprehensive case file for development and implementation of an individualized service plan to meet the assessed service needs of -the recipient
- Assistance for the recipient in locating needed service providers and making the necessary linkages to assure the receipt of services identified in the service plan
- Assessment of the recipient and service providers to determine that the services received are adequate in meeting the identified needs
- Reassessment of the recipient to determine services needed to resolve any crisis situation resulting from changes in the family structure, living conditions, or other events

Service Documentation

Documentation in the client's record for each session, service, or activity for which Medicaid reimbursement is requested must include, the following:

- Name of recipient
- Date of service
- Name of provider agency and person providing services
- Nature, extent, and units of services provided
- Place of service
- The identification of the specific services rendered
- The signature of the staff person who rendered the services
- A written assessment of the client's progress, or lack thereof, related to each of the identified clinical issues discussed
- All entries must be legible and complete and must be authenticated and dated (prior to being submitted for reimbursement) by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. The author of each entry must be identified and must authenticate his or her entry. Authentication may include handwritten signatures, written initials (for treatment plan reviews), or computer entry (associated with electronic records—not a typed signature). A stamped signature is not acceptable.

NOTE:

The documentation requirements described above will be applied to justify payment by Medicaid when clinical records are audited. Payments are subject to recoupment when the documentation is insufficient to support the services billed.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Service Documentation - Additional Information

Documentation should not be repetitive. Examples include, but are not limited to the following:

- Progress notes that look the same for other recipients.
- Progress notes that state the same words with no evidence of progression, maintenance, or regression.
- Plans of care that look the same for other recipients.
- Plans of care with goals and actions that stay the same and have no progression.

Progress Notes

- Progress notes should not be ***preprinted*** or predated with the exception that a group therapy note may have a general section that identifies the participants (i.e. the number of participants, etc.), the topic, and a general description of the session which is copied for each participant. However, each participant must also have individualized documentation that is specific to his/her interaction in the group and how it relates to their POC.
- The progress note should match the goals on the Plan of Care and the Plan of Care should match the needs of the recipient. The actions should be appropriate to meet the goals.
- Documentation must provide enough detail and explanation to justify the reimbursement requested.
- If Case Management (CM) services are rendered to more than one eligible recipient in a household on the same day, the case management documentation must include the following information:
    - All documentation must be individualized to each eligible recipient's visit
    - There must be enough documentation in the recipient's file that support that the services rendered are specific to his/hers Person Centered Plan of Care

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Authentication

- Authors must always compose and sign their own entries (whether handwritten or electronic). An author should never create an entry or sign an entry for someone else or have someone else formulate or sign an entry for them. If utilizing a computer entry system, the program must contain an attestation signature line and time & date entry stamp. A stamped signature is not acceptable.

- If utilizing a computer entry system, the program must contain an attestation signature line and time & date entry stamp. There must also be a written policy for documentation method in case of computer failure/power outage.

Reimbursements

For Target Group 4 (Foster Children) and Target Group 7 (Adult Protective Service Individuals), reimbursement rates are based on cost as determined by the quarterly Social Services Work Sampling Study. Rates will be adjusted annually based on the results of the previous four quarters. Random Moment Sampling may not be used as a method of documenting services provided to recipients. The Work Sampling Study must provide an audit trail that identifies each recipient whose case is included in the data used for rate formulation and identifies that services have been provided.

106.2.4 Limitations

For Target Group 4 (Foster Children) and Target Group 7 (Adult Protective Service Individuals), an encounter rate consisting of a maximum of one unit of case management services will be reimbursed per month for each eligible recipient receiving case management services. A unit of case management service consists of at least one telephone or face-to-face contact with the recipient, a family member, significant other, or agency from which the recipient receives or may receive services.

For Target Group 10 (Disabled Children with ASD, Disabled Children with SED, and Severely Mentally Ill Adults High Intensity Care Coordination), the monthly encounter rate for case management services is limited to one recipient per month. The payment rates were derived from an analysis of caseloads and staffing configurations, productivity, staffing costs and fee-for-service utilization. The caseloads and staffing configuration must adhere to the 1:18 ratio for Target Group 10. (Please refer to DMH policy as it refers to Low/High Intensity Care Coordination). For the provider to bill for a full month case rate, the recipient must maintain eligibility to receive services AND be enrolled with the provider during a period of **20 or more days**.

For all other target groups, a unit of service is reimbursed in increments of five minutes.

All contacts must appear in the recipient's record. Contacts must be for the coordination of services for a specific identified recipient. (Please refer to *Progress Notes* description in the **Service Documentation- Additional Information** section)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Recipients receiving case management services through a waiver are not eligible for targeted case management, except for Target Group 7 (Adult Protective Service Individuals). TCM for Group 7 may be provided in any setting including total care environments.

Case management services for Intellectually Disabled Adults are provided to individuals with a diagnosis of intellectual disability who are 18 years of age or older.

Case management services for all other target groups are not limited to a maximum number of hours per calendar year.

106.2.5 Billable/Non-Billable Services

The following services are Direct and are billable:

Billable units are for time spent delivering a case management service. That service may occur face-to-face with the beneficiary or may consist of telephone contacts or mail or e-mail contacts necessary to ensure that the beneficiary is served.

In Target Group 4, 7 and 10, where payment is cost based, the case management rate can factor in the cost associated with mileage (in a cost-based payment methodology, by allocating such costs among all the productive time increments). It may also include the actual writing of case notes, time documenting social history and writing the information gathered for the case file for the development of a specific care plan; and the gathering of information and the actual documentation. The state may also document non-productive time by providing evidence of State or private agency policies regarding sick leave, vacation leave, paid holidays and training requirements. Any other non-productive time must be documented via use of a CMS approved time study.

Billable Services

The following services are examples of considered billable activities and are reimbursable under the Targeted Case Management Program:

- Meeting with the individual and the individual's team to complete case management plan/ISP/IEP.
- Telephone contact to gather information for an assessment.
- Visiting the day program/resident/community setting to meet with an individual and support staff to assess progress toward objectives.
- Telephone calls and face to face meetings with family, friends, community members, and agencies for the purpose of developing, arranging for, or coordinating formal and informal supports.
- Reviewing records of providers of services to ensure proper documentation is in place.
- Providing an individual with information on advocacy groups, i.e. ADAP, Legal Aid.
- Documentation of assessments.
    - For targeted groups 1, 3, and 10, when providing care coordination services in an inpatient acute facility, psychiatric residential treatment center, Institute of Mental Disease (IMD), or any other facility within

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

180 consecutive days of discharge from a medical institution, providers must bill the 'from and to' dates of the recipient's hospitalization, if known, in Form Locator 18 under 'Hospitalization Dates Related to Current Services' on the CMS-1500 claim for or the 837 equivalent.

- If a provider bills Medicaid for case management services for a recipient with multiple hospital admissions and discharges within a month (for the target groups stated above), the provider must submit a separate claim form for each hospital admission and include the applicable discharge date. The hospitalization "from and to" dates must be indicated on the CMS-1500 Claim Form or the 837 equivalent, under "Hospitalization Dates" area.
- All hospitalization "from and to dates" must be documented in the recipient's file. The documented hospitalization "from and to" dates documented in the recipient's file must match the hospitalization "from and to" dates on the submitted claim form.
- A post payment review will be completed by Medicaid every 6 months to determine if payment was made inappropriately based the hospitalization policy described above.
- Claims identified for services provided prior to the 180- day timeframe may be recouped.

Non-Billable Services

The following services are activities that are made on behalf of a group of individuals and not just a specific person, they are non-billable and are not reimbursable under the Targeted Case Management Program:

- Travel
- The actual scheduling of a meeting with an individual/family to complete the History and Profiles/SUN-R.
- Transporting an individual/family.
- Documentation of case notes and social history.
- Completing travel forms, leave slips, or any other general office activities, including copy work and other clerical activities.
- Visiting an individual who is in a hospital or nursing home. (Exception, services will be available for up to **180 consecutive days** of a covered stay in a medical institution).
- Visiting an individual in a prison or jail. ,
- Visiting an individual in an ICF/ID facility.
- Checking an individual's Medicaid eligibility.

Duplicate Billing

Before providing Targeted Case Management (TCM) services, verify that the recipient is not receiving case management services through another Targeted Group or Waiver. If the recipient receives additional case management services, but the TCM services would not be duplicative, the Provider must document in writing to the Agency how their services would not present a duplication of services from other case management services received. The provider must have written approval from Medicaid prior to submitting the claim to the Agency for reimbursement for Targeted Case

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Management services. The Agency will pay for one case management fee per month and will recoup any claims paid in error unless the Agency has determined there is no duplication of services and gives prior approval for the TCM services provided.

In order to prevent duplicate billing, it is the responsibility of the Targeted Case Management Provider to check the recipient's eligibility at admission and monthly, as long as the recipient is receiving TCM services. If a provider requires training on checking the eligibility of recipients, they are encouraged to contact an Gainwell representative for assistance.

106.3 Prior Authorization and Referral Requirements

TCM procedure codes generally do not require prior authorization, except for the target groups noted below.

Targeted Case Management (TCM) providers must obtain prior authorization (PA) from the Alabama Medicaid Agency by submitting a PA request to Gainwell for TCM services in the following target groups:

- Target Group 3: Disabled Children except Target Group 3, Subgroup D14 – Children with Autism Spectrum Disorder
- Target Group 4: Foster Children
- High Intensity Care Coordination SED Children (Target Group 10)
- High Intensity Care Coordination ASD Children (Target Group 10)

Direct all inquiries and requests relating to prior authorization for a specific target group to Gainwell Provider Communication Unit at 1(800) 688-7989.

Interagency Transfers

If a recipient in a target group requiring prior authorization (PA) requests to change service providers from one agency to another, the receiving TCM provider must complete a request for interagency transfer utilizing the *TCM Recipient Transfer Form*. This request authorizes Gainwell to reassign the PA number to the receiving agency providing the continuation of targeted case management services.

The *TCM Recipient Transfer Form* is a PA option in the Secure Provider Portal under the "Trade Files" tab.

106.4 Cost Sharing (Copayment)

The copayment does not apply to services provided for targeted case management.

106.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

TCM providers who bill Medicaid claims electronically receive the following benefits:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Quicker claims processing turnaround
- Ability to immediately correct claim errors
- Online adjustments capability
- Enhanced access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare Related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

106.5.1 Time Limit for Filing Claims

Medicaid requires all claims for TCM providers to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

106.5.2 Diagnosis Codes

See Section 106.5.3 (Procedure Codes and Modifiers) for the allowable diagnosis codes. The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

106.5.3 Procedure Codes and Modifiers

TCM providers use the Current Procedural Terminology (CPT) coding system. The CPT manual lists most required procedure codes. This manual may be obtained by contacting the Order Department, American Medical Association, 515 North State Street, Chicago, IL 60610-9986. The (837) Professional and institutional claims and the paper claim have been modified to accept up to four Procedure Code Modifiers.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The following procedure codes, modifiers, and diagnosis codes apply when filing claims for TCM services for billing purposes only:

Target Group	*Procedure Code*	*ICD-10 Diagnosis Codes*	*PA Required?*
1 MI Adults	G9008-U1	F200 - F2089 F21 - F258 F28 F3011 - F308 F310 F3111 - F312 F3131 - F315 F3161 - F3164 F3171 - F3189 F320 - F328 F330 - F333 F3341 - F338 F340 - F348 F4001 - F4002 F4011 - F408 F410 - F418 F42 F440 - F4489 F450 - F451 F4521 - F4529 F458 F481 F488 F600 - F6089 F6811 - F688 F840 F843 - F848 F20.9 F25.9 F29 F30.10 F30.9 F31.10 F31.30 F31.60 F31.70 F31.9 F32 F32.9 F33.9 F34.9 F39 F40.00 F40.10 R452 R455 - R456	No

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Target Group	*Procedure Code*	*ICD-10 Diagnosis Codes*	*PA Required?*
		F42 F440 - F4489 F450 - F451 F4521 - F4529 F458 F481 F488 F600 - F6089 F6811 - F688 F840 F843 - F848 F20.9 F25.9 F29 F30.10 F30.9 F31.10 F31.30 F31.60 F31.70 F31.9 F32 F32.9 F33.9 F34.9 F39 F40.00 F40.10 R452 R455 - R456	

For Target Group 10, the provider can use modifier ‘52’ to bill for a partial month.

106.5.4 Place of Service Codes

The following place of service codes apply when filing claims for TCM services:

POS Code	*Description*
03	School
11	Office
12	Home
21	Inpatient Hospital (Medical)
24	Ambulatory Surgical Center
33	Custodial Care Facility
51	Inpatient Psychiatric Facility
52	Psychiatric Facility Partial Hospitalization
53	Community Mental Health Center
56	Psychiatric Residential Treatment Center
62	Comprehensive Outpatient Rehabilitation Facility
71	State or Local Public Health Clinic
81	Independent Laboratory
99	Other – Other place of service not identified above

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Allowed for Target Groups 1, 3, and 10. Claim must be billed with Hospitalization Dates Related to Current Services (CMS-1500 Form Locator 18 or 837 equivalent) completed.

For dates of service beginning December 1, 2020, use POS Code 99 for all claims billed with multiple dates of service (one-line item on a claim for a consecutive date range, i.e. span billing) when the services are provided in multiple locations. The documentation to support these claims must indicate the place of service and all other documentation criteria in Chapter 106.

106.5.5 Required Attachments

There are no required attachments for Targeted Case Management providers.

107

107 Waiver Services

Medicaid covers Home and Community-Based Services (HCBS) through the Elderly and Disabled (E&D) Waiver, the State of Alabama Independent Living (SAIL) Waiver (formerly Homebound Waiver), the Technology Assisted (TA) Waiver for Adults, the Alabama Community Transition (ACT) Waiver, and the Community Waiver Program (CWP) to categorically needy individuals who would otherwise require institutionalization in a nursing facility.

Medicaid covers the Alabama Home and Community-Based Waiver for Persons with Intellectual Disabilities (ID Waiver), formerly MR Waiver the Living at Home (LHW) Waiver and the Community Waiver Program (CWP) to Medicaid-eligible individuals who would otherwise require the level of care available in an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID).

The purpose of providing HCBS to individuals at risk of institutional care is to protect the health, safety, and dignity of those individuals while reducing Medicaid expenditures for institutional care. Services that are reimbursable through Medicaid's EPSDT Program shall not be reimbursed as a waiver service. HCBS are provided through a Medicaid waiver for an initial period of three or five years and for five-year periods thereafter upon renewal of waiver by the Centers for Medicare and Medicaid Services (CMS) .

The E&D Waiver is a cooperative effort between the Alabama Medicaid Agency, and the Alabama Department of Senior Services (ADSS). The policy provisions for E&D Waiver providers can be found in the *Alabama Medicaid Agency Administrative Code*, Chapter 36.

The SAIL Waiver is a cooperative effort between the Alabama Medicaid Agency and the Alabama-Department of Rehabilitation Services (ADRS). The policy provisions for SAIL Waiver providers can be found in the *Alabama Medicaid Agency Administrative Code*, Chapter 57.

The ID, LHW, and CWP Waivers are a cooperative effort between the Alabama Medicaid Agency and the Alabama Department of Mental Health (DMH). The policy provisions for ID, LHW, and CWP Waiver providers can be found in the *Alabama Medicaid Agency Administrative Code*, Chapters 35, 52, and 43 respectively.

The Alabama Medicaid Agency is the Operating Agency for the TA Waiver for Adults. The policy provisions for providers of the TA Waiver for Adults can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 54.

The ACT Waiver is a cooperative effort among the Alabama Medicaid Agency and Alabama Department of Senior Services (ADSS). The policy provisions for the ACT Waiver providers can be found in the Alabama Medicaid Agency Administrative Code, Chapter 44.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Providers rendering private duty nursing services as a result of an EPSDT screening should refer to the Alabama Medicaid Provider Manual, Chapter 31 for policy provisions.

107.1 Enrollment

Applicants who meet the licensure and/or certification requirements of the State of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code* and the *Alabama Medicaid Provider Manual* should apply with the designated waiver Operating Agency for the E&D, SAIL, ID, LHW, CWP and ACT Waivers. Applicants for the TA Waiver are enrolled directly through Gainwell. The Operating Agency may contract directly with vendors of non-medical ACT Waiver services.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a waiver provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive direct reimbursement for waiver-related claims.

NOTE:

The 10-digit NPI is required when filing a claim.

Providers of waiver services are assigned a provider type of 53 (Waiver Service). Valid specialties for these providers include the following:

- Elderly and Disabled Waiver (670)
- SAIL Waiver (660)
- ID Waiver (680)
- Living at Home Waiver (690)
- Technology Assisted (TA) Waiver for Adults (590)
- ACT Waiver (661)
- CWP Waiver (685)

Enrollment Policy for Waiver Service Providers

To participate in the Alabama Medicaid Program, providers must meet the following requirements:

- Must have a contractual agreement with Medicaid directly or through an Operating Agency.
- Must meet the provider qualifications as outlined in the approved Waiver Document for the appropriate HCBS waiver.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Electronic visit verification is required for specified services under HCBS Waivers when conducted as part of service delivery for in home services. These services are electronically verified when the following information is electronically captured and submitted to Medicaid through the use of the State contracted EVVM system:
- (i) the type of service performed;
- (ii) the individual receiving the service;
- (iii) the date of the service;
- (iv) the location of service delivery;
- (v) the individual providing the service; and
- (vi) the time the service begins and ends

Re-enrollment Policy for Waiver Service Providers

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

107.2 Benefits and Limitations

The following table lists the services covered by each type of waiver:

Waiver	***Services Covered***
Elderly and Disabled Waiver	Case Management Services Homemaker Services Personal Care Services Adult Day Health Services Respite Care Services (Skilled) Respite Care Services (Unskilled) Companion Services Home Delivered Meals (Frozen Shelf-Stable and Breakfast Meals) Pest Control Service Skilled Nursing Services (RN/LPN) Home Modification Services Assistive Technology and Durable Medical Equipment (DME) Personnel Emergency Response System (PERS) (Installation Personnel Emergency Response System (PERS) (Monthly Monitoring Fee) Medical Supplies Supervisory Visits

107.2.1 Financial Eligibility

Financial eligibility for the E&D waiver is limited to the following individuals:

- Individuals receiving SSI
- SSI related protected groups deemed to be eligible for SSI/Medicaid
- Individuals receiving State Supplementation
- Individuals receiving State or Federal Adoption Subsidy
- Optional categorically needy individuals at a special income level of 300 percent of the Federal Benefit Rate (FBR) who are receiving HCBS waiver services.

Financial eligibility for the ID waiver is limited to the following individuals:

- Individuals receiving SSI
- SSI related protected groups deemed to be eligible for SSI/Medicaid
- Special Home and Community-Based waiver disabled individuals whose income is not greater than 300 percent of the SSI Federal Benefit Rate
- Parents and Other Caretaker Relatives
- Federal or State Adoption Subsidy Individuals

Financial eligibility for the CWP waiver is limited to the following individuals:

- Individuals receiving SSI
- SSI related protected groups deemed to be eligible for SSI/Medicaid
- Special Home and Community-Based waiver disabled individuals whose income is not greater than 300 percent of the SSI Federal Benefit Rate
- Parents and Other Caretaker Relatives
- Federal or State Adoption Subsidy Individuals

Financial eligibility for the SAIL waiver is limited to the following individuals:

- Individuals receiving SSI
- SSI related protected groups deemed to be eligible for SSI/Medicaid
- Individuals receiving State Supplementation
- Special Home and Community-Based waiver disabled individuals whose income is not greater than 300 percent of the SSI Federal Benefit Rate

Financial eligibility for the Living at Home Waiver is limited to the following individuals:

- Individuals receiving SSI
- Parents and Other Caretaker Relatives
- SSI related protected groups deemed to be eligible for SSI/Medicaid
- Individuals receiving State or Federal Adoption Subsidy
- Special Home and Community-Based waiver disabled individuals whose income is not greater than 300 percent of the SSI Federal Benefit Rate

Financial eligibility for Technology Assisted Waiver for Adults is limited to the following individuals:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Individuals receiving SSI
- Special Home and Community-Based waiver disabled individuals whose income is not greater than 300 percent of the SSI Federal Benefit Rate
- State Supplementation
- Individuals eligible for the Pickle Program (continued Medicaid)
- Deemed disabled widow and widowers from age 50 but not yet age 60
- Early widow and widowers age 60-64
- Disabled adult children who lose Supplemental Security Income benefits upon entitlement to or an increase in the child's insurance benefits based on disability
- Individuals who would be eligible for SSI if not for deeming of income of parent(s) or a spouse
- Medicaid for Low Income Families (MLIF)

Financial eligibility for the ACT waiver is limited to the following individuals:

- Individuals receiving SSI
- SSI related protected groups deemed to be eligible for SSI/Medicaid
- Individuals receiving State Supplementation
- Special Home and Community-Based waiver disabled individuals whose income is not greater than 300% of the SSI Federal Benefit Rate

Financial determinations are made by the Alabama Medicaid Agency, or the Social Security Administration (SSA), as appropriate. In addition to the financial and medical eligibility criteria, Medicaid is limited by the number of recipients who can be served by the waiver.

107.2.2 Medical Eligibility

Medical eligibility criteria for the E&D, TA Waiver for Adults, and ACT Waivers are based on current admission criteria for nursing facility care. Admission criteria are described in Chapter 26 of the non-state Provider Manual, Nursing Facility.

The target groups for SAIL Waiver Services must meet the admission criteria for a nursing facility. The HCBS provider must specifically provide services to individuals with physical disabilities not associated with the process of aging and with onset prior to age 63.

SAIL waiver services are provided, but not limited, to persons with the following diagnoses:

- Quadriplegia
- Traumatic brain injury
- Amyotrophic lateral sclerosis
- Multiple sclerosis
- Muscular dystrophy
- Spinal muscular atrophy
- Severe cerebral palsy
- Stroke

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Other substantial neurological impairments, severely debilitating diseases, or rare genetic diseases (such as Lesch-Nyhan Syndrome)

The target group, for ACT Waiver Services, is individuals currently residing in a nursing facility with a desire to transition to the community.

Eligibility criteria for HCBS for ID, CWP, and LHW recipients are the same as eligibility criteria for an ICF/IID facility. ID, CWP, and LHW persons who meet categorical medical and/or social requirements for Title XIX coverage will be eligible for HCBS under the waivers. Applicants found eligible are not required to apply income above the personal needs allowance reserved to institutional recipients toward payment of care. In addition to the financial and medical eligibility criteria, Medicaid is limited by the number of recipients who can be served by the waivers.

107.2.3 Limitations

Medicaid does not provide waiver services to recipients in a hospital or nursing facility. However, case management activities are available through the Gateway to Community Living (GCL) initiative and the Hospital to Home (H2H) program to assist recipients interested in transitioning from an institution into a community setting under the waivers. Case management activities are limited to a maximum of 180 days prior to discharge into the community.

Medicaid or its operating agencies may deny home and community-based services if it determines that an individual's health and safety is at risk in the community; if the individual does not cooperate with a provider in the provision of services; or if an individual does not meet the goals and objectives of being on the waiver program.

NOTE:

SAIL waiver recipients must be age 18 years or older. LHW, CWP, & ID waiver recipients must be age 3 years or older. TA waiver recipients must be age 21 or with complex medical conditions who are ventilator dependent or who have tracheostomies.

107.2.4 Explanation of Covered Services

This section describes the covered services available through the HCBS Waiver Program. Please note that descriptions for services may differ from program to program.

Adult Day Health Services (S5102/Modifier UA - E&D) (S5102/Modifier TF UB-ACT)

Adult Day Health Service provides social and health care for a minimum of 4 hours per day in a community facility approved to provide such care. Adult Day Health Service includes health education, self-care training, therapeutic activities, and health screening.

Adult Day Health is provided by facilities that meet the minimum standards for Adult Day Health Centers as described in the HCBS Waiver for the E&D and ACT Waivers. The state agencies contracting for Adult Day Health Services must determine that each facility providing Adult Day Health meets the prescribed standards.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A unit is defined as a per diem rate.

Homemaker Services (S5130/Modifier UA - E&D) (S5130/Modifier TF UB-ACT)

Homemaker services are general household activities that include meal preparation, food shopping, bill paying, routine cleaning and personal services. Homemaker Services are provided by a trained homemaker when the individual regularly responsible for these activities is temporarily absent or when a person is limited in managing the home and providing self-care.

A person providing homemaker services must meet the qualifications of a Homemaker Attendant as specified in the approved waiver document.

A unit is defined as 15 minutes.

Case Management Services (T1016/Modifier UA - E&D) (T1016/Modifier UB - SAIL) (T1016/Modifier TF UB-ACT)

Case management is a system under which a designated person or organization is responsible for locating, coordinating, and monitoring a group of services. A case manager is responsible for outreach, intake and referral, diagnosis and evaluation, assessment, care plan development, and implementing and tracking services to an individual. The case manager is also responsible for authorization of waiver and non-waiver services included in the recipient's care plan, terminations, and transfers and maintenance of recipient records.

Case management is provided by a case manager employed by or under contract with the state agencies as specified in the approved waiver document. The case manager must meet the qualifications as specified in the approved waiver document.

Case management activities may also be used to assist individuals residing in institutional settings, such as hospital and nursing facilities, to transition into community settings. Transitional case management services may be provided up to 180 days prior to discharge from an institution.

Transitional case management should not be billed until the first day a client is active on the waiver. If the individual fails to transition to the waiver, reimbursement will be at the administrative rate.

A unit is defined as 15 minutes.

(G9008 Support Coordination - Adults Ages 22+)

(G9008/Modifier HI Support Coordination - Adults Ages 22+)

(G9008/Modifier HO Support Coordination - Adults Ages 22+)

(G9008/Modifier TF Support Coordination - Adults Ages 22+)

(G9008/Modifier HE Support Coordination - Adults Ages 22+)

(G9008/Modifier TG Support Coordination - Adults Ages 22+)

A case management and comprehensive supports/services coordination role involving direct assistance with gaining access to waiver program services that are desired by and selected by the individual, from among available services that are effective options for meeting one or more assessed needs. Support Coordination also involves the effective coordination of waiver program services with other Medicaid-funded services, other publicly funded services and programs (e.g. ADRS, school, workforce and generic community services), and other generic community services and resources (e.g. social, educational, religious, etc.) available to the individual, and family as applicable, regardless of the funding source.

A unit is defined as monthly.

Personal Care Services

Personal Care Services (T1019/Modifier UB - SAIL) (T1019/Modifier TF UB- ACT) (T1019/Modifier UA - E&D)

Personal Care Option (T1019/Modifier UB HX - SAIL) (T1019/Modifier TF HX - ACT) (T1019/Modifier UA HX- E&D)

Personal care services are those services prescribed by a physician in accordance with a plan of treatment to assist a patient with basic hygiene and health support activities. These services include assistance with bathing, dressing, ambulation, eating, supervision of the self-administering of medications, and securing health care from appropriate sources.

A person providing personal care services must be employed by a certified Home Health Agency or other agency approved by the Alabama Medicaid Agency and is supervised by a registered nurse, and meets the qualifications of a Personal Care Attendant as specified in the approved waiver document.

Personal care services may be provided by a relative or a friend when documentation shows that a relative or friend is qualified and there is proof of a lack of other qualified providers in a remote area.

For the SAIL Waiver, the number of units and services provided to each client is dependent upon individual need as set forth in the client's Plan of Care established by the case manager. Personal care services may be provided for a period not to exceed 100 units (25 hours) per week and not to exceed a total of 5,200 units (1300 hours) per waiver year (October 1 – September 30) in accordance with the provider contracting period. Services may be reduced based on need.

Personal Care under the ACT Waiver - There is no unit limit for Personal Care under the ACT Waiver. Services are authorized based on the specific medical needs of the ACT Waiver participant.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The Personal Choices program develops a new service delivery system for participants receiving personal care services on the State of Alabama Independent Living (SAIL) and ACT waivers that will allow for more participant involvement in the direction and choice of the person employed as a personal care worker.

Medicaid will not reimburse for activities performed which are not within the Scope of Services. State Plan EPSDT services must be exhausted prior to any use of Waiver services for individuals under the age of 21.

A unit is defined as 15 minutes.

Respite Care (T1005/Modifier UA - E&D) (T1005/Modifier TF UB-ACT) Respite Care Unskilled (S5150/Modifier UA - E&D), (S5150/Modifier TF UB-ACT)

Respite care is given to individuals unable to care for themselves on a short-term basis due to the absence or the need for relief of those persons normally providing the care. Respite care is provided in the individual's home and includes supervision, companionship and personal care of the individual.

Respite care may be provided by a companion/sitter, personal care attendant, home health aide, homemaker, LPN or RN, depending upon the care needs of the individual;

A unit is defined as 15 minutes.

Unskilled Respite Care (S5150/Modifier UB - SAIL)

Respite Care is provided to individuals unable to care for themselves and is furnished on a short-term basis because of the absence of or need for relief of those persons normally providing the care.

Unskilled Respite is provided for the benefit of the client and to meet client needs in the absence of the primary caregiver(s) rather than to meet the needs of the client’s household.

It is based on the needs of the individual client as reflected in the PCCP.

Breaks and Opportunities (Respite) Services CWP

(S5150 Breaks and Opportunities (Planned Respite) HOURLY - CWP); (S5150/Modifier HI/HW Breaks and Opportunities (Respite) Emergency Self-Directed DAILY); (S5150/Modifier HI Breaks and Opportunities (Respite) –Emergency DAILY); (S5150/Modifier HW/SE Breaks and Opportunities (Planned Respite) - Self-Directed DAILY – CWP); (S5150/Modifier HW Breaks and Opportunities (Planned Respite) - Self-Directed HOURLY – CWP); (S5150/Modifier SE Breaks and Opportunities (Planned Respite) DAILY – CWP)

A service provided to a waiver participant that lives with family or other natural supports who are providing support, care and supervision to the waiver participant. This service is provided for time-limited periods when the family or other natural supports are temporarily unable to continue to provide support, care and supervision to the waiver participant. This service can be provided in the waiver participant’s home or the pre-approved private home of the Breaks and Opportunities service provider. The Breaks and Opportunities service is provided with two equally important goals which include: (1) sustaining the family/natural support living arrangement and support-giving arrangement;

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

and (2) providing the waiver participant with opportunities to continue his/her regular activities and relationships and/or to explore new opportunities and meet new people with the Breaks and Opportunities service provider.

This service is provided during specific periods of time in a day, week or month when the unpaid family/natural support-givers typically provide support, care and supervision to the waiver participant. This service is provided in a way that ensures the individual's typical routine and activities are not disrupted and the individual's goals and needs, as set forth in the PCP, are attended to without disruption.

A unit is defined as hourly or daily.

Companion Services (S5135/Modifier UA - E&D) (S5135/Modifier TF UB-ACT)

Companion services provide support and supervision that is focused on safety and non-medical care such as the following:

- Reminding recipient to bathe, to take care of personal grooming and hygiene, and to take medication
- Observing or supervision of snack and meal planning
- Accompanying recipient to necessary medical appointments and grocery shopping
- Assisting with laundry and light housekeeping duties that are essential to the care of the recipient.

Under no circumstances should any type of skilled medical service be performed. Companion services are provided in accordance with a therapeutic goal and are not purely recreational in nature. A person providing companion services must meet the qualifications of a companion worker as specified in the approved waiver document.

A unit is defined as 15 minutes.

Day Habilitation Services

(T2021/Modifier UD/TG/SE- LHW – Level 3-w/transportation)

(T2021/Modifier UD/HK/SE – LHW – Level 4-w/transportation)

Day Habilitation Service includes planning, training, coordination, and support to enable and increase independent functioning, physical health and development, communication development, cognitive training, socialization, community integration, domestic and economic management, behavior management, responsibility and self-direction. Staff may provide assistance/training in daily living activities and instruction in the skills necessary for independent pursuit of leisure time/recreation activities. Social and other adaptive skills building activities such as expressive therapy, prescribed use of art, music, drama or movement may be used to modify ineffective learning patterns and/or influence change in behavior.

Transportation cost to transport waiver recipients to places such as day programs, social events or community activities when public transportation and/or transportation covered under the State Plan is not available, accessible or desirable due to the functional limitations of the waiver recipient will be included in the rate paid to providers for this service. Day Habilitation Service workers may transport waiver recipients in their own vehicles as an incidental component of Day Habilitation Services.

Day Habilitation Training Services are provided by a residential staff and supervised by a Qualified Intellectual Disabilities Professional (QIDP) in coordination with the waiver recipient's Person-Centered Plan The residential staff will be required to complete the training requirements as outlined in the waiver document. The QIDP must provide and document supervision of, training for, and evaluation of Aide in the individual client record.*****The level utilized for Day Habilitation Services in the LHW is determined by the individual's ICAP score.

The provider for Day Habilitation Services can be reimbursed based on eight levels of services.

Day Habilitation Services are limited to 5 hours each day.

A unit is defined as 15 minutes.

Residential Habilitation Training Services (T2016/Modifier UC–ID)

Residential Habilitation is a type of residential service selected by the waiver recipient supported, offering individualized services and supports that enable the waiver recipient to acquire, retain, or improve skills necessary to reside in a community-based setting and which supports each waiver recipient's independence and full integration into the community, and ensures each waiver recipient's choice and rights.

Residential Habilitation Training Services provides habilitation training and intervention in the areas of self-care, sensory/motor development, interpersonal skills, communication, behavior shaping and supports, community living skills, mobility, health care, socialization, community inclusion, money management, pursuit of leisure and recreational activities and household responsibilities. Training and intervention may consist of incidental learning in addition to formal training plans and will also encompass modification of the physical and/or social environment.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The rate paid to providers for Residential Habilitation Training Service includes the cost to transport waiver recipients to activities such as day programs, social events, or community activities when public transportation or transportation services covered under the Medicaid State Plan are not available. Residential Habilitation Training Service workers may transport consumers in their own vehicles as an incidental component of Residential Habilitation Training Services.

Residential Habilitation Training Services will be delivered or supervised by a Qualified Intellectual Disabilities Professional (QIDP) in accordance with the waiver recipient's Person-Centered Plan. Residential Habilitation Training services can also be delivered by a residential staff. The residential staff will work under supervision and direction of a QIDP.

The residential staff is required to be certified by the provider agency as having completed a course of instruction provided or approved by the DMH. Retraining will be conducted as needed, at least annually.

A unit is defined as a per diem rate.

Respite Care Services - In Home (S5150/Modifier UC - ID) (S5150/Modifier UD - LHW) (S5150/Modifier UC/HW- ID) (S5150/Modifier UD/HW – LHW)

Respite Care Services - Out-of-Home (T1005/Modifier UC –ID) (T1005/Modifier UD LHW) (T1005/Modifier UC/HW – ID) (T1005/Modifier UD/HW – LHW)

Respite Care Services are provided in or outside a family's home to temporarily relieve the unpaid primary caregiver. Respite Care Services provide short-term care to an adult or child for a brief period of rest or relief for the family from day to day care giving for a dependent family member.

Respite Care Services are typically scheduled in advance, but it can also serve as a relief in a crisis situation. As a crisis relief, Out of Home Respite Care Services can allow time and opportunity for assessment, planning and intervention to try to re-establish the waiver recipient in his home, or if necessary, to locate another home for him.

Respite Care Out of the Home Services are typically provided in a certified group home.

Respite Care Services cannot be provided by a family member.

A unit is defined as 15 minutes.

In-Home Residential Habilitation Training Services (T2017/Modifier UC – ID) (T2017/Modifier UD - LHW)

In-Home Residential Habilitation Training Services provide care, supervision, and skills training in activities of daily living, home management and community integration to a waiver recipient in their own homes, but not in group homes or other facilities.

Residential Habilitation Training Services include habilitation training and intervention in the areas of self-care, sensory/motor development, interpersonal skills, communication, behavior shaping, community living skills, mobility, health care, socialization, community inclusion, money management, pursuit of leisure and recreational activities and household responsibilities.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Training and intervention may consist of incidental learning in addition to formal training plans, and will also encompass modification of the physical and/or social environment, meaning, changing factors that impede progress (e.g. moving a chair, substituting Velcro closures for buttons or shoe laces, changing peoples' attitudes toward the person, opening a door for someone, etc.) and provision of direct support, as alternatives to formal habilitative training.

Residential Habilitation Training Services for waiver recipients may be delivered or supervised by a QIDP in accordance with the waiver recipient's Person-Centered Plan. Residential Habilitation Training Services can also be delivered by a residential staff. The residential staff will work under supervision and direction of a QIDP.

The residential staff will be required to be certified by the provider agency as having completed a course of instruction provided or approved by the DMH/ID. Retraining will be conducted as needed, at least annually.

The rate paid to providers for Residential Habilitation Training Service includes the cost to transport waiver recipients to activities such as day programs, social events, or community activities when public transportation or transportation services covered under the Medicaid State Plan are not available.

In-Home Residential Habilitation Training Services is limited to 8 hours per day and cannot overlap other services.

Supported Employment (T2019/Modifier UC – ID) (T2019/Modifier UC/HN – ID) (T2019/Modifier UD/HN – LHW) (T2019/Modifier UC/HO – ID) (T2019/Modifier UD/HO – LHW) (T2019/Modifier UD – LHW) (T2019/Modifier UC/HW – ID) (T2019/Modifier UD/HW – LHW) (S0215/Modifier UC – ID) (S0215/Modifier UD – LHW)

There are three variations of Supported Employment Services: (1) Individual Assessment/Discovery (2) Small Group and (3) Individual.

1. Individual Assessment/Discovery is a one-time, time limited target service designed to help a waiver recipient who wishes to pursue individualized, integrated employment or self-employment. Discovery may involve a comprehensive analysis of the waiver recipient's history; interviews with family, friends and support staff/ observing the waiver recipient performing work skills; and career research in order to determine the waiver recipient's career interests, talents, skills, support needs and choice; and the writing of a Personal Profile Frames which will begin with the development of an employment plan.

2. Employment Small Group often consists of groups of waiver recipients being supported in enclave or mobile work crew activities. Employment Small Group are services and training activities provided in regular business, industry, and community settings for groups of two to eight workers with disabilities.

3. Employment Individual Services are the ongoing support to waiver recipients to obtain and maintain an individual job in competitive or customized employment, or self-employment, in an integrated work setting in the general workforce for which a waiver recipient is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

individuals without disabilities. Employment Individual includes two distinct services: Job Developer and Job Coach.

(a) The Job Developer duties include, but are not limited to, marketing the Supported Employment Service and the waiver recipient's skills; negotiating hours or location to meet the abilities of the waiver recipient; and job placement.

(b) The Job Coach enters once placement has been arranged. The Job Coach duties include, but are not limited to, assisting with training of waiver recipients in supported work to perform specific jobs consistent with their abilities; teaching waiver recipients associated work skills, responsibilities and behaviors not related to the specific job being performed; and providing continued ongoing support to waiver recipients in supported work.

Supported Employment Services are conducted in a variety of settings, particularly work sites in which persons without disabilities are employed.

When Supported Employment Services are provided at a work site in which persons with disabilities are employed, payment will be made only for the adaptations, supervision, and training required by waiver recipients as a result of their disabilities, and will not include payment for the supervisory activities rendered as a normal part of the business settings.

Supported Employment (both group and individual) Services do not include facility based, or other similar types of vocational services furnished in specialized facilities that are not part of the general workplace.

Supported Employment Services are not available to recipients eligible for benefits under a program funded by either Section 110 of the Rehabilitation Act of 1973, or P.L. 94-142.

Transportation accommodations to the worksite or supported employment provider's home-base should be a component of the planning process and integrated into the Person-Centered Plan. While developing the plan which will reflect employment goals; transportation issues, concerns, and access should be addressed. All avenues of possible sources of transportation should be considered including public transportation and natural supports such as family. If training is needed in order for a person to access transportation, then that training should be outlined in the plan.

Supported Employment Transportation Service can be authorized, under special circumstances, intended to be limited in scope, duration, and not to exceed the annual cap.

A unit is defined as 15 minutes.

There are three variations of Supported Employment Services: (1) Individual Discovery, (2) Small Group and (3) Individual.

Supported Employment Individual is a progression of services provided, as needed, on an individual basis for a person who, because of their disability(s), needs support to obtain and/or maintain an individualized, competitive or customized job in an integrated community setting for which the person is compensated at or above the minimum wage. These services are designed to support the achievement of individualized integrated employment outcomes consistent with the person's employment/career goals and conditions for success, as determined through Exploration and/or Discovery if such services are needed to accurately identify these goals and conditions.

The expected outcome of this service is sustained paid employment in a competitive or customized job, with an employer who is not the person’s service provider, and for which a person is compensated at or above the minimum wage, but not less than the customary wage paid by the employer for the same or similar work performed by persons without disabilities. The job also offers the level of benefits offered to persons without disabilities performing the same/similar work.

Supported Employment—Individual Employment Support Services are individualized and may include the following components:

- Exploration: A time-limited & targeted service designed to help a person make an informed choice about whether to pursue an individualized, competitive or customized job in an integrated

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

community setting for which compensation is at or above the minimum wage.

- Discovery: A time-limited & targeted service, if not otherwise available to the individual from the Alabama Department of Rehabilitative Services, designed to help a person, who wishes to pursue an individualized, competitive or customized job in an integrated community setting for which the person is compensated at or above the minimum wage, to identify through person-centered assessment, planning and exploration.
- Job Development Plan: A time-limited & targeted service, if otherwise not available to the individual from ADRS, designed to create a clear plan for Job Development to obtain an individualized, competitive or customized job in an integrated community setting for which the person is compensated at or above the minimum wage.
- Job Development: A service, if otherwise not available to the individual from ARDS, that supports a person to obtain an individualized, competitive or customized job in an integrated community setting for which the person is compensated at or above the minimum wage. This service is designed to implement the Job Development Plan, if applicable, & should result in the achievement of an individualized, integrated employment outcome consistent with the person's employment and career goals, as determined through Exploration (if necessary), Discovery (if necessary) &/or the employment planning process and reflected in the PCP.
- Job Coaching: A service for individualized, integrated employment, if not otherwise available to the individual from ADRS, includes identifying and providing services and supports that assist the person in maintaining and advancing in individualized employment in an integrated setting. Job Coaching includes supports provided to the person and their supervisor or co-workers, either remotely (via technology) or face-to-face. Job Coaching supports must be guided by a Job Coaching fading plan and must include systematic instruction utilizing task analysis to teach the person to independently complete as much of their job duties as possible.
- Career Advancement: A time-limited career planning and advancement support service, if not otherwise available to the individual from the Alabama Department of Rehabilitative Services, for persons currently engaged in individualized, integrated employment who wish to obtain a promotion and/or a second individualized, integrated employment opportunity. The service focuses on developing and successfully implementing a plan for achieving increased income and economic self-sufficiency through promotion to a higher paying position or through a second individualized, integrated employment or self-employment opportunity.

Supported Employment Small Group is a service providing employment services and training activities to support successful transition to individualized integrated employment or self-employment, or to supplement such employment and/or self-employment when it is only part-time.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The expected outcome of this service is the acquisition of knowledge, skills and experiences that facilitate career development and transition to individualized integrated employment or self-employment, or that supplement such employment and/or self-employment when it is only part-time. The individualized integrated employment or self-employment shall be consistent with the individual's personal and career goals, as documented in their PCP. Supported Employment—Small Group shall be provided in a way that presumes all participants are capable of working in individualized integrated employment and/or self-employment.

Participants in this service shall be encouraged, on an ongoing basis, to explore and develop their interests, strengths, and abilities relating to individualized integrated employment and/or self-employment. In order to reauthorize this service, the PCP must document that such opportunities are being provided through this service, to the person, on an on-going basis. The PCP shall also document and address any barriers to the person transitioning to individualized integrated employment or self-employment if the person is not already participating in individualized integrated employment or self-employment.

A unit is defined as 15 minutes and monthly.

Prevocational Services (T2015/Modifier UC–ID)
(T2015/Modifier UD – LHW)

Prevocational Services are not available to waiver recipients who are eligible for benefits under a program funded under Section 110 of the Rehabilitation Act of 1973 or Section 602 (16) and (17) of the Education of the Handicapped Act.

Prevocational Services prepare a waiver recipient for paid or unpaid employment, but are not job task oriented. Prevocational Services include teaching such concepts as compliance, task completion, attention, problem solving, and safety.

Prevocational Services are provided to waiver recipients not expected to be able to join the general work force or participate in a transitional sheltered workshop within one year (excluding supported employment programs).

Waiver recipients are compensated at a rate of less than 50 percent of the minimum wage.

A unit is defined as 1 hour.

Physical Therapy Services (97110/Modifier UC-ID) (97110/Modifier UD-LHW) (97110 – CWP)

Physical Therapy Services include services that assist in determining a waiver recipient's level of functioning by applying diagnostic and prognostic tasks and providing treatment training programs.

Physical Therapy Services preserve and improve abilities for independent function, such as range of motion, strength, tolerance, coordination, and activities of daily living.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Physical Therapy Services also helps with progressive disabilities through means such as the use of orthotic prosthetic appliances, assistive and adaptive devices, positioning, behavior adaptations, and sensory stimulation.

Physical Therapists may also provide consultation and training to staff or caregivers (such as waiver recipient's family or foster family). The Physical Therapist must meet all state licensure requirements and be designated as a regulated Physical Therapist by the national accreditation body.

A unit is defined as 15 minutes.

Occupational Therapy Services (97535/Modifier UC –ID) (97535/Modifier UD – LHW) (97535 – CWP)

Occupational Therapy Services include the evaluation of a waiver recipient to determine level of functioning by applying diagnostic and prognostic tasks and guiding and treating waiver recipients in the prescribed therapy to secure or obtain necessary function.

Therapists may also provide consultation and training to staff or caregivers (such as waiver recipient's family or foster family). The Occupational Therapist must meet all state licensure requirements and be designated as a regulated Occupational Therapist by the national accreditation body.

A unit is defined as 15 minutes.

Speech and Language Therapy Services (92507/Modifier UC –ID) (92507/Modifier UD – LHW) (92507 – CWP)

Speech and Language Therapy Services are diagnostic, screening, preventive, corrective services provided on an individual basis, when referred by a physician (M.D., D.O.). Speech and Language Therapy Services may include:

- Screening and evaluation of waiver recipient’s speech and hearing functions and comprehensive speech and language evaluations when so indicated;
- Participation in the continuing interdisciplinary evaluation of waiver recipients for purposes of implementing, monitoring and following up on the person’s habilitation programs;
- Treatment services as an extension of the evaluation process that include:
    1. Consulting with others working with the waiver recipient for speech education and improvement
    2. Designing specialized programs for developing a waiver recipient’s communication skills comprehension and expression.

Therapists may also provide training to staff and caregivers (such as a waiver recipient's family and/or foster family). Services to direct caregivers will be allowed when the service to caregivers is for the direct benefit of the waiver recipient and is necessary to enable the waiver recipient to be cared for outside of an institution. The Speech/Language Therapist must meet all state licensure requirements.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A unit is defined as an encounter.

Personal Emergency Response System (PERS) (S5160/Modifier UB - Installation - SAIL) (S5160/Modifier TF UB – Installation-ACT) (S5160/Modifier UA – Installation – E&D) (S5161/Modifier UB – Monthly - SAIL) (S5161/Modifier TF UB – Monthly-ACT) (S5161/Modifier UA – Monthly – E&D)

PERS is an electronic device that enables certain high-risk patients to secure help in the event of an emergency. The recipient may also wear a portable "help" button to allow for mobility. The system is connected to a patient's phone and programmed to signal a response center once a "help" button is activated. PERS must be provided by trained professionals. Initial setup and installation of PERS must be on the individual's plan of care, prior authorized and approved by the Alabama Medicaid Agency or its designee. The price quotation from the vendor shall specify the description of the PERS. Only one PERS installation per recipient can be approved. Exceptions to this limitation shall be considered on an individual basis for circumstances such as relocations.

A unit is defined as a monthly rate.

Personal Care (T1019/Modifier UC –ID) (T1019/Modifier UC/HW – ID) (T1019/Modifier UC/ HN) (T1019/Modifier UD – LHW) (T1019/Modifier UD/HW-LHW) (T1019/Modifier UD/HN – LHW)

Personal Care Services include assistance with any activity of daily living (ADL) or instrumental activity of daily living (IADL). Assistance for ADLs includes bathing, toileting, transfer and ambulation, skin care, grooming, dressing, extension of therapies and exercise, routine care of adaptive equipment primarily involving cleaning as needed, meal preparation, assistance with eating, and incidental household cleaning and laundry. IADLs include assistance with shopping, budgeting, using public transportation, social interaction, recreation, and leisure activities. Assistance with IADLs includes accompaniment, coaching and minor problem-solving necessary to achieve the objectives of increased independence, productivity and inclusion in the community.

While in general Personal Care Services will not be approved for a person living in a group home or other residential setting, under the ID Waiver and LHW, Personal Care Services may be approved by the Division of Development Disabilities for specific purposes that are not duplicative.

Personal Care Services can also include supporting a person at an integrated worksite where the individual is paid a competitive wage. There will be a separate procedure code for this service, provided at the worksite, to distinguish it from other personal care activities.

The personal care attendant will work under the supervision of a QIDP and will be observed every 90 days. The personal care attendant is also required to complete the training requirements prior to providing services.

No payment will be paid for Personal Care Services furnished by a member of the immediate family (e.g., parents spouses, children) living in the home or who have a legal obligation to provide Personal Care Services. Siblings who do not reside in the home with the waiver recipient can be paid to provide Personal Care Services to the waiver recipient.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Personal Care Services may be self-directed to allow waiver recipients and their families to recruit, hire, train, supervise, and if necessary to discharge, their own personal care workers.

A unit is defined as 15 minutes.

Personal Care Transportation Services (T2001/Modifier UD – LHW) (T2001/Modifier UC – ID)

Personal care attendants may transport waiver recipients in their own (the attendant's) vehicles as an incidental component of the Personal Care Service. In order for this component to be reimbursed, the personal care attendant must be needed to support the waiver recipient in accessing the community, and not merely to provide transportation. The Personal Care Transportation Service will provide transportation into the community to shop, attend recreational and civic events, go to work and participate in *People First* and other community building activities. Additional payment will be made for mileage and the provider's cost of an insurance waiver to cover any harm that might befall the waiver recipient as a result of being transported.

The attendant must have a valid Alabama driver's license and his/her own insurance coverage as required by State law. The provider agency shall assure the attendant has a good driving record and is in-serviced on safety procedures when transporting a waiver recipient.

Personal Care Transportation Services shall not replace transportation that is already reimbursable under Day or Residential Habilitation nor the Medicaid non-emergency medical transportation program. The planning team must also assure the most cost-effective means of transportation, which would include public transport where available. Transportation by a personal care attendant is not intended to replace generic transportation nor to be used merely for convenience.

A unit is defined as a mileage rate.

Companion Services (S5135/Modifier UC –ID) (S5135/Modifier UD –LHW) (S5135/Modifier UC/HW – ID) (S5135/Modifier UD/HW –LHW)

Companion Services are non-medical supervision and socialization provided to a functionally impaired adult. Companions may assist the waiver recipient with such tasks as meal preparation and shopping, but may not perform these activities as discrete services.

The provision of Companion Services does not entail hands-on medical care.

Companions may perform light housekeeping tasks that are incidental to the care and supervision of the waiver recipient.

Companion Service is provided in accordance with a therapeutic goal in the waiver recipient's approved plan of care and is not merely recreational in nature. Companion Service must be necessary to prevent institutionalization of the waiver recipient.

The person providing Companion Service must meet the qualifications of a companion worker as specified in the waiver document. They also must have completed all training requirements.

Companion Services can be directed by waiver recipients or family but must adhere to all the traditional service rules.

A unit is defined as 15 minutes

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Positive Behavior Support Services
(H2019/Modifier UC/HP - ID - Level 1)
(H2019/Modifier UC/HN – ID- Level 2)
(H2019/Modifier UC/HM – ID-Level 3)
(H2019/Modifier UC/HP/SE – ID-Level 1)
(H2019/Modifier UC/HN/HM – ID – Level 2)
(H2019/Modifier UC/HM/SE – ID – Level 3)
(H2019/Modifier UD/HP – LHW – Level 1)
(H2019/Modifier UD/HN – LHW – Level 2)
(H2019/Modifier UD/HM – LHW – Level 3)
(H2019/Modifier UD/HP/SE – LHW – Level 1)
(H2019/Modifier UD/HN/SE – LHW – Level 2)
(H2019/Modifier UD/HM/SE – LHW – Level 3)
(H2019/Modifier/ HN – CWP – NON CRISIS CONSULTATION)
(H2019/CWP – CRISIS INTERVENTION AND STABILIZATION)

Positive Behavior Support (PBS) Services are a set of researched-based strategies that combine behavioral and biomedical science with person-centered, valued outcomes and systems change to increase quality of life and decrease problem behaviors by teaching new skills and making changes in a waiver recipient's environment. The strategies take into consideration all aspects of the waiver recipient's life and are intended to enhance positive social interactions across work, academic, recreational, and community settings while reducing actions that are not safe or that lead to social isolation, loneliness or fearfulness. PBS provides framework for approaches that emphasize understanding the waiver recipient, strengthening environment that build on individual strengths and interests, and decreasing interventions that focus on controlling problematic behavior in order to fit the waiver recipient's environment. Some of the billable tasks include, but are not limited to: conducting functional behavior support plan (BSP) development, training to implement the BSP, data entry/analysis/graphing, monitoring effectiveness of BSP, writing progress notes/reports, etc. BSP may include consultation provided to families, other caretakers and habilitation service providers. BSP shall place primary emphasis on the development of desirable adaptive behavior rather than merely the elimination or suppression of undesirable behavior. A behavior support plan may only be implemented after positive behavioral approaches have been tried and its continued use must be reviewed every thirty days with reports due quarterly.

Positive Behavior Support (PBS) Service is comprised of two general categories of service tasks. These are (1) development of a BSP and (2) implementation of a BSP. In addition, this waiver service has three service levels: two professional and one technical, each with its own procedure code and rate of payment. The service levels are distinguished by the qualifications of the service provider and by supervision requirements. Both professional and technical level service providers may perform tasks within both service categories, adhering to the supervision requirements that are described under provider qualifications.

The two professional service provider levels are distinguished by the qualifications of the person providing the service. Both require advanced

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

degrees and specialization, but the top level also requires board certification in behavior analysis. The third service provider level is technical and requires that the person providing the service be under supervision to perform PBS tasks. There is a different code and rate for each of the three service provider levels.

The maximum units of service per year of both professional and technician level units combined cannot exceed 1200 and the maximum units of service of professional level one (1) or two (2) cannot exceed 800. Maximum units of Technician level service are the balance between billed professional level one (1) and two (2) units and the combined maximum per year. Providers who bill more than the 800 units of professional level will receive a denial notice. Once the denial notice is received, the provider should submit another claim for 800 units at the professional level and the remaining units at the technical level in order to receive payment for services rendered. Providers of service must document which tasks are provided by date performed in addition to their clinical notes. There will be no accommodation for exceeding the overall cap of 1200 units for all three levels.

Providers of service must maintain a service log that documents specific days on which services are delivered. The following do not qualify for billing under this waiver service: 1) individual or group therapy, 2) group counseling, 3) behavioral procedures not listed in a formal BSP or that do not comply with the current Behavioral Services Procedural Guidelines and Community Certification Standards, 4) non-traditional therapies, such as music therapy, massage therapy, etc., 5) supervision.

Providers at Level 1 must have either a Ph.D. or M.A. and be certified as a Behavior Analyst by the Behavior Analysis Certification Board.

Providers at level 2 must have either a Ph.D. or M.A. in the area of Behavior Analysis, Psychology, Special Education or a related field and three years of experience working with persons with developmental disabilities. Level 2 providers with a Doctorate do not require supervision.

Providers at Level 3 providers must be either a (QIDP) (per the standard at 43 CFR 483.430) or be a Board Certified Associate Behavior Analyst. Level 3 providers require supervision averaging at a minimum of one hour per week by either a Level 1 provider or a Level 2 Doctoral provider.

Positive Behavior Supports (PBS) for CWP involve expertise, training and technical assistance in evidence-based positive behavior support strategies to assist natural, co-worker and/or paid staff in supporting individuals who have behavioral support needs. Positive Behavior Supports are designed to improve the ability of unpaid natural supports and paid direct support staff to carry out therapeutic interventions. As needed, providers of Positive Behavior Supports conduct assessments, develop a person’s behavior support plan and train/consult with unpaid caregivers and/or paid support staff who are implementing the person’s behavior support plan, which is necessary to facilitate the person’s successful participation in the community, in employment and to ensure the person can remain in his/her current community living situation or transition to a less restrictive living situation.

This service may also include time-limited consultation with the person and his/her Person-Centered Planning team to consider available service providers and potential providers and assist the person to identify and select providers that can meet the unique needs of the member and to identify

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

additional supports necessary to implement behavior plans and perform therapeutic interventions. As needed, this service is also used to allow the behavioral specialist to be an integral part of the person-centered planning team, as needed, to participate in team meetings.

All PBS service providers must complete an orientation training provided by DMH.

Positive Behavior Support can be directed by waiver recipients or family but must adhere to all the traditional service rules.

A unit is defined as 15 minutes.

Environmental Accessibility Adaptations Services (S5165/Modifier UB – SAIL) (S5165/Modifier UC –ID) (S5165/Modifier UC/HW – ID) (S5165/Modifier UD – LHW) (S5165/Modifier UD/HW – LHW)

Environmental modifications are those physical adaptations to the home, required by the waiver recipient's approved plan of care, that are necessary to ensure the health, welfare and safety of the individual or enable the individual to function with greater independence in the home. Environmental Accessibility Adaptations must be necessary to prevent institutionalization of the waiver recipient.

Such adaptations may include the installation of ramps and grab-bars and/or the widening of doorways in order to accommodate the medical equipment and supplies necessary for the welfare of the waiver recipient.

Environmental Modifications exclude adaptations or improvements to the home which are not of direct medical or remedial benefit to the waiver recipient, such as floor covering, roof repair, central air conditioning, etc. Adaptations that add to the square footage of the home, any type of construction affecting the structural integrity of the home, changes to the existing electrical components of the home, or permanent adaptations to rental property are traditionally excluded from this Medicaid-reimbursed benefit. All services provided must comply with applicable state or local building codes. Environmental accessibility adaptations must be prior authorized and approved by the Alabama Medicaid Agency or its designee and must be listed on the waiver recipient's approved plan of care.

Total costs of environmental accessibility adaptations under the ID and LHW shall not exceed $5,000 per year, per waiver recipient.

Environmental Accessibility Adaptations for ID and LHW recipients can be directed by waiver recipients or family but must adhere to all the traditional service rules.

The SAIL Waiver maximum amount for this service is $8,500 per recipient for the entire stay on the waivers. Any expenditures in excess of $8,500 must be approved by the State Coordinator and the Medicaid designated personnel. This service may also be provided under the SAIL Waivers to assist an individual to transition from an institutional level of care to the SAIL Waivers. The modifications should not be billed until the first day the client is transitioned and has begun to receive waiver services in order to qualify as billable waiver expenditures. If the individual fails to transition to the SAIL Waivers, reimbursement will be at the administrative rate.

A unit is defined as an item.

Assistive Technology Services
(T2029/Modifier UD - LHW) (T2029/Modifier UD/HW – LHW)
(T2029/Modifier UC-ID) (T2029/Modifier UC/HW –ID)

Assistive Technology includes devices, controls, or appliances specified in the waiver recipient's approved plan of care, which enable waiver recipients to increase their ability to perform activities of daily living or to perceive, control or communicate with the environment in which they live. Included items are those necessary for life support, ancillary supplies and equipment necessary to the proper functioning of such items, and durable and non-durable medical equipment not available under the Medicaid State Plan. Items reimbursed with waiver funds shall be in addition to any medical equipment and supplies furnished under the State Plan and shall exclude those items which are not of direct medical or remedial benefits to the waiver recipient. Providers of Assistive Technology must maintain documentation of items purchased for each waiver recipient. All items shall meet applicable standards of manufacture, design and installation. Costs are limited to $5,000 per year, per waiver recipient.

Assistive Technology can be directed by individual participants or family members but must adhere to all the traditional service rules.

A unit is defined as an item.

Assistive Technology Services – CWP

(Assistive Technology and Adaptive Aids Assessment and/or Training (CWP T2029); (Assistive Technology and Adaptive Aids – DEVICES CWP ITEM (CWP T2029/Modifier/SE)

An item, piece of equipment or product system, whether acquired commercially, modified or customized, that is used to increase, maintain, or improve functional capabilities and to support the individual's increased independence in their home, in community participation, and in competitive integrated employment. The service covers purchases, leasing, shipping costs, and as necessary, repair of equipment required by the person to increase, maintain or improve his/her functional capacity to perform activities of daily living or instrumental activities of daily living independently or more cost effectively than would be possible otherwise. This service must include strategies for training the individual, natural/unpaid and paid supporters of the individual in the setting(s) where the technology and/or aids will be used, as identified in the Person-Centered Plan (PCP).

A unit is defined as hour or item.

Assistive Technology Services/Durable Medical Equipment

(T2029/Modifier UA - E&D)

An item, piece of equipment or product system, whether acquired commercially, modified, or customized, used to increase, maintain, or improve functional capabilities and support the individual's independence in the home, community, and integrated employment. The service covers purchases, leasing, shipping costs, and as necessary, repair of equipment required by the person to increase, maintain or improve his/her functional capacity to perform activities of daily living or instrumental activities of daily living independently or more cost effective. This service must include strategies for training the individual, natural/unpaid and paid supporters of the individual in the setting(s) where the technology and/or aids will be used, as identified in the person-centered plan (PCP).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The maximum allowed for Assistive Technology Services/Durable Medical Equipment is $2,000 per year per waiver participant up to a total of $10,000 per waiver participant's lifetime. State Plan EPSDT services must be exhausted prior to any use of Waiver services for individuals under the age of 21.

A unit is defined as an item.

Specialized Medical Supplies Services (T2028/Modifier UC-ID) (2028/Modifier UC/HW – ID) (T2028/Modifier UD-LHW) (T2028/Modifier UD/HW – LHW)

Specialized Medical Supplies are those which are specified in the waiver recipient's approved plan of care and are necessary to maintain the waiver recipient's health, safety and welfare, prevent further deterioration of a condition, or increase a waiver recipient's ability to perform activities of daily living. Supplies reimbursed under Specialized Medical Supplies shall not include common over-the-counter personal care items, supplies otherwise furnished under the Medicaid State plan, and items which are not of direct medical or remedial benefit to the waiver recipient. All items shall meet applicable standards of manufacture and design.

Providers of Specialized Medical Supplies must maintain documentation of items purchased for each waiver recipient. Costs for medical supplies are limited to $1800 per year, per waiver recipient.

Specialized Medical Supplies can be directed by waiver recipients or family but must adhere to all the traditional service rules.

A unit is defined as an item.

Assistive Technology (T2029/Modifier UB – SAIL) (T2029/Modifier U5 - TA Waiver for Adults) (T2029/Modifier TF UB –ACT)

Assistive technology includes devices, pieces of equipment, or products that are modified or customized and are used to increase, maintain or improve functional capabilities of individuals with disabilities.

Assistive technology services also include any service that directly assists a disabled individual in the selection, acquisition, or use of an assistive technology device, including evaluation of need, acquisition, selection, design, fitting, customization, adaptation, and application. Items reimbursed with waiver funds are in addition to any medical equipment furnished under the State Plan and exclude those items which are not of direct medical or remedial benefit to the recipient. This service must be necessary to prevent institutionalization or to assist an individual to transition from an institutional level of care to the SAIL or ACT Waivers. All items shall meet applicable standards of manufacture, design and installation and must be listed on the client's plan of care. This service along with transitional assistive technology requires prior authorization and approval by the Alabama Medicaid Agency or its designee. Upon completion of the service, the client must sign and date a form acknowledging receipt of the service.

Vehicle modifications can only be authorized if it can be demonstrated that all Non-Emergency Transportation (NET) Services have been exhausted.

For the ACT Waiver, the combined amount for Assistive Technology, Assistive Technology Repair, and Evaluation for Assistive Technology, cannot exceed $15,000.

For the SAIL Waiver, Assistive Technology, cannot exceed $25,000.

A unit is defined as a per diem rate.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Skilled Nursing (S9123/Modifier UC–RN; S9124/Modifier UC–LPN – ID) (S9123/Modifier UD – RN; S9124/Modifier UD–LPN – LHW) (S9123/Modifier UC/HW – ID); (S9124/Modifier UC/HW – ID) (S9123/Modifier UD/HW – LHW); (S9124/Modifier UD/HW – LHW) (S9123/Modifier TF UB-RN-ACT; S9124/Modifier TF UB-LPN-ACT) (S9123 - RN – CWP; S9123/Modifier/HW – CWP); (S9124 – LPN – CWP; S9124 LPN/Modifier/HW – CWP) (S9123/Modifier UA – RN; S9124/Modifier UA – LPN – E&D)

Skilled nursing services are services listed in the plan of care that are within the scope of the Alabama Nurse Practice Act and are provided by a registered professional nurse, or licensed practical or vocational nurse under the supervision of a registered nurse, licensed to practice in the State. This service must be necessary to prevent institutionalization of the recipient.

Services available for Participant Direction services under Personal Choices Program State Plan Option, 1915(j) are: Personal Care, Homemaker, Unskilled Respite, and Companion. Skilled Nursing is not an allowable service under the 1915(j) because the provisions do not fall within the guidelines of the Alabama Nurse Practice Act.

State Plan EPSDT services must be exhausted prior to any use of Waiver services for individuals under the age of 21. Skilled Nursing Service is not intended to be provided seven (7) days a week/24 hours a day and is not intended to be a private duty arrangement. The provision of Skilled Nursing Services must be ordered by a physician and documented in the person-centered plan of care. Services provided without an order by the physician will not be reimbursed by the Alabama Medicaid Agency.

A unit is defined as 1 hour.

Medical Supplies (T2028/Modifier UB – SAIL) (T2028/Modifier TF UB-ACT) (T2028/Modifier UA – E&D)

Medical supplies are necessary to maintain the recipient’s health, safety, and welfare and to prevent further deterioration of a condition such as decubitus ulcers. These supplies do not include common over-the-counter personal care items such as toothpaste, mouthwash, soap, shampoo, Q-tips, deodorant, etc.

These medical supplies will only be provided when authorized by the recipient’s physician and shall meet applicable standards of manufacture, design and installation. Providers of this service will be those who have a signed provider agreement with Medicaid and the Department of Rehabilitation Services. Medical supplies are limited to $2,100.00 per recipient per year. The OA must maintain documentation of items purchased for the recipient.

For the E&D Waiver, Medical Supplies shall be billed monthly, quarterly or annually. The yearly allotment cap shall not exceed $1,200.00 If billed monthly, the monthly cap amount shall not exceed $100.00. If billed quarterly, the quarterly cap amount shall not exceed $300.00. Total cap amounts shall not rollover to another month, quarter or year. State plan EPSDT services must be exhausted prior to any use of waiver services for individuals under the age of 21.

A unit is defined as a per diem rate.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Evaluation for Assistive Technology (T2025/Modifier UB - SAIL) (T2025/Modifier TF UB –ACT)

This service will provide for an evaluation and determination of the client's need for assistive technology. The evaluation must be physician-prescribed and be provided by a physical therapist licensed to do business in the state of Alabama who is enrolled as a provider with the Alabama Department of Rehabilitation Services (ADRS).

When applicable, a written copy of the physical therapist's evaluation must accompany the prior authorization request, and a copy must be kept in the recipient's file. This service must be listed on the recipient's plan of care before being provided. Reimbursement for this service will be the standard cost per evaluation, as determined by Alabama Medicaid or its designee. This service must be necessary to prevent institutionalization of the recipient.

This service may also be provided to assist an individual to transition from an institutional level of care to the home and community-based waiver. The service should not be billed until the first day the client is transitioned and has begun to receive waiver services in order to qualify as billable waiver funds. If the individual fails to transition to the SAIL Waiver, reimbursement will be at the administrative rate.

For the ACT Waiver, the combined total of Assistive Technology, Assistive Technology Repair, and Assistive Technology Evaluation cannot exceed $15,000.

A unit is defined as a per diem rate.

Assistive Technology Repairs (T2035/Modifier UB - SAIL) (T2035/Modifier TF UB –ACT)

This service will provide for the repair of devices, equipment or products that were previously purchased for the recipient. The repair may include fixing the equipment or devices, or replacement of parts or batteries to allow the equipment to operate. This service is necessary to ensure health and safety and prevent institutionalization. All items must meet applicable standards of manufacture, design and installation. Repairs must be arranged by the case manager and documented in the plan of care and case narrative. Prior authorization is not required for this service.

For the ACT Waiver, the combined total of Assistive Technology, Assistive Technology Repair, and Assistive Technology Evaluation cannot exceed $15,000.

A unit is defined as a per diem rate.

Minor Assistive Technology (T2028 UB SC- SAIL)

Minor Assistive Technology (MAT) includes supplies, devices, controls, or appliances, specified in the Plan of Care, which enable individuals to increase their ability to perform activities of daily living, or to perceive, control, or communicate with the environment in which they live. All MAT supplies must be prescribed by a physician, be medically necessary and be specified in the Plan of Care. MAT is necessary to maintain the recipient's health, safety, and welfare and to prevent further deterioration of a condition and does not include common over the counter personal care items.

The OA must maintain documentation of items purchased for the recipient. Providers of this service will be those who have a signed provider agreement

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

with the Alabama Medicaid Agency and the Department of Rehabilitation Services.

Vendors providing MAT devices should be capable of supplying and training in the use of the minor assistive technology/device.

A unit is defined as a daily rate.

Waiver Frozen Meals (S5170/Modifier UA - E & D) (S5170/Modifier TF UB- ACT)
Waiver Shelf-Stable Meals (S5170/Modifier SC - E & D) (S5170/Modifier TF SC- ACT)
Breakfast Meals (S5170 - E & D) (S5170/Modifier TF UA- ACT)

Home Delivered meals are provided to an individual who is unable to meet his/her nutritional needs. It must be determined that the nutritional needs of the individual can be addressed by the provision of home delivered meals. (The individual must be age 21 or older to receive this service on the E&D waiver.)

This service will provide at least one (1) nutritionally sound meal per day to adults unable to care for their nutritional needs because of a functional disability dependency, who require nutritional assistance to remain in the community and do not have a caregiver available to prepare a meal for them. Meals provided by this service will not constitute a full daily nutritional regimen.

This service will be provided as specified in the plan of care.

A unit is defined as:

Seven-(7) pack of frozen meals equal to 1 unit.

Two (2) shelf-stable meals equal to 1 unit.

Seven-(7) pack of breakfast meals equal to 1 unit.

Personal Assistance Services (S5125/Modifier UB – SAIL)
(S5125/Modifier TF UB- ACT)

Personal Assistant Services (PAS) are a range of services provided by one or more persons designed to assist an individual with a disability to perform daily activities on and off the job. These activities would be performed by the individual, if that individual did not have a disability. Such services shall be designed to increase the individual's independence and ability to perform every day activities on and off the job.

This service will support that population with physical disabilities who are seeking competitive employment either in their home or in an integrated work setting. An integrated work setting is defined as a setting typically found in the community, which employs an individual with disabilities and there is interaction with non-disabled individuals who are in the same employment setting.

This service must be sufficient in amount, duration, and scope such that an individual with a moderate to severe level of disability would be able to obtain the support needed to both live and get to and from work.

A unit is defined as 15 minutes.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Personal Assistance Services– CWP

(S5125 – Personal Assistance Community); (S5125/Modifier HW – Personal Assistance Community Self-directed); (S5125/Modifier HE Personal Assistance Home); (S5125/Modifier HE/HW Personal Assistance Home Self-directed); (S5125/Modifier HE/HO/HW - Personal Assistance Home: Family Self-directed)

A range of services and supports designed to assist an individual with a disability to perform, participate fully in his/her community and supports for activities of daily living and instrumental activities of daily living that the individual would typically do for themselves if they did not have a disability and that occur outside the home.
Personal Assistance-Community services may be provided outside the person's home, at an integrated workplace where the person is paid a competitive wage, or other places in the broader community to support community participation, involvement and contribution by the person.

Personal Assistance-Community services must be provided consistent with the goals/outcomes defined in the Person-Centered Plan and with the over-arching goal of ensuring the individual's full community participation and inclusion. Participant goals and support needs, as documented in the Person-Centered Plan, shall be addressed by the Personal Assistance-Community provider in a manner that supports and enables the individual to achieve the highest level of independence possible.

Personal Assistance-Community may be used to address assistance needs in the workplace and community, if personal care and assistance are the only type of supports an individual needs in these locations. Otherwise, personal care and assistance is included in Supported Employment or Community Integration Connections and Skills Training services and the provider of those services shall be responsible for these needs during the hours that Supported Employment on-the-job supports (i.e. Individual Job Coaching or Small Group supports) or Community Integration Connections and Skills Training services are provided. As appropriate to the individual need, based on the nature of the community involvement, this service includes assistance, support, supervision and partial participation with eating, toileting, personal hygiene and grooming, and other activities of daily living as appropriate and needed to sustain competitive integrated employment, integrated community participation, involvement and contribution.

Personal Assistance- Home is a range of services and supports designed to complement but not supplant natural supports and assist an individual with a disability to perform, in his/her home, activities of daily living, including instrumental activities of daily living that the individual would typically do for themselves if they did not have a disability. Personal Assistance-Home services are provided in the person's home and outside the home on the property where the home is located. Participant goals and support needs, as documented in the Person-Centered Plan, shall be addressed by the Personal Assistance-Home provider in a manner that supports and enables the individual to acquire, retain and maximize skills and abilities to achieve the highest level of independence possible. Services, if needed, to support goals and needs related to instrumental activities of daily living that occur outside the home (e.g. shopping; banking), competitive integrated

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

employment and community participation, involvement and contribution must also be addressed in the Person-Centered Plan using Personal Assistance-Community, other appropriate services, or available natural supports. Natural supports must be documented in the Person-Centered Plan and confirmed by the Support Coordinator.

A unit is defined as 15 minutes.

Personal Care/Attendant Service (T1019/Modifier U5 – TA Waiver for Adults)

Personal Care/Attendant Service (PC/AS) provides in-home and out-of-home (job site) assistance with eating, bathing, dressing, caring for personal hygiene, toileting, transferring from bed to chair and vice versa, ambulation, maintaining continence, medication management and other activities of daily living (ADLs). It may include assistance with independent activities of daily living (ADLs) such as meal preparation, using the telephone, and household chores such as laundry, bed-making, dusting and vacuuming, which are incidental to the assistance provided with ADLs or essential to the health and welfare of the client rather than the client's family.

PC/AS is designed to increase an individual's independence and ability to perform daily activities and to support individuals with physical disabilities in need of these services as well as those seeking or maintaining competitive employment either in the home or an integrated work setting.

A unit is defined as 15 minutes.

Medical Supplies and Appliances (T2028/Modifier U5 – TA Waiver for Adults)

This service includes medical equipment and supplies that are not covered in the Medicaid State Plan. The medical equipment or supplies must be included in the recipient's plan of care, and they must be necessary to maintain the recipient's ability to remain in the home. This service must be necessary to avoid institutionalization of the recipient. Invoices for medical equipment and supplies must be maintained in the case record

A unit is defined as a per diem rate.

Private Duty Nursing (S9123/Modifier U5 – RN; S9124/Modifier U5 – LPN - TA Waiver for Adults)

The Private Duty Nursing Service is a service which provides skilled medical observation and nursing services performed by a Registered Nurse or Licensed Practical Nurse who will perform their duties in compliance with the Nurse Practice Act and Alabama State Board of Nursing. Private Duty Nursing under the waiver will not duplicate Skilled Nursing under the mandatory home health benefit in the State Plan. If a waiver client meets the criteria to receive the home health benefits, home health should be utilized first and exhausted before Private Duty Nursing under the waiver is utilized. The objective of the Private Duty Nursing Service is to provide skilled medical monitoring, direct care, and intervention for individuals 21 and over to maintain him/her through home support. This service is necessary to avoid institutionalization and the individual must meet criteria outlined in the approved waiver document prior to receipt of services.

A unit is defined as 1 hour.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Community Specialist Services (H2015-UD – LHW) (H2015-UC – ID) (H2015/Modifier UC/HW – ID); (H2015/Modifier UD/HW – LHW)

Community Specialist Services is a time limited, task specific service that may include professional observation and assessment, facilitation of Person-Centered Plan development and continuance, individualized program design and implementation, training of waiver recipients and family members, consultation with caregivers and other agencies, and monitoring and evaluation of planning and service outcomes as needed to facilitate and implement the Person-Centered Plan. Community Specialist Services, at the choice of the waiver recipient or family, include advocating for the consumer and assisting him or her in locating and accessing services and supports. The Community Specialist will serve as both a qualified planner and, at the waiver recipient's or family's request, a broker.

The functions outlined for Community Specialist Services differs from case management in the skill level and independence of the Specialist, as well as the focus on self-determination and advocacy for the individual.

Targeted case managers will continue to perform traditional duties of intake, completion of paperwork regarding eligibility, serving in the capacity of referral and resource locating, monitoring and assessment.

The planning team shall first ensure that provision of Community Specialist Services does not duplicate the provision of any other services, including Targeted Case Management provided outside the scope of the waiver. The community specialist will frequently be involved for only a short time (30 to 60 days) and designed not to duplicate case management services. If the waiver recipient or family chooses to have the Community Specialist remain involved for a longer period of time, it must be agreed upon by the team and extended on the waiver recipient's approved plan of care. The need to extend Community Specialist Services must be fully justified in writing by the case manager. Community Specialist Services are limited to a 90-day period per waiver recipient per waiver year. Community Specialist Services may be self-directed for waiver recipients who self-direct Personal Care Services. The Community Specialist will inform and consult, intervene, and trouble shoot any problems the waiver recipient may have with self-directing their services.

A unit of service is defined as 15 minutes.

Crisis Intervention Services (H2011–UD - LHW) (H2011-UC - ID)

Crisis Invention Services provide immediate therapeutic intervention, available to a waiver recipient on a 24-hour basis, to address personal, social, and/or behavioral problems which otherwise are likely to threaten the health and safety of the waiver recipient's removal from his current living arrangement.

When need for Crisis Invention Service arises, the service will be added to the waiver recipient's approved plan of care. A separate crisis intervention plan will be developed to define in detail the activities and supports that will be provided. All Crisis Intervention Services shall be approved by the Regional Community Service Office of the DMH prior to the service being initiated.

Crisis Intervention Services will not count against the $25,000 per waiver recipient per waiver year cap in the waivers, since the need for the service cannot accurately be predicted and planned for ahead of time.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A unit of service is defined as 15 minutes.

Transitional Assistance Service (T2038/Modifier TF UB- ACT)

Transitional Assistance Services consists of the following items, when appropriate and necessary for the participant's discharge from a nursing facility and safe transition to the community:

1. Security deposits that are required to obtain a lease on an apartment or home;
2. Essential household furnishings and moving expense required to occupy and use a community domicile, including: furniture, window coverings, food preparation items, and bed/bath linens;
3. Set-up fees or deposits for utility or services access, including telephone, electricity, heating and water;
4. Household services necessary for the individual's health and safety, such as pest eradication and one-time cleaning prior to occupancy.

Transitional Assistance Service cannot exceed $3,500.

Pest Control Service (S5121/Modifier UA– E&D) (S5121/Modifier UB - SAIL) (S5121/Modifier TF UB- ACT) (S5121/Modifier U5- TA)

Pest Control Service is the chemical eradication of pests by a professional in a waiver participant's primary residence, the presence of which may limit or prevent the service providers from entering the setting to deliver other critical waiver services.

Pest control services may be provided in a waiver participant's primary residence, which is limited to

a) A participant living in his/her own private house or apartment and who is responsible for his/her own rent or mortgage; or
b) A participant living with a primary caregiver.

Pest Control Services include the following activities:

a) Assessment or inspection
b) Application of chemical-based pesticide
c) Follow up visit

Pest control services is limited to one series of treatments per lifetime by a licensed and certified pest control company and excludes lodging during the chemical eradication process, all associated preparatory housework, and the replacement of household items. Additional treatments may be approved if the lack of such treatments would jeopardize the participant's ability to live in the community. If additional treatments are needed, the State will evaluate that participant's living situation to determine if the community arrangement is appropriate and supports their health and safety. Limits on Pest Control Services are $3,500 per waiver participant.

Individual Directed Goods and Services (T1999/Modifier UD – LHW) (T1999/Modifier UC – ID) (CWP T1999)

Individual Directed Goods and Services are services, equipment or supplies not otherwise provided through this waiver or through the Medicaid State Plan that address an identified need in the service plan (including improving and maintaining the waiver recipient's opportunities for full membership in the

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

community and meet the following requirements: the item or service would decrease the need for other Medicaid services; and/or promote inclusion in the community; and/or increase the waiver recipient's safety in the home environment; the item or service is not illegal or otherwise prohibited by Federal and State statutes and regulations, and the waiver recipient does not have the funds to purchase the item or service or the item or service is not available through another source.

The limit on the amount is determined individually based on the balance of the waiver recipient's saving account at the time of the request which is maintained by the Financial Management Service Agency, but not to exceed $10,000 annually.

A unit of service is an item.

Benefits and Career Counseling Services (H2014/Modifier UD – LHW) (H2014/Modifier UC – ID)

Benefits and Career Counseling Services comprise two distinct services: Benefits Reporting Assistance (BRA) and Benefits Counseling.

The BRA is designed to assist waiver recipients and their families to understand general information on how SSI/SSDI benefits are affected by employment. Once the waiver recipient enters employment, the BRA will be available to answer questions, assist in the execution of the work incentive plan, and assist with the submission of income statement and/or Impairment Related Work Expenses to SSA as required to the extent needed as indicated by the waiver recipient.

The Benefits Counseling Services are a more intensive service provided by a Community Work Incentives Coordinator (CWIC) who will provide intensive individualized benefits counseling, benefits analysis, develop a work incentive plan and ongoing benefits planning for a waiver recipient changing jobs or for career advancement. The CWIC will work in conjunction with the BRA to develop trainings and education as needed.

The Benefits Counselor must be a Certified Work Incentives Counselor (CWIC) through a recognized training by the Social Security Administration for delivery of Career Counseling Services. This may include a level 5 security clearance from the Social Security Administration/Department of Homeland Security due to Personally Identifiable Information.

Community Experience Services (H2021/Modifier UD – LHW) (H2021/Modifier UC – ID) (H2021/ Modifier UD/SE – LHW) (H2021/Modifier UC/SE – ID)

Community Experience Services has two distinct categories: Individual and Group Community Experience Services. Community Experience Services are non-work-related activities that are customized to the waiver recipient (s) desires to access and experience community participation. Community Experience Services are provided outside of the waiver recipient's residence and can be provided during the day, evening, or weekends. The intent of Community Experience Services is to engage in activities that will allow the waiver recipient to either acquire new adaptive skills or support the waiver recipient in utilizing adaptive skills in order to become actively involved in their community.

Community Experience Individual Services are provided to a waiver recipient, with a one-to-one staff to participant ratio which is determined necessary

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

through functional and health risk assessments prior to approval. Additionally, a behavioral assessment will need to support this specialized staffing if related to behavioral challenges prior to approval.

Community Experience Group Services are provided to groups of waiver recipients, with a staff to waiver recipient ratio of one to two or more, but no greater than four (4) waiver recipients.

A unit of service is defined as 15 minutes.

Housing Stabilization Services (T2025/Modifier UC – ID) (T2025/Modifier UD – LHW)

The Housing Stabilization Service enables waiver recipients to maintain their own housing as set forth in the waiver recipient's approved plan of care (POC). Housing Stabilization Services must be provided in the home or a community setting. Housing Stabilization Service includes the following components:

1. Conducting a Housing Coordination and Stabilization Assessment identifying the waiver recipient's preferences related to housing and needs for support to maintain housing, budgeting for housing/living expenses, obtaining/accessing sources of income necessary for rent, home management, establishing credit and understanding and meeting obligations of tenancy as defined in lease terms.
2. Assisting waiver recipient with finding and securing housing as needed. This may include arranging or providing transportation.
3. Assisting waiver recipient in securing supporting documents/records, completing/submitting applications, securing deposits, and locating furnishings.
4. Developing an individual housing stabilization plan based upon the Housing Coordination and Stabilization Assessment as part of the overall Person-Centered Plan.
5. Participating in Person-Centered plan meetings at redetermination and/or revision plan meetings as needed.
6. Providing supports and interventions per the Person-Centered Plan (individualized housing stabilization portion).
7. Communication with the landlord and/or property manager regarding the waiver recipient's disability (if authorized and appropriate), detailing accommodations needed, and addressing components of emergency procedures involving the landlord and/or property manager.
8. If at any time the waiver recipient's housing is placed at risk (i.e., eviction, loss of roommate or loss of income), Housing Stabilization Services will provide supports to retain housing or locate and secure new housing or sources of income to continue community based supports which includes locating new housing, sources of income. etc.

A unit of service is defined as 15 minutes.

Assistance in Community Integration Services (T2025/Modifier UD – LHW)

The Assistance in Community Integration Service enables waiver recipients to maintain their own housing as set forth in the waiver recipient's approved plan

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

of care (POC). Assistance in Community Integration Services must be provided in the home or a community setting. The Assistance in Community Integration Service includes the following components:

1. Conducting a community integration assessment identifying the waiver recipient's preferences related to housing and needs for support to maintain community integration.
2. Assisting waiver recipient's with finding and securing housing as needed. This may include arranging for or providing transportation.
3. Assisting waiver recipient in securing supporting documents/records, completing/submitting applicants, securing deposits, and locating furnishings.
4. Developing an individualized community integration plan based upon the assessment as part of the overall Person-Centered Plan. Identify and establish short and long-term measurable goal(s) and establish how goals will be achieved and how concerns will be addressed.
5. Participating in Person-Centered plan meetings at re-determination and/or revision plan meetings as needed.
6. Providing supports and interventions per the Person-Centered Plan (individualized community integration portion). Identify any additional supports or services needed outside the scope of Community Integration services and address among the team.
7. Supports to assist the waiver recipient in communicating with the landlord and/or property manager regarding the waiver recipient's disability (if authorized and appropriate), detailing accommodations needed, and addressing components of emergency procedures involving the landlord and/or property manager.
8. Assistance in Community Integration will provide supports to preserve the most independent living arrangement and/or assist the waiver recipient in locating the most integrated option appropriate to the waiver recipient.

A unit of service is defined as 15 minutes.

Personal Emergency Response System Services (PERS) (S5160Modifier UD – LAH) (S5160Modifier UC – ID) (S5160Modifier UD/HW – LAH) (S5160Modifier UC/HW – ID) (S5161Modifier UD – LAH) (S5161Modifier UC – ID) (S5161Modifier UD/HW – LAH) (S5161Modifier UC/HW – ID)

Personal Emergency Response System (PERS) Services provides a direct telephonic or other electronic communications link between waiver recipients and health professionals to secure immediate assistance in the event of a physical, emotional or environmental emergency. PERS may also include cellular telephone service used when a conventional PERS is less cost-effective or is not feasible. PERS may include installation, monthly fee (if applicable), upkeep and maintenance of devices or systems as appropriate.

The use of PERS requires assurance that safeguards are in place to protect privacy, provide informed consent, and that documented needs are addressed in the least restrictive manner. The waiver recipient's Person-Centered Plan should identify options available to meet the need of the waiver recipient in terms of preference while also ensuring health, safety, and welfare.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

PERS can be directed by waiver recipients or family but must adhere to all the traditional service rules.

PERS will not be authorized for waiver recipients receiving Residential Habilitation Training Services. PERS will not replace supervision and monitoring of activities of daily living which are provided to meet requirements of another service (e.g., Personal Care Services; Day Habilitation Services).

Emergency Response System installation and testing is approximated to cost $500.00; Emergency Response Monthly Service Fee (excludes installation and testing) is approximated to cost no more than $83.00/month; Emergency Response system purchase is approximated to cost $1,500.00. The maximum cost for all PERS per year is $3,000.00.

Supported Employment Transportation Services (S0215Modifier UD – LAH) (S0215Modifier UC – ID)

Supported Employment Transportation Services permit waiver recipients access to and from their place of employment in the event that the support team is unable to facilitate transportation through other means. Supported Employment Transportation Services must be necessary to support the waiver recipient in work related travel and cannot be reimbursed for merely transportation.

Transportation must be provided by public carriers (e.g., charter bus or metro transit bus) or private carriers (e.g., Taxicab). The waiver recipient may use a commercial transportation agency.

Remote Supports Services (T1028/Modifier UC – ID) (T1028/Modifier UD – LHW) (T2033/Modifier UC – ID) (T2033/Modifier UD – LHW)

Remote Supports Services are intended to address a person's assessed needs in his/her residence and are to be provided in a manner that promotes autonomy, minimizes dependence on paid support staff, and reduces the need for in-person services that may be more intrusive.

Remote Supports Services are services provided to recipients who are 18 years of age or older, at their place of residence, by Remote Support staff housed at a remote location and who are engaged with the recipient through equipment with the capability for live, two-way communication.

Remote Supports Services shall be provided in real time, not via a recording, by awake staff at a remote monitoring base using an appropriate, stable, and reliable electronic connection.

Equipment used to meet this requirement may include but is not limited to one or more of the following components:

- Sensor Based System (e.g. motion sensors, doors, windows, personal pagers, smoke detectors, bed sensors etc.)
- Radio frequency identification;
- Live video feed;
- Live audio feed;
- Web-based monitoring system;
- Another device that facilitates live two-way communication;
- Contact ID

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Financial Literacy and Work Incentive Benefits Counseling Services CWP

(Work Incentive Benefits Counseling (CWP/H2014/Modifier/SE); (Financial Literacy Counseling (CWP/H2014)

For a waiver participant living at home with the family who is providing a home and/or natural care or support for the waiver participant, the Financial Literacy component of this service is designed to:

- Support continuity of stable housing, community tenure, and natural supports for the waiver participant by supporting the person in sustaining and improving his/her economic self-sufficiency.
- Enable improvement of waiver participant's economic self-sufficiency necessary to sustain his/her living situation including availability of natural supports for that living situation.
- Assist with evaluating a waiver participant's financial health and current level of financial literacy and making a plan with specific strategies to improve financial health and increase the waiver participant's level of financial literacy.
- Teach financial literacy skills.
- Assist with access to community resources available to address improvement of economic self-sufficiency and financial health, including ability to sustain current living arrangement.

For a waiver participant living at home with the family who is providing a home and/or natural care or support for the waiver participant, the Work Incentive Benefits Counseling is designed to:

- Provide general introductory education that identifies and explains the multiple pathways to ensuring individualized integrated competitive employment results in increased economic self-sufficiency (net financial benefit) through the use of various work incentives. This general introductory education should also repudiate myths and alleviate fears and concerns related to seeking and working in individualized integrated competitive employment. Provide a thorough Work Incentive Benefits Analysis addressing the benefits, entitlements, subsidies and services the individual receives to assess the impact that income from employment may have on continued eligibility and benefit amounts, including health coverage. Individuals are informed of work incentives, provisions that are designed to help protect benefits while working (i.e. Impairment Related Work Expense, Earned Income Exclusion, Plan for Achieving Self Support (PASS), Continued Medicaid and Extended Medicare, as well as other benefit programs for which the individual may be eligible. The information is intended to assist the person in making informed decisions about how much they can work and earn through individualized integrated competitive employment.
- Introductory general education as part of Work Incentive Benefits Counseling shall be limited to individuals ages 16-60 who are not currently employed in individualized, integrated competitive employment and shall be limited to a total of four (4) hours of face-to-face service. This component of service can be reauthorized once per waiver year.
- Work Incentive Benefits Analysis, as part of Work Incentive Benefits Counseling, shall be limited to individuals ages 16-60 who are not currently employed in individualized, integrated competitive employment and shall be limited to a total of twenty-three (23) hours of service

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

covering all necessary steps for production of a Work Incentive Benefits Analysis report.

- The service must be provided in a manner that supports the person's communication style and needs, including, but not limited to, age-appropriate communications, translation and/or interpretation services for persons of limited English-proficiency or who have other communication needs requiring translation including sign language interpretation, and ability to communicate with a person who uses an assistive communication device.
- This service may not be provided if the person receives any form of work benefits counseling from any other source or waiver service (i.e., Supported Employment).

A unit is defined as item or 15 minutes.

Minor Home Modifications Services CWP (Minor Home Modifications (CWP S5165) (S5165/Modifier UA – E&D) (S5165/Modifier TF UB –ACT)

Home Modifications are alterations to the home, required by the individual PCP, which are necessary to ensure the health, welfare and safety of the individual, or which enable the individual to function with greater independence in the home. Modifications include:

Provision and installation of certain home mobility aids, including:

- A wheelchair ramp and modifications directly related to and specifically required for the construction or installation of the ramp
- Handrails for interior or exterior stairs or steps
- Grab bars and other devices

Minor physical adaptations to the interior of the individual's place of residence which are necessary to ensure the health, welfare and safety of the individual, or which increase the member's mobility and accessibility within the residence, including:

- Widening of doorways
- Modifications of bathroom facilities
- Installation of electric and plumbing systems necessary to accommodate any medical equipment/supplies needed for the welfare of the individual

All services shall be provided in accordance with applicable state or local building codes.

A unit is defined as job.

For the E&D Waiver, limits on Home Modifications are $5,000 per recipient per lifetime. Any expenditure in excess of $5,000 must be approved by the Operating Agency. This item requires prior authorization by the Operating Agency. Home Modifications are excluded from rental properties unless a temporary modification such as a modular ramp is needed and there is documentation that the modification is approved by the landlord. A unit is defined as an item.

For the ACT Waiver, this service may be necessary to assist an individual to transition from an institution to a home and community-based Waiver. Additionally, this service is used to maintain a participant in the community once transitioned. For the ACT Waiver, the limits on Home Modifications are $5,000 per recipient per lifetime. Any expenditure in excess of $5,000 must be approved by the ACT Waiver Coordinator and the Medicaid Agency designated personnel. The service should not be billed until the first day the

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

participant is transitioned and has begun to receive waiver services in order to qualify as Waiver funds. If the individual fails to transition to the ACT Waiver, reimbursement will be at the administrative rate.

For the ACT and E&D Waivers, any construction/installation must be completed in accordance with state and local building code requirements, American with Disabilities Act Accessibility Guidelines (ADAAG) and by a licensed contractor.

Community Integrations Connections and Skills Training Services

(Community Integration Connections and Skills Training CWP 1:2 (CWP H2021/Modifier HO); (Self-directed Community Integration Connections and Skills Training – CWP 1:2 (CWP H2021/Modifier HN/HW); (Community Integration Connections and skills training – CWP1:1 (CWP H2021/Modifier HN); (Self-directed Community Integration Connections and Skills CWP 1:1 (CWP H2021/Modifier HO/HW); (Community Integration Connections and Skills Training CWP 1:3 (CWP H2021/Modifier HP); (Self-Directed Community Connections and Skills Training CWP 1:3 (CWP H2021/Modifier HP/HW)

Time-limited services which identify and arrange integrated opportunities for the person to achieve his/her unique goals for community participation, involvement, membership, contribution and connections, including targeted education and training for specific skill development to enable the waiver participant to develop ability to independently (or with natural supports only) engage in these integrated opportunities as specified in the person's Person-Centered Plan.

This service focuses specifically on successful participation in community opportunities that offer the opportunity for meaningful, ongoing interactions with members of the broader community. This service also focuses on ensuring the ongoing interactions with members of the broader community are meaningful and positive, leading to the development of a broader network of natural supports for the individual. The community connections component of this service is focused on assisting the person to find and become engaged in specific opportunities for community participation, involvement, membership, contribution and connections.

This service shall be provided in a variety of integrated community settings that offer opportunities for the person to achieve their personally identified goals for community participation, involvement, membership, contribution and connections, including developing and sustaining a network of positive natural supports.

The skills training component of this service is instructional and training-oriented, and not intended to provide substitute task performance by staff. Skill training is focused on the development of skills identified in the Person-Centered Plan that will enable the person to continue participation in integrated community opportunities without waiver-funded supports.

A unit is defined as 15 minutes.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). Community Transportation Services – CWP

(Community Transportation – Agency Paid Driver WITH RESIDENTIAL SERVICE (CWP T2001/Modifier HE); (Community Transportation – Agency Paid Driver NO RESIDENTIAL SERVICE (CWP T2001/Modifier SE); (Community Transportation – Agency Volunteer Driver WITH RESIDENTIAL SERVICE (CWP T2001/Modifier HI); (Self-Directed Community Transportation – With CIE (CWP T2001/Modifier HW/SE); (Self-Directed Community Transportation (CWP T2001/Modifier HW)

Transportation services offered in order to enable an individual to access the broader community, including competitive integrated workplaces, opportunities for integrated community participation, involvement and contribution, and community services, resources and businesses, for purposes specified in the Person-Centered Plan. These services allow people to engage in typical day-to-day (non-medical) integrated community opportunities and activities such as going to and from paid, competitive, integrated employment, stores, bank, social opportunities with other members of the broader community, social events, clubs and associations, other community activities, and attending a worship service when public or other community-based transportation services or transportation provided by natural supports are not available. As part of the service, a natural or paid support-giver may accompany the person using Community Transportation, if the need for such supports are necessary and documented in the Person-Centered Plan.

A unit is defined as mile and/or month.

Natural Support or Caregiver Education and Training Services

(Natural Support or Caregiver Education and Training (CWP T2012); (Natural Support or Caregiver Education and Training Self-Directed (CWP T2012/Modifier HW)

This service provides a natural, unpaid support or natural, unpaid caregiver of a waiver participant with education, training and technical assistance, as needed, to enable the natural support or natural caregiver to effectively provide supports to the waiver participant as documented in the person-centered plan.

A unit is defined as cost.

PEER Specialist Services – CWP (PEER Specialist (CWP T2013)

A service that assists a person to develop and utilize skills and knowledge for self-determination in one or more of the following areas: Directing the person-centered planning (PCP) process; Understanding and considering self-direction; Understanding and considering individualized integrated employment/self-employment; Understanding and considering independent and supported living community living options. The service is provided on a time-limited basis, determined by the person's individual need, by a peer with intellectual or developmental disabilities who has experience matched to the focus areas, needs and goals of the person receiving this service: has successfully directed their own Person-Centered Planning process; has self-directed their own services; has successfully obtained individualized integrated employment at a competitive wage; and/or utilizes independent/supported living options.

A unit is defined as 15 minutes.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Integrated Employment Path Services– CWP

(Integrated Employment Path Services – 1:1 (CWP T2015); (Integrated Employment Path Services – 1:2 (CWP T2015/Modifier HW); (Integrated Employment Path Services – 1:8 (CWP T2015/Modifier HO)

The provision of time-limited learning and work experiences, including volunteering opportunities, where a person can develop general, non-job-task-specific strengths and skills that contribute to employability in individualized integrated employment or self-employment. Services are expected to specifically involve strategies that facilitate a participant's successful transition to individualized integrated employment or self-employment. Persons receiving Integrated Employment Path Services must have a desire to obtain some type of individualized integrated employment or self-employment and this goal must be documented in the PCP as the goal that Integrated Employment Path Services are specifically authorized to address.

Services should be customized to provide opportunities for increased knowledge, skills and experiences specifically relevant to the person's specific individualized integrated employment and/or self-employment goals and career goals. If such specific goals are not known, this service can also be used to assist a person to identifying his/her specific individualized integrated employment and/or self-employment goals and career goals.

This service is limited to no more than one year. One extension of up to one year can be allowed only if the person is actively pursuing individualized integrated employment or self-employment in an integrated setting and has documentation that a service(s) (i.e. ADRS Individualized Plan for Employment in place or Job Development or Self-Employment Start-Up funded by the Waiver) is concurrently authorized for this purpose. The one-year extension may be repeated only if a person loses individualized integrated employment or self-employment and is seeking replacement opportunities.

A unit is defined as 15 minutes.

Community Based Residential Services – (Community based Residential Service (CWP T2016/Modifier SE)

Community-Based Residential Services enable an individual to avoid institutionalization and live in a community setting that provides services to support the person's maximum independence, autonomy and full integration in their community, ensure each person's rights and abilities to make choices and support each person in a manner that complies fully with HCBS Settings Rule standards, including standards for provider-owned or controlled homes. Community-Based Residential Services are provided for up to four individuals in a dwelling which may be rented, leased, or owned by the provider. The person has the right to a legally enforceable lease or rental agreement with the provider that offers the same appeal rights and eviction protections as is required under state landlord-tenant law.

This service offers individualized services and supports that enable the person supported to acquire, retain, and improve skills necessary to reside in the least restrictive residential setting possible. The setting in which the service is provided must be an ADMH-certified, community-based residential setting which supports each person's independence and full integration into

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

the community and ensures each person's basic needs (e.g., food, clothing, etc.), choice, rights, safety and security. Community-Based Residential Services provide care, supervision, and skills training in activities of daily living, home management and community integration.

A unit is defined as day.

Adult Family Home Services CWP – (Adult Family Home (CWP T2016)

A community-based alternative to residential habilitation service that enables up to three persons receiving this service to live in the home of trained host family caregivers (other than the person's own family) in an adult foster care arrangement. In this type of shared living arrangement, the person(s) moves into the host family's home, enabling the person(s) to become part of the family, sharing in the experiences of a family, while the trained family members provide the individualized services that: support each person's independence and full integration in their community, ensure each person's choice and rights and support each person in a manner that complies fully with HCBS Settings Rule standards, including standards for provider-owned or controlled homes.

A unit is defined as day.

Independent Living Skills Training Services CWP

(Independent Living Skills Training (CWP T2021); (Independent Living skills Training Self-directed (CWP T2021/Modifier/HW);

Time-limited, focused service that provides targeted education and training for specific skill development to enable the waiver participant to develop ability to independently perform routine daily activities at home as specified in the person's Person-Centered Plan. Services are not intended to provide substitute task performance by staff. Services are instructional and training-oriented, focused on development of skills identified in the Person-Centered Plan. Independent Living Skills Training is intended as a short-term service designed to allow a person to acquire specific skills for independence in defined tasks and activities for community living. Goals for skill development and independence at home must be age-appropriate for the waiver participant while recognizing that learning skills for maximizing individual initiative, autonomy and independence at home should start at a very young age.

A unit is defined as 15 minutes.

Housing Start-Up Assistance Services – CWP

(Housing Start-Up Assistance – cost other than Direct Service by Waiver Provider (CWP T2025/Modifier/HE); (Housing Start-Up Assistance – Direct Service by Waiver Provider (CWP T2038)

A service intended to provide essential services and items needed to establish an integrated community living arrangement for persons relocating from an institution or a provider owned or controlled residential setting to one where the individual is directly responsible for his/her own living expenses. Housing Start-Up Assistance is intended to enable the person to establish an independent or supported living arrangement. Housing Start-Up Assistance may also include person-specific services and supports that may be arranged, scheduled, contracted or purchased, which support the person's

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

successful transition to a safe, accessible independent or supported living situation. No institutional length of stay requirement exists to access this service.

A unit is defined as item or 15 minutes.

Housing Counseling – CWP (Housing Counseling (CWP T2025)

Services that provide assistance to a person when acquiring housing in the community, where ownership or rental of housing is separate from service provision. The purpose of Housing Counseling Services is to promote consumer choice and control of housing and access to housing that is affordable, accessible to the extent needed by the individual, and promotes community inclusion. Housing Counseling Services include counseling and assistance to the individual, based on individual needs and a plan reflecting the needs.

A unit is defined as 15 minutes.

Family Empowerment and Systems Navigation Counseling Services – CWP (Family Empowerment and Systems Navigation Counseling (CWP T2025/Modifier HO)

Family Empowerment and Systems Navigation Counseling matches the involved family members (e.g. support/care givers; legal guardians) of an individual with intellectual disabilities with a local professional or similar reputable adult with broad knowledge of the variety of programs and local community resources that are available to an individual with intellectual disabilities and his/her family. The Family Empowerment Counseling and Systems Navigation Service is intended to be a time-limited service that involves assessment of the individual's situation (including needs, goals), assessment of the family's specific goals and needs for information, assistance, and referral to address the individual and family's situation.

The service further includes, researching as needed, and sharing of the identified information, connecting the family with assistance, and making referrals as appropriate. The goal of the service is to empower the family with the information, connections and referrals they need, and to work with the family to increase their skills in problem-solving and leveraging available programs and community resources, including Support Coordination. This service is also intended, through temporary peer supervision, to facilitate an opportunity for interested family members, who have received this service, to become providers of this service themselves to grow the network of providers of this service over time.

A unit is defined as 15 minutes.

Supported Living Service – CWP

(Supported Living Service: Non-intensive (CWP T2032); (Supported Living Service: Intensive (CWP T2032/Modifier/SE)

Services that include training and assistance in maintaining a home of one's own: a residence not owned or controlled by a waiver service provider or a residence that is not the home of a family caregiver. The home may be shared with other freely chosen housemates who may or may not also receive waiver services and/or have a disability. Supported Living Services

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

are provided with the goal of maximizing the person's independence and interdependence with housemates and natural supports, using a combination of teaching, training, technology and facilitation of natural supports. Supported Living Services are delivered according to the person's Supported Living Service Plan. This service is intended for persons who, with technology, natural supports and good advanced planning, need intermittent and/or on-call staff support to remain in their own home and who do not need and will not benefit from around-the-clock staffing. Supported Living Services are differentiated from Personal Assistance by virtue of the 24-hour on-call access to supports on an as-needed/emergency basis that are part of Supported Living Services.

A unit is defined as day.

Supervisory Visit Services – E&D

(Supervisory Visit Services: (E&D T1001/Modifier/UA- E&D)

Supervisory Visit Services are provided by a Waiver Direct Service Provider (DSP) in the supervision or Personal Care, Homemaker, Unskilled Respite and Companion workers. Supervisory Visit Services shall be conducted by Alabama Licensed Registered Nurses (RN) or Alabama Licensed Practical Nurses (LPN) to monitor DSP staff performance to ensure adherence of Waiver guidelines, quality of service provision to Waiver recipients, and recipient satisfaction with service provision. The RN and LPN must meet all federal and state requirements to provide services to eligible Medicaid recipients under Waiver authority. State Plan EPSDT services must be exhausted prior to any use of Waiver services for individuals under the age of 21.

Supervisory Visits shall be billed in 15 minutes increments (not to exceed 60 minutes) every 60 days or 4 increments (not to exceed 60 minutes) every 60 days. No reimbursement will be made for attempted or missed visits.

One increment is defined as 15 minutes.

107.2.5 Characteristics of Persons Requiring ICF-IID Level of Care Through the ID Waiver (formerly MR Waiver) and Living at Home Waiver

Services provided in an intermediate care facility for individuals with intellectual disabilities in Alabama are those services that provide a setting appropriate for a functionally individual with intellectual disabilities in the least restrictive productive environment currently available.

Generally, persons eligible for the ICF-IID level of care provided through the ID, CWP, and LHW Waiver need such a level of care because the severe, chronic nature of their mental impairment results in substantial functional limitations in three (3) or more of the following areas of life activity:

- Self-Care
- Receptive and expressive language
- Learning
- Self-direction
- Capacity for independent living
- Mobility

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

ICF-IID-care requires the skills of a QIDP to provide directly or supervise others in the provision of services. ICF-IID services address the functional deficiencies of the beneficiary to allow the beneficiary to experience personal hygiene, participate in daily living activities appropriate to his functioning level, take medication under appropriate supervision (if needed), receive therapy, receive training toward more independent functioning, and experience stabilization as a result of being in the least restrictive, productive environment that promotes the individual's developmental process.

Determining Eligibility for ID, CWP, and LHW Waiver

Determination regarding eligibility for care under the ID, CWP, & LHW Waiver is made by a Qualified Intellectual Disabilities Professional (QIDP). An interdisciplinary team (described below) recommends continued stay. The recommendation is certified by a (QIDP) and a physician.

Qualifications of Interdisciplinary Review Team

An interdisciplinary team consisting of a nurse, social worker, and a member of appropriate related discipline, usually a psychologist, recommends continued stay.

The nurse will be a graduate of a licensed school of nursing with a current state certification as a Licensed Practical Nurse (LPN) or Registered Nurse (RN). This person will have knowledge and training in the area of intellectual disabilities with a minimum of two years' experience.

The social worker will be a graduate of a four-year college with an emphasis in social work. This person will have knowledge and training in the area of intellectual disabilities with a minimum of two years' experience.

The psychologist will possess a Ph.D. in Psychology. This person will be a licensed psychologist with general knowledge of test instruments used with intellectual disabilities with a minimum of two years' experience.

Other professional disciplines may be represented on the assessment team as necessary depending on the age, functional level, and physical disability of the recipients:

- Special Education
- Speech Pathologist
- Audiologist
- Physical Therapist
- Optometrist
- Occupational Therapist
- Vocational Therapist
- Recreational Specialist
- Pharmacist
- Doctor of Medicine
- Psychiatrist
- Other skilled health professionals

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Individual Assessments

Medicaid requires an individual plan of care for each ID, CWP & LHW waiver service recipient. The Individual Habilitation Plan (IHP) is subject to review by Medicaid and CMS.

The DMH (or its contract service providers) uses assessment procedures to screen recipients for eligibility for the Waiver services as an alternative to institutionalization. Assessment procedures are based on eligibility criteria for ICF-IID developed jointly by DMH and Medicaid.

Review for "medical assistance" eligibility may be performed by a qualified practitioner in the DMH, by its contract service providers, or by qualified (Diagnostic and Evaluation Team) personnel of the individual or agency arranging the service.

Recipients are re-evaluated on an annual basis. Written documentation of all assessments is maintained in the recipient's case file and is subject to review by Medicaid and CMS.

A written assessment is a method for determining a recipient's current long-term care needs. This comprehensive instrument is used to access each individual recipient's functional, medical, social, environmental, and behavioral status. Information obtained should be adequate enough to make a level of care decision and for case managers to develop an initial plan of care.

Re-evaluations are done on an annual basis or when needed. Written documentation of all assessments is maintained in the recipient's case file and is subject to review by Medicaid and CMS.

107.2.6 Informing Beneficiaries of Choice

Medicaid is responsible for ensuring that beneficiaries of the waiver service program are advised of feasible service alternatives and receive a choice regarding which type of service they wish to receive (institutional or home- and/or community-based services).

Medicaid advises applicants for NF, ICF, ICF-IID services, or their designated responsible party, of feasible alternatives to institutionalization at the time of their entry into the waiver system. All applicants found eligible will be offered the alternative unless there is reasonable expectation that the services required would cost more than institutional care.

When residents of long-term care facilities become eligible for home and community-based services under this waiver, the resident will be advised of the available services and given a choice of service providers.

107.2.7 Cost for Services

The costs for services to individuals who qualify for home and community-based care under the waiver program will not exceed, on an average per capita basis, the total expenditures that would be incurred for such individuals if home and community-based services were not available.

The cost for services to individuals who qualify for home and community-based care under the LHW waiver program will not exceed a cap of $25,000 per client per year with the exception that crisis intervention services are not included in the cap.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

107.2.8 Records Used for Medicaid Audits

Providers must maintain financial accountability for funds expended on HCBS and provide a clearly defined audit trail.

Providers must retain records that fully disclose the extent and cost of services provided to eligible recipients for a three-year period. These records must be accessible to the Alabama Medicaid Agency and appropriate state and federal officials. If these records are not available within the state of Alabama, the provider will pay the travel cost of the auditors.

The state agencies as specified in the approved waiver document as operating agencies of home and community-based services will have their records audited at least annually at the discretion of the Alabama Medicaid Agency. Payments for services are adjusted to actual cost at the end of each waiver year.

The Alabama Medicaid Agency will review at least annually the recipient's care plans and services rendered by a sampling procedure. The review will include appropriateness of care and proper billing procedures.

The state agencies as specified in the approved waiver document provide documentation of actual costs of services and administration. The quarterly cost report includes all actual costs incurred by the operating agency for the previous quarter and includes costs incurred for the current year-to-date. The state agencies submit this document to Medicaid before the first day of the third month of the next quarter.

Failure to submit the actual cost documentation can result in the Alabama Medicaid Agency deferring payment until this documentation has been received and reviewed.

The providers of the HCBS waivers will have their records audited at least annually at the discretion of Medicaid. Medicaid will recover payments that exceed actual allowable cost.

Medicaid reviews recipients' habilitation and care plans and services rendered by a sampling procedure. The review includes appropriateness of care and proper billing procedures.

Providers of the E&D and SAIL HCBS waivers are required to file a complete uniform cost report of actual statistics and costs incurred during the entire preceding year. The cost reports for E&D and SAIL must be received by Medicaid on or before December 31. Extension may be granted only upon written request. Failure to submit the actual cost documentation may result in the AMA deferring payment until this documentation has been received and reviewed.

Providers of the LHW, TA Waiver for Adults, ID, CWP, and ACT Waivers are not required to submit uniform cost reports. The method of payment is on a fee-for-service basis.

Quarters for E&D and SAIL are defined as follows:

Quarter	***Reporting Period***	***Due Date***
1st	October – December	Due before March 1
2nd	January – March	Due before June 1
3rd	April – June	Due before September 1
4th	July – September	Due before December 1

All rights reserved. Applicable FARS/DFARS apply.

107.2.9 HCBS Payment Procedures

Each covered HCB waiver service is identified on a claim by a procedure code. Respite care will have one code for skilled and another for unskilled.

The basis for the fees is usually based on audited past performance with consideration given to the health care index and renegotiated contracts. The interim fees may also be changed if a provider can show that an unavoidable event(s) has caused a substantial increase or decrease in the provider's cost.

For each recipient, the claim will allow span billing for a period up to one month. There may be multiple claims in a month; however, no single claim can cover services performed in different months. For example, 10/15/02 to 11/15/02 would not be allowed. If the submitted claim covers dates of service part or all of which were covered in a previously paid claim, the claim will be rejected.

Payment will be based on the number of units of service reported on the claim for each procedure code.

Accounting for actual cost and units of services provided during a waiver year must be captured on CMS Form 372. The following accounting definitions will be used to capture reporting data, and the audited figures used in establishing new interim fees:

- A waiver year consists of twelve consecutive months starting with the approval date specified in the approved waiver document.
- An expenditure occurs when cash or its equivalent is paid in a quarter by a state agency for waiver benefits. For a public/governmental provider, the expenditure is made whenever it is paid or recorded, whichever is earlier. Non-cash payments, such as depreciation, occur when transactions are recorded by the state agency.
- The services provided by an operating agency is reported and paid by dates of service. Thus, all services provided during the twelve months of the waiver year will be attributed to that year.

The provider's costs shall be divided between benefit and administrative cost. The benefit portion is included in the fee for service. The administrative portion will be divided in twelve equal amounts and will be invoiced by the provider directly to the Alabama Medicaid Agency. Since Administration is relatively fixed, it will not be a rate per claim, but a set monthly payment. As each waiver is audited, this cost, like the benefit cost, will be determined and lump sum settlement will be made to adjust that year's payments to actual cost.

The Alabama Medicaid Agency's Provider Audit/Reimbursement Division maintains the year-end cost reports submitted by the Alabama Department of Senior Services (ADSS).

Providers must retain records that fully disclose the extent and cost of services provided to the eligible recipients for a five (5) year period. These records must be accessible to the Alabama Medicaid Agency and appropriate state and federal officials.

There must be a clear differentiation between waiver services and non-waiver services. There must be a clear audit trail from the point a service is provided

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

through billing and reimbursement. The OA, Alabama Medicaid Agency and Centers for Medicare and Medicaid Services (CMS) must be able to review the Plan of Care to verify the exact service and number of units provided, the date the service was rendered, and the direct service provider for each recipient. There must be a detailed explanation of how waiver services are segregated from ineligible waiver costs.

NOTE:

The rates for each service for each operating agency may differ. For the E&D and SAIL waiver, operating agencies have 120 days from the end of a waiver year to file their claims. Since the actual cost incurred by the operating agency sets a ceiling on the amount it can receive, no claims for the dates of service within that year will be processed after the adjustment is made. For the LHW, ID, CWP, and ACT Waivers, the operating agency must file all claims for services within 12 months from the date of service. For the TA Waiver for Adults, the providers must file all claims for services rendered within 12 months from the date of service provision.

107.2.10 Records for Quality Assurance Audits

The operating agencies for the E&D, ID, LHW, CWP, and ACT waivers are required to maintain all records pertaining to the waiver recipients. They should also maintain the following information for audit purposes:

- Daily activity logs
- Narratives
- Evaluations and reevaluations
- Complaints and grievances
- Billing and payment records
- Plan of Care
- Delivery of services
- Any other important tools used to determine the success of the waiver services

This information is used to ensure that the state is in accordance with the approved waiver document and services are appropriate for the individual being served.

This information shall be made available to Medicaid and any other party in the contractual agreement at no cost.

NOTE:

Records for Quality Assurance audits for the TA Waiver for Adults conducted by the in-house Medicaid reviewer will be maintained at the Alabama Medicaid Agency.

107.2.11 Appeal Procedure (Fiscal Audit)

Medicaid conducts fiscal audits of all services. At the completion of a field audit there will be an exit conference with the provider to explain the audit

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

findings. The provider will have the opportunity agree or disagree with the findings.

Medicaid reviews the field audit and provider comments and prepares a letter to make the appropriate findings official. If the provider feels that some of the findings are not justified, the provider may request an informal conference with Medicaid. To request the informal conference, the provider must submit a letter within 30 days of the date of the official audit letter. This letter must specify the findings that are contested and the basis for the contention. This letter should be addressed to Provider Audit Division, Alabama Medicaid Agency, 501 Dexter Avenue, P. O. Box 5624, Montgomery, AL 36103-5624.

Medicaid forwards decisions made as a result of the informal conference to the provider by letter. If the provider believes that the results of the informal conference are still adverse, the provider will have 15 days from the date of the letter to request a fair hearing.

Quality Assurance (QA) reviews are performed on an annual basis by Medicaid. At the end of this review there will be an exit conference with the providers to explain the findings. The provider will have an opportunity to agree or disagree.

Medicaid reviews the findings and prepares an official letter. If the provider feels that some of the findings are not justified, the provider may request an informal conference with Medicaid. To request the informal conference, the provider must submit a letter within 30 days of the date of the official review letter. This letter must specify the findings that are contested and the basis for the contention. This letter should be addressed to Quality Assurance Division, Alabama Medicaid Agency, 501 Dexter Avenue, P.O. Box 5624, Montgomery, AL 36103-5624.

If the provider is not satisfied with the findings of the informal conference, the provider may request a fair hearing.

107.3 Prior Authorization and Referral Requirements

Certain procedure codes, for waivers, require prior authorization. Refer to Section 4, Obtaining Prior Authorization, for general guidelines.

When filing claims for recipients enrolled in the Alabama Coordinated Health Network (ACHN), refer to Chapter 40 to determine whether your services require a referral from the Primary Medical Provider (PMP).

Application Process

The case manager receives referrals from hospitals, nursing homes, physicians, the community, and others for persons who may be eligible for HCBS.

The plan of care, which is developed by the case manager and applicant's physician, is part of this assessment. The plan of care includes the following:

- Objectives
- Services
- Provider of services
- Frequency of services

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The Alabama Medicaid Agency requires providers to submit an application in order to document dates of service provision to long term care recipients maintained by the long-term care file. Application approvals will be done automatically through systematic programming. Quality Improvement and Standards Division will perform random audits on a percentage of records to ensure that documentation exists to support the medical level of care criteria, physician certification, as well as other state and federal requirements.

Case managers and/or designated staff of the HCBS waiver Operating Agency (ies) will assess the client to determine the risk for institutionalization and determine if the medical level of care is met according to Medicaid criteria.

Assessment data will be entered and submitted electronically using the Alabama Medicaid Agency Interactive website. If problems are encountered such as mismatched Social Security Numbers and/or Medicaid numbers, date conflicts, invalid NPIs, or financial ineligibility, the auto-application will be denied and returned. Information will be provided to the user of the appropriate action(s) to take to correct the problem and will be allowed to resubmit the application.

The application, upon completion of processing, will systematically assign approval dates in one-year increments. For initial assessments, once the application is submitted with an indication of an initial assessment, the system will apply the begin date as the date of submission plus one year, which is extended to the last day of the month. For re-determinations, the application is submitted with an indication of a re-determination and the system will pick up the end date already on the file and extend for one year.

No charges for services rendered under the waiver program prior to the approval payment dates will be paid.

Application Process for TA Waiver for Adults

The Alabama Department of Senior Services (ADSS) targeted case manager will receive referrals from hospitals, nursing homes, physicians, the community and others for persons who may be eligible for home and community based services.

An assessment document will be completed by the targeted case manager, in conjunction with the applicant's physician. This document will reflect detailed information regarding social background, living conditions, and medical problems of the applicant. A copy of this document will be submitted to the Alabama Medicaid Agency for approval.

The targeted case manager, in conjunction with the applicant's physician will develop a plan of care. The plan of care will include objectives, services, provider of services, and frequency of service. The plan of care must be submitted to the Alabama Medicaid Agency for approval. Changes to the original plan of care are to be made as needed to adequately care for an individual. Reasons for changes must be documented on the client's care plan, which is subject to the review of the Alabama Medicaid Agency. The plan of care must be reviewed by the targeted case manager as often as necessary and administered in coordination with the recipient's physician.

The targeted case manager will coordinate completion of the medical need admissions form with the applicant's physician and the financial application form for submission to the Alabama Medicaid Agency’s Long Term Care Division.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Agency will review to determine if the individual meets the criteria for nursing facility care, in accordance with Rule No 560-X-10-.10 of the Alabama Medicaid Administrative Code.

If approved, the applicant and the targeted case manager will be notified in writing.

If denied, the applicant and the targeted case manager will be notified and the reconsideration process will be explained in writing as described in Rule No. 560-X-10-.14 of the *Alabama Medicaid Administrative Code*.

When an application is approved by the Alabama Medicaid Agency, a payment date is also given for the level of care for which a recipient has been approved. No charges for services rendered under the Waiver Program prior to this approved payment date will be paid.

A current assessment document, along with a new plan of care, and medical need admission form must be submitted by the targeted case manager to the Alabama Medicaid Agency at each re-determination of eligibility which shall be at least every twelve (12) months.

HCBS Waiver Appeal Process

An individual receiving a Notice of Action (denial, termination, suspension, reduction in services) from the operating agency (OA), may request an appeal if he/she disagrees with the decision. The Notice of Action explains the reason for the denial, termination, suspension, or reduction in waiver services and the appeal rights made available to them.

Appeal requests for ACT, SAIL, E&D, & TA Waivers

If an individual chooses to appeal an adverse decision, a written request must be submitted to the contact person designated by the OA **within 30 days from the date of the notice of action.** However, services may continue until the final outcome of the hearing process, if the written request is received **within 10 days after the effective date of the action unless:**

(1) It is determined at the hearing that the sole issue is one of Federal or State law or policy; and

(2) The agency promptly informs the beneficiary in writing that services are to be terminated or reduced pending the hearing decision.

The individual will have an Informal Conference. After the Informal Conference, the Medicaid Waiver Program Administrator will send a certified letter notifying the individual of the decision. If the individual/guardian is dissatisfied with the decision, a Fair Hearing may be requested. A written request for a hearing must be received **no later than 30 days from the date of the notice of action.**

Requests made for ID, CWP, and LHW Waivers

If an individual chooses to appeal an adverse decision, a written request must be submitted to the Associate Commissioner for the Developmental Disabilities Division **no later than 15 calendar days after the effective date printed on the notice of action.** However, services may continue until the final outcome of the hearing, if the written request is received **within 10 days after the effective date of the action unless:**

(1) It is determined at the hearing that the sole issue is one of Federal or State law or policy; and

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

(2) The agency promptly informs the beneficiary in writing that services are to be terminated or reduced pending the hearing decision.

Upon receipt of an appeal request by the Associate Commissioner for the Developmental Disabilities Division, contact is made with the Regional Community Services Offices to request the information packet that they reviewed to base the denial decision. The Associate Commissioner will contact the individual/guardian and inform them that the division is in the process of reviewing their information. A written decision from the Associate Commissioner is mailed (certified) to the individual/guardian within 21 days after the review of all information. If the individual/guardian disagrees with the Associate Commissioner's decision, he/she can request a Fair hearing to the AMA. A written hearing request must be received by the AMA **no later than 15 calendar days from the date of the Associate Commissioner's letter.**

107.4 Cost Sharing (Copayment)

Copayment does not apply to services provided by Waiver service providers.

107.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Waiver service providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claims processing turnaround
- Ability to immediately correct claim errors
- Online adjustments capability
- Enhanced access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When an attachment is required, a hard copy CMS-1500 claim form must be submitted. TA Waiver for Adults providers must file claims on a UB-04 claim form when filing hard copy. Medicare-related claims must be filed using the Institutional/Medicare-related claim form for TA Waiver recipients.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

107.5.1 Time Limit for Filing Claims

The operating agencies for the E&D and SAIL waiver have 120 days at the end of the waiver year to process claims. LHW Waiver, TA Waiver for Adults, ID, CWP, and ACT Waiver claims are to be filed within one year of the date of service. Refer to Section 5.1.4, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

107.5.2 Diagnosis Codes

The *International Classification of Diseases - 9th Revision - Clinical Modification* (ICD-9-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 or ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field.

107.5.3 Procedure Codes

The following procedure codes apply when filing claims for E&D Waiver services:

Code	*Description*	*PA Required?*
T1016-UA	Case Management	No
T1019-UA	Personal Care	No
S5102-UA	Adult Day Health	No
T1005-UA	Respite Care – Skilled– Billed per hour	No
S5150-UA	Respite Care – Unskilled	No
S5130-UA	Homemaker	No
S5135-UA	Companion	No
S5170-UA	Waiver Frozen Meals	No
S5170-SC	Waiver Shelf-Stable Meals	No
S5170	Waiver Breakfast Meals	No
S5160-UA	Personal Emergency Response System (PERS) Installation	No
S5161-UA	Personal Emergency Response System (PERS) Monthly	No
T2029-UA	Assistive Technology/Durable Medical Equipment	Yes
T2028-UA	Medical Supplies	No
T1001-UA	Supervisory Visits	No
S9123-UA	Skilled Nursing (RN)	No
S9124-UA	Skilled Nursing (LPN)	No
S5121-UA	Pest Control Services	No
S5165-UA	Home Modifications	Yes

108

108 Early Intervention Services

Early Intervention (EI) Services are specialty-oriented services delivered to infants/toddlers enrolled in Alabama's Early Intervention System (AEIS). Alabama's eligibility definition for Early Intervention is: a child birth to three years of age with a diagnosed mental or physical condition which has a high probability of resulting in developmental delay or who is experiencing a 25% delay in one or more of the five developmental areas: cognitive, physical to include vision/hearing, communication, social/emotional and adaptive. EI services include the following services provided in the natural environment unless otherwise denoted on the Individualized Family Service Plan (IFSP):

Early Intervention Services include:

- Intake Evaluation
- Basic Living Skills
- Audiology
- Family Support
- Physician Evaluation and Management Services
- Occupational Therapy (OT)
- Physical Therapy (PT)
- Psychological Testing
- Speech and Language Pathology
- Vision Services
- Treatment Plan Review

Eligible infants/toddlers receive EI Services through providers who contract with Medicaid to provide services to the eligible population.

108.1 Enrollment

The Alabama Medicaid Agency fiscal agent enrolls EI providers who meet the licensure and/or certification requirements of the State of Alabama, the Code of Federal Regulations, the *Standards For Serving Young Children With Disabilities and Their Families In Alabama* (EI personnel standards), the *Alabama Medicaid Administrative Code,* and the *Alabama Medicaid Provider Manual.*

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as an EI provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursement for EI-related claims.

NOTE:

The 10-digit NPI is required when filing a claim.

- EI providers are assigned a provider type of 63 (Services).

Valid providers for Early Intervention through contractual agreements include the following:

- Alabama Institute for Deaf and Blind (AIDB)
- Children's Rehabilitation Services (ADRS/CRS)
- Department of Mental Health (DMH)
- Division of Early Intervention (ADRS/EI)

NOTE:

CRS Specialty Clinics are not part of Early Intervention.

Enrollment Policy

Providers are qualified personnel who provide services within the natural environment unless otherwise denoted on the IFSP and provide services through a team approach.

Providers must meet recognized standards for infants/toddlers under AEIS and include the following disciplines, at a minimum:

- Audiologists
- Family Therapists
- Nurses
- Registered Dietitians
- Occupational Therapists
- Orientation & Mobility Specialists
- Physical Therapists
- Psychologists
- Social Worker
- Service Coordinators
- Special Instructors
- Speech & Language Pathologists
- Vision Specialists

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

108.2 Benefits and Limitations

All providers must participate in the development of the IFSP. All services must be provided as outlined on the IFSP.

Case management/service coordination is an integral part of Alabama's EI System. Case managers/service coordinators provide services such as evaluation/assessment, IFSP development, and coordination of services. Please see Chapter 106 addressing Targeted Case Management for Handicapped Children.

IFSP Team

The IFSP teams are usually comprised of family support personnel, parents/family members, and other EI personnel as they relate to the identified needs of the infant/toddler. The team will establish a written IFSP. The IFSP team then implements this plan.

108.2.1 Covered Services

EI Services do not include services rendered under other Medicaid programs.

EI Services are covered when provided by a Medicaid-enrolled early intervention provider and are subject to retrospective review, which may result in monies being recouped. Payments are subject to recoupment when the documentation is insufficient to support the services billed (i.e. must be documented "with justification").

Types of covered services provided include, but are not limited to:

- Intake Evaluation
- Basic Living Skills
- Therapy (physical, speech/language, occupational)
- Family Support
- Audiology services
- Physician Evaluation and Management services
- Psychological testing
- Vision services
- Treatment Plan Review

An IFSP is required for each infant/toddler and Family Support Personnel is responsible for arranging specialty and needed services for the family.

The following is a description of each EI service. Please see the EI Services Grid for Billing Unit, Daily Maximum, Maximum Units and Billing Restrictions.

Intake Evaluation (T1023 with TL modifier)

Definition

Initial evaluation to determine child's eligibility for EI. Child will undergo an evaluation of all five developmental areas with a second procedure to confirm delay in at least one of the developmental areas. The evaluator(s) will determine child's functioning level and provide written report which will indicate child's functioning level in terms of percentage of delay or no delay. Eligibility determination will be made by a multidisciplinary team. Ongoing assessment will be conducted to determine the child's continued eligibility for EI.

Deleted: ~~(90801 with TL…prior to 01/01/2013)~~
Deleted: ~~for dates of…01/01/2013 and thereafter~~

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Key service functions include the following:

- A voluntary family assessment conducted in a personal interview
- Evaluation of the child's functioning level in the five developmental areas: cognitive, physical (includes vision & hearing), communication, social/emotional and adaptive
- Review of pertinent medical records or other developmental information
- Screening of vision and hearing
- Written report

Qualified staff

Evaluations & assessments may be performed by individuals who meet the test protocol for administering such tests as the Battelle, Bayley, E-LAP, DAYC, IDA, etc. These individuals include:

- Targeted case manager
- Family Support personnel (completion of the AEIS SI webinar is not required)
- Certified social worker licensed under Alabama law
- Occupational, Physical or Speech therapist licensed under Alabama law
- Audiologist licensed under Alabama law
- Individuals meeting ICC personnel standards for Family Training/Counseling/Home visits
- Registered nurse licensed under Alabama law
- Registered dietitian licensed under Alabama law
- Psychologist licensed under Alabama law
- School psychologist or psychometrist meeting Alabama's ICC personnel standards
- Individuals who have a bachelor's degree in ECSE/VI/HI who meet Alabama's ICC personnel standards (e.g. special instructors, family trainers, home visitors, service coordinators, social workers, etc.)
- Orientation & Mobility specialists as certified by the Association for Education & Rehabilitation of the Blind and Visually Impaired

Location

Service may be delivered in the child's natural environment or service provider location.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Basic Living Skills (H0036 with TL modifier)

Definition

Functional evaluation of the child in the child's natural environment. The purchasing, leasing or otherwise providing for the acquisition of assistive technology devices. Selecting, designing, adapting, or maintaining an AT device, in order to assist with basic living skills. Any training and/or technical assistance in developing or maintaining basic living skills to improve functional capacity.

Key service functions include the following:

- Evaluating the child's functioning level and determining need of assistive device
- Acquiring the device and providing maintenance or adaptation to the device.
- Providing child, family and providers on the appropriate use of the device so that the child receives the maximum benefit.
- Progress reports and physical participation in IFSP meetings
- Service will be provided per the IFSP

Qualified staff

- Occupational, Physical or Speech therapist licensed under Alabama law
- Certified Occupational Therapy Assistant under the supervision of a licensed Occupational Therapist.
- Licensed Physical Therapist Assistant under the supervision of a licensed Physical Therapist.
- Certified social worker licensed under Alabama law
- Rehabilitation technology specialist
- Other individuals as defined by the ICC Personnel standards

Added: Certified Occupational Therapy…licensed Physical Therapist.

Location

Service may be delivered in the child's natural environment or service provider location, with justification.

Added: 92651, 92652,92653,
Deleted: ~~92585,~~ ~~92586~~

Audiology (92507, 92508, 92550, 92552, 92553, 92555, 92556, 92557, 92567, 92568, 92579, 92651, 92652, 92653, 92582, 92583, and 92587— all codes must be submitted with TL modifier)

Definition

Identification of children with auditory impairment. A determination of range, nature and degree of hearing loss and communication functions of the child. The provision of auditory training, aural rehabilitation, speech reading and listening device orientation and training. The determination of the child's need for individual amplification, including selecting, fitting and dispensing appropriate listening and vibrotactile devices and evaluating the effectiveness of those devices.

Key service functions include the following:

- Identifying auditory impairment based on appropriate audiologic screening techniques
- Determining the range and degree of hearing loss and communication functions
- Providing auditory training, aural rehabilitation, speech reading and listening device orientation
- Selecting, fitting and dispensing appropriate listening and vibrotactile devices and evaluating the effectiveness of those devices
- Progress reports and physical participation in IFSP meetings
- Service will be provided per the IFSP

Qualified staff

- Audiologist licensed under Alabama law
- Speech therapist licensed under Alabama law
- Hearing Aid Dealers
- Licensed Doctor of Medicine
- Staff will meet the ICC approved Personnel Standards for AEIS

Location

Service may be delivered in the child's natural environment or service provider location, with justification.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). Family Support (H2027 with TL modifier)

Definition

Services provided to assist the family of an eligible child in understanding the special needs of the child and enhancing the child's development.

There are 2 distinct areas of service included in Family Support: Service Coordination and Special Instruction.

Service Coordination

(Billable activities under H2027 will begin once a child is determined to be eligible for services)

- Providing families with a single point of contact for Early Intervention (EI) services
- Development of Individualized Family Service Plan (IFSP)
- Discussion of evaluation results that determine the child is eligible for early intervention services
- Completing all EI procedural safeguard requirements to allow a child (referral) to receive early intervention services
- Review of eight core values and the early intervention vital message
    - Family centered
    - Developmentally appropriate
    - Individualized
    - Natural environment
    - Train/Equip
    - Collaborative
    - Routines based
    - Evidence-Based
- Completion of voluntary family assessment
- Development of IFSP document
- Assisting families in gaining access to the EI services and other services identified in the IFSP
- Ensuring all monthly services are scheduled according to planned services per IFSP
- Review of progress notes and family support notes to ensure that all services are being provided per the IFSP including frequency/duration and location and that current outcomes are being addressed
- Preparing a social/emotional developmental assessment of the child within the family context
- Making home visits to evaluate a child's living conditions and patterns of parent-child interaction

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Working with the family's living situation (home, community and other locations where early intervention services are provided) that affect the child's maximum utilization of early intervention services
- Attending home visits with service providers to ensure that services are being provided per the IFSP (outcomes are addressed, caregiver training, follow-through)
- Identifying and coordinating community resources and services to enable the child and family to receive maximum benefit from EI services
- Facilitating and participating in the review of the IFSP at 6 month and annual intervals
- Update of IFSP planned services at request of parent or guardian
- Communicate information between service providers and caregiver through ongoing contact among various team members via phone, email, or face-to-face contact
- Facilitating the timely delivery of services
- Assisting family in the transition process by facilitating 27 month and 33 month transition meeting. Ensure LEA receives referral in timely manner
- The LEA Referral Meeting CANNOT be billed under the EI Medicaid Option
- Closing a child's case with early intervention through contact with parent, ensuring that they understand EI services are ending and helping to connect the family to other resources when appropriate.
- Service Coordination provided to a child who is in the hospital, etc. CANNOT be billed under the EI Medicaid Option.

Qualified Staff for Service Coordinator

Individuals must meet the ICC approved personnel standards and attend mandatory CPSD trainings.

Special Instruction

- Working with the child and family to enhance the child's development and assure family follow through with routine activities on a daily basis
- Visiting the child in their home environment and addressing specific outcomes with the family/caregivers
- Promoting the child's acquisition of skills in a variety of developmental areas, including cognitive processes and social interaction
- Providing a family support note after each visit
- Providing developmental and functionally appropriate services
- Service will be provided per IFSP:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Training the family regarding specific information regarding the child's disability
- How to carry out activities as indicated in the IFSP
- Home visits are a support to accomplished activities under the IFSP
- Social/emotional development assessment
- Enhancing the developmental skills of the child
- Providing structured intervention and routine, functional approach to children diagnosed with autism spectrum disorder.

Qualified Staff for Special Instruction

Individuals must meet ICC approved personnel standards and attend mandatory CSPD training.

Location

Service may be provided in the child's home environment or the service provider's location, with justification.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Physician Evaluation and Management Services (99382 with TL modifier)

Definition

Services provided by a physician to determine a child's developmental status and need for early intervention services.

Key services functions include the following:

- To evaluate the child's on-going eligibility for AEIS.
- To determine if the child has a physical or mental condition that would make the child eligible, if no such diagnosis previously existed and the child was no longer experiencing a 25% delay to maintain eligibility for AEIS.
- Progress reports and physical participation in IFSP meetings
- Service will be provided per the IFSP

Qualified staff

- Licensed doctor of medicine

Location

Service may be provided in the child's natural environment or service provider location, with justification.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Occupational Therapy (97165, 97166, 97167, 97168, 97110, 97530, 97532, and 97533 — all codes must be submitted with the TL modifier)

Definition

Services to address the functional needs of the child related to adaptive development, adaptive behavior and play and sensory, motor and postural development. These services are designed to improve the child's functional ability to perform tasks in the home and community settings.

Key service functions include the following:

- Identification, assessment and intervention
- Adaptation of the environment, and selection, design and fabrication of assistive and orthotic devices to facilitate development and promote the acquisition of functional skills
- Prevention or minimization of the impact of initial or future impairment, delay in development or loss of functional ability
- Providing developmental and functionally appropriate services
- Teaming as appropriate with other IFSP team members in achieving the outcomes in the child's IFSP
- Progress reports and physical participation in IFSP meetings
- Service will be provided per the IFSP

Qualified staff

Added: Certified Occupational Therapy…licensed Occupational Therapist.

- Occupational therapist licensed under Alabama law
- Certified Occupational Therapy Assistant under the supervision of a licensed Occupational Therapist
- Staff will meet the ICC approved Personnel Standards for AEIS

Location

Service may be provided in the child's natural environment or service provider location, with justification.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Physical Therapy (97161, 97162, 97163, 97164, 97110, 97112, 97530, 97532, 97533, and 97760 — all codes must be submitted with the TL modifier)

Definition

Services to address the promotion of sensorimotor function through enhancement of musculoskeletal status, neurobehavioral organization, perceptual and motor development, cardiopulmonary status and effective environmental adaptation.

Key service functions include the following:

- Screening, evaluation and assessment of infants and toddlers to identify movement dysfunction
- Obtaining, interpreting and integrating information appropriate to program planning to prevent, alleviate or compensate for movement dysfunction and related functional problems
- Providing individual and group services or treatment to prevent, alleviate or compensate for movement dysfunction and related functional problems
- Providing developmental and functionally appropriate services
- Teaming as appropriate with other IFSP team members in achieving the outcomes in the child's IFSP
- Progress reports and physical participation in IFSP meetings
- Service will be provided per the IFSP

Qualified staff

Added: Licensed Physical Therapist…licensed Physical Therapist.

- Physical therapist licensed under Alabama law
- Licensed Physical Therapist Assistant under the supervision of a licensed Physical Therapist.
- Staff will meet the ICC approved Personnel Standards for AEIS

Location

Service may be provided in the child's natural environment or service provider location, with justification.

Psychological testing (96112, 96113 additional 30 minutes- all codes must be submitted with the TL modifier)

Deleted: ~~(96111 with TL modifier)~~
Added: (96112, 96113 additional…the TL modifier)

Definition

Administering psychological and developmental tests and other assessment procedures. Interpreting assessment results. Obtaining, integrating and interpreting information about the child behavior and child and family conditions related to learning, mental health and development. Planning and managing a program of psychological services, including psychological counseling for children and parents, family counseling, consultation on child development, parent training and education programs.

Key service functions include the following:

- Administering developmental tests
- Interpreting assessment results
- Planning psychological services and counseling to family related to the child's development
- Progress reports and physical participation in IFSP meetings
- Service will be provided per the IFSP

Qualified staff

- Psychologist licensed under Alabama law
- School psychologist certified by the Alabama State Department of Education for AA Certificate and/or holds the National Certification in School Psychology
- School Psychometrics certified by the Alabama State Department of Education for the A Certificate and/or listed in the Alabama Roster of Approved Psychologists and Psychometrics for Testing Children Referred for Placement in Special Education Classes
- Staff will meet the ICC approved Personnel Standards for AEIS

Location

Service may be provided in the child's natural environment or service provider location, with justification.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). Speech-Language Pathology (92523, 92507, and 92508 — all codes must be submitted with the TL modifier)

Definition

Identification of children with communicative or oropharyngeal disorders and delays in the development of communication skills, including the diagnosis and appraisal of specific disorders and delays in those skills. Referral for medical or other professional services necessary for the habilitation or rehabilitation of children with communicative or oropharyngeal disorders and delays in the development of communication skills. Provision of services for the habilitation, rehabilitation or prevention of communicative or oropharyngeal disorders and delays in the development of communication skills.

Key service functions include the following:

- Identifying and evaluating delays in the development of communication skills
- Providing services to address the developmental delays of the child's communication skills
- Speech services include a variety of techniques, to include, but not limited to: speech, cued speech, auditory-verbal therapy, etc.
- Providing developmental and functionally appropriate services
- Teaming as appropriate with other IFSP team members in achieving the outcomes in the child's IFSP
- Progress reports and physical participation in IFSP meetings
- Service will be provided per the IFSP

Qualified staff

- Staff will meet the ICC approved Personnel Standards for AEIS

Location

Service may be provided in the child's natural environment or service provider location, with justification.

Vision services (99173 with TL modifier)

Definition

Evaluation & assessment of visual functioning, including the diagnosis and appraisal of specific visual disorder, delays and abilities. Referral for medical or other professional services necessary for the habilitation and rehabilitation of visual functioning disorders or both. Communication skills training, orientation and mobility training for all environments, visual training, independent living skills training, and additional training necessary to activate visual motor abilities.

Key service functions include the following:

- Determining the visual functioning level of the child
- Orientation and mobility training for all environments
- Visual training
- Independent living skills training
- Providing developmental and functionally appropriate services
- Teaming as appropriate with other IFSP team members in achieving the outcomes in the child's IFSP
- Progress reports and physical participation in IFSP meetings
- Service will be provided per the IFSP

Qualified staff

- Individuals with a bachelor's degree in the Education of the Visually Impaired and have an Alabama Class B teacher certificate
- Orientation & Mobility specialists as certified by the Association for Education & Rehabilitation of the Blind and Visually Impaired
- Licensed doctor of Optometry or Ophthalmologist
- Occupational or Physical therapist licensed under Alabama law
- Staff will meet the ICC approved Personnel Standards for AEIS

Location

Service may be provided in the child's natural environment or service provider location, with justification.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Treatment Plan Review (H0032 with TL modifier)

Definition

Review and/or revision of a client's IFSP by qualified staff members. Treatment outcomes will be written in family friendly terms, based on the family's priorities and concerns. A variety of disciplines may be involved based on the results of the multidisciplinary evaluation and assessment that determined the child's eligibility for EI. The meeting for this review will only occur if the family is present.

- The IFSP is reviewed with the family
- Treatment outcomes are functional in nature
- Modification or revision of treatment outcomes or services are made as necessary and coordinated through the Family Support Personnel
- After the initial IFSP is written, the plan will be reviewed, at a minimum, every six months
- The 6 month review can be done via telephone with the parent by the therapist or special instructor. A sign-in sheet is required as documentation for billing the 6 month review
- IFSP reviews may also be conducted via various videoconference mediums

Qualified staff

See staff listed under previous EI services

Location

Service may be provided in the child's natural environment or via telephone or various videoconference mediums.

108.2.2 Reimbursement

Claims may be submitted for reimbursement for multiple early intervention (EI) services to a recipient on a given day. However, a provider may only submit one claim per day for a particular service to a recipient. For example, an infant may receive service coordination, special instruction, and speech therapy all on date of service. Each face to face contact for speech therapy and special instruction with the infant would constitute an encounter. Each contact for service coordination with the family, whether face-to-face or other would also constitute an encounter.

Each discipline will be able to submit a claim for reimbursement: H2027-family support (service coordination) in the office or other, if justified, and speech therapy in the home or other, if justified. Providers will be able to submit a claim for each individual service to the child per IFSP. If a provider is qualified to provide more than one EI service, then each claim for reimbursement and documentation should clearly distinguish which service was rendered and there should be a clear delineation of types of services provided to the infant/toddler.

*Covered services are face-to-face contacts during which a professional team member provides an EI service to an infant/toddler. They are identified based on the data from the individual EI records.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

* An exception to face-to-face contacts is the 6 month review of the treatment plan. The 6 month review plan is allowable to be billed when the service plan is reviewed by telephone. It may still be done face-to-face if preferred by the parent.

Face-to-face contact is also defined as utilizing various videoconference mediums.

The definition of a professional team member depends upon the type of service being delivered.

108.2.3 Maintenance of Records

The provider must make available to the Alabama Medicaid Agency at no charge all information regarding claims for services provided to eligible recipients. The provider will permit access to all records and facilities for the purpose of claims audit, program monitoring, and utilization review by duly authorized representatives of federal and state agencies. The provider maintains complete and accurate fiscal records that fully disclose the extent and cost of services.

The provider maintains documentation of progress notes and dates of service.

The provider maintains all records for a period of at least three years plus the current fiscal year. If audit, litigation, or other legal action by or on behalf of the state or federal government has begun but is not completed at the end of the three-year period, the provider retains the records until the legal action is resolved. The provider must keep records in a format that facilitates the establishment of a complete audit trail in the event the items are audited.

108.3 Prior Authorization and Referral Requirements

Early Intervention codes do not require prior authorization. Refer to Chapter 4, Obtaining Prior Authorization, for general guidelines.

When filing claims for recipients enrolled in the Alabama Coordinated Health Network (ACHN) Program, refer to Chapter 40 to determine whether your services require a referral from the Primary Care Physician (PCP).

108.4 Cost Sharing (Copayment)

Copayment does not apply to services provided by EI Providers.

108.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

EI Providers that bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Online adjustment functions
- Enhanced access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

108.5.1 Time Limit for Filing Claims

Medicaid requires all claims for EI services to be filed within one year from the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

108.5.2 Procedure Codes and Modifiers

Medicaid uses the Healthcare Common Procedure Coding System (HCPCS). HCPCS is composed of the following:

- American Medical Association's Current Procedural Terminology (CPT)
- Nationally assigned codes developed for Medicare

The CPT manual lists most procedure codes required by Medicaid. This manual may be obtained by contacting the Order Department, American Medical Association, 515 North State Street, Chicago, IL 60610-9986. The (837) Professional, Institutional and Dental electronic claims and the paper claim have been modified to accept up to four Procedure Code Modifiers.

The following procedure codes have been approved for billing by Early Intervention providers.

EI Services Grid

(All these Procedure Codes **require** a TL modifier)

Procedure Code	*Billing Unit*	*Daily Maximum*	*Maximum Units-Annual*	*Description*	*Same Day Services Not Allowed (Billing Restrictions)*
T1023	Episode	3	6	Intake Evaluation	All other EI services except TCM and Family Support Personnel NOTE: Two different disciplines may bill for this service on the same day.

109 PACE

The Program of All-Inclusive Care for the Elderly (PACE) is a unique model of long term care service delivery for the frail elderly living in the community. It is a state plan program of comprehensive care that allows the frail elderly to live in their communities. The program brings together all the medical and social services needed for someone who otherwise might be in a nursing home. A team, including a physician, registered nurse, social worker, therapists and other health professionals, assesses the participant's needs, develops a comprehensive plan of care and provides for total care. Generally, services are provided in an adult day health center, but they may also be given in a participant's home, a hospital, a long-term care facility or a nursing home. Most PACE participants are dually eligible for Medicare and Medicaid benefits. Enrollment in PACE is voluntary and not limited to an individual who is either a Medicare or Medicaid recipient. All participants must be certified as meeting nursing facility level of care according to the criteria established by the state Medicaid Agency prior to enrollment. Once enrolled, PACE becomes the sole source of all Medicare and Medicaid-covered services, as well as any other items, or medical, social or rehabilitation services the PACE interdisciplinary team (IDT) determines a participant needs.

The PACE program receives a fixed monthly capitated payment from Medicare and Medicaid for each participant, depending on their Medicare and Medicaid eligibility. The payments remain the same during the contract year, regardless of the services a participant may need. The PACE provider assumes full financial risk for each participant enrolled in the program.

The purpose of providing PACE care to individuals at risk of institutional care is to protect the health, safety, and dignity of those individuals while reducing Medicaid expenditures for institutional care.

The policy provisions for PACE providers can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 53 and Part 460 of the Code of Federal Regulations.

109.1 Enrollment

109.1.1 CMS Enrollment and Agreement

An entity that wishes to become a PACE Organization (PO) must complete an application that describes how the entity meets all the requirements to be a PO. The application must first be submitted to Alabama Medicaid Agency (AMA) for review and approval, and then to CMS. AMA will provide the entity with an assurance that is to be submitted with the application sent to CMS by the entity, stating that the entity is qualified to be a PO and that AMA is willing to enter into an agreement with the entity. CMS will then evaluate the application based on the information contained in the application, as well as information obtained by onsite visits conducted by AMA and/or CMS. CMS will notify the entity within 90 days from receipt of the application that the application is approved or denied, or that additional information is required. If additional information is requested, CMS will have an additional 90 days from receipt of the requested information to make a final decision. Once an application is approved, an agreement must be signed by the

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

organization, the AMA, and an authorized official of CMS. The agreement is effective for one contract year but may be extended each year unless any party chooses to terminate the agreement. At a minimum, the agreement must include the information required in 42 CFR 460.32.

109.1.2 AMA Enrollment

Once the three-way agreement has been signed by all parties, the entity is to submit a provider application to Gainwell for enrollment as a Medicaid provider. Gainwell will contact the appropriate staff of the Medicaid PACE Unit to verify that the entity has been approved to be a PACE provider.
Gainwell enrolls PACE providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the State of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code* and the *Alabama Medicaid Provider Manual.*

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.
Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a PACE provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for PACE related services.

NOTE:
The 10-digit NPI is required when filing a claim.

PACE providers are assigned a provider type of 64 (PACE Organization). The valid specialty for PACE providers is PACE Organization (645).

109.2 Benefits and Limitations

109.2.1 Federal Eligibility Requirements

As required by 42 CFR 460.150, an individual shall meet the following basic requirements to be eligible to enroll in PACE:

- be 55 years or older
- reside in an approved PACE service area
- meet the state's Medicaid criteria for nursing facility level of care, and
- meet any additional program specific eligibility conditions imposed under the PACE program agreement, including the individual shall be safely served in the community

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Medical Eligibility

The Medicaid Agency has delegated authority for initial and annual level of care determination to the PACE provider. Medicaid eligibility for PACE is based on current admission criteria for nursing facility care. Admission criteria are described in *Chapter 26, Nursing Facility, of the Alabama Medicaid Provider Manual and in the Alabama Medicaid Administrative Code, Chapter 10, 560-X-10-.10.* As the Operating Agency and State Administering Agency for PACE, Alabama Medicaid Agency (AMA) maintains ultimate authority and oversight of this process. AMA will prospectively review all initial and annual redetermination admission level of care determinations for certification before the participant is enrolled/continues to be enrolled in the PACE program. Redetermination of the participant eligibility follows the same procedure as a new enrollment.

NOTE:

Initial enrollment in PACE and annual redetermination requires that the patient meet two criteria listed on PACE Form 12-001 (a-k). As a result, an individual who meets one or more ADL deficits under (k) must also meet an additional criterion from the list (a-j). All assessments submitted for PACE must include supporting documentation. Four exceptions are noted:

- Criterion (a) and criterion (k)-7 are the same as they both involve medication administration. Only one may be used. Therefore, if an individual meets criterion (a), criterion (k)-7 may not be used as the second qualifying criterion.
- Criterion (g) and Criterion (k)-9 are the same as they both involve direction by a registered nurse. Only one may be used. Therefore, if an individual meets criterion (g), Criterion (k)-9 may not be used as the second qualifying criterion.
- Criterion (k) (3) cannot be used as a second criterion if used in conjunction with criterion (d) if the ONLY stoma (opening) is a Gastrostomy or PEG tube.
- Criterion (k) (4) cannot be counted as a second criterion if used in conjunction with criterion (d) if used for colostomy or ileostomy.

NOTE:

If an individual has a serious mental illness or has an intellectual disability, the individual will not be eligible for PACE unless the individual has medical needs unrelated to the diagnosis of serious mental illness or intellectual disability and meets the criteria as set in Chapter 26, Nursing Facility, of the Alabama Medicaid Provider Manual.

ocess for admission includes medical and financial eligibility determination:

- In accordance with 42 CFR 460.152(a) (3), prior to enrollment in PACE, Medicaid shall certify that the PACE applicant meets the state's nursing facility level of care criteria.

- The PACE organization shall submit the level of care screening tool each year to verify that the enrollee continues to meet nursing facility level of care requirements as required in 42 CFR 460.160 (b).

- The determination of level of care will be made by an RN of the PACE organization (PO), certification signed by the PO physician and forwarded on to the AMA PACE Unit RN. This is done prior to submission of Form 204/205 and Form 376. The Form 204/205 and Form 376 are to be mailed to the AMA PACE Unit RN. The PACE Unit RN will complete the Form 376 when the LOC has been approved and will then forward Form 204/205 along with Form 376 to the appropriate Eligibility staff. For

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

cases in which medical eligibility cannot be determined by the PACE Unit RN, the documents will be submitted to the Director of Long Term Care for a determination to be made. For cases in which the Director is unable to make a determination, the documents will be submitted to the Alabama Medicaid Agency physician who will review and assess the documentation submitted.

- The earliest date of entitlement for Medicaid is the first day of the month of application for assistance, provided the individual meets all factors of eligibility for that month. The individual who is eligible on the first day of the month is entitled to Medicaid for the full month. It is the responsibility of the PO to verify Medicaid eligibility for participants on a monthly basis. There will be no retroactive benefits applied to initial enrollments in PACE.
- Financial determination is made by the Alabama Medicaid Agency, or the Social Security Administration (SSA). Upon determination of financial and medical eligibility the PO will submit required data electronically via the LTC software to Medicaid's fiscal agent to document dates of service to be added to the Level of Care file. Financial eligibility will be established in accordance with the *Alabama Medicaid Agency Administrative Code, Chapter 25.*

All PACE organizations are required to accurately complete and maintain the following documents related to level of care in the participants file (EMR) for Medicaid/CMS retrospective reviews.

- PACE Form 12-001. A written assessment used to determine a participant's current care needs. This assessment is used to assess each individual participant's functional, medical, social, environmental and behavioral status. Information obtained should be adequate enough to make a level of care decision with supporting documentation for all criteria selected. If criterion G, unstable medical condition is one of the established medical needs, the provider must maintain supporting documentation of the unstable condition requiring active treatment in the 90 days preceding enrollment.
- IDT assessments
- Plan of Care
- Any and all documentation that would support the Level of Care criteria selected on PACE Form 12-001.

Financial Eligibility

Eligibility for enrollment in PACE is not restricted to an individual who is either a Medicaid recipient or a Medicare beneficiary. Individual's eligible for enrolling in the PACE program are those included in one of the categories listed below:

- Eligible for full Medicaid;
- Eligible for Medicare Part A;
- Enrolled under Medicare Part B;
- Dual eligibles for Medicaid and Medicare

Financial determinations are made by the Alabama Medicaid Agency, or the Social Security Administration (SSA), as appropriate.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Recipients can have Medicare, Medicaid, be dually eligible for Medicare/Medicaid or disabled with income not greater than 300% of the SSI Federal Benefit Rate.

Medicaid does not guarantee future eligibility. For this reason it is very important that providers must verify recipient eligibility on a monthly basis prior to providing a service. For more information refer to Chapter 3, Verifying Recipient Eligibility in the *Alabama Medicaid Provider Manual.*

Enrollment Denials

For any enrollment denial based on level of care, Alabama Medicaid will advise the PO in writing of its decision and the opportunity to request reconsideration of the decision via an Informal Conference so that they may present further information to establish medical eligibility. To request the Informal Conference the PO must submit a letter within 30 days of the date of the letter. This letter must specify the findings that are contested and the basis for the contention. This letter should be addressed to Alabama Medicaid Agency, PACE Program Unit, P.O. Box 5624, Montgomery, AL 36103-5624.

If the Informal Conference results in an adverse decision, the PO is advised of the right to a Fair Hearing. To request the Fair Hearing the PO must submit a letter within 60 days of the date of the letter. This letter should be addressed to Alabama Medicaid Agency, PACE Program Unit, P.O. Box 5624, Montgomery, AL 36103-5624. If the Informal Conference results in a favorable decision, the enrollment procedures are followed.

Prior Approval

Prior approval of the medical level of care must be determined by AMA Medical Review staff. Documentation in support of the Level of Care and PACE Form 12-001 must be submitted to AMA PACE staff. An approval/denial will be faxed to the PACE provider within five working days of receipt of the request. The medical Level of Care must be approved prior to a financial determination. Refer to section 109.6 for additional information regarding PACE assessment requirements.

Enrollment Requirements

- When the participant meets the eligibility requirements and wants to enroll, he/she shall sign an Enrollment Agreement that contains the minimal information under 42 CFR 460.154
- The PACE organization must give a participant, upon signing the enrollment agreement, all of the information set forth in 42 CFR 460.156
- In accordance with 42 CFR 460.158, a participant's enrollment in the program is effective on the first day of the calendar month following the date the PACE organization receives the signed Enrollment Agreement
- In accordance with 42 CFR 460.160, the PACE enrollment continues until the participant's death, regardless of changes in health status, unless the participant voluntarily disenrolls in accordance with 42 CFR 460.162, or is involuntarily disenrolled in accordance with 42 CFR 460.164
- As indicated in 42 CFR 460.154 (p), each individual enrolling in PACE shall accept PACE as his or her sole source for services. This requirement must be included in the PACE Enrollment Agreement and the individual or legally responsible person must acknowledge acceptance of this requirement by signing a form approved by AMA

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

If a recipient is enrolled in a HCBS waiver program or receiving nursing facility services or the PO must contact the appropriate operating agency or Alabama Medicaid staff for the associated program well enough in advance of the effective enrollment date in PACE, in order to allow enough time for the process of end dating the other benefit plan segment. If not done, this could delay enrollment of the recipient until the next calendar month.

Initial Level of Care Review

In accordance with 42 CFR 460.152 (a) (3) and as described above, prior to enrollment in PACE, Medicaid shall certify that the PACE applicant meets the state's nursing facility level of care criteria.

Annual Level of Care Review

The PACE organization shall submit the level of care screening tool each year to verify that the enrollee continues to meet nursing facility level of care requirements as required in 42 CFR 460.160 (b). The PACE Organization will submit documents to AMA for redetermination review up to 45 days before the annual date but no later than the 15th of the month before the annual date.

Physical, Functional and Psychosocial Assessment/Plan of Care

Following certification by Medicaid that an eligible recipient meets nursing facility level of care requirements, the PACE interdisciplinary team (IDT), under the direction of the PACE medical director and in accordance with 42 CFR 460.104, must conduct a comprehensive assessment of the participant. The IDT must meet the following assessment requirements:

- An initial in-person comprehensive assessment must be completed promptly following enrollment by the:
  - Primary Care Physician
  - Registered Nurse
  - Social Worker
  - Physical therapist
  - Occupational therapist
  - Recreational therapist or activity coordinator
  - Dietician; and
  - Home care coordinator

- At least semi-annually, an in-person assessment and treatment plan must be completed by the:
  - Primary care physician
  - Registered nurse
  - Social worker

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

  - Recreational therapist/activity coordinator and
  - Other team members actively involved in the development or implementation of the participant's plan of care (e.g., home care coordinator, PT, OT or dietitian

- Annually, an in-person assessment and treatment plan must be completed by the:
  - Physical therapist
  - Occupational therapist
  - Dietician and
  - Home care coordinator

Following the required assessments, the PACE program must develop a plan of care for each participant as required by 42 CFR 460.106. PACE organizations consolidate discipline specific plans into a single plan of care semi-annually through discussion and consensus of the IDT. The consolidated plan is then discussed and finalized with the PACE participant and/or his or her significant others.

Reassessments and treatment plan changes are completed when the health or psychosocial situation of the participant changes.

Reference Alabama Medicaid Agency Administrative Code Chapter 53, section 560-X-53-.07 for Participant Assessment and Plan of Care policy provisions.

Signature Requirement

Under Alabama's Uniform Electronic Transactions Act, effective January 1, 2002, Alabama law recognizes the validity of electronic signatures. For all Medicaid PACE Forms, the signature must be an original signature or an approved electronic signature of the recipient's attending physician/PACE physician. Provider certification is made via standardized electronic protocol.

Health and Safety Assessment

The primary consideration underlying the provision of services and assistance to this state's frail and elderly is their desire to reside in a community setting. However, enrollment in a Program of All Inclusive Care for the Elderly may be denied based upon the inability of the program to ensure the health, safety, and well-being of the individual under any of the following circumstances, based on assessment of the individual's mental, psychosocial and physical condition and functional capabilities:

- The individual is considered to be unsafe when left alone, with or without a Personal Emergency Response System
- The individual lacks the support of a willing and capable caregiver who must provide adequate care to ensure the health, safety and well-being of the individual during any hours when PACE services are not being provided
- The individual's needs cannot be supported by the system of services that is currently available
- The individual's residence is not reasonably considered to be habitable

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The individual's residence or residential environment is unsafe to the extent that it would reasonably be expected to endanger the health and safety of the individual, the individual's caregivers, or the PACE Organization's staff if PACE services are to be provided in the residence
- The individual's behavior is disruptive or threatening or is otherwise harmful (e.g., suicidal, injurious to self or others, or destructive of environment)
- There is a high risk or an existing condition of abuse, neglect or exploitation as evidenced by an assessment

The PACE program shall conduct a comprehensive health and safety assessment to ensure that the applicant's health, safety or welfare will not be jeopardized by living in the community. The assessment must include:

- An on-site evaluation of the applicants residence
- An evaluation of the applicant's social support system, including the willingness and capabilities of all informal caregivers; and
- An evaluation of whether the applicant can be safely transported to the PACE center

PACE Participant Rights

A PACE organization must have a written participant bill of rights designed to protect and promote the rights of each participant. Those rights include, at a minimum, the ones specified in 42 CFR 460.112:

- Respect and nondiscrimination
- Information disclosure
- Choice of providers within the PACE organization's network
- Access to emergency services
- Participation in treatment decisions
- Confidentiality of health information
- Complaints and appeals

Services

The PACE services for all participants, regardless of the source of payment, must include items and services as indicated under 42 CFR 460.90, 42 CFR 460.92 and 42 CFR 490.94 and Alabama Medicaid Agency Administrative Code, section 560-X-53.06.

Provision of Service

- As required by 42 CFR 460.32(a) (1), the PACE program must define its service area. The service area must be approved by AMA and CMS.
- As defined by 42 CFR 460.98(c), the minimum services that must be furnished at each PACE program include primary care, including physician and nursing services; social services, restorative therapies, including physical therapy and occupational therapy, personal care and supportive services, nutritional counseling, recreational therapy and meals, which serve as the focal point for coordination and provision of most PACE services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- The PACE program must establish an interdisciplinary team (IDT) to provide care and case manage all of the services provided or arranged by the PACE program for each participant. The IDT must be composed of at least the following members:

    a) Primary care physician
    b) Registered Nurse
    c) Master's-level social worker
    d) Physical therapist
    e) Occupational therapist
    f) Recreational therapist or activity coordinator
    g) Dietician
    h) PACE center manager
    i) Home care coordinator
    j) Personal care attendant or his/her representative; and
    k) Driver or his/her representative

In-Home and Referral Services

As required by 42 CFR 460.94, the PACE program must arrange for all in-home and referral services that may be required for each participant. In-home and referral services are furnished by a PACE organization or by a contracted provider with the PACE program in the manner as set forth in 42 CFR 460.70 and in compliance with 460.71.

Emergency Care Services

The PACE program must provide emergency care services in accordance with 42 CFR 460.100.

An emergency medical condition means a condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson, with an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in the following:

- Serious jeopardy to the health of the participant
- Serious impairment to bodily functions
- Serious dysfunction of any bodily organ or part

Emergency Services Care Plan

The PACE program must establish and maintain a written plan to handle emergency care at the PACE center and when the PACE participant is not at the PACE center. The plan must include procedures to access emergency care both in and out of the PACE service area. The PACE program must ensure that participants and caregivers know when and how to access emergency care services when not at the PACE center. The plan must ensure that CMS, AMA, and PACE participants are held harmless if the PACE Organization does not pay for emergency services.

Access to Emergency Care

In the case of an emergency medical condition, the PACE participant has the right to access the closest and most readily accessible qualified provider, in or out of the PACE service area, including hospital emergency room services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Out-of-Service-Area Emergency Care

Emergency care while the PACE participant is out of the service area is covered by the PACE program and no prior approval is required.

Out-of-Service-Area Follow-up Care

Urgent care and care furnished to the PACE participant to stabilize his or her emergency medical condition that is provided outside the PACE service area must be prior approved by the PACE program.

Retrospective Reviews of Emergency Care

Evaluation of the participant's decision to use emergency services must be based on the prudent layperson standard and no higher standard may be adopted by the PACE program.

Cost of Emergency Care

Charges for all emergency care must be paid by the PACE program.

109.3 Participant Disenrollment from PACE

Voluntary Disenrollment

In accordance with 42 CFR 460.162, a PACE participant may voluntarily disenroll from PACE at any time without cause. The disenrollment date will not be effective until the participant is appropriately reinstated into other Medicaid programs and alternative services are arranged.

The PO is to notify AMA in writing by the 10th of each month of any voluntary disenrollments for the previous month. A copy of the request to voluntarily disenroll is to be submitted with the monthly report. Voluntary disenrollments are to also be reported on quarterly reports submitted to CMS and AMA.

Involuntary Disenrollment

A PACE participant may be involuntarily disenrolled for any of the following reasons established in 42 CFR 460.164:

- Failure to Pay: Any participant who fails to pay, or make satisfactory arrangements to pay any premiums due, to the PACE organization after a thirty-day grace period
- Disruptive or Threatening Behavior: A participant engages in disruptive or threatening behavior. Such behavior is defined as the following:
  - Behavior that jeopardizes the participant's own health or safety, or the safety of others; or a participant with decision-making capacity who consistently refuses to comply with his/her individual plan of care or the terms of the PACE enrollment agreement. Note that a PACE organization may not involuntarily disenroll a PACE participant on the grounds that the participant has engaged in noncompliant behavior related to an existing mental or physical condition unless the participant's behavior is jeopardizing his/her health or safety or that of others. Noncompliant behavior includes repeated noncompliance with medical advice and repeated failure to keep appointments

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Relocation out of the service area: The participant moves out of the PACE program service area or is out of the service area for more than 30 consecutive days, unless the PACE organization agrees to a longer absence due to extenuating circumstances
- Non-renewal or Termination of Program Agreement: The PACE organization's program agreement with CMS and AMA is not renewed or is terminated
- The participant is determined to no longer meet the Medicaid's nursing facility level of care requirements and is not deemed eligible

Procedures for Involuntary Disenrollment

In the event that a participant is involuntarily disenrolled, the PACE organization shall comply with 42 CFR 460.164.

To involuntarily disenroll a participant, the PACE Organization must obtain the prior review and approval of AMA. The request to disenroll a participant and documentation to support the request must be sent to the AMA PACE Unit. The request and corresponding documentation will be reviewed and a final determination will be made regarding the appropriateness of the involuntary disenrollment. AMA will notify the PACE Organization of approval or denial of the involuntary disenrollment in writing.

The PACE organization must assist the individual in obtaining other care and services to meet his/her medical, functional, psychological, social and personal care needs.

The PO is to notify AMA in writing by the 10th of each month of any completed involuntary disenrollments for the previous month. Involuntary disenrollments are to also be reported on quarterly reports submitted to CMS and AMA.

Effective Date of Disenrollment

The PACE organization is required to ensure that the disenrollment date is coordinated between Medicare and Medicaid for participants who are dually eligible (42 CFR 460.166).

The PACE participant must continue to use and the PACE organization must continue to provide, PACE services up to the effective date of termination (42 CFR 460.166)

The disenrollment date must not become effective until the participant is appropriately reinstated into other Medicare and Medicaid programs and alternative services are arranged (42 CFR 460.168)

Fiscal Agent Enrollment/Disenrollment Notification

When there is both medical and financial approval, the enrollment date will be entered through the Long Term Care (LTC) notification software by the PACE provider. This software enables the provider to submit LTC enrollment/disenrollment notifications on behalf of PACE participants. Enrollment must be completed by the end of the month prior to the effective date for PACE. Example: participant enrolling effective March 1st must have the enrollment information entered in the LTC software program by February 28th. The system is set to automatically default to the first of the following month and PACE providers are not authorized to backdate.

Participants disenrolled from the PACE program must have disenrollment information submitted using the LTC Admission Notification Software within 48 hours. This would include disenrollment due to death, termination from the program or transfer to a Medicaid Waiver program.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Alabama LTC Admission Notification software is available at no charge to Alabama Medicaid providers. It provides installation procedures and a contact number for the Gainwell Electronic Media Claims (EMC) Help Desk, whose commitment is to assist Alabama Medicaid providers with electronic eligibility, claims, and medical eligibility application submission. Access to the LTC Admission Notification Manual can be done via the Alabama Medicaid web page at the following link:

http://medicaid.alabama.gov/content/7.0_Providers/7.6_Manuals.aspx and/or the Alabama Medicaid Provider Portal (https://www.medicaid.alabamaservices.org/alportal) by navigating to “Information” and click on “AL Links”.

For additional support or questions contact the *EMC Helpdesk at-1-800-456-1242.*

109.4 Additional Requirements

Compliance

Providers shall comply with all applicable federal, state and local laws and regulations, including the Health Insurance Portability and Accountability Act (HIPAA) and record retention requirements.

Reports to AMA

A PACE Organization is responsible for collecting data, maintaining records, and submitting reports as required by CMS and AMA as outlined in 42 CFR 460, Subpart L. Quarterly reports are to be submitted to CMS through the HPMS system. A copy of the quarterly reports is to be submitted to AMA by secure email. Monthly reports for voluntary and involuntary disenrollments are to be submitted to AMA by secure email. AMA will notify the PACE Organization in writing if it is determined that additional information, or additional reports, are needed.

The following quarterly reports must be submitted to AMA by the 20th of the month following the end of the quarter:

- Routine Immunizations
- Grievances
- Appeals
- Enrollments
- Disenrollments
- Prospective Enrollees
- Readmissions
- Emergency (unscheduled) Care
- Unusual Incidents
- Participant Deaths

Quality Assessment and Performance Improvement Program

The PACE program must develop, implement, maintain, and evaluate an effective data-driven quality assessment and performance improvement (QAPI) program, with the minimum requirements as under 42 CFR 460.134.

AMA will conduct site visits annually in conjunction with CMS, or as needed, to review the quality of service provision by the PACE Organization. The annual site visit review will include a clinical and administrative component and a review of compliance with life safety codes.

Medical Record Documentation

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Per 42 CFR 460.210(b) the PACE organization must maintain a single comprehensive medical record for each participant. The medical record shall contain the following:

- Appropriate identifying information
- Documentation of all services furnished, including the following:
    - A summary of emergency care and other inpatient or long-term care services
    - Services furnished by employees of the PACE center
    - Services furnished by contractors and their reports
- Interdisciplinary assessments, reassessments, plans of care, treatment, and progress notes that include the participant's response to treatment
- Laboratory, radiological and other test reports
- Medication records
- Hospital discharge summaries, if applicable
- Reports of contact with informal support (e.g., caregiver, legal guardian or next of kin)
- Enrollment Agreement
- Physician orders
- Discharge summary and disenrollment justification, if applicable
- Advance Directives, if applicable
- A signed release permitting disclosure of personal information.

Medical Record Retention

In accordance with 42 DFR 460.200, medical records must be maintained in an accessible location for at least six years after the last entry or six years after the date of disenrollment. The records must be available upon request for audit by an authorized representative of the Alabama Medicaid Agency, the state Medicaid Fraud Control Unit and representatives of CMS.

109.5 Capitated Payment and Amounts

The state provides a monthly capitated payment for each PACE participant who is eligible for Medicaid assistance, in accordance with 42 CFR 460.180. The capitation payment amount is specified in the PACE program agreement and is based on the amount AMA would otherwise have paid under the state plan if the recipients were not enrolled in PACE. The capitation payment must be accepted in full for Medicaid participants. The PACE Organization may not bill, charge, collect or receive any other form of payment for the participant unless based on the exceptions listed in 42 CFR 460.182(c).

Payment for Medicare and Medicaid Dually Eligible Recipients

In accordance with 42 CFR 460.180 and 42 CFR 460.182, a PACE program is eligible to receive monthly capitated payments from Medicaid for recipients who are Medicaid eligible or dually eligible for both Medicare and Medicaid when:

- The organization has been approved by AMA as a PACE provider
- The organization has been approved by CMS as a PACE provider; and
- All parties have properly executed the three-way agreement between CMS, AMA and the PACE organization

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Private Pay Participants

Federal regulations (42 CFR 460.186) allow the PACE organization to accept private-pay participants and to collect a premium from individuals who are Medicare-only beneficiaries. A PACE organization may not charge a private pay participant an amount greater than the Medicaid capitated payment amount.

109.6 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers are required to bill Medicaid claims electronically.

PACE providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claims correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

The PACE Organization will use the following procedure codes:

- T1015 for Dual Eligible PACE participants in the community
- T1015 with modifier TF for PACE participants in the nursing facility
- T1015 with modifier TG for Medicaid only PACE Participants in the community

The date of service should be the first day of the month and only one unit should be entered.

109.7 Cost Sharing (Copayment)

Copayment does not apply to services provided by PACE providers.

109.8 Time-Limit for Filing for payment

Medicaid requires all claims for PACE to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

109.9 Diagnosis Codes

The *International Classification of Diseases*- 10th Revision-*Clinical Modification (*ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:
ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015. ICD-10 codes should be used for claims submitted with dates of service on or after 10/01/2015.

109.10 Place of Service Code

The following place of service code applies when filing claims for PACE:

POS Code	Description
99	Other place of service

109.11 For More Information

110

110 Rehabilitative Services (ASD) – DMH

Rehabilitative Autism Services are specialized medical services delivered by uniquely qualified practitioners designed to treat or rehabilitate persons with Autism Spectrum Disorder (ASD). These services are provided to recipients based on medical necessity guidelines as defined in Chapter 7, Understanding Your Rights and Responsibilities as a Provider.

Direct services can be provided in any home or community setting (except licensed hospital beds) that is convenient for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

Rehabilitative services will be provided to Medicaid recipients based on medical necessity. Although limits are provided for guidance, the limitation(s) noted can be exceeded based on the individual recipient needs. While it is recognized that involvement of the family in the treatment of individuals with ASD is necessary and appropriate, provision of services where the family is involved clearly must be directed to meeting the identified recipient's treatment needs. Services provided to non-Medicaid eligible family members independent of meeting the identified recipient's treatment needs are not covered by Medicaid. An asterisk denoting this restriction will appear in each service description that refers to a recipient's collateral defined as a family member, legal guardian or significant other.

The policy provisions for rehabilitative services providers can be found in the *Alabama Medicaid Agency Administrative Code*, Chapter 47.

For those providers seeking to render ABA Therapy services, please refer to Chapter 37 Therapy (Occupational, Physical, Speech and ABA).

Intensive Care Coordination is an integral part of Autism Services. See Chapter 106 addressing Targeted Case Management for Autism Spectrum Disorder (Target 3 or 10).

110.1 Enrollment

The Alabama Department of Mental Health (ADMH) enrolls Rehabilitative Autism Services providers and issues provider contracts to applicants who meet the licensure and/or credentialing requirements of ADMH and the State of Alabama, the Code of Federal Regulations (CFR), and the *Alabama Medicaid Agency Administrative Code*.

Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program (through ADMH). Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

National Provider Identifier, Type, and Specialty

A provider who has a contractual agreement with ADMH as an Autism Services provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursement for Autism Services-related claims.

NOTE:
The 10-digit NPI is required when filing a claim.

Rehabilitative services providers are assigned a provider type of 11 (State Rehabilitative Services). The valid specialties for Rehabilitative Autism Services are:

- Rehabilitative Autism Services - DMH (114)

Enrollment Policy for Rehabilitative Services Providers

Autism Services providers must complete the Autism Services applications and submit to ADMH, along with proof of licensure/certification, transcript, and work experience.
To participate in the Alabama Medicaid Program, Rehabilitative Autism Services providers must meet the following requirements. Service providers must demonstrate that they meet the criteria in either (1) or (2), and (3) below.

1. A provider must have demonstrated the capacity to provide access to the following services through direct provision:
    - Must submit an application to and receive approval by ADMH to provide Rehabilitative Autism Services for children under age 21 under the Medicaid Rehabilitative Option program if they have demonstrated capacity to provide medically necessary services, either directly or through contract.

2. A provider must demonstrate the capacity to provide services off-site in a manner that assures the recipient's right to privacy and confidentiality and must demonstrate reasonable access to services as evidenced by service location(s), hours of operation, and coordination of services with other community resources.

3. A provider must ensure that Medicaid recipients receive quality services in a coordinated manner and have reasonable access to services delivered in a flexible manner to best meet their needs.

110.1.1 Minimum Qualifications for Rehabilitative Autism Service Professional Staff

Providers are qualified personnel who provide services within home or community, and who provide services guided by an Individualized Service Plan (ISP). Providers must meet recognized standards under Autism Services and include the following disciplines, at a minimum:

- Physician

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Psychologists
- Licensed Professional Counselors
- Licensed Marriage and Family Therapists
- Licensed Social Workers
- Behavior Therapists (BCBA, BCBA-D, Psychologist)
- Behavior Support Monitors (RBT, BCaBA, Behavior Therapist, SLP, LPC)
- Speech Pathologists
- Occupational Therapists
- Physical Therapists
- Registered Nurses
- Child/Youth Peer Support Specialists
- Family Peer Support Specialists
- Therapeutic Mentors

A Professional Autism Services Specialist (PASS) I is defined as the following:

- An individual licensed in the State of Alabama as a
  - Physician
  - Clinical Psychologist
  - Professional Counselor
  - Marriage and Family Therapist
  - Graduate Level Social Worker
  - Registered Nurse

OR

  - An individual who has a Master's Degree or above from a nationally or regionally accredited university or college in psychology, counseling, social work, or other behavioral health area with requisite course work equivalent to that degree in counseling, psychology, or social work.

A Professional Autism Services Specialist (PASS) II is defined as the following:

- Individual who has a Bachelor of Arts or Bachelor of Science in a human services related field from an accredited college or university with a minimum of one-year experience working with individuals with disabilities, families and/or service coordination

A Certified Autism Support Specialist (CASS) is defined as the following:

- A person with an Associate's degree or high school diploma or GED supervised by a Professional Autism Services Specialist I.
- A Parent Autism Peer Support Specialist provider who is parenting or has parented a child with ASD and can articulate the understanding of their experience with another parent or family member. This individual may be a birth parent, adoptive parent, family member standing in for an absent parent, or other person chosen by the family or youth to have the role of parent. This individual has at least a high school diploma or GED and has satisfactorily completed an Autism Parent Peer Support Provider training program approved by state. A Parent Autism Peer Support Specialist must be supervised by a Professional Autism Services Specialist I.
- A Youth Autism Peer Support Specialist must be 18 years of age or older and serves children and youth ages 0-21 and uses his/her life experience with ASD and specialized training to promote resiliency. Youth Autism Peer Support service can be provided in an individual, family, or group setting by a Certified Child/Youth Autism

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Peer Support Specialist. A Child/Youth Peer Support Specialist must be supervised by PASS I. This individual has satisfactorily completed a Youth Autism Peer Support Provider training program approved by the state.

110.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Treatment eligibility is limited to individuals with a diagnosis of F84.0, F84.1, F84.5, and F84.9, assigned by a licensed physician or a licensed psychologist as listed in the most current International Classification of Diseases - 10th Revision - Clinical Modification (ICD-10-CM).

110.2.1 Covered Services

While Medicaid recognizes that family involvement in the treatment of individuals in need of rehabilitative services is necessary and appropriate, provision of services where the family is involved must be directed to meeting the recipient's treatment needs. Medicaid does not cover services for non-Medicaid eligible family members independent of meeting the recipient's treatment needs.

Only the following rehabilitative services qualify for reimbursement under this program:

- Behavior Support
- In Home Therapy (Mental Health Support)
- Mental Health Care Coordination
- Peer Support
- Psychoeducational Services
- Therapeutic Mentoring

Intensive Care Coordination is an integral part of Autism Services. All providers must participate in the development of the Individualized Service Plan (ISP). All services must be provided as outlined on the ISP. Refer to Chapter 106 addressing Targeted Case Management for Autism Spectrum Disorder (Target 3 or 10).

The ISP teams are usually comprised of the child/youth, Intensive Care Coordinator, parents/family members, and other service providers as they relate to the identified needs of the child/youth. The team will establish a written ISP. The ISP team then implements this plan.
An ISP is required for each child/youth and ICC personnel is responsible for assisting eligible children/youth in gaining access to needed medical, social, therapeutic, educational, and other services and is responsible for initiating and guiding those service interventions.

This section contains a complete description of each covered service along with benefit limitations.

The following is a description of each ASD service. Please see ASD Services Grid for Billing Unit, Daily Maximum Units, and Billing Restrictions.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The following procedure codes apply when filing claims for ASD Rehabilitative Services. The (837) Professional and Institutional electronic claims and the paper claim have been modified to accept up to four procedure code modifiers.

Claims without procedure codes or with invalid codes will be denied. Only the procedure codes listed in this section are covered under this program.

HCPCS Code	***Description***	***Daily Max***	***Annual Max Units***
H2019	Behavior Support	16	4160
T1027	In Home Therapy (Mental Health Support)	8	832
H0046	Mental Health Care Coordination	24	312
H0038	Peer Support – Family Individual Group	 20 20	 2080 2080
H0038	Peer Support – Youth Individual Group	 20 20	 2080 2080
H2027	Psychoeducational Services Individual Group	 8 8	 416 416
H2014	Therapeutic Mentoring Individual Group	 8 8	 416 416

Telehealth Billing Guidelines

Refer to Chapter 112, Telemedicine Services, for general benefit information and limitations.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Behavior Support (H2019)

Positive behavior support therapy and monitoring is designed to address challenging behaviors in the home and community for children and youth with ASD or ASD with co-occurring IDD. A behavioral therapist writes and monitors a behavioral management plan that includes specific behavioral objectives and interventions that are designed to diminish, extinguish, or improve specific behaviors related to the child's or youth's behavioral health condition. The behavioral therapist supervises and coordinates the interventions and trains others who works with the family to implement the plan in the home and in the community.

Eligible Provider Type:

Behavior Support services may be performed by a person who possesses any one or more of the following qualifications:

Behavior Therapist:

- A Professional Autism Services Specialist I (PASS I) who is
    - Licensed and Board Certified Behavior Analyst (BCBA, BCBA-D, LBA) OR Licensed Psychologist, AND
    - Possesses at least two years full-time working experience in providing services to individuals with ASD, one year of which much be post-graduate work.

Behavior Support Monitor:

- PASS I who qualifies as at least one of the following:
    - Licensed and Board Certified Assistant Behavior Analyst (BCaBA, LABA)
    - Registered Behavior Technician
    - Licensed Professional Counselor (LPC)
    - Licensed Speech Pathologist (SLP)
    - Licensed Occupational Therapist (OT)
    - Licensed Clinical Social Worker (LCSW)

    AND

    - Possesses at least two years full-time working experience in providing services to individuals with ASD, one year of which much be post-graduate work.

- A **Professional Autism Services Specialist II** (PASS II) who qualifies as at least one of the following:
    - A Bachelor degree in a relevant human services field and the appropriate training in implementing behavioral interventions, including: Licensed & Board Certified Assistant Behavior Analyst (BCaBA, LABA), Registered Behavior Technician (RBT)
      AND
    - Minimum one-year of supervised experience in performing ASD services after obtaining the degree.

- A **Certified Autism Support Specialist** (CASS) who qualifies as:
    - High-school diploma or GED, and
    - Registered Behavior Technician Certification, and
    - Minimum two years' experience working with children/adolescents/transition-age youth, and adequate ongoing supervision.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Key service functions include the following:

- Discrete Trial Training- PASS I, PASS II, CASS
- Incidental Teaching- PASS I, PASS II, CASS
- Pivotal Response Training- PASS I, PASS II, CASS
- Verbal Behavior Intervention- PASS I, PASS II, CASS
- Functional Communication Training- PASS I, PASS II, CASS
- Coping Skills Training- PASS I, PASS II, CASS
- Assessment- PASS I, PASS II
- Reduction of Environmental Barriers to Learning- PASS I, PASS II, CASS
- Maladaptive Behavior Reduction- PASS I, PASS II, CASS
- Functional Behavior Assessment- PASS I, PASS II
- Functional Analysis- PASS I
- Crisis Intervention- PASS I, PASS II
- Social Skills Therapy- PASS I, PASS II, CASS
- Psycho-educational Services- PASS I, PASS II, CASS
- Sensory Integration- PASS I, PASS II, CASS
- Development of Individual Program Plan- PASS I
- Progress Reporting- PASS I
- Transition Planning- PASS I
- Family Training- PASS I, PASS II, CASS
- Augmentative Communication Training- PASS I, PASS II, CASS

Billing Unit: 15 minutes

Maximum Units: 16 units/day; 4,160 units/year (1040 hours annually)

Billing Restrictions: 97151 Behavior Identification Assessment, 97152 Observational F/U assessment, 0362T Exposure Behavioral F/U assessment, 97153 Adaptive Behavior Treatment, 97154 Group Adaptive Behavior Treatment, 97158 Social Skills Group, 0373T Exposure Adaptive Behavior Treatment, 97155 Adaptive Behavior Modification, 97156 Family Adaptive Behavior Treatment Guidance, 97157 Multiple Family, Group Treatment Guidance

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

In Home Therapy (T1027) (Mental Health Support)

Definition

A structured, consistent, strength-based therapeutic relationship between a licensed clinician and a child or youth with ASD or ASD and co-occurring IDD and his or her family for the purpose of treating the child's or youth's behavioral health needs. In-Home Therapy services are provided under a multidisciplinary team model. In Home Therapy also addresses the family's ability to provide effective support for the child or youth and enhances the family's capacity to improve the child's or youth's functioning in the home and community.

Eligible Provider Type:

In Home Therapy services may be performed by a person who possesses any one or more of the following qualifications:

- Professional Autism Services Specialist I (PASS I): (i)An individual licensed in the State of Alabama as a (1) Professional Counselor, Graduate Level Social Worker, Registered Nurse, Marriage and Family Therapist, Clinical Psychologist, Physician; or (ii) An individual who (1) Has a Master's Degree or above from a nationally or regionally accredited university or college in psychology, counseling, social work, or other behavioral health area with requisite course work equivalent to that degree in counseling, psychology, or social work.
- Professional Autism Services Specialist II (PASS II) – An individual who has a Bachelor of Arts or Bachelor of Science in a human service related field from an accredited college or university with a minimum of one-year experience working with individuals with disabilities, families and/or service coordination

Key service functions include the following:

- Psychoeducational Services- PASS I, PASS II
- Individual counseling/therapy- PASS I, PASS II
- Family counseling/therapy- PASS I, PASS II
- Group counseling/therapy- PASS I, PASS II
- Coping Skills Training- PASS I, PASS II
- Assessment- PASS I
- Therapeutic Treatment- PASS I, PASS II
- Crisis Intervention- PASS I, PASS II
- Basic Living Skills- PASS I, PASS II
- Social Skills Therapy- PASS I, PASS II
- Treatment Plan Review- PASS I
- Progress Reporting- PASS I
- Development of Individual Program Plan- PASS I
- Transition Planning- PASS I

Billing Unit: 15 minutes

Maximum Units: 8 units/day; 832 units/year (208 hours annually) 4hrs/week

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Mental Health Care Coordination (H0046)

Definition

Services to assist an identified Medicaid recipient to receive coordinated mental health services from external agencies, providers or independent practitioners.
Key service functions include written or oral interaction in a clinical capacity in order to assist another provider in addressing the specific rehabilitative needs of the recipient, as well as to support continuation of care for the recipient in another setting.

Eligible Provider Type:

- PASS I
- PASS II
- CASS

Billing Unit: 15 minutes

Maximum Units: 24 per day, 312 per year

Additional Information

Acceptable service provision that qualify as Mental Health Care Coordination includes but is not limited to: Telephone or face to face consultation with a contract provider, doctor, therapist, school teacher, school counselor and/or other professional that is working with the child external to your agency regarding the treatment needs of the child.

Inappropriate tasks include: Scheduling/Rescheduling/Canceling appointments, sharing clinical information within your agency/organization, reading reports or case summaries, writing progress notes or reports, receiving information not pertaining to the treatment needs of the child.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). Peer Support (Youth:H0038-HA or HA;HQ Group; Family: H0038-HC or HC:HQ Group)

Definition

Peer Support services provides structured, scheduled activities that promote socialization, self-advocacy, development of natural supports, and maintenance of community living skills, by Certified Peer Specialists. Peer Support service actively engages and empowers an individual and his/her identified supports in leading and directing the design of the service plan and thereby ensures that the plan reflects the needs and preferences of the individual (and family when appropriate) with the goal of active participation in this process. Additionally, this service provides support and coaching interventions to individuals (and family when appropriate) to promote resiliency and healthy lifestyles and to reduce identifiable behavioral health and physical health risks and increase healthy behaviors intended to prevent the onset of disease or lessen the impact of existing chronic health conditions. Peer supports provide effective techniques that focus on the individual's self-management and decision making about healthy choices, which ultimately extend the members' lifespan. Family peer specialists assist children, youth, and families to participate in the wraparound planning process, access services, and navigate complicated adult/child-serving agencies.

Eligible Provider Type:

Family Peer Support services may be performed by a person who possesses the following qualifications:

- A **Parent Autism Peer Support Specialist** provider who is parenting or has parented a child with ASD and can articulate the understanding of his/her experience with another parent or family member. This individual may be a birth parent, adoptive parent, family member standing in for an absent parent, or other person chosen by the family or youth to have the role of parent. This individual has at least a high school diploma or GED, and has satisfactorily completed a Parent Autism Peer Support Provider training program approved by the state. A Parent Autism Peer Support Specialist must be supervised by a Professional Autism Services Specialist I.

Youth Peer Support services may be performed by a person who possesses the following qualifications:

- A **Youth Autism Peer Support Specialist** must be 18 years of age or older and serves children and youth ages 0-21 and uses his/her life experience with ASD and specialized training to promote resiliency. Youth Autism Peer Support service can be provided in an individual, family, or group setting by a Certified Child/Youth Autism Peer Support Specialist. A Child/Youth Peer Support Specialist must be supervised by PASS I. This individual has satisfactorily completed a Youth Autism Peer Support Provider training program approved by the state.

Key service functions include the following:

- Mentoring, advocacy, development of coping/problem solving skills
- Promotion of socialization and development of natural supports
- Engagement of community services

Billing Unit: 15 minutes

Maximum Units: Limited to 20 units per day (individual) and 8 units per day (group). 2,080 units per year for group services and 2,080 units per year for individual services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Psychoeducational Services (H2027– Individual; H2027-HQ – Group)

Definition

Structured, topic specific educational services provided to assist the recipient and the families* of recipients in understanding the nature of the identified behavioral health disorder, symptoms, management of the disorder, how to help the recipient be supported in the community and to identify strategies to support restoration of the recipient to his/her best possible level of functioning.

Key service functions include, as appropriate, but are not limited to education about the following:

- The nature of the disorder
- Expected symptoms
- Ways in which the family member can support individuals with the disorder

Eligible Provider Type:

- PASS I
- PASS II
- CASS

Billing Unit: 15 minutes

Maximum Units: 416 per year (416 units per year for individual and 416 units per year for group)

- 8 units (unit = 15 minutes) per day, individual
- 8 units (unit = 15 minutes) per day, group

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Therapeutic Mentoring (H2014– Individual; H2014-HQ – Group)

Definition

Therapeutic Mentoring Services provide a structured one on one intervention to a child or youth and their families that is designed to ameliorate behavioral health-related conditions that prevent age-appropriate social functioning. This service includes supporting and preparing the child or youth in age-appropriate behaviors by restoring daily living, social and communication skills that have been adversely impacted by a behavioral health condition. These services must be delivered according to an individualized treatment plan and progress towards meeting the identified goals must be monitored and communicated regularly to the PASS I so that the treatment plan can be modified as necessary. Therapeutic mentoring may take place in a variety of settings including the home, school or other community settings. The therapeutic mentor does not provide social, educational, recreational or vocational services.

Key service functions include the following:

- Basic Living Skills
- Social Skills Training
- Coping Skills Training
- Assessment
- Plan Review
- Progress Reporting
- Transition Planning

Eligible Provider Type

- PASS I
- PASS II
- CASS

Billing Unit: 15 minutes

Maximum Units: 416 per year (416 units per year for individual and 416 units per year for group)

- 8 units (unit = 15 minutes) per day, individual
- 8 units (unit = 15 minutes) per day, group

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

110.2.2 Reimbursement

The Medicaid reimbursement for each service provided by an Autism Rehabilitative Services provider is based on the following criteria and does not exceed the lowest of the following amounts:

- The fee schedule established by Medicaid as the maximum allowable amount
- Actual reimbursement is based on the rate in effect on the date of service. Only those services that qualify for reimbursement are covered under this program.

110.2.3 Requirements for Recipient Intake, Treatment Planning, and Service Documentation

Once a recipient is determined eligible for Rehabilitative Autism Services, the Intensive Care Coordinator will refer the client to appropriate Rehabilitative Autism Services.

Documentation in the recipient's record for each session, service, or activity for which Medicaid reimbursement is requested must comply with any applicable certification or licensure standards and must include the following, at a minimum:

- The identification of the specific services rendered
- The date and the amount of time that the services were rendered (to include the time started and the time ended)
- The signature of the staff person who rendered the services
- The identification of the setting in which the services were rendered
- A written assessment of the recipient's progress, or lack thereof, related to each of the identified clinical issues discussed.

All entries must be legible and complete and must be signed and dated by the person (identified by name **and** discipline) who is responsible for providing the service. The author of each entry must be identified and must sign his or her entry.

Documentation of Medicaid recipients' signatures may be entered on a sign-in log, service receipt, or any other record that can be used to indicate the recipient's signature and the date of service. The recipient's signature is only required one time per day that services are provided. Any non-face-to-face services that can be provided by telephone do not require recipient signatures.

When clinical records are audited, Medicaid will apply the list of required documentation to justify payment. Documentation failing to meet the minimum standards noted above will result in recoupment of payments.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Additional Information

Documentation

Documentation should not be repetitive (examples include, but are not limited to the following scenarios):

- Progress Notes that look the same for other recipients.
- Progress notes that state the same words day after day with no evidence of progression, maintenance or regression.
- Treatment Plans that look the same for other recipients.
- Treatment Plans with goals and interventions that stay the same and have no progression.

Progress Notes

- Progress Notes should not be ***preprinted*** or predated with the exception that a group therapy note may have a general section that identifies the participants (i.e. the number of participants, etc.), the topic, and a general description of the session which is copied for each participant. However, each participant must also have individualized documentation relative to his/her specific interaction in the group and how it relates to their treatment plan.
- The progress note should match the goals on the plan and the plan should match the needs of the recipient. The interventions should be appropriate to meet the goals. There should be clear continuity between the documentation.
- Progress Notes must provide enough detail and explanation to justify the amount of billing.

Treatment Plan

- The Treatment Plan should not be signed or dated prior to the plan meeting date.

Authentication

- Authors must always compose and sign their own entries (whether handwritten or electronic). An author should never create an entry or sign an entry for someone else or have someone else formulate or sign an entry for them. If utilizing a computer entry system, the program must contain an attestation signature line and time/date entry stamp.
    - If utilizing a computer entry system, there must be a written policy for documentation method in case of computer failure/power outage.

Corrections

- Corrections must be made legally and properly by drawing a line through the entry and making sure that the inaccurate information is still legible. Write “error” by the incorrect entry and initial. Do not obliterate or otherwise alter the original entry by blacking out with marker, using whiteout, or writing over an entry. White Out, Liquid Paper, or any form of correctional fluid or correctional tape is not acceptable on **any** records whether being used as a corrective measure or to individualize an original template or for any other reason.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

110.2.4 Requirements for Supervision/Monitoring and Complaint Procedure for Unlicensed Providers Supervision/Monitoring

In order to regulate the quality of services performed by unlicensed allied mental health providers, all behavioral health services rendered by non-licensed individuals are required to be authorized by and performed under the supervision of a qualified supervisor as determined by ADMH. ADMH must abide by their policy/guidelines that have been developed outlining supervision of unlicensed allied mental health providers who provide ASD Rehabilitative Services.

NOTE: The permitting of unlicensed allied mental health professionals to provide services does not authorize a party to hold themselves out as a licensed professional or as titled professional for which a license is required.

Complaints

Complaints received to the Alabama Medicaid Agency against unlicensed providers will be forwarded to the Alabama Department of Mental Health – Office of Autism Services for investigation. DMH must abide by their policy/guidelines that have been developed outlining complaint investigation procedure and submit a report of findings and actions taken (if any) to the Alabama Medicaid Agency. The Alabama Medicaid Agency may also conduct an investigation in reference to received complaint.

110.2.5 Requirements for Telemedicine Billing

Refer to Chapter 112, Telemedicine Services, for general benefit information and limitations.

110.3 Prior Authorization and Referral Requirements

Rehabilitative services procedure codes generally do not require prior authorization (PA), except for circumstances when a Rehab Option provider determines that it is medically necessary to provide treatment services that goes beyond the indicated service limits for a recipient eligible under EPSDT (under age 21). Medical necessity will be established from the recipient's condition at the time of the request, not the diagnosis alone.

Approval is required if number of service hours will be exceeded for a particular service. All prior approvals of additional Autism Services units require approval from the *Regional Autism Coordinator*. All requests must be received at least **10 days** prior to the anticipated date of need. All approvals for additional units are based on the individual's needs and extraordinary circumstances.

To request additional units, the provider must complete the "Request for Additional Hours" form and submit for review by Intensive Care Coordinator (ICC). The ICC will determine need and approve if appropriate. The client/family should be made aware of request. The ICC should then send to the Regional Autism Coordinator for approval of increase. The Regional Autism Coordinator will determine need and approve if appropriate. The ICC will then be responsible of updating authorization in Therap.

To access the "Request for Additional Hours" form, refer to the ADMH Autism Services website at https://mh.alabama.gov/autism-services/.

Rehabilitative services do not require an ACHN referral.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

110.4 Cost Sharing (Copayment)

Copayment does not apply to rehabilitative services.

110.5 Completing the Claim Form

110.5.1 Time Limit for Filing Claims

Medicaid requires all claims for rehabilitative services to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions for more information regarding timely filing limits and exceptions.

110.5.2 Diagnosis Codes

The International Classification of Diseases - 10th Revision - Clinical Modification (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

110.5.3 Procedure Codes and Modifiers

The (837) Professional and Institutional electronic claims and the paper claim have been modified to accept up to four Procedure Code Modifiers. Use the modifiers to distinguish ASD services and individual/group services.

Modifier 59 (Distinct Procedural Service)

Under certain circumstances eligible DMH ASD staff may need to indicate that a procedure or service was distinct or independent from other services performed on the same day. Modifier 59 is used to identify procedures/services that are not normally reported together, but are appropriate under the circumstances. This may represent a different session or patient encounter, not ordinarily encountered or performed on the same day by the same eligible DMH ASD staff. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used.

According to the CPT book, modifier 59 is described as being necessary to describe a distinct procedural service. This modifier should only be used to show a distinct procedural service when a comprehensive/component coding pair is billed. Modifier 59 should not be billed to represent that multiple services of the same procedure code were performed.

A comprehensive/coding pair occurs when one code is considered a component procedure and the other code is considered a comprehensive procedure. These code pairs are frequently referred to as bundled codes thus meaning the component code is usually considered an integral part of the comprehensive code. Therefore, in most instances the most comprehensive code only should be billed and the component code should be denied as re-bundled or mutually exclusive. Modifier 59 should only be used in conjunction with a comprehensive/ coding pair procedure when appropriately unbundling the code pair. This modifier 59 should not be billed with the comprehensive code. The component code can be unbundled or allowed separately, in certain situations. If the two services are performed at two different times of day, then modifier 59 can be submitted with the component procedure code.

In order to communicate the special circumstances of the component/ comprehensive code pair unbundling, diagnoses codes must be utilized as appropriate on the claim form. In some cases, it

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

may be necessary to attach a detailed explanation of services rendered to further explain the reason for the unbundling of code pairs.

CMS publishes the National Correct Coding Initiative Coding Policy Manual for Medicare and Medicaid Services (https://www.medicaid.gov/medicaid/program-integrity/national-correct-coding-initiative-medicaid/index.html) and this may be used as a reference for claims-processing edits. The manual is updated annually, and the NCCI edits are updated quarterly. It is the responsibility of the provider to check the site quarterly for any billing related updates.

110.5.4 Place of Service Codes

The following place of service codes apply when filing claims for rehabilitative services:

POS Code	Description
11	Office
12	Home
99	Other Unlisted Facility

***Must document in progress/treatment notes where the POS 99 service occurred.

110.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims With Third Party Denials

Refer to Section 5.8, Required Attachments, for more information on attachments.

110.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

111

111 Remote Patient Monitoring (RPM)

Remote Patient Monitoring (RPM), also known as In-home Remote Patient Monitoring, is a program that allows medical providers to monitor and manage acute and chronic health conditions while the patient is home. The goal of the program is to decrease exacerbation episodes, emergent care visits, hospital admissions, and medical costs and increase self-management of the disease/chronic condition.

Services rendered by non-physician practitioners, i.e., physician assistants, certified registered nurse practitioner, etc., must adhere to applicable guidelines, policies, and procedures. Refer to Administrative Code chapters 6: Physicians and 49: Certified Register Nurse Practitioner (CRNP) for additional information.

111.1 Provider Enrollment

Medicaid's fiscal agent enrolls providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the State of Alabama, the Code of Federal Regulations, the Alabama Medicaid Agency Administrative Code, and the Alabama Medicaid Provider Manual.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will receive a notification when it is time to re-validate. Failure to re-validate and provide appropriate documentation to complete the enrollment process will result in an end-date being placed on the provider file. A new enrollment application must be submitted once a provider file has been closed due to failure to timely re-validate.

111.1.1 *National Provider Identifier, Type, and Specialty*

A provider who contracts with Medicaid as an RPM provider is added to the Medicaid system with the National Provider Identifiers provided to the Agency at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for RPM-related claims.

NOTE:
The 10-digit NPI is required when filing a claim

Remote Patient Monitoring providers are assigned a provider type of 08 (Remote Patient Monitoring) and provider specialty 085 or 086.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

111.1.2 *Enrollment Policy for RPM Providers*

Any provider that can and is willing to pay the Alabama State Share may enroll as an RPM provider. A Memorandum of Understand (MOU) must be executed between the Medicaid Agency and the RPM provider. The MOU will outline the financial and medical responsibilities for the Medicaid Agency and the RPM provider.

Requirements include but not limited:

- Ability to provide services statewide.
- Meet appropriate clinical staffing requirements.
- Provides and allows the recipients to keep user friendly, interactive audio and video technology monitoring equipment.
- Accepts electronic submissions of referrals.
- Provide in-home initial and in-home annual assessments.
- Transmits recipient data automatically in real time (a Medicare requirement).
- Reviews, intervenes, and reports on the data promptly.
- Provides 24-hour-a-day, 7-day-a-week (24/7) access to physicians or other qualified health care professionals or clinical staff, to address urgent needs of recipients.
- Develops, monitors and updates a patient-centered care plan
- Ongoing, compliance monitoring.
- Program graduation, when appropriate.

Deleted: ~~s an~~
Added: and in-home annual

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will receive a notification when it is time to re-validate. Failure to re-validate and provide appropriate documentation to complete the enrollment process will result in an end-date being placed on the provider file. A new enrollment application must be submitted once a provider file has been closed due to failure to timely re-validate.

111.1.3 *Provider Termination and/or Change of Ownership*

Medicaid may terminate the RPM provider's participation in the Medicaid program if the provider is participating in cases involving fraud or willful or grossly negligent non-compliance with all applicable program, State and federal guidelines.

Medicaid must be notified in writing within thirty (30) days of the date of an owner and/or name change. The existing contract will be terminated, and a new contract must be signed to continue participation in the Medicaid program.

Please refer to the executed MOU for specific information regarding the termination or expiration of the MOU between the Medicaid Agency and the provider.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

111.2 Benefits and Limitations

Remote Patient Monitoring (RPM) services are available to Medicaid eligible persons with a need for daily monitoring and with a diagnosis of one or more of the following conditions:

- Diabetes
- Gestational Diabetes (effective 10/1/2022)
- Hypertension
- Congestive Heart Failure
- Pediatric Asthma (effective 10/1/2022)

Enrollment orders must be obtained from the recipient's primary care physician (PCP). Enrollment orders are required prior to the start of rendering RPM service. Orders for RPM, along with the specific parameters for daily monitoring, must be obtained from the patient's PCP prior to evaluation and admission. The order must be documented in the medical record. Orders must be signed and dated by the ordering practitioner and must be obtained annually.

Deleted: ~~An order~~
Added: Enrollment orders must be obtained
Deleted: ~~is~~
Added: Enrollment orders are

Referrals for RPM may be accepted from any source, including physicians, ACHN Care Coordinators, patient or caregiver, the Health Department, hospitals, home health agencies, or community-based organizations.

Annual orders and any other orders can be obtained from an independent nurse practitioner (CRNP) or physician assistant (PA) if they are linked under an active billing group and if they are Medicaid Certified practitioners. Orders can also be obtained from Certified Nurse Practitioners (CRNPs) and Physician Assistants (PAs) if they are part of the primary care provider's healthcare group.

Added: Annual orders and…provider's healthcare group.

A practitioner must obtain patient consent before furnishing or billing RPM services. Consent may be verbal or written but must be documented in the medical record, and includes informing them about:

- The availability of RPM services and applicable cost sharing
- That only one practitioner can furnish and be paid for RPM services during a calendar month
- The right to stop RPM services at any time (effective at the end of the calendar month)

Informed patient consent by the recipient or caregiver, when appropriate, must be obtained prior to rendering RPM services or if the patient chooses to change the practitioner who will render the services.

111.2.1 *Benefits*

Benefits for the RPM program include:

- improved health outcomes for eligible Medicaid recipients
- increased collaboration between PCP and patient/care giver
- teaches the patient and/or care giver self-management of the disease/chronic condition
- reduces hospital admissions and emergency department visits for recipients with identified chronic conditions/diagnoses
- health care monitoring provided in-home that reduces travel and in-person office visits

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

RPM services include, but are not limited to:

Added: and Annual

- Initial and Annual home assessments for RPM
- Initial setup of RPM equipment
- Instructions and education about the use of monitoring devices
- Instructing the patient/care giver on data entry
- Instructing patient on optimum symptom control
- Direct patient contact, when necessary and as indicated
- Evaluate threshold violations
- Monitoring and follow up
- Diet/nutrition education
- Needs assessing/screening
- Making referrals for care when appropriate

RPM providers must also develop a process for addressing patient noncompliance. This process should include the expected actions of the patient and the RPM provider related to initial and on-going noncompliance issues. Noncompliance and the specified actions must be documented in the patient's chart.

111.2.2 *Limitations*

Medicaid will not separately reimburse for any direct care services, such as wound care, rendered by RPM providers. RPM services are restricted to the medical diagnosis outlined in section 111.2.

111.3 Documentation Requirements

The RPM provider must maintain complete and accurate medical, case management, and fiscal records that fully disclose the extent of the services provided. All documentation must be legible, signed and dated by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. Additionally, the author of each entry must sign his or her entry, either handwritten or electronic. A stamped signature is not acceptable. (Signatures must be in compliance with details specified in Administrative Code Rule No. 560-X-1-.18 Provider and Recipient Signature Requirements.)

RPM records must contain documentation of:

a) Name and date of birth of recipient,
b) recipient Medicaid ID,
c) dates of services,
d) initial and annual assessments,

Added: and annual

e) initial physician's order and any changes to the physician's order, (All provider's orders must be signed and dated by a licensed nurse)
f) physician order renewals, (All provider's orders must be signed and dated by a licensed nurse)
g) recipient consent for services,
h) diagnoses from qualified Medical Professional,
i) medical history and physical,
j) threshold violations,
k) name of RPM provider and person providing services,
l) nature, start and end time, extent or units of services provided, and

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

m) a written assessment of the client's progress. (documented in the patient's chart at least monthly until discharge),
n) Initial home assessment for RPM,
o) Initial setup of RPM equipment,
p) Instructions and education on the use of monitoring devices,
q) Instructing the patient/ caregiver on data entry,
r) Instructing the patient on optimum symptom control,

Documentation must also include supervision of staff as required by licensing boards and applicable state and federal guidelines.

LPN observation by an RN or RN Supervisor

The RN must review all physician orders that are received by an LPN. The RN or RN supervisor must review the orders for accuracy and completion. After the RN has reviewed the Physician's orders, the RN must sign and date the orders. The RN must document in the patient's chart that the orders were reviewed, are accurate, and complete.

The RN or the RN supervisor must review the patient's chart for documentation completed by an LPN at least monthly. The RN or RN supervisor must document in the patients' chart that the LPN's documentation was reviewed.

The RPM provider must make available to Medicaid, at no charge, all information describing services provided to eligible recipients. The provider must also permit access to all records and facilities for the purpose of claims audit, program monitoring, and utilization review by duly authorized representatives of Federal and State agencies.

111.3.1 *Program Evaluation Report*

Program evaluation reports are required at least annually unless otherwise specified. The purpose of the report is to conduct a retrospective review, per calendar year, of relevant patient data and Medicaid claims to evaluate the efficiency of the RPM program. Specifics to be included in the report must include at least the following:

- Patient enrollments and re-enrollments
- Length of time patient enrolled in RPM program
- Number of deceased patients
- Improved patient compliance
- Patient graduation/program completion stats
- Reduced hospital admissions
    - Number of visits
    - Length of stay
    - Average length of stay
    - Total cost
    - Average cost
    - Percent changes
- Reduced emergency department visits
    - Number of visits
    - Average visits
    - Percent changes
- Pharmacy cost impact
- Reduced overall health costs

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

111.4 Reimbursement

1. Remote Patient Monitoring (RPM) provider may submit a claim to Medicaid once each month

   NOTE: Claims paid in error will be subject to recoupment.

2. The RPM provider agrees to accept payment in full as the amount paid for covered RPM services.

111.4.1 *Completing the Claim Form*

To enhance the effectiveness and efficiency of Medicaid processing, providers are encouraged to bill Medicaid claims electronically.

RPM providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

111.4.2 *Procedure Codes, Modifiers, and Diagnosis Codes*

Billing Instructions: RPM provider bills on a UB-04 claim form using the following procedure codes, modifiers, and diagnosis codes:

- Revenue Code: 789
- Procedure Code: G9008-U4 (Nurse Case Management)
- Procedure Code: S9110- U8 (Telemonitoring Equipment)

Effective 1/1/24, at least one of the following diagnoses must be submitted on the RPM claim:

- Hypertension Code
- Diabetes-DM-1 Code
- Diabetes-DM-2 Code
- Gestational Diabetes Code
- Congestive Heart Failure Code
- Pediatric Asthma Code

Billing Units: 5 minutes equals one unit

111.4.3 *Cost Sharing (Copayment)*

Copayment does not apply to services provided by RPM providers.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

111.4.4 *Time Limit for Filing Claims*

Medicaid requires all claims for RPM services to be filed within one year of the date of service. Refer to Chapter 5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

112

112 Telemedicine Services

This general information is related to the telehealth medical services rendered by Alabama Medicaid (Medicaid) providers. Providers are expected to comply with Alabama's Telehealth Medical Services law (Code of Alabama, Sections 34-24-701 through 34-24-707) at all times.

112.1 Enrollment

Alabama Medicaid's fiscal agent enrolls providers and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Agency Administrative Code*, and the *Alabama Medicaid Provider Manual*.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as an enrolled provider is added to the Alabama Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements.

NOTE:
The 10-digit NPI is required when filing a claim.

Providers must submit the Telemedicine Service Agreement/Certification to Medicaid's fiscal agent. The form is located on the Medicaid website at: www.medicaid.alabama.gov. Once the form is received, providers will be enrolled with Medicaid with a specialty type of 931 (Telemedicine Service). Providers must have the specialty type of 931 to bill for telemedicine services.

Provider Types Eligible for Reimbursement for Telemedicine Services

- Physicians
- Certified Registered Nurse Practitioners (CRNPs)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Physician Assistants
- Rehabilitative Option Providers
- Psychologists
- Licensed Professional Counselors
- Associate Licensed Counselors
- Licensed Marriage and Family Therapist and Associates
- Licensed Master Social Workers
- Licensed Independent Clinical Social Workers
- Licensed Psychological Technicians
- Speech Therapists
- Optometrists
- Applied Behavior Analysts
- Early Intervention
- Children's Rehabilitation Service
- Pharmacists/Pharmacies
- Targeted Case Management

Provider Types Not Eligible for Reimbursement for Telemedicine Services

- Physical Therapists
- Occupational Therapists
- DME suppliers
- Ambulance providers
- Chiropractors
- Home Infusion
- Laboratory

General Enrollment Policy for Telemedicine Services Providers

Refer to the respective Alabama Medicaid Provider Billing Manual chapter that describes the service rendered by providers listed above for general enrollment information.

112.2 Benefits and Limitations

This section describes telemedicine provider requirements. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

Definitions

As found in Alabama law the following definitions apply to Medicaid's telemedicine policy:

Telehealth medical services means "digital health, telehealth, telemedicine, and the applicable technologies and devices used in the delivery of telehealth.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The term does not include incidental communications between a patient and a physician.

- Digital Health is defined as “the delivery of health care services, patient education communications, or public health information via software applications, consumer devices, or other digital media.”
- Telehealth is defined as “the use of electronic and telecommunications technologies, including devices used for digital health, asynchronous and synchronous communications, or other methods, to support a range of medical care and public health services.”
- Telemedicine is defined as “a form of telehealth referring to the provision of medical services by a physician at a distant site to a patient at an originating site via asynchronous or synchronous communications, or other devices that may adequately facilitate and support the appropriate delivery of care. The term includes digital health but does not include incidental communications between a patient and a physician.”

The term irregular or infrequent services refers to “telehealth medical services” occurring less than 10 days in a calendar year or involving fewer than 10 patients in a calendar year.

Synchronous is defined as “the real-time exchange of medical information or provision of care between a patient and a physician via audio/visual technologies, audio-only technologies, or other means.”

Telemedicine Provider Requirements

Providers must identify themselves to the recipient with their credentials and name at the time of service.

Providers must obtain prior written or verbal consent from the recipient before services are rendered.

Telemedicine services may only be provided as a result of a patient’s request, part of an expected follow up, or a referral from the patient’s licensed physician with whom the patient has an established patient-physician relationship.

Services rendered via telecommunication system must be provided by a provider who is licensed, registered, or otherwise authorized to engage in his or her healthcare profession in the state where the patient is located. Per Alabama law, the provision of telemedicine medical services is deemed to occur at the patient’s originating site within this state.

Services must be within the provider’s scope of license.

Services must be provided to a recipient that is an established patient of the provider or practice or due to a referral made by a patient’s licensed physician with whom the patient has an established physician-patient relationship, in the usual course of treatment of the patient’s existing health condition.

Telemedicine services provided to minors under the age of medical consent must have a parent or legal guardian attend the telemedicine visit.

Only the provider rendering the services via telemedicine may submit for reimbursement for services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Providers must indicate an in-state or qualifying bordering state site of practice address from which telemedicine services will be provided.

NOTE:

This policy does not expand or grant any authority outside that authority granted to the provider by their respective licensure board or by federal or state law.

Delivery Requirements of Telemedicine Services

Services must be administered via an interactive audio or audio and video telecommunications system which permits two-way communication between the distant site provider and the site where the recipient is located (this does not include electronic mail message or facsimile transmission between the provider and recipient).

Telemedicine health care providers shall ensure that the telecommunication technology and equipment used is sufficient to allow the health care provider to appropriately evaluate, diagnose, and/or treat the recipient for services billed to Medicaid and is HIPAA compliant.

Transmissions must utilize an acceptable method of encryption adequate to protect the confidentiality and integrity of the transmission information. Transmissions must employ acceptable authentication and identification procedures by both the sender and the receiver.

The provider shall implement confidentiality protocols that include, but are not limited to:

a. specifying the individuals who have access to electronic records;

b. usage of unique passwords or identifiers for each employee or other person with access to the client records;

c. ensuring a system to prevent unauthorized access, particularly via the internet; and

d. ensuring a system to routinely track and permanently record access to such electronic medical information.

These protocols and guidelines must be available for inspection at the telemedicine site and to Medicaid upon request.

NOTE:

A covered telemedicine service will count towards each recipient's benefit limit of 14 annual physician office visits.

Documentation of Services Delivered via Telemedicine

Providers shall document in the medical record detailed information of the telemedicine visits including, but not limited to:

- Identification of the patient.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Identification of parent or legal guardian attending the telemedicine visit if recipient is under the age of medical consent.
- Physical location of the patient, including the city and state.
- The medical record documentation must accurately reflect the services rendered and the level of medical decision making to substantiate the procedure code billed.
- The same “in” and “out” documentation is required for telemedicine as is required for current services with incremental timeframes provided in person.
- Identification of the provider including credentials.
- Patient’s consent for the use of telemedicine delivery of health care services. This consent must be documented in the recipient’s medical record.
- Condition for which the care is being provided.
- Medical necessity and appropriateness of services billed.
- Follow up care needed.
- Other relevant details of the visit, to include BMI recording, when applicable.

Origination Sites

The following are required for the origination site where the patient is located:

- The site provider shall ensure that the telecommunication technology and equipment used at the origination site is HIPAA compliant and is sufficient to allow the appropriate evaluation, diagnosis, and/or treatment of the patient.
- The site provider shall implement protocols that ensure the same confidentiality of the telemedicine visit as for in-person visits.
- Regardless of the location of the recipient, it is the provider’s responsibility to ensure the telemedicine visit meets all required HIPAA rules and regulations regarding telemedicine visits.
- The following sites are recognized by Medicaid as origination sites:
  - Physician and practitioner offices
  - Hospitals
  - Rural Health Clinics (RHCs)
  - Federally Qualified Health Centers (FQHCs)
  - Hospital-based or CAH-based Renal Dialysis Centers (including satellites)
  - Skilled Nursing Facilities (SNFs)
  - Community Mental Health Centers (CMHCs)
  - Renal Dialysis Facilities
  - Mobile Stroke Units
  - Alabama Department of Public Health

Telemedicine services can be rendered to a recipient in their home. However, a recipient’s home should not be considered an origination site entitled to receive an origination site fee.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

If a Medicaid-enrolled provider performs another medically necessary service(s), the provider may bill for the covered service(s) in addition to providing his/her facility as an origination site and be eligible for reimbursement for the origination site facility fee and the other medically necessary service(s).

Prescribing of Medications and Controlled Substances via Telemedicine

In accordance with Alabama's Telemedicine Law, an enrolled provider may prescribe a legend drug, medical supplies, or a controlled substance via telemedicine if the prescriber is authorized to do so under state and federal law. However, a prescription for a controlled substance may only be issued via telemedicine if:

- The telemedicine visit includes synchronous audio or audio-visual communication using HIPAA compliant equipment with the prescriber;
- The prescriber has had at least one in-person encounter with the patient within the preceding 12 months; and
- The prescriber has established a legitimate medical purpose for issuing the prescription within the preceding 12 months.

BMI Requirements

The BMI will be required for office visits including the telemedicine visits. The BMI is required at least once per calendar year on all claims with procedure codes 99202-99205, 99211- 99215, and 99242-99245 and EPSDT procedure codes 99382-99385 and 99392-99395. Providers should use subjective data to calculate the BMI which can include providers asking the recipient for his or her height and weight during the telemedicine visit. The BMI should be calculated, based on the information provided by the recipient, and appended to the claim for reimbursement. The BMI should also be documented in the recipient's medical record.

Remote Patient Monitoring

For information related to Remote Patient Monitoring, please refer to Chapter 111 - Remote Patient Monitoring (RPM) of the Provider Billing Manual.

112.3 Prior Authorization and Referral Requirements

Prior authorization is not required for services to be delivered via telemedicine, though prior authorization may be required for the individual procedure codes billed. Refer to the Provider Billing Manual chapter that describes the service provided for prior authorization requirements.

Refer to Appendix A and the respective Alabama Medicaid Provider Billing Manual chapter that describes the service provided for information about Early and Periodic Screening, Diagnostic, and Testing (EPSDT) referrals.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

112.4 Cost Sharing (Copayment)

The copayment amount for office visit* including crossovers is:

$3.90 for procedure codes reimbursed $50.01 and greater
$2.60 for procedure codes reimbursed between $25.01 and $50.00
$1.30 for procedure codes reimbursed between $10.01 and $25.00

* The following CPT codes are considered office visits and the copayment is based on Medicaid's allowed amount (fee schedule) for each procedure:

99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99242, 99243, 99244, 99245

Copayment does not apply to services provided for pregnant women, nursing home residents, recipients less than 18 years of age, emergencies, and family planning. Native American Indians that present an "active user letter" issued by Indian Health Services (IHS) will be exempt from the Medicaid required copayment.

The provider may not deny services to any eligible Medicaid recipient because of the recipient's inability to pay the cost-sharing (copayment) amount imposed.

112.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

Refer to the respective Alabama Medicaid Provider Billing Manual chapter that describes the service provided for general information on completing the appropriate claim form.

This section describes telemedicine services information. Providers should refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

112.5.1 Time Limit for Filing Claims

Medicaid requires all claims for providers to be filed within one year of the date of service. Refer to Chapter 5 for more information regarding timely filing limits and exceptions.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

112.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885 or 1-800-621-8335.

Refer to the respective Alabama Medicaid Provider Billing Manual chapter that describes the service provided by providers listed in Section 112.1 for general information for billing appropriate diagnosis codes with procedure codes and modifiers listed in Section 112.5.3.

112.5.3 Procedure Codes and Modifiers

Procedure Codes

Procedure codes listed below are reimbursable services when delivered via telemedicine by a provider type listed in Section 112.1. The procedure codes (and applicable modifiers) are listed below by provider type or services. For further detailed information, refer to the below referenced chapters of the Provider Billing Manual.

Eye Care – Chapter 15

- Office visit codes for established patients: CPT 99211-99215

CRNPs/PAs Services– Chapter 21

- Office or other outpatient visits for recipients ages 21 and older: CPT 99202-99205, 99211-99215
- **Office or other outpatient visits for recipients ages 0-20 billed as an EPSDT referred service: CPT 99211-99215
- **EPSDT interperiodic screenings for recipients ages 0-20: CPT 99211-EP-99215-EP
- Initial hospital inpatient or observation care: CPT 99221-99223
- Subsequent hospital inpatient or observation care: CPT 99231-99233
- Hospital inpatient or observation care: CPT 99234-99236
- Hospital inpatient or observation discharge day management: CPT 99238-99239
- Office or other outpatient consultation: CPT 99242-99245
- Inpatient or observation consultation: CPT 99252-99255
- Psychiatric diagnostic testing: CPT 90791
- Psychiatric diagnostic testing with medical services: CPT 90792

***Refer to Appendix A – Well Child Visit (EPSDT) for information on billing. Claims not billed for telemedicine services in compliance with policy may be subject to recoupment.*

Physician Services – Chapter 28

- Office or other outpatient visits for recipients ages 21 and older: CPT 99202-99205, 99211-99215
- **Office or other outpatient visits for recipients ages 0-20 billed as an EPSDT referred service: CPT 99211-99215
- **EPSDT interperiodic screenings for recipients ages 0-20: CPT 99211-EP – 99215-EP
- Initial hospital inpatient or observation care: CPT 99221-99223

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Subsequent hospital inpatient or observation care: CPT 99231-99233
- Hospital inpatient or observation care: CPT 99234-99236
- Hospital inpatient or observation discharge day management: CPT 99238-99239
- Office or other outpatient consultation: CPT 99242-99245
- Inpatient or observation consultation: CPT 99252-99255
- Psychiatric diagnostic testing: CPT 90791
- Psychiatric diagnostic testing with medical services: CPT 90792

***Refer to Appendix A – Well Child Visit (EPSDT) for information on billing. Claims not billed for telemedicine services in compliance with policy may be subject to recoupment.*

Behavioral Health – Chapter 34

- Psychotherapy:
  - *90832, 90834, 90837, 90846, 90847 and
  - *H2011 [psychologist only]

*** denotes service must be done with both audio and visual (GT modifier)**

Applied Behavioral Analysis Therapy – Chapter 37

- Behavior Identification Assessment: CPT 97151
- Observational F/U assessment: CPT 97152
- Exposure Behavioral F/U Assessment: HCPCS 0362T
- Adaptive Behavior Treatment: CPT 97153
- Group Adaptive Behavior Treatment: CPT 97153
- Social Skills Group: CPT 97154
- Exposure Adaptive Behavior Treatment: HCPCS 0373T
- Adaptive Behavior Modification: CPT 97155
- Family Adaptive Behavior Treatment Guidance: CPT 97156
- Multiple Family, Group Treatment Guidance: CPT 97157

Speech Therapy – Chapter 37

- Treatment of speech: 92507, 92508
- Evaluation of speech sound production: CPT 92523

Children's Rehabilitation Service – Chapter 100

- Office visits: 99202-HT, 99203-HT, 99204-HT, 99205-HT, 99212-HT, 99213-HT, 99214-HT, 99215-HT

Rehabilitative Option Services– Chapter 105

- Psychiatric evaluation: 90791, 96130, 96131
- *Psychotherapy: 90832, 90834, 90837, 90846, 90847, 90853, 90849
- *Psychological testing: 96136, 96137, 96138, 96139, 96146
- *Assessments: H0002, H0004, H0031-HF
- Medication Monitoring: H0034
- Peer support services: H0038 (with appropriate modifiers)
- Crisis intervention: H2011
- *Treatment plan review: H0032
- Mental health care coordination: H0046
- Assertive Community Treatment (ACT) H0040-HE (Psychiatrist only)
- *Behavioral Health Placement Assessment H0002-HE
- Psychoeducational Services H2027- HE
- Nursing Assessment and Care T1001

Modifiers

Providers meeting the telemedicine provider requirements listed above must append one of the following modifiers indicating the mode of telemedicine service delivery:

- GT for covered telemedicine services delivered via audio and visual telecommunications.
- FQ for covered telemedicine services delivered via audio only telecommunications.

Additional modifiers may be required. Refer to the chapter of the Provider Billing Manual that describes services provided for further information.

Reimbursement for services provided via telemedicine, audio only and audio and video telecommunications, will be paid at parity to those services provided face-to-face. Medicaid will continue to monitor and reevaluate, if deemed necessary.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Billing the Telemedicine Origination Site Facility Fee

Effective April 1, 2020, Medicaid pays an origination site facility fee of $20.00. The origination fee will be limited to one per date of service per recipient and may be billed by all of the providers listed above under Origination Sites (Section 112.2).

No origination site facility fee will be paid for an origination site not listed above. To receive the origination site facility fee, the following must be included on a CMS-1500 or UB-04 claim:

	Procedure Code
Providers	Q3014
Federally Qualified Health Centers and Rural Health Clinics	Q3014 (independent of the encounter rate)

NOTE:

If a Medicaid-enrolled provider performs another medically necessary service(s), the provider may bill for the covered service(s) in addition to providing his/her facility as an origination site and be eligible for reimbursement for the origination site facility fee and the other medically necessary service(s).

A recipient's home should not be considered an origination site entitled to receive an origination site fee.

Services not Eligible for Reimbursement for Telemedicine Services

Common examples of services via telemedicine not considered for reimbursement (not exhaustive):

- Chart reviews
- Electronic mail messages (between providers and recipients)
- Facsimile transmissions (between providers and recipients)
- Consultation between two providers
- Internet based communications that are not HIPAA-compliant or secure
- Services not directly provided by an enrolled provider or by office staff
- Services not normally charged for during an office visit
- Services not specifically listed in Provider Billing Manual chapters
- Communication that is not secure or HIPAA-compliant (e.g., Skype, FaceTime)

Exceptions may be made to the lists for providers and services not reimbursable under this policy in the event of a public health emergency, however, separate guidance would be issued in those instances.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

If a Medicaid-enrolled provider performs another medically necessary service(s), the provider may bill for the covered service(s) in addition to providing his/her facility as an origination site and be eligible for reimbursement for the origination site facility fee and the other medically necessary service(s).

112.5.4 Place of Service Codes

Refer to the respective Alabama Medicaid Provider Billing Manual chapter that describes the service provided for general information on completing the appropriate claim form.

112.5.5 Required Attachments

To enhance the effectiveness and efficiency of Medicaid processing, your attachments should be limited to the following circumstances:

- Claims with Third Party Denials

NOTE:

When an attachment is required, a hard copy CMS-1500 claim form must be submitted.

Refer to Chapter 5 Required Attachments, for more information on attachments.

112.6 For More Information

This section contains a cross-reference to other relevant sections in the manual.

A Well Child Visit (EPSDT)

The purpose of EPSDT services is:

- To actively seek out all eligible families and educate them on the benefits of preventive health care
- To help recipients effectively use health resources and encourage them to participate in the screening program at regular intervals
- To provide for the detection of any physical and mental problems in children and youth as early as possible through comprehensive medical screenings in accordance with program standards
- To provide for appropriate and timely services to correct or ameliorate any acute or chronic conditions

This appendix offers information about the EPSDT program. It consists of the following sections:

Section	***Contents***
Understanding EPSDT	Provides an overview of EPSDT, including descriptions of screening types and services offered under EPSDT
Performing Screenings	Provides information on becoming an EPSDT screening provider, verifying recipient eligibility, critical components of screenings, and how to submit claims for EPSDT screenings
Providing and Obtaining Referrals	Describes the process for providing referrals to specialists and obtaining referrals from screening providers.
Coordinating Care	Describes the administrative requirements of the EPSDT program, including consent forms and retention of medical records.
Off-site Screenings	Provides an overview of the off-site screening program, including enrollment requirements, components required, eligibility verification, referral process and reimbursement information.
Vaccines for Children	Describes the Vaccines for Children program, including enrollment instructions, which procedure codes to bill, how to bill for administration fees, and a copy of the immunization schedule.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.1 Understanding EPSDT

The purpose of the EPSDT program is to find children with actual or potential health problems and to screen, diagnose, and treat the problems before they become permanent, lifelong disabilities. The program also offers preventive health services to Medicaid-eligible children under 21 years of age.

The EPSDT program was expanded in the Omnibus Budget Reconciliation Act of 1989 to allow additional services. The acronym EPSDT stands for:

Early	A Medicaid-eligible child should begin to receive high quality preventive health care as early as possible in life.
Periodic	Preventive health care occurring at regular intervals according to an established schedule that meets reasonable standards of medical, vision, hearing, and dental practice established by recognized professional organization.
Screening	A comprehensive, unclothed head-to-toe physical examination to identify those who may need further diagnosis, evaluation, and/or treatment of their physical and mental problems.
Diagnosis	The determination of the nature or cause of physical or mental disease, conditions, or abnormalities identified during a screening.
Treatment	Any type of health care or other measures provided to correct or ameliorate defects, physical and mental illnesses, or chronic conditions identified during a screening.

Periodicity Schedule

Periodic screenings must be performed in accordance with the schedule listed below. This schedule is based upon the recommendations of the American Academy of Pediatrics.

- 1 month
- 2 months
- 4 months
- 6 months
- 9 months
- 12 months
- 15 months
- 18 months
- 24 months
- Then annually (per calendar year) through 20 years of age beginning with the third birthday

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Medicaid will reimburse for only one screening per calendar year for children over the age of three. Screening benefit availability may be verified through AVRS, Gainwell Provider Electronic Solutions software, or the Provider Assistance Center at Gainwell. Please refer to Chapter 3, Verifying Recipient Eligibility, for more information.

If a periodic screening has not been performed on time according to the periodicity schedule (for instance, if the 2 months' periodic screening was missed), a screening may be performed at an “in between” age (for example, at 3 months) and billed as a periodic screening. In other words, the child should be brought up to date on his/her screening according to his/her age. Re-screenings should occur within 2 weeks (before or after) of the established periodicity schedule. This policy applies to recipients 0-24 months of age.

EPSDT screenings fall under six broad categories:

Type of Screening	***Description***
Initial Screening	Initial screenings indicate the first time an EPSDT screening is performed on a recipient by an EPSDT screening provider.
Periodic Screening	Periodic screenings are well child visits performed based on a periodicity schedule. The ages to be screened are 1 month, 2 months, 4 months, 6 months, 9 months, 12 months, 15 months, 18 months, 24 months, and annually beginning on or after the child’s third birthday.
Interperiodic Screening	Interperiodic screenings are considered problem-focused and abnormal. These are performed when medically necessary for undiagnosed conditions outside the established periodicity schedule and can occur at any age.
Vision Screening	Vision screenings must be performed on children from birth through age two by observation (subjective) and history. Objective testing begins at age three and should be documented in objective measurements.
Hearing Screening	Hearing screenings must be performed on children from birth through age four by observation (subjective) and history. Objective testing begins at age five and should be recorded in decibels.
Dental Screening	Dental screenings must be performed on children from birth through age two by observation (subjective) and history. Beginning with age one, recipients must be either under the care of a dentist or referred to a dentist for dental care.
Emotional and behavioral Screening	Emotional Assessment will cover procedure code 96127 for children age 3 months - 20 years. Assessment must be ordered and signed by a physician or Non- Physician Practitioner (i.e., Psychologist, Physician Assistant, or Certified Registered Nurse Practitioner).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.2 Using PT+3 with EPSDT services

A patient education method (PT+3) has recently been developed for working with illiterate or marginally literate individuals. The PT+3 allows providers to make the most of patient contacts as opportunities to provide developmentally appropriate information for recipients and their families.

The acronym PT+3 means:

P = Personalize the problem

T = "TAKLE" the problem:

- T = set a Therapeutic Tone,
- A = Assess the knowledge level of the patient,
- K = provide Knowledge,
- L = Listen for feedback,
- E = Elaborate or reeducate as needed.

+3 = Summarize the teaching session into three essential points.

PT+3 is a standardized protocol that provides the skills and structure for health care providers to assist young or marginally literate patients in learning and remembering essential points from a health care encounter. PT+3 is designed to increase patient knowledge and compliance. Patients seem to like and understand the simplified information and providers like the process. Using PT+3 saves time for providers and enhances the medical visit for the recipient. PT+3 enables individuals to remember the most important aspects of the medical visit.

Specially designed low literacy materials are available for children (EPSDT Brochures), teens ("How to Talk to Your Children"), and adults ("Facts about Birth Control") and are free to providers including EPSDT, ACHN, and Medicaid family planning providers who receive training in the use of the PT+3 method of education. For more information regarding PT+3, please fax your request to (334) 353-5203, attention "Outreach & Education." Please include your name and telephone number.

A.3 Performing Screenings

This section describes becoming an EPSDT screening provider, verifying recipient eligibility, scheduling screenings, critical components of screenings, and submitting claims for EPSDT screenings.

A.3.1 Becoming an EPSDT Screening Provider

Participation as an EPSDT screening provider is voluntary. To become an EPSDT screening provider, a provider must be an approved Alabama Medicaid provider and must have a 10-digit NPI. New providers should refer to Chapter 2, Becoming a Medicaid Provider, for instructions on receiving an application.

Federal requirements mandate providers re-validate periodically with the Alabama Medicaid program. Providers will be notified when they are scheduled to re-validate. Failure to re-validate and provide appropriate documentation to complete enrollment will result in an end-date being placed on the provider file. Once a provider file has been closed for failure to timely re-validate, providers will have to submit a new application for enrollment.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Current Medicaid providers who wish to become an EPSDT screening provider may download the information and forms from the Alabama Medicaid website (https://medicaid.alabama.gov/) or contact the Gainwell Provider Enrollment Unit at the following address:

Gainwell Provider Enrollment
P.O. Box 241685
Montgomery, Alabama 36124-1685
1 (888) 223-3630

Provider Types Eligible for Participation

Only certain Alabama Medicaid provider types may become approved EPSDT screening providers. In some cases, these providers are restricted to where they can perform screenings:

This Provider Type	***May Perform Screenings at the Following Locations:***
Physicians	Anywhere a physician is authorized to practice
Nurse practitioners	At a physician's office, Rural Health Clinic, Federally Qualified Health Care Clinic (FQHC), health department, or hospital
Registered Nurses	At a rural health clinic, Federally Qualified Health Care Clinic (FQHC), health department, or hospital **NOTE:** Two-year degree RNs who wish to perform EPSDT screenings must first complete a Medicaid-approved pediatric health assessment course (PAC) or show proof of completion of a similar program of study. BSN's are exempt from taking a PAC.
Physician Assistants	At a physician's office, rural health clinic, Federally Qualified Health Care Clinic (FQHC), health department, or hospital

Providers are not limited to those who are qualified to provide the full range of medical, vision, hearing, and dental screening services. Although a qualified provider may be enrolled to furnish one or more types of screening services, the Alabama Medicaid Agency encourages qualified providers to provide the full range of medical, vision, hearing, and dental screening services to avoid fragmentation and duplication of services.

NOTE:

Medical screenings, including the physical, must be performed by a physician, certified nurse practitioner, registered nurse, or physician's assistant, who is approved to perform well child visits. Other trained personnel may perform some screening components (for instance, measurements or finger sticks).

Refer to Chapter 112, Telemedicine Service, for general benefit information and limitations.

Potential EPSDT off-site providers must submit specific documents (see Section A.5) and be approved to participate as an off-site provider.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.3.2 Verifying Recipient Eligibility

Reimbursement will be made only for eligible Medicaid recipients. Eligibility and benefit limits should be verified **prior to rendering** services to **ANY** Medicaid recipient.

NOTE:

Every effort should be made to assure that medical, dental, vision, and hearing screenings, including immunizations, are accomplished in one visit, and that fragmentation or duplication of screening services is prevented. Section A.7, Vaccines for Children, describes the immunization schedule.

To be eligible for Medicaid, recipients must meet certain criteria. It is crucial for a provider to check the eligibility prior to performing services. Eligibility verification will help ensure that the provider claim gets paid. Some examples of what a provider will be informed of when checking eligibility include:

- The type of eligibility which indicates services the recipient may obtain
- The attributed provider
- The number of screenings that have been performed
- The 13th digit of the recipient Medicaid identification number

For details about eligibility please refer to Chapter 3: Verifying Recipient Eligibility.

A.3.3 Outreach

Outreach activities are critical to successful health screening services. The outreach process assures that eligible families are contacted, informed, and assisted in securing health-screening services.

The Alabama Medicaid Agency, in conjunction with the Department of Human Resources, informs the applicant of EPSDT services. SSI (Category 4) eligible recipients are informed of EPSDT services. The Medicaid-eligible child is permitted to see any Alabama Medicaid provider for EPSDT services without a referral from PCP.

Once the child has had an EPSDT screening, all subsequent visits to other providers for further diagnosis or treatment must have a prior approved written referral (Form 362) from the EPSDT screening provider.

For more information regarding the ACHN, refer to Chapter 40 - ACHN of this manual or call the Provider Assistance Center at (800) 688-7989.

The Alabama Medicaid Agency's goal is to provide effective outreach services for Medicaid-eligible recipients. EPSDT outreach efforts are aimed at two groups: (a) new Medicaid recipients and (b) all Medicaid-eligible recipients under 21 years of age who have not had a well child screening in the last 12 months. These recipients are notified twice annually. The recipient is informed about EPSDT services through an outreach letter and is encouraged to make an appointment for an EPSDT screening.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.3.4 EPSDT Care Coordination

The goal for ACHN Care Coordination Services is to provide children with opportunities to maximize their health and development by ensuring the availability and accessibility of comprehensive and continuous preventive health services throughout childhood. The ACHN Care Coordination services are available to any provider, at no cost, who wishes to benefit from effective intervention. These Medicaid eligible recipients will then be targeted for outreach.

The scope of services are also designed to support and assist your office personnel with identifying, contacting, coordinating, and providing follow up office visits for children who are behind on their EPSDT screenings. These services include but are not limited to: immunizations, vision/hearing screenings, dental screenings, identifying recipients who have high utilization of emergency room visits; follow up regarding referrals, missed appointments, and coordination for teen pregnancy prevention services. In addition, Care Coordinators are available to assist with transportation services using Alabama Medicaid's Non-Emergency Transportation (NET) program. ACHN Care Coordinators may receive referrals from physicians and dentists regarding medically-at-risk clients who need assistance with keeping appointments and obtaining follow-up care. Lastly, ACHN Care Coordinators will encourage and assist in recruiting private physicians to improve services to this population.

Participation of qualified EPSDT Care Coordination services is available through the ACHNs whose primary role is that of care coordinator. Active physician involvement for treatment is vital. ACHN Care Coordination services are available by contacting your regional ACHN. Please visit our website at www.medicaid.alabama.gov and select "ACHN": ACHN Home: ACHN Providers: "ACHN Interactive Map" or ACHN Contact Information for Providers. A list of ACHN Care Coordinators by county and telephone numbers is available to support your office personnel.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.3.5 Scheduling Screenings

The Alabama Medicaid Agency requires that persons requesting screening services receive the services within 120-180 days from the date the request was made. These persons should be given priority by the screening agency when scheduling appointments.

EPSDT selected providers and Primary Care Physician (PCP) receive a periodic re-screen list each month. The provider should utilize the periodic re-screen list to notify the EPSDT-eligible recipient when the medical screening is due. An appointment should be made for the next screening on the periodicity schedule. These functions are an integral part of the full screening provider's responsibility and are essential for care coordination. Providers have a total of 120 days from due date or award date (listed on printout) to accomplish screening, necessary referral, and treatment for the recipients listed on the printout.

EPSDT-eligible Medicaid beneficiaries who request well child visits must be provided regularly scheduled examinations and assessments at the intervals established by Medicaid policy.

Scheduling of initial and periodic screenings is the responsibility of the screening provider. The ACHN is responsible for overall care coordination for medical, vision, hearing, and dental screenings for recipients who participate in the ACHN program.

The EPSDT screening provider should not perform a screening if written verification exists or if notified by another provider that the child has received the most recent age appropriate screening. An additional interperiodic screening may be performed if requested by the parent or if medically necessary.

Please refer to Section A.5, Care Coordination, for more information on screening provider responsibilities.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.3.6 Critical Components of Screenings

This section describes critical components of periodic, interperiodic, and vision/hearing/dental screenings. It also describes recommended health education counseling topics by age group.

Periodic Screenings

Component	*Description*
Unclothed physical exam	This is a comprehensive head-to-toe assessment that must be completed at each screening visit and include at least the following: • Temperature, and height/weight ratio • Head circumference through age two • Blood pressure and pulse at age three and above • Measure body-mass index when clinically indicated Body-mass index (BMI) – BMI should be performed at each visit if clinically indicated. BMI-for-age charts are recommended to assess weight in relation to stature for children ages 2 to 20 years. The weight-for-stature charts are available as an alternative to accommodate children ages 2-5 years who are not evaluated beyond the preschool years. However, all health care providers should consider using the BMI-for-age charts to be consistent with current recommendations. The charts are available on the American Academy of Pediatrics website at http://www.aap.org.
Comprehensive family/medical history	This information must be obtained at the initial screening visit from the parent(s), guardian, or responsible adult who is familiar with the child's history. The history must include an assessment of both physical and mental health development and the history must be updated at each subsequent visit.
Immunization status	Immunizations and applicable records must be updated according to the current immunization schedule of the Advisory committee on Immunization Practices (ACIP). Dates and providers must be recorded in the medical record indicating when and who gave the vaccines, if not given by the screening provider. The state law has been changed so that private and public healthcare providers may share immunization data. Medicaid recipients shall be deemed to have given their consent to the release by the state Medicaid Agency of information to the State Board of Health or any other health care provider, by virtue immunization data should be recorded in the medical record.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Component	*Description*
TB skin test	Children who should be considered for tuberculin skin testing (TST): 1. Children whose parents (with unknown TST status) immigrated from regions of the world with high prevalence of tuberculosis; continued potential exposure by travel to endemic areas and/or household contact with persons from the endemic areas (with unknown TST status) should be tested. 2. Children without specific risk factors who reside in high-prevalence areas should be tested. In general, a high-risk neighborhood or community does not mean an entire city is at high risk. Rates in any area of the city may vary by neighborhood or even from block to block. Physicians should be aware of these patterns in determining the likelihood of exposure; public health officials or local tuberculosis experts should help physicians identify areas with appreciable tuberculosis rates. 3. Children at increased risk for progression of infection to disease should be tested. Those with medical conditions such as diabetes mellitus, chronic renal failure, malnutrition or congenital or acquired immunodeficiency deserve special consideration. Without recent exposure, these children are not at increased risk of acquiring tuberculosis infection. Underlying immune deficiencies associated with these conditions theoretically enhance the possibility for progression to severe disease. Initial histories of potential exposure to tuberculosis should be included for all of these patients. If these histories or local epidemiologic factors suggest a possibility of exposure, immediate and periodic TST should be considered. An initial TST should be performed before initiation of immunosuppressive therapy for any child with an underlying condition that necessitates immunosuppressive therapy. Bacille Calmette-Guérin (BCG) immunization is not a contraindication to TST. HIV indicates human immunodeficiency virus.
Definitions of positive TST	Definitions of positive tuberculin skin testing (TST) per CDC.gov: 1. TST should be read between 48 - 72 hours after administration by a health care worker trained to read TST results. 2. The diagnosis of TB disease in children is often made without laboratory confirmation and instead based on combination of the following factors: • Clinical signs and symptoms typically associated with TB disease, • Positive tuberculin skin test (TST) or positive TB blood test (IGRA), • Chest x-ray that has patterns typically associated with TB disease, and • History of contact with a person with infectious TB disease.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Component	*Description*
	3. Classification of the TST Reaction **A. Induration >5mm** • People living with HIV. • A recent contact of a person with infectious TB disease. • People with chest x-ray findings suggestive of previous TB disease. • People with organ transplants. • Other immunosuppressed people (e.g., patients on prolonged therapy with corticosteroids equivalent to/greater than 15 mg per day of prednisone or those taking TNF-a antagonists) **B. Induration >10mm** • People born in countries where TB disease is common, including Mexico, the Philippines, Vietnam, India, China, Haiti, and Guatemala, or other countries with high rates of TB. • People with certain medical conditions that place them at high risk for TB (e.g., silicosis, diabetes mellitus, severe kidney disease, certain types of cancer, and certain intestinal conditions) • Children younger than 5 years of age • Infants, children, and adolescents exposed to adults in high-risk categories **C. Induration >15mm** • People with no known risk factors for TB
Developmental surveillance and assessment	A comprehensive developmental history is required, if appropriate, to determine the existence of motor, speech, language, and physical problems or to detect the presence of any developmental lags. An age-appropriate developmental assessment is required at each screening. Information must be acquired on the child's usual functioning as reported by the child's parent, teacher, health care professional, or other knowledgeable individual. **Developmental assessments must be performed by a RN, BSN; CRNP, PA, or M.D.**
Nutritional status screening	Nutritional status must be assessed at each screening visit. Screenings are based on dietary history, physical observation, height, weight, head circumference (ages two and under), hemoglobin/hematocrit, and any other laboratory determinations carried out in the screening process. A plotted height/weight graph chart is acceptable when performed in conjunction with a hemoglobin or hematocrit if the recipient falls between the 10th and 95th percentile.
Health education including anticipatory guidance	Health education and counseling for parent(s) or guardian and the youth (if age appropriate) are required at each screening visit. Health education is designed to assist the parent in understanding what to expect in terms of development. Health education also provides information about the benefits of healthy lifestyles and practices, as well as accident and disease prevention. Providers may use the PT+3 teaching method for anticipatory guidance counseling. PT+3 should be documented in the medical record (i.e., progress notes) listing the three points emphasized.
Objective Developmental Screenings	SEE BELOW

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Objective Developmental Screenings

EPSDT providers are allowed to bill for an objective developmental screening in addition to an EPSDT screening at the 9 month, 18 month, 24 month and 48 month well-child visit. EPSDT providers also have the option of providing the developmental screening anytime that surveillance (medical history of developmental risk factors, parental/caregiver concern) identifies a need. Providers are encouraged to use standardized screening tools that have a moderate to high sensitivity, specificity, and validity level and are culturally sensitive. The following code, which is limited to five (5) units per date of service (five different screening tools used), may be used to bill for this screening:

> 96110 - Developmental testing; limited (e.g., Developmental Screening Test II, Early Language Milestone Screen), with interpretation scoring and reporting documentation per standardized instrument (provider must document description of score).

In order to bill this code, providers must use a standardized screening tool. Examples of screening tools allowed for this code include, but are not limited to:

- Ages and Stages Questionnaire (ASQ)
- Denver DST/Denver II
- Battelle Developmental Screener
- Bayley Infant Neurodevelopment Screener (BINS)
- Parents Evaluation of Development (PEDS)
- Early Language Accomplishment Profile (ELAP)
- Brigance Screens II
- Pediatric Symptom Checklist (PSC)

The developmental screening tool must be ordered by the provider or on behalf of the provider based on developmental screening written protocol/standing orders and scored (Provider must document description of score). The provider's physical or electronic signature must be in the medical record. Provider includes physician or non-physician practitioner, (i.e., Psychologist, Physician Assistant, Certified Registered Nurse Practitioner, and Certified Pediatric Nurse Practitioner). If a standardized tool has a summary form, the summary must be retained/scanned into the medical record. For any other form with no summary, retain/scan the full document.

Objective Developmental Testing

Objective developmental testing is when a physician or other health care professional measures cognitive, motor, social, language, adaptive, and/or cognitive abilities using provider standardized tests (meeting industry standards) via written, oral, or combined format testing. The following codes apply to testing for developmental disorders for recipients up to 20 years old and must include the interpretation and report on the findings.

A. Procedure Codes:

1. 96112 – Developmental test administration (including assessment of fine and/or gross motor, language, cognitive level, social, memory and/or executive

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

functions by standardized developmental instruments) when performed by physician or other qualified healthcare professional, with interpretation and report; first hour

- Report 96112 for the initial hour of testing, with interpretation and report.
- 96112 may not be reported for less than 31 minutes of time.

2. 96113 – Each additional 30 minutes (list separately in addition to code 96112)

- Report 96113 for each additional 30 minutes, with interpretation and report.
- 96113 may not be reported for less than 16 minutes.

B. Documentation Requirement:

1. Generally, the documentation of objective developmental testing will include: scoring, interpretation, and preparation of a separate identifiable report.

- The report must include the following: identifying data, date/time and location of testing, reason for the type of testing being done, and titles of all instruments completed by the child.
- The report must also include the test protocol, all scoring sheets, and the scored item results.
- The provider's interpretation and plan need to be noted in the report.

2. An appropriate provider signature and date is required according to Alabama Administrative Code Rule 560-X-1-.18.

3. The total time spent on these services for the patient is required. If time is not documented, the code(s) may not be reported.

- If the testing is performed over several days, the time for all testing should be combined and reported on the last day of service.

C. These services will be subject to post-payment review.

Brief Emotional and Behavioral Assessment

EPSDT providers are allowed to bill for an emotional and behavioral assessment in addition to an EPSDT screening for ages 3 months to 20 years. EPSDT providers also have the option of providing the emotional and behavioral assessment anytime that surveillance (medical history of risk factors, parental/caregiver concern) identifies a need. Providers are encouraged to use standardized tools that have a moderate to high sensitivity, specificity and validity level and are culturally sensitive. The following code, which is limited to three (3) units per date of service (three different screening tools used), may be used to bill for this screening:

> 96127 – Brief emotional/behavioral assessment (e.g., depression inventory, attention-deficit/hyperactivity disorder [ADHD] scale), with scoring and documentation, per standardized instrument (Provider must document description of score).

Examples of screening tools allowed for this code include, but not limited to:

- Ages and Stages Questionnaire/ Social Emotional (ASQ-SE)
- Modified Checklist for Autism in Toddlers (M-CHAT)
- NICHQ Vanderbilt Assessment Scales
- Behavior Assessment Scale for Children Second
- Patient Health Questionnaire (PHQ – 2 AND PHQ – 9)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Pediatric Symptom Checklist (PSC)

The emotional and behavioral assessments must be ordered by the provider or on behalf of the provider based on emotional and behavioral assessment written protocol/standing orders and scored Provider must document description of score). The provider's physical or electronic signature must be in the medical record. Provider includes physician or non-physician practitioner, (i.e., Psychologist, Physician Assistant, Certified Registered Nurse Practitioner, and Certified Pediatric Nurse Practitioner). If a standardized tool has a summary form, the summary must be retained/scanned into the medical record. For any other form with no summary, retain/scan the full document.

Vision Testing/Screenings

Vision screenings are available either as a result of the EPSDT referral or as a result of a request/need by the recipient. A subjective screening for visual problems must be performed on children from birth through age two by history and observation. Gross examinations should be documented as grossly normal or abnormal. Objective testing begins at age three. Visual acuity screening must be performed through the use of the Snellen test, Allen Cards, photo refraction, or their equivalent. Objective testing must be referred out if not performed by the screening provider.

If a child is uncooperative, perform a subjective assessment. The reason(s) for not being able to perform the test must be documented in the medical record. Proceed with billing the vision screening on the same date of service as the initial or periodic screening. The child should be rescheduled for an appointment to complete the vision screening. Be sure to complete the vision screening within 30-45 days from the original screening date.

If a suspected visual problem manifests itself, regardless of whether such services coincide with the periodicity schedule, an interperiodic screening should be scheduled with the child's physician so the history and problem-focused physical exam, can be obtained and an EPSDT referral issued to the appropriate specialist or consultant.

Providers **must** use an "EP" modifier to designate all services related to EPSDT well-child visits, **including routine vision** and **hearing screenings**. Post payment reviews are performed to determine appropriate utilization of services.

Trained office staff may perform a vision screening if successfully trained. A staff member must meet the following criteria to be considered trained.

- Employee observes a vision screening being performed on a minimum of three patients by a skilled/trained employee
- Employee verbalizes an understanding of the steps required to perform a vision screening
- Employee performs a vision screening under supervision on a minimum of three patients successfully.

Hearing Testing/Screenings

Hearing screenings are available either as a result of an EPSDT referral or as a result of a request/need by the recipient. A subjective screening for hearing problems must be performed on children from birth through age four by history and observation. Gross examination should be documented as grossly normal or abnormal. Objective testing begins at age five. Hearing screenings must be performed through the use of a

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

pure tone audiometer at 500 and 4,000 Hz at 25 decibels for both ears. If a child fails to respond at either frequency in either ear, a complete audiogram must be done. Objective testing must be referred out if not performed by the screening provider.

If a child is uncooperative, do a subjective assessment. The reason(s) for not being able to complete the test must be documented in the medical record. Proceed with billing the hearing screening on the same date of service as the initial or periodic screening. The child should be rescheduled for an appointment to complete the hearing screening. Be sure to complete the hearing screening within 30-45 days from the original screening date.

If a suspected hearing problem manifests itself, regardless of whether such services coincide with the periodicity schedule, an interperiodic screening should be scheduled with the child's physician so the history and problem-focused physical exam can be obtained and an EPSDT referral issued to the appropriate specialist or consultant.

Trained office staff may perform a hearing screening if successfully trained. A staff member must meet the following criteria to be considered trained.

- Employee observes a hearing screening being performed on a minimum of three patients by a skilled/trained employee
- Employee verbalizes an understanding of the steps required to perform a hearing screening
- Employee performs a hearing screening under supervision on a minimum of three patients successfully.

EP modifiers are used when billing initial, periodic and interperiodic screenings. Once chronic problems have been identified, providers should bill the appropriate level of office visit code and bill the services as EPSDT referring.

Dental Services

Dental care is limited to Medicaid-eligible individuals who are eligible for treatment under the EPSDT Program. Dental screenings must be performed on children from birth through age two by observation/inspection and history. Beginning with age one, recipients must be either under the care of a dentist or referred to a dentist for dental care.

A periodic oral examination is recommended once every six months for eligible Medicaid recipients under 21 years of age. Dental services include emergency, preventive, and therapeutic services as well as orthodontic treatment when medically necessary. A referral, or documentation that recipient is under the care of a dentist is required at age one and older. Follow-up is no longer mandatory. Any time a need for dental care is identified, regardless of the child's age, the child should be referred to a dentist.

Beginning with age one, providers should educate and document that caretakers have been advised of the importance (anticipatory guidance) of good oral healthcare and the need to make a dental appointment. Additional documentation suggestions include providing the caretaker with one of the following: www.insurekidsnow.gov, or the Recipient Hotline number to assist with locating a dentist (800) 362-1504.

Effective 01/01/2009, Pediatric providers (MDs, DOs, PAs, and NPs) are be able to bill in accordance with Medicaid reimbursement policies for oral assessment and application of fluoride varnish for recipients age 6 months through 35 months of age. Providers may bill assessment code D0145 (oral exam less than 3 years old,

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

counseling with primary caregiver). D0145 can be billed once by pediatric medical provider and once by the dental provider for recipients 6 months through 35 months of age. Varnishing code D1206 (topical fluoride application) will be limited to 3 per calendar year, not to exceed a maximum of 6 fluoride varnish applications between 6 months and 35 months of age. Frequency is not allowed less than 90 days. Providers are required to bill ICD 10 diagnosis code Z13.84 or Z29.3 on or after October 01, 2015.Once a recipient has an established dental home (described in Chapter 13), a pediatrician cannot bill D1206.

Dental care under the Program is available either as a result of the EPSDT referral or as a result of request/need by the recipient. Conditions for each situation are as follows:

1. EPSDT Referral – If the EPSDT Screening Provider determines a recipient requires dental care or if the recipient is age one or older and is not currently under the care of a dentist, the recipient must be referred to an enrolled dentist for diagnosis and treatment. After the recipient's dental care is initiated, the consultant's portion of the Referral Form (Form 362) must be completed by the dentist and the appropriate copy must be returned to the screening provider.
2. Recipient Seeking Treatment – If a recipient who has not been screened through the EPSDT Program requires dental care, care may be provided without having a Referral Form. Dental care provided on request of the recipient is considered a partial screening. In this situation, after the required care is completed, the dentist should advise the recipient to seek an EPSDT screening provider to obtain a complete medical assessment.

NOTE:

Dental health care services are available for eligible children under age 21, as part of the EPSDT program. To obtain information about dentists. Please contact Provider Assistance Center at (800) 688-7989.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Laboratory Screenings

Laboratory screening procedures must be performed in coordination with other medical screening services at the same visit, whenever possible. If verifiable results are available from another provider that any required laboratory procedure was performed within 30 days prior to the screening visit and there is no indication of a diagnosis that would warrant that the test be redone, it is not necessary to perform the test again. However, the test results or a copy of the test results should be documented in the medical record.

NOTE:

Providers have the option of obtaining the Hgb or Hct and the lead test during the nine month or twelve month well child visit (EPSDT screening).

The following is a list of tests and procedures of laboratory screenings:

Laboratory Test	*Description*
Newborn Screening	Newborn screening is mandated by **Statutory Authority Code of Alabama 1975, Section 22-20-3**. Every hospital or facility providing delivery services is required to screen all infants for these potentially devastating disorders. The Alabama Department of Public Health (ADPH) is responsible for administrative oversight of the Newborn Screening Program. Infants are screened for 32 primary and 45 secondary disorders which include Endocrine Disorders (Congenital Hypothyroidism and Congenital Adrenal Hyperplasia), Cystic Fibrosis (CF), Sickle Cell Disease, Hearing Loss, Metabolic Disorders (Amino, Fatty, and Organic Acid), severe combined immunodeficiency (SCID), spinal muscular atrophy (SMA), and critical congenital heart disease through pulse oximetry screening. The Alabama Newborn Screening website has a complete list of disorders at www.alabamapublichealth.gov/newbornscreening. Early diagnosis of these conditions may reduce morbidity, premature death, intellectual disability, and other developmental disabilities. All initial screening tests are conducted by ADPH's Bureau of Clinical Laboratories (BCL). Infants 12 months of age and younger with no record of a newborn screen should be tested as soon as possible. Screening for hemoglobinopathies (sickle cell disease/trait or thalassemia) is only included on the initial newborn screen. If initial results are not satisfactory for infants from birth to 12 months of age a repeat test must be performed. Children over 12 months of age who have never been tested need only be screened when ordered by a physician. ADPH's BCL has established standards and cutoffs for newborns and infants, and therefore, **cannot accept specimens on infants older than 12 months of age**. Please see the Newborn Screening Collection Guidelines at https://www.alabamapublichealth.gov/newbornscreening/assets/newbornscreeningbloodcollectionguidelines.pdf Routine second testing is recommended between two and six weeks of age, with four weeks being optimal. This second screen is critical in detecting a condition that may not have been picked up on an initial screen. Confirmation of abnormal newborn screening results is always necessary. An infant with a positive screen should be referred for diagnostic testing. The Alabama Newborn Screening Program works in partnership with pediatric sub-specialists to ensure all babies identified with abnormal results receive appropriate follow-up. These specialists are located at the University of Alabama in Birmingham (UAB), University of South Alabama in Mobile, and the St. Jude Clinic

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Laboratory Test	*Description*
	in Huntsville. In addition, there are seven community-based Sickle Cell Organizations who provide counseling and follow-up for infants identified with sickle cell disease and trait. The Cystic Fibrosis Care Center at UAB provides CF care to include genetic counseling at Children's of Alabama. It should be noted physicians should not bill for laboratory tests performed by the BCL. However, procedure codes 36415 and 36416 with modifier 90 may be billed for the specimen collection when referred to an outside laboratory. All screening tests are conducted by Alabama Department of Public Health's Bureau of Clinical Laboratories.
Public Health: Secure Remote Viewer (SRV)	The Secure Remote Viewer (SRV) is a web-based system that allows healthcare providers access to newborn screening results. The system allows users to search, view, and print results immediately from their computer. SRV is offered by the Alabama Department of Public Health, Bureau of Clinical Laboratories (BCL). The SRV provides 24-hour, seven days a week web-based reporting of screening results. The SRV requires registration with the BCL. Physicians may register with the system by completing the registration form found at https://www.alabamapublichealth.gov/newbornscreening/assets/srv_registration_form.pdf. Each physician is required to provide his/her state license number, national provider identifier (NPI), and an email address. On the registration form, physicians are asked to provide three options for the account's username. Once registration is complete, the registrant will receive a username and password via the email account provided. The email will not include the link to the SRV website for security purposes. For additional questions or information, visit https://www.alabamapublichealth.gov/newbornscreening/assets/srvregistration-instructions_lab_10-23-2023.pdf or call the BCL at (334) 290-3097.
Iron Deficiency Anemia Screening	Hematocrit and/or hemoglobin values must be determined at a medical screening visit by 9 months of age. Providers have the option of obtaining the lead and Hct/Hgb at nine or twelve months of age. Hematocrit and/or hemoglobin must also be determined between 11-20 years of age. Any other time must be deemed medically necessary based on physical examination and nutritional assessment.
Urine screening	Effective 10/01/2008 the urinalysis component of an EPSDT screening is no longer a requirement. A urinalysis should only be performed if clinically indicated. If a urinalysis is needed, the required screening procedure is a dipstick that shows the measurement of protein and glucose. Urine obtained from recipients between 11 and 20 years of age should also be checked for leukocytes.
Chlamydia Screening	Chlamydia Screening is recommended for all sexually-active females aged <25 years annually.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

The hgb or hct are included in the screening reimbursement and should not be billed separately.

Laboratory Test	*Description*
Lead toxicity screening	All children must have a blood lead toxicity screening at 12 and 24 months of age. Providers have the option of obtaining the lead and Hct/ Hgb at 9 or 12 months of age. A lead toxicity screening is also required for any child 36 to 72 months of age who has not previously received a blood lead toxicity screening or who presents with symptoms of possible lead poisoning. All children should receive lead toxicity screenings since all children are vulnerable to blood lead poisoning. Children's blood lead levels increase most rapidly at 9-12 months of age and peak at 18-24 months of age. The screening test of choice is blood lead measurement (replaces the erythrocyte protoporphyrin (EP) test.
Other lab tests	There are several other tests to consider in addition to those listed above. Their appropriateness is determined by an individual's age, sex, health history, clinical symptoms, and exposure to disease. These may include, for example, a pinworm slide, urine culture, VDRL, GC cultures and stool specimen for parasites, ova, and blood. **Note:** The test for VDRL, gonorrhea cultures, intestinal parasites, and pinworms may be done by the Alabama Department of Public Health clinical laboratory at NO cost to the EPSDT screening provider. The State lab slip must have "EPSDT Program" documented across the top. Other Medicaid approved laboratories may be used to run sickle cell and lead screening tests.

NOTE:

The State Laboratory will supply microvettes, mailing containers and forms for obtaining blood lead levels at no cost to providers upon request. Please contact (334) 290-6130 to obtain additional information.

Public Health Department Services

EPSDT care coordination is initiated for children with a confirmed blood lead level of > 3.5 μg/dL. Case management services may be requested if the physician determines the family requires additional education in the home. A physician's order is required. EPSDT care coordinators assess the family's social and environmental needs, develop a case plan with the goal of reducing blood lead levels, educate family regarding lead risk behaviors, schedule blood lead level retest, and refer to appropriate resources regarding lead screening guidelines. An environmental investigation is initiated for children with a confirmed venous blood lead level of ≥ 15 ug/dL or may be requested through a physician's order. Environmentalists perform an environmental investigation on a residence to identify lead hazards and recommend interim control or abatement measures if necessary.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Blood Lead Screening and Management Guidelines

Screening Guidelines

All children should receive blood lead level (BLL) screenings at 12 and 24 months of age. Providers have the option obtaining the lead level and Hct or Hgb at 9 or 12 months of age.

A BLL screening is also required for a child who:

- Is 36 to 72 months of age and has not previously received a BLL screening.
- Has a change in risk status.
- Presents with symptoms of possible lead poisoning. (Examples: severe anemia, seizures, constipation, abdominal pain, changes in behavior.)

Lead Risk Assessment Questionnaire

Providers should assess a child's risk of blood lead poisoning beginning at 9 month of age. Children determined to be at high risk of blood lead poisoning should receive parental education, nutritional counseling, and a BLL screening as appropriate. Administering the Risk Assessment Questionnaire instead of a BLL screening does not meet Medicaid requirements. A venous specimen is preferred, although capillary samples are acceptable.

BLL (ug/dL)	COMMENTS
5-9	CONFIRM with venous sample within **3 months**
10-14	CONFIRM with venous sample within **3 months**
15-19	CONFIRM with venous sample within **1 months**
20-44	CONFIRM with venous sample within **5 days**
45-59	CONFIRM with venous sample within **48 hours**
60-69	CONFIRM with venous sample within **24 hours**
>70	CONFIRM with venous sample **immediately**

Venous Samples - Confirmed Diagnostic Comments

< 5	• EDUCATE families about preventing lead exposure • SCREEN BLL at 12 and 24 months of age, or as indicated by risk status.
5-9	• OBTAIN confirmatory diagnostic (venous) test within 3 months, even if the initial sample was venous. • CONTINUE follow-up testing every 3 months until 2 consecutive tests are < 5 µg/dL. • EDUCATE families concerning lead absorption and sources of lead exposure (ADPH pamphlet available). Case management services • EXPLAIN that there is no safe level of lead in the blood. • PROVIDE nutritional counseling. • COMPLETE history and physical exam. • TEST for anemia and iron deficiency. • PROVIDE neurodevelopmental monitoring. • SCREEN all siblings under age 6. • OBTAIN abdominal X-ray (if particulate lead ingestion is suspected) with bowel decontamination if indicated.
10-14	• REFER for targeted case management and environmental investigation via mailing ADPH-FHS 135, *Elevated Blood Lead Environmental Surveillance Form,* to the address on the bottom of the form within 5 days of notification

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

	of results. • PROVIDE parental education and nutritional counseling. • RETEST within 3 months with venous sample.
15-19	• REFER for targeted case management and environmental investigation via mailing ADPH-FHS-135, *Environmental Surveillance Form,* to the address on the bottom of the form within 5 days of notification of results. • PROVIDE parental education and nutritional counseling. • RETEST within 3 months with venous sample.
20-44	• REFER for targeted case management and environmental investigation via mailing ADPH-FHS-135, *Environmental Surveillance Form,* to the address on the bottom of the form within 3 days of notification of results. • PROVIDE parental education and nutritional counseling. • RETEST within 3 months with venous sample or more often as determined by physician.
45-59	• REFER for treatment (chelation therapy*) to physician within 24 hours if asymptomatic; otherwise, refer for medical treatment immediately. • REFER for targeted case management and environmental investigation via faxing ADPH-FHS-135, *Environmental Surveillance Form,* to 334-206-2983 immediately upon notification of results. • PROVIDE parental education and nutritional counseling. • RETEST within 1 month with venous sample or more often as determined by physician.
60-69	• REFER for treatment (chelation therapy*) to physician with 24 hours if asymptomatic; otherwise, refer for medical treatment immediately. • REFER for targeted case management and environmental investigation via faxing ADPH-FHS-135, *Environmental Surveillance Form,* to 334-206-2983 immediately upon notification of results. • PROVIDE parental education and nutritional counseling. • RETEST within 2 weeks with venous sample or more often as determined by physician.
>70	• REFER for treatment (chelation therapy*) to physician within 24 hours if asymptomatic; otherwise, refer for medical treatment immediately. • REFER for targeted case management and environmental investigation via faxing ADPH-FHS-135, *Environmental Surveillance Form,* to 334-206-2983 immediately upon notification of results. • PROVIDE parental education and nutritional counseling. • RETEST weekly with venous sample or more often as determined by physician.

***Child should only return to a lead-safe environment after chelation therapy.**

CLINICAL NOTE:

Most children with lead poisoning are asymptomatic. Symptomatic children with elevated blood lead levels should be evaluated immediately. Symptoms may include coma, seizures, bizarre behavior, ataxia, apathy, vomiting alteration of consciousness, and subtle loss of recently acquired skills. Lead encephalopathy has been reported with levels as low as 70 µg/dL.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Environmental Lead

Environmental Lead Investigations is the investigation of the home or primary residence of an EPSDT-eligible child who has an elevated blood lead level. Please refer to Chapter 101, County Health Departments, for more information.

Normal and Abnormal Diagnoses

An abnormal diagnosis should only be billed when a health problem is identified and is referred for further diagnosis and treatment services. These services may be self-referrals.

A normal diagnosis should be billed when no health problem is identified or when identified health problems are treated immediately (acute or one time problem) during the screening (same day) and no referral is made for further diagnosis and treatment services. A normal diagnosis should also be billed when the only referrals are for *routine* vision, hearing or dental services. ICD 10 diagnosis Z00.12, Z76.1 and Z76.2 for age 29 days to 17 years and Z00.0, Z00.00 and Z00.01 for age 18+ on or after October 01, 2015.

Interperiodic Screenings

EPSDT-eligible children may receive medical, vision, hearing, and dental services that are medically necessary to determine the existence of a suspected physical or mental illness or condition, regardless of whether such services coincide with the periodicity schedule for these services. Screenings that are performed more frequently or at different intervals than the established periodicity schedules are called **interperiodic screenings**. An interperiodic screening may be performed before, between, or after a periodic screening if medically necessary. Interperiodic screenings are performed for undiagnosed medically necessary conditions outside the established periodicity schedule. Interperiodic EPSDT screenings are problem-focused and abnormal.

Interperiodic screening examinations may also occur even in the case of children whose physical, mental, or developmental illnesses or conditions have already been diagnosed. If there are indications that the illness or condition may have become more severe or has changed sufficiently, then further examination is medically necessary.

By performing an interperiodic screening and issuing an EPSDT referral form, physician office and other benefits will be “saved” for acute illnesses or other sickness. An interperiodic screening should be performed (where a history and problem-focused physical exam occurs) for suspected medical, vision, hearing, psychological, or dental problems in order for an EPSDT referral to be issued for further diagnosis and/or treatment. In this manner, the recipient will be referred for consultation and/or to a specialist for medically necessary and appropriate diagnostic tests and/or treatment. Vision/hearing screenings are to be performed/billed on the same date of service as an initial or periodic screening only. Vision/hearing screenings are limited to one each annually, beginning at age 3 for vision and 5 for hearing. However if a suspected vision/hearing/ dental/medical problem should manifest itself, an interperiodic screening should be performed in order for an EPSDT referral to be issued to a specialist or consultant. For more information regarding vision and hearing screenings, please refer to section A.3.5. For more information regarding dental screening and EPSDT referral requirements, please refer to Chapter 13 Dentist.

An interperiodic screening may be performed based upon a request by the parent(s) or guardian(s), or based on the provider's professional judgment relative to medical necessity. The Alabama Medicaid Agency considers **any** encounter with a health care

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

professional who meets the qualifications for participation in the EPSDT program to be an interperiodic screen, regardless of whether the health care professional is enrolled as a provider with the Agency.

A health developmental or educational professional who comes in contact with the child outside the formal health care system may also determine whether an interperiodic screening is medically necessary. The screening provider must document the person referring the child, and a description of the suspected problem, in the record.

Documentation requirements for interperiodic screenings are:

- Consent
- Medical-surgical history update
- Problem-focused physical examination
- Anticipatory guidance/counseling related to the diagnosis made.

Interperiodic screenings must always be filed with the patient's other insurance first. If the primary insurance is a HMO or the provider is a FQHC, IRHC or PBRHC, the interperiodic screening code must be submitted. Once the claim has been paid/denied, Medicaid may then be billed utilizing the interperiodic screening code with an EP modifier appended. When filing for an interperiodic screening, always append an EP modifier or the visit will count against benefit limits.

If the primary insurance is not a HMO, bill the appropriate "office visit" code. Once the claim has been paid/denied from the patient's other insurance, a claim may be filed with Medicaid utilizing the same "office visit" code with an EP modifier appended. When billing an office visit code for an interperiodic code, always append the EP modifier or the visit will count against benefit limits.

NOTE:

If any other treatments are provided the same day (injections, lab, etc.), a "1" or "4" must also be reflected in Block 24h, on each line item, or the claim will deny.

NOTE:

The codes for interperiodic screenings **must be billed with an EP modifier and** are as follows:

- 99202 EP through 99215 EP for office and/or outpatient interperiodic screenings
- 99233 EP for Inpatient interperiodic screenings

The new interperiodic screening codes will count against office / hospital visit limits if billed without an EP modifier.

The Evaluation and Management code level of care chosen must be supported by medical record documentation.

Each child's primary insurance must be billed first, and then Medicaid as the payor of last resort.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

99385 EP EPSDT NEW PATIENT	NEW PATIENT 18 YEARS TO 20 YEARS OF AGE	$ 70.00
99391 EP EPSDT ESTABLISHED PATIENT	ESTABLISHED PATIENT UNDER 1 YEAR	$ 70.00
99392 EP EPSDT ESTABLISHED PATIENT	ESTABLISHED PATIENT 1 YEAR TO 4 YEARS OF AGE	$ 70.00
99393 EP EPSDT ESTABLISHED PATIENT	ESTABLISHED PATIENT 5 YEARS TO 11 YEARS OF AGE	$ 70.00
99394 EP EPSDT ESTABLISHED PATIENT	ESTABLISHED PATIENT 12 YEARS TO 17 YEARS OF AGE	$ 70.00
99395 EP EPSDT ESTABLISHED PATIENT	ESTABLISHED PATIENT 18 YEARS TO 20 YEARS OF AGE	$ 70.00
99202 EP INTERPERIODIC	NEW PATIENT OFFICE/OUTPATIENT VISIT, TOTAL TIME 15-29 MINUTES	$ 64.61
99203 EP INTERPERIODIC	NEW PATIENT OFFICE/OUTPATIENT VISIT, TOTAL TIME 30-44 MINUTES	$ 91.85
99204 EP INTERPERIODIC	NEW PATIENT OFFICE/OUTPATIENT VISIT, TOTAL TIME 45-59 MINUTES	$ 141.16
99205 EP INTERPERIODIC	NEW PATIENT OFFICE/OUTPATIENT VISIT, TOTAL TIME 60-74 MINUTES	$ 178.70
99211 EP INTERPERIODIC	ESTABLISHED PATIENT OFFICE/OUTPATIENT VISIT	$ 17.00
99212 EP INTERPERIODIC	ESTABLISHED PATIENT OFFICE/OUTPATIENT VISIT, TOTAL TIME 10-19 MINUTES	$ 31.00
99213 EP INTERPERIODIC	ESTABLISHED PATIENT OFFICE/OUTPATIENT VISIT, TOTAL TIME 20-29 MINUTES	$ 63.95

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

PROCEDURE CODE	DESCRIPTION	Medicaid EPSDT Provider Rate (EP)
99214 EP INTERPERIODIC	ESTABLISHED PATIENT OFFICE/OUTPATIENT VISIT, TOTAL TIME 30-39 MINUTES	$ 93.11
99215 EP INTERPERIODIC	ESTABLISHED PATIENT OFFICE/OUTPATIENT VISIT, TOTAL TIME 40-54 MINUTES	$ 125.40

NOTE:

Effective 1/1/2011, periodic screening codes 99382 EP- 99385 EP and 99392 EP- 99395 EP may not be billed in a hospital setting (inpatient or outpatient facility settings).

Intensive Developmental Diagnostic Assessment

An EPSDT Intensive Developmental Diagnostic Assessment is a multidisciplinary comprehensive screening limited to infants' age zero to under two years, and is also limited to two per recipient per lifetime. These screenings are in addition to the routine periodic screenings and must be performed by a qualified EPSDT Intensive Developmental Diagnostic Assessment Screening provider, as approved and enrolled by Medicaid.

NOTE:

Medical necessity is subject to retrospective review by the Alabama Medicaid Agency. Please refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for more information.

Interagency Coordination

The State of Alabama, in conjunction with the Interagency Coordinating Council and the Alabama Department of Rehabilitation Services will implement a system of services to the eligible population (20 USC Section 1471 et seq, Part H), with the assistance of agencies, programs, providers, and the families of eligible infants and toddlers with special needs.

The Alabama Medicaid Agency is one of nine state agencies that hold positions on the Interagency Coordinating Council. The Early Intervention Law legislates a statewide system of early intervention services for eligible infants and toddlers that is comprehensive and coordinated among all disciplines and providers involved and encourages the development of a system of service delivery that includes parents' participation and input. Services that provide early intervention are to be coordinated across agency and provider lines.

The definition of a child eligible for early intervention services includes infants and toddlers under age three who are either: (1) experiencing developmental delay equal to or greater than 25 percent as measure by appropriate diagnostic instruments and procedures in one or more of the following areas: cognitive development, physical development (including vision and hearing), communication development, social or emotional development, adaptive development; or (2) have a diagnosed physical or mental condition which has a high probability of resulting in developmental delay. Early intervention services can include the following:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Audiology	Service coordination
Family training/counseling & home visits	Occupational therapy
Health	Nursing
Medical services for diagnostic/evaluation	Vision services
Nutrition	Physical therapy
Psychological services	Social work
Special instruction	Speech/language pathology
Assistive technology devices & services	Transportation

The Early Intervention Service Coordinator who receives the Child Find referral will contact the EPSDT provider to obtain the EPSDT screening information and any other pertinent information. In order to coordinate services, once a well child visit (EPSDT) has been completed and a developmental delay has been indicated, contact Child Find, (**800) 543-3098**. Please refer to the Early Intervention Child Find Referral Form at the end of this Appendix or visit Medicaid's website at: www.medicaid.alabama.gov. Additionally, please refer to https://www.rehab.alabama.gov/ for other rehabilitation services.

NOTE:

You may refer a family to Alabama's Early Intervention System (AEIS) in addition to referring the child and family to other appropriate services. AEIS staff is located in seven districts in the state. Please call the toll free number if you are interested in information about local EI resources.

Recommended Health Education Counseling Topics

2 weeks-3 months Nutrition - Spitting up Hiccoughs Sneezing, etc. Safety Need for affection Immunizations Skin and scalp care Bathing frequency How to use a thermometer When to call the doctor	**4-6 months** Nutrition Safety Teething and drooling/dental hygiene Fear of strangers Lead poisoning Immunizations

6-13 years Nutrition Safety Dental care School readiness Onset of sexual awareness Peer relationship (male and female) Preputertal body changes Substance abuse Tobacco Cessation Contraceptive information (if sexually active)	**14-21 years** Nutrition Dental Safety (automobile) Understanding body anatomy Male/female relationships Contraceptive information Obedience and discipline Parent-child relationships Alcohol, drugs, and smoking Tobacco Cessation Occupational guidance Substance abuse

Providers may use the PT+3 teaching method for anticipatory guidance counseling. Providers should document PT+3 counseling was utilized and list the three points emphasized.

Providers must provide age-appropriate health education related to smoking and smoking cessation. This includes risk-reduction counseling with regard to use during routine well-child visits. In addition to routine visits, additional counseling must be provided when medically necessary for individuals under age 21.

Billing Requirements

The table below provides billing information for EPSDT screening claims:

Topic	***Explanation***
Copayment	EPSDT recipients, under 18 years of age, are not subject to co-payments.
Prior Authorization	Screenings are not subject to prior authorization.
Referral	Please refer to Section A.4, Providing and Obtaining Referrals, for more information.
Time Limit for Filing Claims	One year from the date of service
Visit Limitations	Effective 05/08/2020 an office visit is now billable on the same day with an EPSDT screening by the same provider or provider group.
Diagnosis Codes	The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.
Procedure Codes and Modifiers	The following procedure codes should be used when billing comprehensive EPSDT screening services: • 99381;EP - 99385;EP: Initial EPSDT Screening • 99391;EP - 99395;EP: Periodic EPSDT Screening

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Topic	*Explanation*
	• 99173;EP: Vision Screening – Annual • 92551;EP: Hearing Screening – Annual Effective January 1, 2007, the interperiodic screening codes have changed. The following procedure codes (in service locations other than inpatient hospital) must be used: 99211;EP - 99215;EP EP modifiers are used when billing initial, periodic and interperiodic screenings. Once chronic problems have been identified, providers should bill the appropriate level of office visit code and bill the services as EPSDT referring. For interperiodic screenings performed in an inpatient hospital setting, the following procedure code must be used: 99231;EP – 99233;EP Interperiodic screening codes should also have abnormal diagnosis codes. The (837) Professional, Institutional and Dental electronic claims and the paper claim have been modified to accept up to four Procedure Code Modifiers.
Intensive Developmental Diagnostic Assessment (Multidisciplinary team) An HT modifier must be appended to procedure codes 96110, 96112 and 96113 to identify Intensive Diagnostic Assessment (Multidisciplinary team)	The following procedure codes should be used when billing for an intensive development diagnostic assessment (a multidisciplinary comprehensive screening) for children under two years of age (limited to two per recipient per lifetime) 96110;HT – Developmental testing; limited (eg, Developmental Screening Test II, Early Language Milestone Screen), with interpretation and report. (Formerly known as Intensive developmental diagnostic assessment, normal findings) 96112;HT – First hour 96113;HT – each additional 30 minutes Developmental testing; extended (includes assessment of motor, language, social, adaptive and/or cognitive functioning by standardized developmental instruments) with interpretation and report. (Formerly known as Intensive developmental diagnostic assessment, abnormal findings)
Third Party Coverage	Providers are required to file with available third party resources prior to filing Medicaid. Preventive pediatric services and prenatal care are excluded from this requirement unless the recipient has managed care coverage or Medicaid pays the provider a global fee.
Reimbursement	Governmental screening providers (including physicians) will be paid on a negotiated rate basis, which will not exceed their actual costs. Non-governmental screening providers will be paid their usual and customary charge, which is not to exceed the maximum allowable rate established by Medicaid.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Topic	*Explanation*
EPSDT Indicator Reference	The EPSDT Indicator will be either a “Y” or “N”, as applicable, when using electronic claims only. Providers should bill the appropriate level visit code and bill the services as EPSDT referring for chronic problems that have been identified. This EPSDT Indicator will allow care to be rendered and bypass the 14 or 16 visit limits.

NOTE:

Well child visits (Initial, Periodic, and Interperiodic screenings) do not count against recipient's benefit limits of 14 physician office visits per calendar year when billed with the EP modifier. There is no co-pay for recipients under 18 years of age.

A.3.7 ACHN, Primary Care Case Management (PCCM) Referral Services

Please refer to Chapter 40 for more information regarding the ACHN program.

A.3.8 Billing for ACHN Referred Services

Please refer to Chapter 40 for more information regarding the ACHN program.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.4 Providing and Obtaining Referrals

One of the primary purposes of the EPSDT services is to ensure that health problems are diagnosed and treated early before they become more complex and their treatment more costly. A Medicaid eligible child who has received an EPSDT screening may receive additional medically necessary health care. These services are considered above the normal benefit limitations and require a referral from an EPSDT screening provider. Some of these referred services require prior authorization from the Alabama Medicaid Agency. The Alabama Medicaid Referral Form (Form 362) must be appropriately completed by the screening physician including the screening date that the problem was identified and the reason for referral.

Providers are not required to complete written referrals to the other providers in the same group. The medical record documentation shall clearly indicate that the PCP did a screening, identified the problem, and an appropriate referral was made.

Referrals to specialists and other physicians outside of the group are required to have a written referral.

A cascading referral is used in situations where more than one consultant may be needed to provide treatment for an identified condition(s). When this situation arises, the original referral form is generated by the EPSDT screening provider. If the first consultant determines a recipient should be referred to another consultant/specialist, it is the first consultant's responsibility to provide a copy of the referral form to the second consultant. This process is continued until the condition(s) have been rectified or in remission, or referral expires, at which time a new screening and referral must be obtained. A new approval/EPSDT screening must be provided anytime the diagnosis, plan of care (care plan, plan of treatment, treatment plan, etc.), or treatment changes. The consultant must contact the PCP for a new referral/screening at that time.

Medical documentation must be present in the recipient's medical record identifying the provider making referrals between consultants. Medical documentation created as a result of a referral between consultants must be associated with the original referral.

If a child is admitted to the hospital as a result of an EPSDT screening, the days will not count against the yearly benefit limit. Facility fees for outpatient visits will not count against the yearly benefit limit if the visit is the result of an EPSDT screening and referral. Services rendered by speech and occupational therapists are covered **only** as the result of an EPSDT screening.

Signature Requirement for Referrals: Effective May 16, 2012:

For hard copy referrals, the printed, typed, or stamped name of the primary care physician with an original signature of the physician or designee (physician or non-physician practitioner) is required. **Stamped or copied signatures will not be accepted**. For electronic referrals, provider certification is made via standardized electronic signature protocol.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.4.1 Vision, Hearing, and Dental Referrals

If the EPSDT screening provider chooses to refer a recipient for vision, hearing, and/or dental services, the recipient must be referred to the appropriate provider for diagnosis and/or treatment. After the recipient's vision, hearing, and/or dental service is initiated, the consultant's portion of the EPSDT referral form must be completed by the consultant and the appropriate copy must be returned to the screening provider. Referral forms should be returned in 30 days, from the date of the appointment, or (if no appointment was made) from the date of the screening examination.

NOTE:

If the recipient is one year of age or older and is not under the care of a dentist, the recipient must be referred to a dentist for diagnosis and/or treatment. Follow-up on dental referrals is not required.

A referral form is completed by the screening provider when an abnormality or condition is noted during the child's screening that requires further diagnosis and/or treatment. The referring provider must document the condition(s) within the medical record (either in the medical history or physical exam portion). Medicaid has the right to recoup the screening service fees from the referring provider when a referral is made for a condition not documented in the medical record (in medical history or physical exam portion).

A.4.2 Referrals Resulting from a Diagnosis

If, as a result of a medical, vision, hearing, or dental screening, it is suspected or confirmed that the child has a physical or mental problem, the screening provider must refer the child without delay for further evaluation of the child's health status. Follow-up is required to assure that the child receives a complete diagnostic evaluation. Diagnostic services may include but are not limited to physical examination, developmental assessments, psychological and mental health evaluation, laboratory tests and any x-rays. Diagnosis may be provided at the same time, or it may be provided at a second appointment. For services such as physical therapy, speech therapy, and occupational therapy that require physicians' orders, all orders must be written according to practice guidelines and state/federal law and must include the date and signature of the provider, the service(s) ordered, and the recipient's name. The EPSDT referral form may be considered the physician's order as long as these guidelines are met. The physician's order/prescription date is considered "today's date" on the referral form.

The time limit for completing the referral form (Form 362) requires the form to be completed within 364 days of the date of the screening. If an abnormality or condition is noted during an EPSDT screening and an EPSDT referral form is not issued at the time (for example, sickle cell remission), an EPDST referral may be issued at a later date for the same diagnosis only (for example, sickle cell remission changes to sickle cell crisis). In this instance, the date utilized on the referral form will be the same as the date of the EPSDT screening where the abnormality/condition was noted. If another abnormality or condition occurs that was not diagnosed during an EPSDT screening, or if a condition has changed sufficiently so that further examination is medically necessary, an interperiodic screening should be performed (or periodic screening if it is due) to identify the problem.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

EPSDT referrals are valid for **one year from the date of the EPSDT screening**. Therefore, the maximum time an EPSDT referral remains valid is 12 months from the date of the EPSDT screening. The EPSDT screening date must be current to be valid. The EPSDT screening date may not be backdated or future dated. The date of the EPSDT screening should be documented under "Type of Referral" on form 362, the Alabama Medicaid Agency Referral Form. The EPSDT screening date documented on the Referral Form is the date used to determine the length of time an **EPSDT referral is valid**. The "Length of Referral" is used to determine the amount of time the referral is valid from the referral date and is inclusive of all types of referrals (EPSDT referral, Targeted Case Management, etc). Please refer to Appendix E, Medicaid Forms, for additional information.

Diagnosis and treatment services may be provided by the screening provider (self-referral) or may be obtained by referral to any other practitioner or facility qualified to evaluate, diagnose, or treat the child's health problem.

NOTE:

The number of visits or months must be documented on the EPSDT referral form to be considered a valid referral.

A.4.3 Treatment

Treatment may include but is not limited to physicians' or dentists' services, optometrists' services, podiatrists' services, hospital services (inpatient and outpatient), clinic services, laboratory and X-ray services, prescribed drugs, eyeglasses, hearing aids, prostheses, physical therapy, rehabilitation services, psychological services, and other types of health care and mental health services.

If a condition requires a referral, it is the responsibility of the screening provider and PCP, if applicable, to:

- Document the abnormality discovered during the EPSDT screening in the record
- Determine what resources a child needs and to which provider he/she wishes to be referred (the recipient's freedom of choice of providers must be ensured)
- Make the appropriate referral in a timely manner
- Offer and provide assistance in scheduling the appointment
- Verify whether the child received the service. Referrals must be followed up within 30 days (excluding dental) from the date of the appointment with the consultant.

A.4.4 Completing the Referral Form

The Referral for Services Form 362 must be completed after a screening if further diagnosis and/or treatment are required for a child not assigned to a PCP. The referral form is completed when referring the recipient to other providers for services that were identified during the screening as medically necessary.

Refer to Appendix E, Medicaid Forms, for a sample of the Alabama Medicaid Agency Referral Form.

Screening providers must include their 10-digit National Provider Identifier (NPI), name, and address for all recipients.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

.

- The **screening provider** must document the time span in which the referral is valid. The maximum time span is 12 months from the date of the screening.
- The **consulting provider** must follow the appropriate billing instructions and guidelines for completion of the CMS 1500 claim form found in Chapter 5, Section 5.2.2 of the Alabama Medicaid Provider Manual.

NOTE:

Providers should write the referral as soon as the condition is noted so that the regular benefits are not exhausted. This is important for patients with chronic conditions or a problem that will require numerous visits to treat.

EP modifiers are used when billing initial, periodic and interperiodic screenings. Once chronic problems have been identified, providers should bill the appropriate level of office visit code and bill the services as EPSDT referring.

Once benefit limitations have been exceeded, Medicaid will not pay for services without the EPSDT referral.

The referral form should follow the recipient for all services related to the condition noted on the form. If a child is screened with a particular condition noted and referred for further diagnosis, and another condition develops that is not noted on the referral form, the child must be re-screened in order to receive expanded benefits for the second condition noted. If not re-screened, the services rendered would count against the child's routine benefit limits.

NOTE:

If the screening provider refers a child to a consultant, it is the screening provider’s responsibility to follow up. However, if the managed care provider refers the child to a consultant, it is the managed care provider’s responsibility to follow up.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.4.5 EPSDT Referrals for ACHN Recipients

Scenario: A child is referred by the PCP to be screened by a county health department and appears to have a foot deformity.

Procedure: The child **must** be seen by a screening provider (a pediatrician credentialed as a screening provider: for example) to obtain an EPSDT referral form. The PCP may choose to

- Provide the necessary treatment
- Refer the child to an orthopedic specialist
- Instruct the screening provider to complete the referral form

The screening provider must complete the Alabama Medicaid Agency Referral Form (Form 362) if referring the child to a specialist. The referring number reflects the NPI of the screening provider.

The name and address of the screening provider should be entered to reflect, in this scenario, the county health department. All services in this scenario are covered by the original EPSDT screening referral, which must follow the child from visit to visit. The screening NPI and signature will reflect the county health department number and the signature of the health department employee who performed the screening.

The consulting provider must use the screening provider number as the referring physician on the claim form. Each provider testing the condition diagnosed during the screening, and documented in the referral, must include the screening/referring provider's number on the claim form. Please refer to Chapter 5, Filing Claims, for instructions on including the referring NPI on the claim form.

In this scenario, the specialist may suggest surgery, braces, and/or therapy. All services approved by and referred by the screening provider would then be covered by an EPSDT screening referral.

NOTE:

The PCP must be contacted and approve any and all referrals made by the specialist.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

A.4.6 Billing Instructions for Referred Services

For EPSDT Referred Services

If you file hard copy claims on the **UB-04**, you must complete the following fields:

- Block 2 – Enter the screening provider's 10-digit National Provider Identifier (NPI)
- Block 24 – Enter "**A1**" to indicate EPSDT

If you file **electronically** on the UB-04 (837 Institutional) using Gainwell *Provider Electronic Solutions* software, please refer to the latest edition of the Provider Electronic Solutions User Manual.

If you file claims on the **CMS-1500**, you must complete:

- Block 17 – Enter the name of screening provider
- Block 17a – Enter the screening provider's 10-digit National Provider Identifier (NPI)
- Block 24H – Enter "**1**" to indicate EPSDT

If you file **electronically** on the CMS-1500 (837 Professional) using Gainwell *Provider Electronic Solutions* software, please refer to the latest edition of the Provider Electronic Solutions User Manual.

For EPSDT Referred Services

If you file claims on the **UB-04**, you must complete:

- Block 2 – Enter the referring PCP's 10-digit National Provider Identifier (NPI)
- Block 24 – Enter "**A1**" to indicate EPSDT and managed care

If you file electronically on the UB-04 (837 Institutional) using Gainwell *Provider Electronic Solutions* software, please refer to the latest edition of the Provider Electronic Solutions User Manual.

If you file claims on the **CMS-1500**, you must complete:

- Block 17 – Enter the name of referring PCP
- Block 17a – Enter the referring PCP's 10-digit National Provider Identifier (NPI)
- Block 24H – Enter "**4**" to indicate EPSDT and managed care

If you file **electronically** on the CMS-1500 (837 Professional) using Gainwell *Provider Electronic Solutions* software, please refer to the latest edition of the Provider Electronic Solutions User Manual.

NOTE:

Each line item on the CMS-1500 Claim Form must have an indicator in Block 24 or 24H if billing for a Referred Service.

For Example: If the first line is an office visit and the indicator in Block 24 Or 24H is a "4", All additional services for that Date Of Service must also have an indicator of "4" in Block 24 Or 24H or the claim will deny.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Coordinating Care

The Alabama Medicaid Agency establishes the service standards and requirements that the providers must meet.

Providers of medical screening services are responsible for overall care coordination for those recipients that are not enrolled in a managed care system. For those recipients who are enrolled in the ACHN, it is the ACHN's responsibility for overall care coordination. These ongoing activities include scheduling, coordinating, follow-up, and monitoring necessary EPSDT screening and other health services.

Care coordination enhances EPSDT Program efficiency and effectiveness by assuring that needed services are provided in a timely and efficient manner and that duplicated and unnecessary services are avoided.

A.4.7 Consent Forms

Since EPSDT screenings are voluntary services, some parents of children may decline a screening. This does not preclude the child from receiving a screening at a later date or receiving medically necessary diagnosis, treatment or other health services separate from the screening, providing such services do not exceed normal benefit limitations.

A "Consent for Services" form must be signed at each visit by the responsible adult. The consent could be a permission form to treat or a signature reflecting the date the service is rendered (e.g., a sign-in sheet). The consent for services should be filed in the patient's permanent medical record. If a sign-in logbook is used, the provider will need to keep this record for a minimum of three years plus the current year. The responsible adult must be present at the time of the screening to give pertinent history and developmental status and to receive counseling as indicated. The absence of a responsible adult as defined above would invalidate the screening. When off-site screenings are performed, the parent may complete the history form prior to the screening in compliance with Off-Site Screening Protocol. Recipients 14 years of age or older may sign for themselves.

A.4.8 Medical Records

All screening providers must maintain complete records for three years plus the current year on all children who have received services or screened. Records of all EPSDT-eligible children must be made available to Medicaid upon request. Medicaid will monitor EPSDT services provided by screening physicians or agencies on a periodic basis. If Medicaid identifies claims paid where any three findings listed as critical components of the screening process are omitted, the claim may be adjusted.

Medical records must include the following documentation. The critical components of a well child visit (comprehensive screening) are denoted with an asterisk.

- Consent signature
- * Family history of diseases and annual updates
- * Medical history and updates at each screening
- Mental health assessment
- * History of immunizations and administration as indicated

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- * Age-appropriate developmental assessment
- * Age-appropriate anticipatory guidance
- * Nutritional assessment to include recorded results of hemoglobin/hematocrit and plotted height/weight
- * Documentation of sickle cell test results
- * Recorded results of hemoglobin/hematocrit
- *Urine screening needs to be performed only if clinically indicated (Effective 10/01/2008).
- * Lead testing/results (according to age)
- Tb skin test
- Height, weight, temperature, pulse, and blood pressure
- * Vision and hearing assessment/testing (Considered as two critical components)
- * Documentation of the unclothed physical examination
- * Dental referral/status for recipients 1 year of age and above
- * Failure to make appropriate referral, when required (i.e., medical, vision, hearing)
- * Referral follow-up on conditions related to medical, vision, or hearing problems

A.5 Off-site Screenings

Children are our state's most important assets and yet many of them arrive at school generally in poor health. The healthier a child, the greater his or her learning potential. The Alabama Medicaid Agency is committed to helping ensure that children are healthy and ready to learn. To that end, the Alabama Medicaid Agency has developed protocols for off-site EPSDT screenings. These services must be accessible to all children, not just Medicaid-eligible children.

NOTE:

EPSDT screening providers must also contact the recipient's primary care physician to receive prior authorizations to perform the screening.

Off-site screenings are defined as screenings that are provided off-site from a medical facility, which is limited to hospitals, physician offices, Department of Public Health (DPH) clinics, and Federal/State certified clinics. Off-site screenings occur in schools, day care centers, head start centers, and housing projects.

An off-site EPSDT screening provider must develop and adhere to confidentiality policies set out by the respective agencies and should be submitted to the agency. Information pertinent to the child's performance may be shared. Information pertinent to infectious disease shall be released only by the County Health Officer. Sharing information with others outside the local agency may take place only if parental consent has been given.

Provider is defined as and will include only a county health department clinic, hospital, FQHC, IRHC, PBRHC, or a physician's office. A provider must be located within the

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

county or within 15 miles of the county in which the off-site screenings occur. Medical personnel performing the physical examination are limited to physicians, certified registered nurse practitioners (CRNP), certified nurse midwives (CNM), physician assistants (PA), and registered nurses (RN) employed by the facilities listed above.

Clinic is defined as a certified medical facility, under the supervision of a physician that provides a full range of medical services on a regular basis. A clinic must be equipped to handle acute care situations and provide treatment and/or management of chronic diseases. Licensed medical personnel must perform medical services.

Medical facility is defined as a Federal/State certified clinic, hospital, physician's office, or a DPH clinic where diagnosis of health problems are rendered and treatment of diseases occur. The medical facility must have a permanent location, regularly scheduled hours of operation, and a published telephone number. Medical services and supplies must also be available for treatment of abnormal conditions identified at the time of an EPSDT screening.

Physician's office is defined as a place staffed by physician(s) and other medical professionals where medical activities, such as the practice of medicine, is conducted. This office is specifically designed and set up to provide medical diagnosis and treatment of medical conditions. This office is open and operating on a published, regularly scheduled basis with a published telephone number and regularly scheduled appointments.

A.5.1 Enrollment for Off-site providers

To be considered as an EPSDT screening provider for off-site screenings, potential providers must submit the following criteria:

- A letter documenting the ability to complete all components of a screening. The physical exam portion of the screening must be completed by an approved EPSDT screening provider: physician, nurse practitioner, physician assistant, or a registered nurse. All registered nurses, except BSNs, must complete a Medicaid-approved Pediatric Assessment course or show proof of having completed a similar program of study in their professional training that prepared them to perform pediatric health assessments.
- A primary care referral list of medical providers in the county to whom you will refer to services. The referral list must include pediatricians, family and/or general practice physicians, internal medicine physicians, vision and hearing providers, and dentists. All providers must agree to be on your referral list, therefore, you must submit their written agreement with your referral list. The list must be sufficient in number to allow recipients/parents a choice in the selection of a provider.
- Documentation to demonstrate that services will be offered to all children enrolled at an off-site location, not just Medicaid-eligible children. A copy of your fee schedule must be attached to your documentation and must include fees for non-Medicaid enrollees.
- Child abuse and confidentiality policies
- A signed Matrix of Responsibilities form between the off-site location authority (school superintendent, principal, day care director, etc.) and the screening provider. Only one screening provider will be approved per location.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Only RNs that are employed by a FQHC, RHC, Health Department, Physicians office, and hospital may perform off-site EPSDT screenings.

- A signed agreement/letter from a local physician to serve as Medical Director. This physician may be a pediatrician, family practice physician, general practice physician, or an internal medicine physician. Proof of 6 pediatric focused credits (CME) from the previous year must be included with the signed agreement. EXCEPTION: A board-certified pediatrician should submit a copy of current certification only. **The medical director is responsible for resolving problems that the nurses encounter and rendering care for medical emergencies.**

- A monthly schedule shall be maintained designating the dates, times, and the local agency in which you will be offering the EPSDT services. The monthly schedule should be readily available and retained in either the local agency/medical facility (i.e., the facility that has been approved as an off-site EPSDT screening provider) or the recipient's medical record. Failure to maintain schedules one week in advance of Off-site EPSDT screenings may result in termination and loss of revenue.
- A document, listing members of the Peer Review Coalition of community members to serve in an advisory capacity. The committee must have the opportunity to participate in policy development and program administration of the provider's off-site program and to advise the director about health and medical service needs within the community. The committee must be comprised of parents, school personnel, public health personnel and local physicians within the local community. Members must be familiar with the medical needs of low-income population groups and with the resources available in the community.
- Information packet materials, including letters, forms, and examples of anticipatory guidance information sheets to be used. These materials must be prior approved by Medicaid.
- A copy of the waiver certificate and/or CLIA number, issued by the Division of Health Care Facility, Bureau of Health Provider Standards for the State of Alabama Department of Public Health.
- A list of all physical locations at which EPSDT screenings will be provided. A separate NPI will be assigned to each off-site location and will be distinct from any other NPI. A separate application and contract is required for each off-site location.

A.5.2 Space for Screenings

The room in which screenings are done may vary according to the availability of space. Space to perform the screening assessment must include a well-lighted private room in close proximity to hot and cold running water, a bathroom, and a nearby waiting area.

A.5.3 Parent/Guardian Consent and Follow-up

Children under 14 years of age must have written consent from their parent/guardian before participating in the screening program. Children age 14 and above may

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

consent for themselves. The parent/guardian should be encouraged to be present during the screening.

Once the health screening is complete, the parent/guardian must be informed of the results of the screening by mail or in a one-on-one meeting. The anticipatory guidance materials must be age appropriate and the material may be given to children 14 years of age and above. Documentation must reflect that anticipatory guidance materials were mailed to parent/guardian for recipients under 14 years of age.

NOTE:

The potential provider cannot begin well child visits (screenings) until approval has been authorized in writing and Medicaid has enrolled the provider for off-site screenings.

A.6 Vaccines for Children

In an effort to increase the immunization levels of Alabama's children by two years of age, the Alabama Department of Public Health and the Alabama Medicaid Agency implemented the Vaccines for Children (VFC) Program on October 1, 1994,

This nationally sponsored program offers free vaccines to family and general practitioners, pediatricians, hospital nurseries, emergency rooms, and other qualified providers for children aged 18 years and under who are Medicaid enrolled and eligible, have no health insurance, or are American Indian or Alaskan Native. Free vaccines are also available to children who do not have health insurance for immunizations (“underinsured”), if they obtain those vaccines from a Federally Qualified Health Center or Rural Health Clinic.

Participation in Medicaid is not required for VFC enrollment; however, over 400,000 of Alabama’s children are Medicaid enrolled.

A.6.1 Fees

Medicaid has taken the past vaccine and administration fee costs and calculated an equivalent reimbursement fee of $8.00 per dose. When multiple doses are given during the same visit, Medicaid will reimburse for each dose. When doses are given in conjunction with an EPSDT screening or physician visits, an administration fee of $8.00 per injection will also be paid for recipients 18 years of age and younger. The statewide fee-for-service will be paid for recipients 19 years of age and older. Providers are encouraged to utilize licensed available combination vaccines when indicated rather than the individual components of the vaccine.

Providers should use the immunization(s) procedure code designated by the VFC Program when billing for the administration of an immunization. Please refer to section A.6.3 for the list of designated VFC procedure codes.

Medicaid VFC providers may give VFC vaccines to children who are Medicaid enrolled, uninsured, American Indian, or Alaskan Native. If a VFC vaccine is given to any of the above patients, with the exception of Medicaid enrolled, an administration fee not to exceed $19.79 for each vaccine administered may be charged. Underinsured patients must go to an FQHC or RHC, to receive VFC vaccines. . No VFC-eligible patient should be denied immunizations because of an inability to pay the administration fee.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Physicians and health departments are not required to file recipient health insurance prior to filing Medicaid for preventive pediatric services, including administration fees for VFC. Exceptions to this rule require that all providers must file with a recipient's health plan when the plan is an HMO or other managed care plan. In addition, FQHCs and RHCs are required to file other insurance prior to filing Medicaid as are any providers receiving a lump sum payment for bundled services or a capitation payment from Medicaid.

A.6.2 Enrollment

The Department of Public Health is the lead agency in administering the VFC Program. Enrollment and vaccine order forms are available through the Immunization Division. Questions regarding enrollment should be directed to the VFC Coordinator at (800) 469-4599.

Participation in Medicaid is not required for VFC enrollment. Participation in the VFC Program is not required for Medicaid enrollment.

A.6.3 Vaccines for Children Billing Instructions

Providers must use an appropriate CPT code on a CMS-1500 claim form or UB-04 claim form in order to receive reimbursement for the administration of each immunization given from VFC stock.

When immunizations are given in conjunction with an EPSDT screening visit or physician office visit, an administration fee of $8.00 per injection will be paid for recipients 18 years or younger. The statewide fee-for-service rate will be paid for recipients 19 and 20 years old.

NOTE:

A VFC provider may or may not choose to become an enrolled Medicaid provider. Enrollment as a VFC provider or a Medicaid provider is independent of each other.

The following CPT codes must be used when billing Medicaid for immunizations for any recipient under age 19:

CPT Procedure Code	***Procedure Description***	***Lay Term Description***	***Brand Name Example(s)***
90380	RSV MAB IM 0.5 ML	RSV Monoclonal Antibody	Beyfortus

A.6.4 ImmPRINT Immunization Provider Registry

The Alabama Department of Public Health has established a statewide lifespan immunization registry. Effective September 1, 2018, all VFC providers are required to submit all VFC vaccines administered for accountability. Please visit their website at https://siis.state.al.us/ImmPrint/login/login.aspx for more information.

A.6.5 Recommended Immunization Schedule

You may access the recommended immunization schedule at https://www.cdc.gov/vaccines/schedules/.

The schedule indicates the recommended ages for routine administration of currently licensed childhood vaccines. Combination vaccines may be used whenever any components of the combination are indicated and its other components are not contraindicated. Providers should consult the manufacturers' package inserts for detailed recommendations.

A.6.6 Synagis

Deleted: ~~The drug~~
Deleted: ~~must be~~
Added: requires
Deleted: ~~Kepro~~
Added: Acentra Health. For…contact Acentra Health

Synagis requires prior authorized through Acentra Health. For questions about the Synagis prior authorization process, contract Acentra Health at **1-800-748-0130**.

Added: Prescriber Responsibility: Only…the Medicaid website
Deleted: ~~The new form…on our website~~

- **Prescriber Responsibility**: Only prescribers, not pharmacies, manufacturers, or any third-party entities, can submit requests for Synagis. Use a separate Prior Authorization Form (Form 351) to send directly to Acentra Health. The fax number for Synagis requests is: **1-800-748-0116**.
- **Submission Dates**: Requests may be submitted starting September 1, for an October 1 effective date.
- **Forms**: Access Forms 369 and 351 on the Medicaid website at www.medicaid.alabama.gov under Programs: Pharmacy Services: Pharmacy Forms and Criteria: Form 369 and Form 351 Instructions.

Added: Fees:

- **Fees**: The appropriate administration fee may be billed in addition to Synagis.

All rights reserved. Applicable FARS/DFARS apply.

Key:

X	Required at the visit for this age
X+	Perform blood level if unknown
S	Subjective assessment by history and/or observation with appropriate action to follow
O	Objective by standard testing methods

Footnotes:

1	If a child comes under care for the first time at any point of the schedule, or if any components are not accomplished at the recommended age, the schedule should be brought up to date at the earliest possible time.
2	The physical examination/assessment must include an oral/dental inspection.
3	Every visit should allow for the opportunity to update a child's immunization status.
4	PCP should verify initial newborn screening results collected by the birthing facility. If unable to verify initial results collect a bloodspot specimen and mark the filter form “First Test.” The BCL will accept specimens up to 12 months of age. A second newborn screening specimen is recommended at 2-6 weeks of age (4 weeks optimal) on all full-term infants with a normal first test screen. If the first test specimen was collected after two weeks of age, a second test is not recommended.
5	Hematocrit and/or hemoglobin values must be determined at a medical screening by 9 months of age. Providers have the option of obtaining the lead and Hct or Hgb at nine or twelve months of age. Hematocrit or hemoglobin must also be determined between 11-20 years of age. Any other time must be deemed medically necessary based on physical examination and nutritional assessment.
6	All children are considered at risk and must be screened for lead poisoning. A blood lead test is required at 12 and 24 months of age. Providers have the option of obtaining the lead and Hct/Hgb at 9 or 12 months of age.
	X indicates a lead screening is required. **X+** indicates a lead screening test is required for any Medicaid-eligible child 36 to 72 months of age who has not previously been screened for lead.
7	Health education must include anticipatory guidance and interpretive conference. Youth, ages 12 to 20, must receive more intensive health education that addresses physiological, emotional, substance usage, and reproductive health issues at each screening visit.
8	Vision screenings must be performed on children from birth through age two by observation (subjective) and history. Objective testing begins at age three and should be documented in objective measurements.
9	Hearing screenings must be performed on children from birth through age four by observation (subjective) and history. Objective testing begins at age five and should be recorded in decibels.
10	Dental screenings must be performed on children from birth through age two by observation (subjective) and history. Beginning with age one, recipients must be either under the care of a dentist or referred to a dentist for dental care.

B Electronic Media Claims (EMC) Guidelines

This appendix contains information about electronic submission of claims and the software that providers use to transmit claims to Gainwell. It contains the following sections:

- General Information
- Provider Electronic Solutions
- Vendor Software
- Alabama Medicaid Interactive Website

Technical support is available through the Gainwell Electronic Claims Submission Help Desk.

(800) 456-1242 (Nationwide Toll Free)
(334) 215-0111

B.1 General Information

All claims which do not require attachments or an Administrative Review override by Medicaid must be submitted electronically. Electronic Claim Submission (ECS) offers many benefits to all participants in the claims submission process. ECS is the most efficient and effective means of processing claims, ensuring swift adjudication and payment to providers.

Electronic claim submission reduces claims processing time from start to finish. Rather than mailing paper claims, providers use the Alabama Medicaid Interactive website to submit claims to a central location.

With ECS, electronic claims avoid the sorting and keying process. The claim data is immediately available to the system. However, it is not only at the start of the claims cycle that electronic submission can save providers time.

Providers who submit claims electronically can check their claims to ensure that the data has passed basic edits, or can determine claim data that prevents the claim from paying. Providers can determine how much payment they will receive from each submission, in a fraction of the time it took when submitting claims on paper.

ECS assists providers in receiving quick payment and reduces claims processing time. Also, electronic claims submission provides an audit trail of claims that have failed preliminary edits. Providers may receive information regarding certain problems on submitted claims within minutes. This allows the provider the opportunity to the make necessary corrections and resubmit the claim before the next scheduled check writing date.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

To submit claims electronically, providers use software designed specifically for this purpose as well as the Alabama Medicaid Interactive web site. Providers may use software created by Gainwell, called Provider Electronic Solutions software, or software developed by outside vendors. The following three sections provide general information about each electronic option.

B.2 Provider Electronic Solutions

Provider Electronic Solutions software is data entry software used to verify eligibility and transmit claims in the proper format to the web so that they may be processed by the system.

Provider Electronic Solutions software is available free of charge to any provider. Gainwell will mail the software to the provider at no cost, or the provider may download the software from the Internet.

http://medicaid.alabama.gov/content/7.0_Providers/7.8_PES_Software.aspx

Providers use the Provider Electronic Solutions software to submit the following batch transaction types:

- 270 Eligibility Request
- 276 Claim Status Request
- 278 Prior Authorization Request
- 837 Dental
- 837 Institutional Inpatient
- 837 Institutional Nursing Home
- 837 Institutional Outpatient
- 837 Professional
- NCPDP Pharmacy Eligibility
- NCPDP Pharmacy
- NCPDP Pharmacy Reversal

B.2.1 Verifying Eligibility

Providers have access to all available eligibility information on a recipient including but not limited to the following:

- Recipient name on file
- Full recipient number including the check digit (13th digit)
- Alabama Coordinated Health Network (ACHN)
- Aid category – indicating benefit limitations, for example, SOBRA
- Name and phone number of assigned Primary Medical Provider
- Benefit limits to date, for services such as physician visits, inpatient/outpatient visits, EPSDT screenings, and vision services
- Third party insurance information

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

The Provider Electronic Solutions software offers the feature of verifying recipient's eye care benefit limits. Select the eligibility icon and enter the requested information in all of the fields. When inquiring about a recipient's eligibility for eye care services, be sure to check the current year and previous year. For example, to determine if a recipient has met the benefit limit allowed for eye exams services, the provider needs to check the current and previous year service usage by entering the appropriate service year.

Providers have access to the following information about their submissions.

- **Communication Log** - displays information about successful or non-successful communication during transaction submissions
- **View Batch Response** - allows the user to view the response files downloaded from the web. For example claim responses 277 may be viewed after the submission of a 276 – Claim Status.
- **Download Electronic Remittance Advice (ERA)** - allows the user to download the 835 - Electronic Remittance Advice (ERA). The 835 file should be viewed in a text editor as the Provider Electronic Solutions software cannot display the Electronic Remittance Advice file.

B.2.2 Using Report and List Features: Managing your Data

Providers use the Lists feature to store frequently submitted values. These values can then be reused in later claims submissions, shortening data entry time. Provider Electronic Solutions software stores lists of data about the following topics:

- Attending/Operating Provider
- Prescriber
- Provider
- Recipient
- UPIN
- Admission Type
- Carrier
- Condition Code
- Diagnosis ICD-9
- Diagnosis ICD-10
- Modifier
- NDC
- Occurrence
- Patient Status
- Place of Service
- Policy Holder
- Procedure HCPCS
- Procedure ICD-9

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Procedure ICD-10
- Revenue
- Taxonomy
- Type of Bill

Providers can generate reports about these lists, as well as detail and summary reports about the claims they have submitted.

B.2.3 Archive and Connection Tools: Protecting your Data

Providers use the Get Upgrades option to upgrade their software from any downloaded update through the web. Options allow users to set up their modems, batch and interactive submitter IDs, carrier information (for example, phone number to dial), and to establish their retention settings (sets the number of files to keep before archiving).

The Archive tool allows users to create archives and restore archives. This feature is very useful for space conservation on the provider's computer system. The Database Recovery tool allows users to compact, repair, and unlock their databases. These tools are very useful in correcting database problems, allowing users to correct the problem without Gainwell sending new software.

B.2.4 Additional Information about Provider Electronic Solutions

Provider Electronic Solutions software does not interface with accounting systems or other databases. This would require claims data to be keyed twice, once when submitting the claim using Provider Electronic Solutions software and again into the provider's database.

However, this software is perfect for providers who do not submit a large number of Medicaid claims, and for providers who want to save the vendor fee.

Provider Electronic Solutions software comes with full installation instructions, a user's guide, and full technical support.

For more information on obtaining Provider Electronic Solutions software, contact the Gainwell Electronic Claims Submission Help Desk.

(800) 456-1242 (Nationwide Toll Free)
(334) 215-0111

B.3 Vendor Software

Providers may prefer to submit claims using vendor software. Providers are recommended to contact Gainwell to determine if their vendor's software is approved for claims submission.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

B.4 Alabama Medicaid Interactive Web Site

The Interactive Services web use of online user friendly forms, allows providers to inquire about recipient eligibility, claim status, prior authorization requests and household inquiries. A provider will also able to enter and submit claims, including online voids and adjustments.

The website is available free of charge to any provider. This site is available 24-hours a day, seven days a week, excluding time for scheduled maintenance.

The Alabama Medicaid Interactive web site address is https://www.medicaid.alabamaservices.org/ALPortal .For additional information regarding the features or sign-up procedures, refer to the Alabama Medicaid Interactive Web Site User Manual, found on the site's AL Links page under the Information menu.

All rights reserved. Applicable FARS/DFARS apply.

C Family Planning

Family planning services are services provided to prevent or delay pregnancy.

C.1 Eligible Individuals

Eligible individuals are those females of childbearing age 8 through 55 years of age and males of any age who may be sexually active and meet the criteria for Medicaid eligibility. Family planning services **do not require a referral** for recipients in Medicaid's Managed Care programs.

Reimbursement will be made only for eligible Medicaid recipients. Eligibility should be verified **prior to rendering** services to **ANY** Medicaid recipient.

Maternity Care eligible Medicaid women are covered for family planning services through the last day of the 12th postpartum month.

Plan First

The Plan First Program is an 1115 Demonstration Waiver approved by the Centers for Medicare and Medicaid Services that extends family planning coverage for eligible women ages 19 through 55 and men age 21 or older, for vasectomy/vasectomy related services and care coordination. Please refer to the section, Plan First, for additional information.

C.1.1 Authorization for Recipient Services

The recipient must have freedom of choice in deciding to receive or reject family planning services. Acceptance of any family planning service must be voluntary on the part of the recipient and without any form of duress or coercion applied to gain such acceptance. Recipients are required to give written or verbal consent prior to receiving family planning services. For any face-to-face encounter a written consent is required. For any telephonic encounter a verbal consent is required. **A recipient consent for services must be obtained at each Family Planning visit. A sign-in logbook may be used after the initial consent form has been signed.**

Age of Consent

Family planning services are available to:

- Females, any age, after onset of menses. If age 14 or over, no parental or other consent is required.
- Males, any age. If age 14 or over, no parental or other consent is required.
- If a child is under the age of 14, whether they are sexually active or not, parental consent is required.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

C.2 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations.

C.2.1 Family Planning Visits

PT+3 Teaching Method

All family planning counseling must utilize the **PT+3 teaching method**, after the provider has received training. The acronym, PT+3, means:

P = Personalize the PROBLEM,
T = "TAKLE" the problem
T = set a Therapeutic Tone,
A = Assess the knowledge level of the recipient,
K = provide Knowledge
L = Listen for feedback,
E = Elaborate or reeducate as needed.

+3 = Summarize the teaching session into three essential points.

At all points during the counseling and education process, the recipient must be given the information in such a way as to encourage and support the exercise of choice. In order to support informed choice, certain informational elements should be offered. Due to the constraint of time, the topics are listed in order of priority. Priority One includes those topics that MUST be DISCUSSED with the recipient. Priority Two includes those topics that can be presented to the recipient in a written document, with verbal follow-up. Priority Three includes those topics that can be presented in written format only, with follow-up occurring should the recipient need/desire further clarification.

At all times, the PT+3 method of teaching/counseling should be used so that time is targeted toward individual recipient need.

Priority One Topics:

1. Recipient expressed needs or problems
2. Contraception:
    a. Listing of the various options
    b. How to use
    c. Side effect management
3. Prevention of STDs including HIV
4. Breast or testicular inspection and self-awareness

Priority Two Topics

1. Explanation of any screening or lab testing done
2. Services offered
3. Telephone number of office or instructions about accessing emergency care
4. Folic Acid

Priority Three Topics

1. Need for Mammogram
2. Anatomy and physiology

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Family Planning Protocols – Educational

		INIT	AN	Per	EXT/C	Home
Counseling Using PT + 3 Teaching Method

Priority Three	*Need for Mammogram*	X	X			
Optional	Anatomy and physiology	CI	CI	CI	CI	CI

***Topic priority explanations: Priority One** includes those topics that MUST be discussed with the recipient. All recipient concerns fall in this area. **Priority Two** includes those topics that can be presented to the patient in a written document, with verbal follow-up. **Priority Three** includes those topics that can be presented in written format only, with verbal clarification done if needed or desired by the recipient. At all times, if the recipient wants to discuss a topic, the opportunity should be provided.

NOTE:

Per ACOG Practice Bulletin Number 179 of July 2017 (*reaffirmed 2021*);
breast self-examination is no longer recommended in average-risk women because there is a risk of harm from false-positive test results and a lack of evidence of benefit.
Unlike breast self-examination, breast self-awareness does not include a recommendation for women to examine their breasts in a systematic way or on a routine basis. Rather, it means that a woman should be attuned to noticing a change or potential problem with her breasts.
Although breast self-examination is no longer recommended, evidence on the frequency of self-detection of breast cancer provides a strong rationale for breast self-awareness in the detection of breast cancer.

https://www.acog.org/clinical/clinical-guidance/practice-bulletin/articles/2017/07/breast-cancer-risk-assessment-and-screening-in-average-risk-women

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The following services are covered services when provided by Family Planning providers.

Initial Visit (99205-FP)

The initial visit is the first time a Plan First or Family Planning recipient receives family planning services. An initial visit is limited to one per provider per recipient per lifetime.

The initial visit requires the establishment of medical records, an in-depth evaluation of an individual including a complete physical exam, establishment of baseline laboratory data, contraceptive and sexually transmitted disease prevention counseling, and issuance of supplies or prescription. Counseling in the family planning setting is interactive and includes education. Counseling/education topics must be based on recipient's need and on protocol requirements.

Billable laboratory services **for the initial visit may include:**

- Hemoglobin or hematocrit,
- Urinalysis,
- Pap smear according to current, nationally recognized clinical guidelines,
- STD/HIV test, and
- Pregnancy testing.

Since a family planning visit may be the only medical encounter a female has, **performing the above laboratory tests is encouraged at the initial and annual visits.** Any laboratory procedure performed within the past 30 days with available results need not be repeated.

Pregnancy testing is a covered service during any visit where clinical indication is present and evaluation is needed.

NOTE:

Pap smears, not technically related to any contraceptive method, may be provided accordingly to the current standard of care and schedule. Providers must have and follow a Pap smear protocol based on the guidelines of a nationally recognized organization, such as the American College of Obstetrics and Gynecology (ACOG), the American Cancer Society (ACS), or the U.S. Preventive Services Task Force (USPSTF). These guidelines can be accessed at the following links:

https://www.acog.org/clinical/clinical-guidance/practice-advisory/articles/2018/08/cervical-cancer-screening-update

https://www.cancer.org/cancer/cervical-cancer/detection-diagnosis-staging/cervical-cancer-screening-guidelines.html

https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/cervical-cancer-screening

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The **physical assessment** is another integral part of the initial family planning visit. The following services, at a minimum, **must** be provided during the initial visit:

- Height, blood pressure, and weight check
- Thyroid palpation
- Breast and axilla examination accompanied by instruction for self-breast inspection
- Abdominal examination and liver palpation
- Auscultation of heart and lungs
- Pelvic evaluation to include bimanual and recto-vaginal examination with cervical visualization
- Examination of extremities for edema and varicosity
- Testicular, genital, and rectal inspection for males.

Annual Visit (99214-FP)

The annual visit is the re-evaluation of an established Plan First or Family Planning recipient requiring an update to medical records, interim history, complete physical examination, appropriate diagnostic laboratory tests and/or procedures, family planning counseling using PT+3 teaching method, and adjustment of contraceptive management as indicated. An annual visit is **limited to one per calendar year**.

The services listed below must be provided during the annual visit:

- Updating of entire history and screening, noting any changes
- Counseling and education, as necessary, using the PT+3 teaching method
- Complete physical assessment

  The **physical assessment** is another integral part of the annual family planning visit. The following services, at a minimum, **must** be provided during the annual visit:
  - Height, blood pressure, and weight check
  - Thyroid palpation
  - Breast and axilla examination accompanied by instruction for self-breast examination
  - Abdominal examination and liver palpation
  - Auscultation of heart and lungs
  - Pelvic evaluation to include bimanual and recto-vaginal examination with cervical visualization
  - Examination of extremities for edema and varicosity
  - Testicular, genital, and rectal examination for males.
- Issuance of supplies or prescription.

Billable laboratory services **for the annual visit may include:**

- Hemoglobin or hematocrit,
- Urinalysis,
- Pap smear, according to current, nationally recognized clinical guidelines,
- STD/HIV test, and

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Pregnancy testing.

Periodic Revisit (99213-FP)

The periodic revisit is a follow-up evaluation of an established Plan First or Family Planning recipient with a new or existing family planning condition. Four periodic visits are available per calendar year. These visits are available for multiple reasons such as contraceptive changes, issuance of supplies, or contraceptive problems (e.g. breakthrough bleeding or the need for additional guidance). Providers may utilize the appropriate Z304 diagnosis code for ICD-10, "Surveillance of previously prescribed contraceptive methods," for a visit related to a contraceptive problem.

The following services, at a minimum, must be provided during the periodic revisit:

- Weight and blood pressure
- Interim history
- Symptom appraisal as needed
- Documentation of any treatment/counseling including administration/issuance of contraceptive supplies.

NOTE:
Family Planning visits are not payable after sterilization.

Home Visit (99347-FP)

The home visit is a brief evaluation by a medical professional in the home of an established recipient and is for the purpose of providing contraceptive counseling (using the PT+3 teaching method) and administration/**issuance of supplies** as indicated. **The home visit is for postpartum women during the postpartum period and usually occurs within 7-14 days after delivery. A home visit is not a covered service for recipients with Plan First eligibility and can only be provided as a family planning service by Medicaid eligible family planning providers to eligible recipients.**

To qualify for reimbursement for the home visit:

- Medical professionals who are licensed to administer medications such as oral contraceptives or to give injections must provide the home visit.
- The home visit must include: brief medical histories: family, medical, contraceptive, and OB/GYN, blood pressure and weight check, contraceptive education and counseling using the PT+3 teaching method assuring that the recipient:
  - understands how to use the method selected,
  - how to manage side effects/adverse reactions,
  - when/whom to contact in case of adverse reactions, and the importance of follow-up.
  - scheduling of a follow-up visit in the clinic if needed
  - issuance or prescription of contraceptive supplies as appropriate.

The recipient must give her signed consent for this visit.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Extended Family Planning Counseling Visit (99212-FP)

The extended family planning counseling visit is a separate and distinct service consisting of a minimum of 10 face-to-face minutes of extended contraceptive counseling using the PT+3 teaching method. The extended family planning counseling visit is for postpartum women and is performed in conjunction with the 6-week postpartum visit in the office/clinic setting. The counseling services are those provided above and beyond the routine contraceptive counseling that is included in the postpartum visit. The purpose of this additional counseling time is to take full advantage of the window of opportunity that occurs just after delivery when the physical need for pregnancy delay is at a peak. An extended family planning counseling is limited to once during the post-partum period and is not available for women who have undergone a sterilization procedure or Plan First eligible recipients on the Plan First Program. It is not a covered service for recipients with Plan First eligibility and can only be provided as a family planning service by Medicaid eligible family planning providers to eligible recipients**.**

The following services are required:

- Contraceptive counseling and education
- STD/HIV risk screening and counseling, and
- Issuance of contraceptive supplies.

NOTE:

In the event of a premature delivery or miscarriage, the EDC, "Expected Date of Confinement", must be documented on the claim form in block 19 in order to be reimbursed for procedure code 99212-FP.

All visits must be documented in the recipient's chart and reflective of the treatment and care provided.

STD/HIV Risk Screening and (Pre-HIV test) Counseling (99401, Diagnosis Code Z309 [ICD-10])

STD/HIV screening, counseling, and testing is necessary to identify possibly infected persons who will benefit from medical treatment and to support and encourage all persons to practice responsible sex. Recipients who contract an STD are at greater risk of contracting HIV. Those who are HIV positive and contract an STD have a much greater chance of transmitting HIV. The best way to prevent HIV is to prevent an STD. For this reason, emphasis is being placed on STD/HIV screening and counseling in lieu of HIV testing only. The HIV pre-test counseling code will be used even though this activity is performed in conjunction with STD/HIV risk counseling.

Basic requirements of STD/HIV screening and counseling are:

1. Determine degree of risk
2. Intervene with education and counseling
3. Test for STD/HIV as clinically indicated
4. Screen for risk at the initial and annual visit or as clinically indicated
5. Document using Form 189 (STD/HIV Risk Screening and Intervention Tool)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Requirements Detailed:

- Determine degree of risk.
- Screen for STD/HIV risk using the screening tool provided. See Attachments for a reproducible copy.
- Intervene with education and counseling.
    a. Risk Level I - No risk factors identified. Minimal counseling required.
    b. Risk Level II - At Risk – Due to exposure to blood or blood products only. Limited counseling required.
    c. Risk Level III - One or more risk factors present: Prevention Counseling required using the PT+3 method.
- Test for STD/HIV as indicated by screening results and clinical symptoms.
- Document using the Form 189 (STD/HIV Risk Screening and Intervention Tool)
- Screen for risk at the initial and annual visit or as clinically indicated.

At a minimum, screening for STD/HIV risk is to be done at these visits, however screening and offering STD/HIV testing should be done as clinically indicated.

Please note that the pre-test counseling may be billed regardless of whether the counseling session results in the drawing of blood or of STD/HIV testing.

STD/HIV Post-Test Counseling (99402, Diagnosis Code Z309 [ICD-10])

Post-test counseling is performed to provide the recipient with test results. When STD testing results in a positive finding, the recipient should be called in and told of test results and treated immediately. A plan of notification of partners with treatment should be developed. Counseling should focus on immediate treatment and future prevention efforts.

Post-test counseling for HIV testing, if negative, should emphasize and reinforce the HIV prevention message imparted during the pre-test counseling session. If positive results are obtained, this counseling visit should focus on:

- the meaning of the test result,
- assisting with the emotional consequences of learning the result,
- providing a referral for and stressing the importance of getting into medical care as soon as possible,
- developing a plan to prevent transmission of HIV,
- developing a plan for notification of partners, and
- justification, if needed, for a second post-test counseling visit.

Should a second post-test visit be necessary, requirements for this second session are the same as those above. Forms for documentation of HIV testing and post-test counseling are available in reproducible form in the Attachment section. (Form 189- STD/HIV Risk Screening and Intervention Tool).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Counseling is limited to two counseling services per recipient each calendar year and must be performed in conjunction with a family planning visit. This means Medicaid will pay for a total of two counseling services. The recipient can have two services of 99401; or two services of 99402 or one service of 99401 and one service of 99402 in the same calendar year. Once two counseling services (99401 or 99402) are paid for the recipient for the year, Medicaid will not pay for additional counseling services for that calendar year.

BMI Requirements

Family Planning providers that bill procedure codes 99202-99205, 99211-99215, and 99242-99245 must include a BMI diagnosis on the claim or the claim will be denied. In instances where a BMI cannot be determined (e.g., wheelchair bound recipients) an override request may be submitted after the claim has been filed and denied. See Chapter 40 for Override request procedures.

The table below provides a description of procedure codes and ICD-10 codes that require a percentile on the CMS 1500 claim form for **recipient's age 8-19 years**:

Procedure Code Description	ICD-10 Diagnosis Code Description for Ages 8-19
99202 Office/Outpatient Visit New 99203 Office/Outpatient Visit New 99204 Office/Outpatient Visit New 99205 Office/Outpatient Visit New 99211 Office/Outpatient Visit Est 99212 Office/Outpatient Visit Est 99213 Office/Outpatient Visit Est 99214 Office/Outpatient Visit Est 99215 Office/Outpatient Visit Est 99242 Office Consultation 99243 Office Consultation 99244 Office Consultation 99245 Office Consultation	Z6851 BMI Pediatric, Less Than 5th Percentile for Age Z6852 BMI Pediatric, 5th Percentile to Less Than 85% for Age Z6853 BMI Pediatric, 85% To Less Than 95th Percentile for Age Z6854 BMI Pediatric, Greater Than or Equal To 95% for Age

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The table below provides a description of procedure codes and ICD-10 codes that require a BMI on the CMS 1500 claim form for **recipients age 20 and older**:

Procedure Code Description	ICD-10 Diagnosis Code Description For Ages 20 and Older

All rights reserved. Applicable FARS/DFARS apply.

C.2.3 Referrals

Family planning providers shall be responsible for referring the recipient to the proper resource, and for ensuring that the recipient is accepted by the resource to which they are referred, in the following circumstances:

a. Medical/GYN problems indicated by history, physical examination, or laboratory and clinical tests, including the removal of implantable contraceptive capsules.
b. Pregnancy related services.

C.2.4 Family Planning Drugs

Medically approved pharmaceutical supplies and devices, such as oral contraceptive pills, contraceptive patches, intrauterine devices, diaphragms, injections and implants are covered if provided for family planning purposes.

C.3 Sterilization

Counseling services involving complete information regarding male/female sterilization procedures shall be provided for the individual or couple requesting such services. These counseling services may be provided during any contraceptive visit to the office/clinic. Counseling and education should use the PT+ 3 teaching method. Full information concerning alternative methods of contraception will be discussed with the recipient.

NOTE:

The recipient is to be made aware that sterilization is considered permanent and irreversible and Medicaid does not cover the reversal of a voluntary sterilization. A "Consent to Sterilization" is a **Federal required form**. The sterilization consent form is included with a sterilization booklet given to the recipient.

Counseling related to sterilization **must** include:

- Assessment of base knowledge level of the reproductive process/sterilization procedure.
- Instruction as needed.
- Listing and discussion of all reversible contraceptive methods.
- Information stressing that the sterilization procedure is considered irreversible.
- Complete explanation of the sterilization procedures using charts or body models.
- Complete information concerning possible complications and failure rates.
- Information regarding the relative merits of male versus female sterilization given to both partners, if possible.
- Information explaining that sterilization does not interfere with sexual function or pleasure.

The counselor shall in no way coerce or “talk the recipient into being” sterilized.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

C.3.1 Contraindications to Sterilization

The following conditions shall be considered contraindications for voluntary sterilization:

- The recipient has physical, mental, or emotional conditions that could be improved by other treatment.
- The recipient is mentally incompetent or institutionalized, regardless of age.
- The recipient is suffering from temporary economic difficulties that may improve.
- The recipient or couple feels that they are not yet ready to assume the responsibilities of parenthood.
- The recipient expresses possible wish to reverse the procedure in case of a change of circumstances.

NOTE:

If sterilization is not desired, alternate methods of contraception must be discussed.

C.3.2 General Rules

Surgical procedures for male and female recipients as a method of birth control are covered services under the rules and regulations as stated in the *Alabama Medicaid Agency Administrative Code,* Chapter 14, Rule No. 560-X-14-.04, and as set forth below.

a. The recipient must be eligible for Medicaid at the time the procedure is performed.
b. The recipient is at least 21 years old at the time informed consent is obtained.
c. The recipient is mentally competent.
d. The recipient has voluntarily given informed consent in accordance with all requirements.
e. At least 30 days, but not more than 180 days, have passed between the date of signed informed consent and the date of sterilization, except in the case of premature delivery or emergency abdominal surgery.
f. A recipient may consent to be sterilized at the time of a premature delivery or emergency abdominal surgery if at least 72 hours have passed since he/she gave informed consent for the sterilization. In the case of premature delivery, the informed consent must have been given at least 30 days prior to EDC (expected date of delivery). If the recipient decides to be sterilized, the provider must be responsible for referring the recipient to the proper medical source and for ensuring that the recipient is accepted by that resource.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

In addition, the provider shall:

a. Inform the recipient that, in accordance with federal regulations, a 30-day waiting period is required between the time the consent form is signed and the procedure is performed.
b. Provide information and instructions concerning the need for follow-up, particularly for male recipients.
c. Provide appropriate post-operative semen analysis for vasectomy recipients.

NOTE:

Payment is not available for the sterilization of a mentally incompetent or institutionalized individual. Federal regulations prohibit Medicaid coverage of sterilization for anyone less than 21 years of age.

C.3.3 Digital Submission of the Sterilization Consent Form and Supporting Documentation

Effective October 26, 2016, providers will be able to upload or fax their fillable Sterilization Consent Forms and supporting documentation for review and processing via the Forms menu of the Alabama Medicaid Interactive Web Portal. A new form will allow providers the ability to upload Consent Forms and supporting documents in PDF format or create a fax barcode cover sheet from the Web Portal. Providers may submit additional documentation via fax at a later time and have that documentation combined with original document through the use of the same barcode cover sheet.

The provider must submit a copy of the recipient's signed sterilization consent form and supporting documentation to Gainwell via Provider Web Portal upload or fax at: (334) 215-7416.

Refer to Chapter 5, Filing Claims, for instructions on the digital submission of the Sterilization Consent Form and supporting documentation.

IMPORTANT NOTE:

The electronic fillable Sterilization Consent form and supporting documentation will be accepted in paper format via mail or fax **until November 27, 2016** at the following address and fax number:

Gainwell

Attention: Medical Policy Unit/Consent Forms

P.O. Box 244032, Montgomery Alabama 36124-4032

Fax Number: (334) 215-7416

After that date, consent forms and supporting documentation submitted to Gainwell on paper will be returned to the provider.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Electronic Fillable Version Sterilization Consent Form

An electronic fillable version of the Sterilization Consent Form is available on the Alabama Medicaid's website at the following link: http://www.medicaid.alabama.gov/documents/9.0_Resources/9.4_Forms_Library/9.4.3_Consent_Forms/9.4.3_Form_193_Consent_Sterilization_Fillable_9-26-16.pdf

The electronic fillable version must be printed to complete the signatures and dates. All signature and dates must be completed in black ink to ensure faxed copies are legible. Only electronic fillable Sterilization Consent Forms, signatures and dates completed in blank ink will be accepted by Gainwell. Handwritten Sterilization Consent Forms will not be accepted via fax.

Reference the Sterilization Consent Form Detailed Instructions Guide for additional information.

Details Regarding the Completion of the Sterilization Consent Form

Sterilization forms must be legible, complete and accurate. Gainwell will NOT pay any claims to ANY provider until a correctly completed appropriate form is on file at Gainwell.

All blanks on the consent form **must be** appropriately **completed** before Medicaid pays the provider for the sterilization procedure.

Consent forms submitted to Gainwell with missing and/or invalid information in non-correctable fields **(recipient's signature and date recipient signed, signature of the person obtaining consent and date person obtaining consent signed, and interpreter's signature and date interpreter signed, if an interpreter is used)** of the consent form will be denied by Gainwell and not returned to the provider. **Revisions to non-correctable fields are not accepted for any reason**. Before sending the consent form to Gainwell, it is imperative that the date of surgery be clarified by reviewing the operative note to remedy claim denials due to incorrect date of surgery.

NOTE:

When the claim for the sterilization procedure is submitted to Gainwell, the claim will suspend in the system for 35 days waiting for the approved consent form to be entered. The Saturday after the claim is keyed into the system, it will check to see if the consent form has been entered. It will check the system each Saturday, up to 35 days, for the approved consent form. After the 35th day, the claim will deny for no consent form on file. If the approved consent form is found in the system during the 35 days, it will process the claim on the Saturday it finds the form.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The sterilization consent forms shall be completed as follows.

a. The counselor must thoroughly explain the sterilization procedure to the recipient.
b. The “Consent to Sterilization” must be signed by the person to be sterilized at least 30 days prior to the procedure date. The birth date must indicate the person to be at least 21 years of age on the date the signature was obtained.
c. The person obtaining consent (counselor) and the title for that person (e.g., M.D., D.O., R.N., L.P.N., C.R.N.P., C.N.M.W.), if applicable, must be indicated on the consent form.
d. The counselor’s original signature with date, as well as the recipient’s signature with date, shall reflect that at least 30 days, but not more than 180 days, have passed prior to the procedure being performed. The counselor may sign the consent form on the same day as the recipient or after the recipient signs the consent form and prior to the date of the procedure.
e. If no interpreter is used, this section of the form must be marked as “Not Applicable” (N/A). If the “Interpreter’s Statement” is signed and dated, please complete the “in_____ language” line also. The recipient and interpreter must sign and date the consent form on the same date.

f. Procedure recorded in the “Physician’s Statement”: It is necessary for the recipient (by signature) to give consent in understanding their rights relative to the sterilization. Both sections of the form should indicate the same type of procedure. However, it is not necessary that the wording of the procedure/manner in which the sterilization is performed be identical under both sections of the form. Example: “Bilateral tubal ligation” listed in the recipient’s section and “postpartum tubal ligation” listed under the physician’s section is acceptable.

NOTE:

The physician's statement must be signed by the physician who is performing the sterilization procedure. Rubber stamped signatures are not permissible in this field. The physician must date the certification on the same date he or she signs it.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

C.4 Plan First

Plan First operates under an 1115 Demonstration Waiver granted by the Centers for Medicare and Medicaid Services (CMS). The Plan First Program expands the provision of family planning services to women, ages 19 through 55, and men ages 21 or older, with income up to 141 percent of the federal poverty level (FPL), that are not otherwise eligible for Medicaid. Men are eligible to receive only vasectomy services and enhanced family planning counseling services (referred to as "care coordination" services) with respect to arrangement for and follow-up to receipt of vasectomy services under the demonstration.

Plan First enrollees are also eligible to receive tobacco cessation counseling and products. Under Plan First, eligible women qualify for most family planning services and supplies, including birth control pills, the Depo-Provera shot, vaginal ring, diaphragm and contraceptive patch, doctor/clinic visits (for family planning only), smoking cessation products and counseling, and tubal ligations. Eligible men qualify for doctor/clinic visits (for family planning only), vasectomies and post semen analysis. Plan First does not cover any other medical services, and individuals who have been previously sterilized are not eligible for participation in this program.

NOTE:

Pain medication prescribed after a tubal ligation **is not** covered for a Plan First recipient. Women who receive a sterilization procedure and complete all necessary follow-up procedures will be disenrolled from Plan First.

NOTE:

If for medical reasons, a **Plan First recipient** requires an **inpatient stay** for sterilization, **prior approval** must be requested by the physician and approved by Medicaid prior to performing the sterilization. Please contact Gainwell for prior approval of an inpatient stay.

NOTE:

Effective for dates of service October 1, 2012 selected smoking cessation products are covered for Medicaid recipients on the Plan First Program. Prior authorization will not be required for Plan First recipients. Refer to Appendix Q Tobacco Cessation for additional information.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

C.5 Eligible Individuals

Eligible individuals are females of childbearing age between 19 through 55 years of age and men age 21 or older, for vasectomies only, who meet the eligibility criteria described below. These individuals are identified on the Eligibility Master File with an aid category of 50.

As always, providers are responsible for verifying eligibility and coverage via Provider Electronic Solutions (PES) or Automated Voice Response System (AVRS) systems.

Eligible recipients fall into four categories; however, there is no difference in benefits. The income limit for each of these groups must not exceed 141% of the federal poverty level (FPL). A standard income disregard of 5% of the FPL is applied if the individual is not eligible for coverage due to excess income. The four groups are described below:

Group 1

Women 19 through 55 years of age who have Medicaid eligible children (poverty level), who become eligible for family planning without a separate eligibility determination. They must answer yes to the Plan First question on the application. Income is verified at initial application and re-verified at recertification of their children. Eligibility is redetermined every 12 months.

Group 2

Poverty level pregnant women 19 through 55, whose pregnancy ends while she is on Medicaid. The Plan First Waiver system automatically determines Plan First eligibility for every female Medicaid member entitled to Plan First after a pregnancy has ended. Women automatically certified for the Plan First program receive a computer generated award notice by mail. If the woman does not wish to participate in the program, she can notify the caseworker to be decertified. Women who answered “no” to the Plan First question on the application and women who do not meet the citizenship requirement do not receive automatic eligibility. Income is verified at initial application and re-verified at re-certification of their children. Income is verified at initial application and re-verified at recertification of their children. Eligibility is redetermined every 12 months.

Group 3

Other women age 19 through 55 who are not pregnant, postpartum or who are not applying for a child must apply using a simplified shortened application. A Modified Adjusted Gross Income (MAGI) determination will be completed using poverty level eligibility rules and standards. Recipient declaration of income will be accepted unless there is a discrepancy. The agency will process the information through data matches with state and federal agencies. If a discrepancy exists between the recipient’s declaration and the income reported through data matches, the recipient will be required to provide documentation and resolve the discrepancy. Eligibility is redetermined every 12 months.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Group 4

Plan First men only age 21 and older, for vasectomies may complete a simplified shortened Plan First application (Form 357). An eligibility determination must be completed using poverty level eligibility rules and standards. Eligibility will only be for a 12-month period; therefore, retro-eligibility and renewals are not allowed. If the individual has completed the sterilization procedure but has not completed authorized follow-up treatments by the end of the 12-month period, a supervisory override will be allowed for the follow-up treatments. If the individual does not receive a vasectomy within the 12-month period of eligibility, then he will have to reapply for Medicaid eligibility.

NOTE:

Effective January 2014, Plan First women can check on their initial application whether they want to renew their eligibility automatically up to 5 years using income data from tax returns.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

C.6 Plan First Provider Enrollment

Participation in Plan First is open to any provider who wishes to be Medicaid enrolled and executes a Plan First agreement. Only those Plan First enrolled providers are able to service Plan First eligibles. Providers can be clinics, private physicians, nurse midwives, nurse practitioners, or physician assistants. Providers are bound by the requirements in the Appendix C of the Alabama Medicaid Provider Manual; The American College of Obstetrics and Gynecology guidelines and the approved 1115 Plan First Demonstration Waiver.

In addition to enrolling as a Medicaid provider through Gainwell, the provider must complete a Plan First agreement.

Clinics and clinic-based providers (Health Departments, FQHCs, and RHCs) are enrolled as one group. Individual providers within these groups are not required to individually enroll. Plan First recipients have the option of using any provider within these groups.

A provider who contracts with Alabama Medicaid as a Plan First provider is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for Plan First related claims. A specialty of 700 is added to the provider file for those enrolling in Plan First. In order for claims to process for Plan First recipients, this specialty code must be present on the provider file.

Medicaid providers that perform only tubal ligations or vasectomies do not have to enroll as Plan First providers. This includes surgeons, anesthesiologists and outpatient surgical centers.

If you have further questions regarding this program please call the Plan First Program Manager. If you wish to enroll please call Gainwell. Recipients may call the Plan First hotline toll-free at 1 (888) 737-2083 for more information.

C.6.1 Network List

The Alabama Medicaid Agency maintains a directory of all providers who have enrolled to provide services to Plan First eligibles. The list contains the provider's address and phone number and is sorted by the provider's county of practice. The provider directory is available online at the Alabama Medicaid web site (www.medicaid.alabama.gov).

Confidentiality

Providers agree that any information obtained through this program is confidential and will not be disclosed directly or indirectly except for purposes directly connected with the conduct of this program. The informed, written or verbal consent of the individual must be obtained for any disclosure.

Availability of Records

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The provider shall make available for review and audit by authorized representatives of the Alabama Medicaid Agency at all reasonable times, the medical records pertaining to the services rendered to program recipients.

C.7 Plan First Benefits and Limitations

Services covered are the same as current Medicaid family planning services unless otherwise noted. See Section C.2 for a listing of these.

C.7.1 Oral Contraceptives, Contraceptive Patch and Vaginal Ring

Effective 11/1/2009, women on Plan First have a new option of obtaining oral contraceptives, the contraceptive ring or the contraceptive patch at a Medicaid-enrolled community/outpatient pharmacy. This is in addition to the contraceptive products already available at the pharmacy such as Depo and diaphragms. In order to fill a prescription at a community/outpatient pharmacy, the Plan First recipient must have received the prescription from a private provider. A 30-day supply is the maximum that may be dispensed at one time.

NOTE:

Plan First recipients seeing providers at a Federally Qualified Health Center (FQHC) or the health department will continue to receive the oral contraceptives, contraceptive patch or vaginal ring from the FQHC or health department provider. A 12-month supply of contraceptives may be dispensed at one time. Recipients can also receive a Depo-Provera injection at a FQHC or the health department.

C.7.2 Long Acting Reversible Contraception

Effective for dates of service June 4, 2019, and thereafter, Alabama Medicaid will reimburse the cost of the long acting reversible contraceptive to the facility when provided in the inpatient hospital setting immediately after a delivery or up to the time of the inpatient discharge for postpartum women, or in an outpatient setting immediately after discharge from the inpatient hospital for postpartum women. The insertion of the device/drug implant will be billable to Medicaid by both the physician and hospital for reimbursement.

Refer to Chapter 19 Hospital for additional information.

NOTE:

Effective January 1, 2015, Plan First providers will receive reimbursement for the surgical removal of migrated or embedded IUDs in an office setting or outpatient hospital setting.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

C.7.3 Vasectomies

Effective for dates of service August 1, 2015, and thereafter, Medicaid began coverage of vasectomies under the Plan First Program for Plan First males recipients age 21 or older. Coverage includes one initial and two periodic visits, vasectomy in an office or outpatient hospital setting and semen analysis. All men receiving a vasectomy are required to have a completed Alabama Medicaid sterilization Consent Form (Form 193) prior to surgery. The Sterilization Consent Form must be completed in accordance with the guidelines listed below in section C.12.

Initial Visit for Plan First Male Receiving a Vasectomy (99205-FP)

The initial visit is the first time a Plan First male recipient receives family planning services. An initial visit is limited to one per provider per recipient per lifetime and can only be billed by the provider performing the vasectomy.

The initial visit requires the establishment of medical records, an in-depth evaluation of an individual including a complete physical exam, establishment of baseline laboratory data, contraceptive and sexually transmitted disease prevention counseling, and issuance of supplies or prescription. Counseling in the family planning setting is interactive and includes education. Counseling/education topics must be based on recipient's need and on protocol requirements.

Billable laboratory services for the initial visit may include:

- Hemoglobin or hematocrit,
- Urinalysis,
- STD/HIV test, and

Since a family planning visit may be the only medical encounter a Plan First male has, **performing the above laboratory tests is encouraged at the initial visit.**

The **physical assessment** is an integral part of the initial family planning visit for the Plan First male. The following services shall be provided during the initial visit:

- Height, blood pressure, and weight check
- Thyroid palpation
- Breast and axilla examination accompanied by instruction for self-breast examination
- Abdominal examination and liver palpation
- Auscultation of heart and lungs
- Examination of extremities for edema and varicosity
- Testicular, genital, and rectal examination for males.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Periodic Revisit for the Plan First Male Receiving a Vasectomy (99213-FP)

The periodic revisit is for a follow-up evaluation and semen analysis post vasectomy procedure for the Plan First male. Two periodic visits are allowed post vasectomy procedure for the eligible Plan First male recipient.

The following services, at a minimum, shall be provided during the periodic revisit:

- Weight and blood pressure
- Interim history
- Symptom appraisal as needed
- Documentation of any treatment/counseling including administration/issuance of contraceptive supplies.

Providers must use appropriate CPT, ICD Diagnosis Codes, and Place of Service Codes to bill for services provided.

The following CPT codes are applicable:

- **55250** Vasectomy- unilateral or bilateral, including postoperative semen examination(s)
- **00921** Anesthesia for vasectomy, unilateral or bilateral
- **89300** Semen analysis; presence and/or motility of sperm
- **99205-FP** Initial visit
- **99213-FP** Periodic visit

This procedure is only covered in an office or outpatient hospital setting, the place of service must be indicated on the CMS 1500 claim form in order to be reimbursed by Medicaid.

Place of Service Codes:

- **11** Office visit
- **22** Outpatient hospital setting

The following diagnosis codes must be billed in conjunction with the above CPT codes on the claim form (UB-04 or CMS-1500) in order to be reimbursed by Medicaid.

ICD-10 Diagnosis Code:

- **Z30018** Encounter for initial prescription of other contraceptives
- **Z302** Encounter for sterilization
- **Z308** Encounter for other contraceptive management

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

C.7.4 Care Coordination

Care coordination services for females are designed to provide special assistance to those women who are at high risk or low risk for an unintended pregnancy and allow for enhanced contraceptive education, encouragement to continue with pregnancy spacing plans and assistance with the mitigation or removal of barriers to successful pregnancy planning.

Care coordination services for males are designed for males enrolled in the Plan First program for vasectomy services. The service is designed to **overcome barriers males may encounter in** trying to receive the covered service. This may include, but is not limited to, establishing Medicaid eligibility **(assistance with completing the Form 357 (Lavender Application), the Joint Paper Application (Single Streamline Application) or the on-line application at insurealabama.org as applicable),** finding a provider to perform the surgery and to ensure compliance with follow-up appointments, **and coordinating medical and social resources as identified.**

As mentioned above, the goal of care coordination is to form a partnership with the recipient to address impediments to successful family planning. The bio-psychosocial model of care coordination is used to achieve this goal and includes:

- A psychosocial assessment and development of care plan for all recipients who accept care coordination.
- Counseling regarding sexuality, family planning, HIV/AIDS, STDs, and psychosocial issues identified in the assessment, such as substance abuse or domestic violence.
- Referrals and follow up to ensure appointments are kept, including subsequent family planning visits.
- Answers to general questions about family planning.
- Low-literacy family planning education based on the PT+3 model.
- Consultation with providers regarding problems with the selected family planning method.

The care coordinator will work diligently with family planning providers to ensure that recipients receive care coordination services in a timely manner. All Plan First recipients are eligible to receive an initial risk assessment to determine if and what type of care coordination services is needed.

C.7.5 Recipient Choice/Consent for Service

As with any family planning visit, the recipient must have freedom of choice in deciding to receive or reject family planning services. Acceptance of any family planning service must be voluntary without any form of duress or coercion applied to gain such acceptance. **Recipients are required to give written or verbal consent prior to receiving family planning services.**

C.8 Cost Sharing (Co-payment)

Medicaid recipients and Plan First beneficiaries are exempt from co-payment requirements for family planning services.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

There are to be no co-payments on prescription drugs/supplies that are designated as family planning.

Plan First Claims Information

Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

Claims for family planning services - See sections C.11, Completing the Claim form and C.11.2 and C.11.4 for diagnosis and procedure codes. Service requirements per visit are detailed in Section C.2.2, Family Planning Protocol - Clinical.

Non-enrolled Plan First providers who are billing for a tubal ligation or a tubal ligation with a family planning visit can file an electronic or paper claim to Gainwell in order to receive reimbursement. The approved Plan First tubal codes are 58600, 58615, 58670, and 58671. The Plan First family planning visit codes are 99205-FP (initial), 99214-FP (annual), or 99213-FP (periodic). In addition to these codes, the diagnosis code Z309 for ICD-10 must be used as well **as a secondary modifier of 56**.

Non-enrolled Plan First providers who are billing for a vasectomy or a vasectomy with a family planning visit can file an electronic or paper claim to Gainwell in order to receive reimbursement. The approved Plan First vasectomy code is 55250. The Plan First family planning visit codes are 99205-FP (initial) or 99213-FP (periodic). In addition to these codes, the diagnosis code Z309 for ICD-10 must be used as well **as a secondary modifier of 56**.

If the sterilization is **not** performed, the non-enrolled provider must use diagnosis code Z30.9 for ICD-10 and a secondary modifier of 56 with procedure code 99205-FP, 99214-FP or 99213-FP.

For information about Third Party Liability, please refer to Chapter 3, Section 3.3.7, Third Party Liability.

C.9 Quality Assurance Overview

As with any waiver, there is a requirement for Quality Assurance monitoring and complaint/grievance resolution.

The Waiver has four major goals:

- To assure accessibility of family planning services to eligible recipients,
- To assure that recipient assessments include the assessment and care plan appropriate for the risk level,
- To assure that the family planning encounters provided through enrolled providers follows the guidelines in the Appendix C, Plan First, of the Alabama Medicaid Provider Manual; The American College of Obstetrics and Gynecology, 1996; and
- To ensure that an effective complaint and grievance system is in place for both providers and recipients.

The Waiver has provisions for UAB to assist in providing outcome and summary reports to support effectiveness of the Program. This will enable comparisons between different sectors of populations and historical data.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Through referral from a Plan First Provider, the Waiver has approved Care Coordinators to assist recipients who are assessed to be at high risk or low risk of an unintended pregnancy. The Care Coordinators will make and follow a plan to aid the high risk and low risk recipients in avoiding unintended pregnancies through improved compliance and informed decisions about family planning services.

The Alabama Medicaid Agency is responsible for Quality Assurance, Complaint and Grievance Resolution, and Utilization Monitoring. In order to accomplish these Waiver requirements, the Agency has implemented several monitoring functions as outlined below:

- Utilization reports from claims data to monitor trends and utilization
- Monitor Care Coordinator activity via summary reports
- Review Summary Reports, from UAB
- Coordinate complaints and grievances to acceptable resolution.
- Conduct recipient medical record reviews

C.10 Services Other Than Family Planning

Services **required** to manage or treat medical conditions/diseases whether or not such procedures are also related to preventing or delaying pregnancy are **not** eligible as family planning. Many procedures that are completed for "medical" reasons also have family planning implications.

- Sterilization by hysterectomy is not a family planning covered service.
- Abortions are not covered as a family planning service. Refer to Chapter 28, Physician's Program, for details about abortions.
- Hospital charges incurred when a recipient enters the hospital for sterilization purposes, but then opts out of the procedure cannot be reimbursed as a family planning service.
- Removal of an IUD due to a uterine or pelvic infection is not considered a family planning service, and is not reimbursable as such.
- Colposcopy and biopsy of cervix/vagina performed to identify and treat medical conditions are not considered family planning services.
- Diagnostic or screening mammograms are not considered family planning services.
- Medical complications requiring treatment (for example, perforated bowel) caused by or following a family planning procedure are not a covered family planning service.
- Any procedure or service provided to a woman who is known to be pregnant is not considered a family planning service.
- Removal of contraceptive implants due to medical complications are not family planning services.

C.11 Completing the Claim Form

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions
- Improved access to eligibility information.

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

C.11.1 Time Limit for Filing Claims

Medicaid requires all claims for family planning to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits, for more information regarding timely filing limits and exceptions.

C.11.2 Diagnosis Codes and BMI Requirements

ICD-10 Diagnosis Codes

Z30011	Encounter for initial prescription of contraceptive pills
Z30013	Encounter for initial prescription of injectable contraceptive
Z30014	Encounter for initial prescription of intrauterine contraceptive device
Z30018	Encounter for initial prescription of other contraceptives
Z30019	Encounter for initial prescription of contraceptives, unspecified
Z3002	Counseling and instruction in natural family planning to avoid pregnancy
Z3009	Encounter for other general counseling and advice on contraception
Z302	Encounter for sterilization
Z3040	Encounter for surveillance of contraceptives, unspecified
Z3041	Encounter for surveillance of contraceptive pills
Z3042	Encounter for surveillance of injectable contraceptive
Z30430	Encounter for insertion of intrauterine contraceptive device
Z30431	Encounter for routine checking of intrauterine contraceptive device
Z30432	Encounter for removal of intrauterine contraceptive device
Z30433	Encounter for removal and reinsertion of intrauterine contraceptive device
Z3049	Encounter for surveillance of other contraceptives
Z308	Encounter for other contraceptive management
Z309	Encounter for contraceptive management, unspecified
Z3202	Encounter for pregnancy test, result negative
Z641	Problems related to multiparity

NOTE:

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

All claims filed for Plan First recipients must utilize one of the family planning diagnosis codes noted above. This includes claims filed for lab services. Diagnosis codes that are used and not listed above will cause the claim for a Plan First recipient to deny.

NOTE:
ICD-10 diagnosis codes must be listed to the highest number of digits possible (3, 4 or 5 digits). Do not use decimal points in the diagnosis code field.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

C.11.3 Family Planning Indicator References

Providers must complete the Family Planning Indicator, as applicable. "Y or "N" are the only valid indicators, when filing electronic claims.

C.11.4 Procedure Codes, Modifiers, and BMI Requirements

The (837) Professional and Institutional electronic claims and the paper claim have been modified to accept up to four Procedure Code Modifiers.

Collection of laboratory specimens may be billed only when sending specimens to another site for analysis if the other site is not owned, operated, or financially associated with the site in which the specimen was collected.

The collection fee may not be billed if the lab work is done at the same site where the specimen was collected or in a lab owned, operated, or financially associated with the site in which the specimen was collected.

Providers will not be paid for and should not submit claims for laboratory work done for them by independent laboratories or by hospital laboratories.

Providers may submit claims for laboratory work done by them in their own offices or own laboratory facilities. Providers who send specimens to independent laboratories for analysis may bill a collection fee. This fee shall not be paid to any provider who has not actually extracted the specimen from the recipient.

NOTE:

Providers should use procedure code 36415-90 for routine venipuncture collection, 36416-90 for collection of capillary blood specimen (e.g., finger, heel, ear stick) and Q0091-90 for collection of Pap smear specimen.

NOTE:

Family planning visits do not count against the recipient's office visits when the procedure codes listed below and the appropriate family planning indicator are used.

Code	Procedure Description
99402	STD/HIV Post-test Counseling (Must be billed in conjunction with a family planning visit) – Limited to two per recipient per calendar year. (Must use diagnosis code Z309 for ICD-10)
99401	STD/HIV Risk Screening and HIV Pre-test Counseling (Must be billed in conjunction with a family planning visit) – Limited to two per recipient per calendar year. (Must use diagnosis code Z309 for ICD-10)
88305	Level IV Surgical Pathology, gross and microscopic examination
88304	Level III Surgical Pathology, gross and microscopic examination
88302	Surgical pathology, gross and microscopic examination
88300	Level I Surgical Pathology, gross examination only
89300	Semen analysis; presence and/or motility of sperm
88175	Cytopathology, cervical or vaginal (any reporting system), collected in preservative fluid, automated thin layer preparation; with screening by automated system and manual rescreening, under physician supervision.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Code	Procedure Description
88174	Cytopathology, cervical or vaginal (any reporting system), collected in preservative fluid, automated thin layer preparation; screening by automated system, under physician supervision.
88167	Cytopathology, slides, cervical or vaginal
88166	Cytopathology, slides, computer assisted rescreening
88165	Cytopathology, slides, cervical or vaginal
88164	Cytopathology, slides, cervical or vaginal
88162	Cytopathology, any other source
88161	Cytopathology, any other source
88160	Cytopathology, smears, any other source
88155	Cytopathology, slides, cervical or vaginal
88154	Cytopathology, slides, computer assisted
88153	Cytopathology, slides, manual screening & rescreening under physician supervision (use in conjunction with 88142-88154, 88164-88167)
88152	Cytopathology, slides, cervical or vaginal
88150	Cytopathology, manual screening under physician supervision
88148	Cytopathology, screening by automated system with manual rescreening
88147	Cytopathology smears, screening by automated system under physician supervision
88143	Cytopathology, manual screening & rescreening under physician supervision
88142	Cytopathology, cervical or vaginal, automated thin layer preparation
88141	Cytopathology, cervical or vaginal; requiring interpretation by physician (use in conjunction with 88142-88154, 88164-88167)
88108	Cytopathology, concentration technique, smears and interpretation
87850	Neisseria gonorrhea
87801	Infectious agent detection by nucleic acid (DNA or RNA), multiple organisms; amplified probe(s) technique
87798	Infectious agent detection by nucleic acid (DNA or RNA), not otherwise specified; amplified probe technique, each organism. (Not billable by ADPH effective June 30, 2015.)
87797	Infectious agent detection by nucleic acid (DNA or RNA); not otherwise specified, direct probe technique
87661	Trichomonas vaginalis, amplified probe technique
87660	Trichomonas vaginalis, direct probe technique
87625	Human Papillomavirus (HPV), types 16 & 18 only
87624	Human Papillomavirus (HPV), high-risk types
87623	Human Papillomavirus (HPV), low-risk types
87592	Neisseria gonorrhea, quantification
87591	Neisseria gonorrhea, amplified probe technique. (Not billable by ADPH effective June 30, 2015.)
87590	Neisseria gonorrhea, direct probe technique
87539	HIV-2, quantification
87538	HIV-2, amplified probe technique
87537	HIV-2, direct probe technique
87536	HIV-1, quantification
87535	HIV-1, amplified probe technique
87534	HIV-1, direct probe technique
87533	Herpes virus-6, quantification
87532	Herpes virus-6, amplified probe technique
87531	Herpes virus-6, direct probe technique
87530	Herpes simplex virus, quantification
87529	Herpes simplex virus, amplified probe technique
87528	Herpes simplex virus, direct probe technique
87512	Gardnerella vaginalis, quantification
87511	Gardnerella vaginalis, amplified probe technique
87510	Gardnerella vaginalis, direct probe technique

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Code	Procedure Description
87491	Infectious agent detection by nucleic acid (DNA or RNA); Chlamydia Trachomatis. Amplified probe technique. (Not billable by ADPH effective June 30, 2015.)
87490	Infectious agent detection by nucleic acid (DNA or RNA); Chlamydia Trachomatis. Direct probe technique.
87482	Candida species, quantification
87481	Candida species, amplified probe technique
87480	Candida species, direct probe technique
87389	Infectious Agent Antigen
87220	Tissue examination for fungi
87210	Smear, primary source, with interpretation, wet mount with simple stain, for bacteria, fungi, ova, and/or parasites
87209	Smear, primary source with interpretation; complex special stain (eg, trichrome, iron hemotoxylin) for ova and parasites
87207	Smear, primary source, with interpretation, special stain for inclusion bodies or intracellular parasites (e.g., malaria, kala azar, herpes)
87206	Smear, primary source, with interpretation, fluorescent and/or acid fast stain for bacteria, fungi, or cell types
87205	Smear, primary source, with interpretation; routine stain for bacteria, fungi, or cell types
87177	Smear, primary source, with interpretation, wet and dry mount for ova and parasites, concentration and identification
87164	Dark field examination, any source; includes specimen collection
87110	Culture, chlamydia
87081	Culture, bacterial, screening only, for single organisms
86780	Antibody; Treponema Pallidum
86703	HIV – 1&2
86702	Antibody HIV-2
86701	HIV – 1
86695	Herpes simples, type 1
86694	Herpes simplex, non-specific type test
86689	HTLV or HIV antibody
86593	Syphilis
86592	Syphilis
85032	Manual cell count (erythrocyte, leukocyte or platelet) each
85027	Blood count; RBC only
85025	Blood count; hemogram and platelet count, automated, and automated complete differential WBC count (CBC)
85018	Blood count; hemoglobin
85014	Blood count; other than spun hematocrit
85013	Blood count; spun microhematocrit
85009	Blood count; differential WBC count, buffy coat
85008	Blood count; manual blood smear examination without differential parameters
85007	Blood count; manual differential WBC count (includes RBC morphology and platelet estimation)
84703	HCG qualitative
84702	HCG quantitative
81025	Urine pregnancy test
81020	Urinalysis; two or three glass test
81015	Urinalysis microscopic only
81007	Urinalysis; bacteriuria screen, by non-culture technique, commercial kit
81005	Urinalysis; qualitative or semiquantitative, except immunoassays
81003	Urinalysis; automated without microscopy
81002	Urinalysis; non-automated without microscopy
81001	Urinalysis; automated with microscopy

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Code	Procedure Description
81000	Urinalysis by dip stick or tablet reagent
76881	Contraceptive surveillance, unspecified of a missing Nexplanon
76830	Transvaginal Ultrasound Non-OB
76857	Ultrasound, Pelvic (Nonobstetric), real time with image documentation; limited or follow-up (EG, for follicles) **(This procedure is to be used for locating missing IUDs Only)**
74740	Hysterosalpingography, radiological supervision and interpretation
73060	X-ray of Humerus-Purpose Location of Nexplanon Capsules
58671	Tubal ligation by laparoscopic surgery
58670	Tubal ligation by laparoscopic surgery
58615	Tubal ligation by suprapubic approach
58611	Tubal ligation done in conjunction with a c-section (*Not applicable for Plan first)*
58605	Tubal ligation by abdominal approach (postpartum) (*Not applicable for Plan first)*
58600	Tubal ligation by abdominal incision
58565	Hysteroscopy, surgical; with bilateral fallopian tube cannulation to induce occlusion by placement of permanent implants (by Prior Approval only; **See note box below)
58562	Hysteroscopy, surgical; with removal of impacted foreign body
A4264	Intratubal occlusion device (by Prior Approval only; **See note box below)
58340	Catheterization and introduction of saline or contrast material for saline infusion sonohysterography (SIS) or hysterosalpingography
58301	IUD removal
58300	IUD insertion
57800-FP	Dilation of cervical canal, instrumental (separate procedure)
57410-FP	Pelvic examination under anesthesia (other than local)
57170	Diaphragm – fitting with instructions **only.** Does not include the device.
55250	Vasectomy –unilateral or bilateral, including postoperative semen examination(s)
11980	Subcutaneous hormone pellet implantation(implantation of estradiol and/or testosterone beneath the skin)
11976	Removal, implantable contraceptive capsule
11981-FP	Insertion, non-biodegradable drug delivery implant
11982-FP	Removal, non-biodegradable drug delivery implant
00921	Anesthesia for vasectomy, unilateral or bilateral
00952-FP	Anesthesia for hysteroscopy and/or hysterosalpingography procedures
00940-FP	Anesthesia for vaginal procedures (including biopsy of labia, vagina, cervix or endometrium); not otherwise specified
00851	Anesthesia Intraperitoneal procedures in lower abdomen including laparoscopy; tubal ligation/transection.
J1050-FP	Depo-Provera-no less than 104 mg and no more than 150 mg per injection once every 70 days
J7296	Kyleena IUD (Levonorgestrel-releasing intrauterine contraceptive system, 19.5mg limited to one every 5 years). Exceptions are in NOTE box below. **Effective January 1, 2018, providers should bill J7296 on the claim form for reimbursement**.
J7297	Liletta IUD (Levonorgestrel-releasing intrauterine contraceptive system, 52 mg) limited to one every 5 calendar years. Exceptions are in the NOTE box below

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Code	Procedure Description
J7298	Mirena IUD (Levonorgestrel-releasing intrauterine contraceptive system, 52 mg) limited to one every 5 calendar years. Exceptions are in the NOTE box below
J7301	Skyla IUD (limited to one every 3 years). Exceptions are in NOTE box below.
J7304-FP	Contraceptive Patch (For Health Department Billing Only) TPL exempt
J7304-SE	Contraceptive Patch (For FQHCs, PRHCs, IRHCs Billing only)
J7303-FP	Vaginal Ring (For Health Department billing only and is covered for Plan First)
*J3490	Kyleena IUD (limited to one every 5 years). Exceptions are in NOTE box below. * For dates of service April 01, 2017 through June 30, 2017 bill J3490. See Q9984 for dates of service July 01, 2017 through December 31, 2017.
99205-FP	Initial visit
99214-FP	Annual visit
99213-FP	Periodic visit
99347-FP	Home visit – Limited to one per post-partum period as a family planning covered service. (Not applicable for Plan First eligible recipients)
S4993-FP	Birth control pills (For Health Department billing only)
96372	Therapeutic, prophylactic or diagnostic injection (specify substance or drug); subcutaneous or intramuscular.
99212-FP	Extended contraceptive counseling visit (May be billed in conjunction with the postpartum visit – Limited to one service during the postpartum period as a family planning covered service. (Not applicable for Plan First eligible recipients.)
S4993-SE	Birth Control Pills (For FQHCs, PRHCs, IRHCs Billing only)
J7307	Etonogestrel (contraceptive) implant system, including implants and supplies also known as Nexplanon Effective 1/1/2008, J7307 replaces S0180
J7300	Mechanical (Paragard) IUD
Q0091	Collection of Pap smear specimen
Q0111	Wet mounts
Q9984	Kyleena IUD (limited to one every 5 years). Exceptions are in NOTE box below. Bill Q9984 for dates of service July 01, 2017 through December 31, 2017. See J7296 for dates of service January 1, 2018 and thereafter.
36415-90	Routine venipuncture for collection
36416-90	Collection of capillary blood specimen (eg, finger, heel, ear stick)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Sterilizations

NOTE:

The Essure method of sterilization is restricted to Prior Approval and also requires a sterilization consent form. The limitations are as follows:
This procedure must be performed in an outpatient setting and the recipient must meet one of the following criteria:
Morbid obesity (BMI of 45 or greater); or
Abdominal mesh that mechanically interfaces with laparoscopic tubal ligation sterilization procedures; or
Permanent colostomy with documented adhesions; or
Multiple abdominal/pelvic surgeries with documented severe adhesions; or
Artificial heart valve requiring continuous anticoagulation; or
Other severe medical problems that would be a contraindication to laparoscopic tubal ligation procedures based on medical documentation submitted.
Effective January 1, 2010, Medical providers will use two procedures to bill for the Essure. A4264 will be used for reimbursement of the device and 58565 will be used for reimbursement of the procedure. The outpatient facility will only bill 58565 for the surgical procedure.

NOTE:

Once a sterilization claim is processed for a Plan First recipient, the Medicaid eligibility is ended. Therefore, a claim for the Essure related follow-up procedures (58340 and 74740) would deny due to no eligibility. The performing provider should submit the claims for procedures 58340 and 74740 for administrative review to:

Alabama Medicaid Agency
Plan First Program Manager
501 Dexter Avenue
Montgomery, AL 36103

The claims will be researched and a lump sum payment will be made to the provider if there is a paid claim on file for the Essure procedure.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

IUDs

NOTE:

Effective 1/1/2010, the Mirena IUD is restricted to 1 every 5 years. The recipient cannot have another Mirena IUD, but may receive a different type of IUD (Skyla, Liletta, Paragard, or Kyleena) or different birth control method (oral contraceptives, contraceptive patch, vaginal ring, Depo-Provera, etc. in a 5 year period. The only exception to this 5 year restriction is if the recipient meets one or more of the criteria listed below. If a recipient meets one or more of the criteria listed below she may qualify for another Mirena IUD within a 5 year period.

1. Recipient develops high blood pressure or any other medical condition that would allow for a progestin only method.

2. Any nulliparous woman who has a spontaneous expulsion within 6 months of placement.

3. Mirena IUD is removed to allow a pregnancy. Once delivered, recipient is eligible for another Mirena IUD.

4. Surgical removal of an embedded IUD in an office or outpatient setting.

In order to receive reimbursement, providers will need to submit a clean claim and medical records documenting the above mentioned criteria to the:

Plan First Program Manager
Alabama Medicaid Agency
Managed Care Division
P. O. Box 5624
Montgomery, AL 36103-5624

NOTE:

Effective January 1, 2012, intrauterine devices (IUDs) and implantable contraceptive devices will be reimbursed only when billed on a medical claim. Pharmacies will no longer be able to bill for these devices for a specific recipient and ship to the provider for insertion/implantation. Example devices include Mirena®, Paragard®, Nexplanon®, Liletta®, Kyleena® and Skyla®.

NOTE:

Effective 5/1/2012, Federally Qualified Health Centers and Rural Health Centers may submit claims for Mirena®, Paragard®, Liletta, Nexplanon®, and Kyleena® fee-for-service outside the encounter rate. FQHC and RHCs may submit a separate medical claim using the following procedure codes:

Mirena® - J7298	Skyla®- J7301
Paragard® - J7300	Liletta®- J7297
Nexplanon® – J7307	Kyleena® - J7296

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

Effective 1/1/2014, the Skyla IUD is restricted to 1 every 3 years. The recipient **cannot** have another Skyla IUD, but may receive a different type of IUD (Mirena, Liletta, Paragard, or Kyleena) or different birth control method (oral contraceptives, contraceptive patch, vaginal ring, Depo-Provera, etc.).
The only exception to this 3 year restriction is if the recipient meets one or more of the criteria listed below. If a recipient meets one or more of the criteria listed below, she may qualify for another Skyla IUD within a 3 year period.

1. Recipient develops high blood pressure or any other medical condition that would allow for a progestin only method.

2. Any nulliparous woman who has a spontaneous expulsion within 6 months of placement.

3. Skyla IUD is removed to allow a pregnancy. Once delivered, recipient is eligible for another Skyla IUD.

4. Surgical removal of an embedded IUD in an office or outpatient setting.

In order to receive reimbursement, providers will need to submit a clean claim and medical records documenting the above mentioned criteria to the:

Plan First Program Manager
Alabama Medicaid Agency
Managed Care Division
P.O. Box 5624
Montgomery, AL 36103-5624

NOTE:

Effective 10/15/2018, the Liletta IUD is restricted to 1 every 5 years. The recipient **cannot** have another Liletta IUD, but may receive a different type of IUD (Mirena, Skyla, Paragard, or Kyleena) or different birth control method (oral contraceptives, contraceptive patch, vaginal ring, Depo-Provera, etc.). The only exception to this 5 year restriction is if the recipient meets one or more of the criteria listed below. If a recipient meets one or more of the criteria listed below, she may qualify for another Liletta IUD within a 5 year period.

1. Recipient develops high blood pressure or any other medical condition that would allow for a progestin only method.

2. Any nulliparous woman who has a spontaneous expulsion within 6 months of placement.

3. Liletta IUD is removed to allow a pregnancy. Once delivered, recipient is eligible for another Liletta IUD.

4. Surgical removal of an embedded IUD in an office or outpatient setting.

In order to receive reimbursement, providers will need to submit a clean claim and medical records documenting the above mentioned criteria to the:

Plan First Program Manager
Alabama Medicaid Agency
Managed Care Division
P.O. Box 5624
Montgomery, AL 36103-5624

NOTE:

Effective for dates of service 9/1/2016, and thereafter, Medicaid began coverage of the Kyleena IUD. The Kyleena IUD is restricted to 1 every 5 years. The recipient **cannot** have another Kyleena IUD, but may receive a different type of IUD (Mirena, Skyla, Paragard, or Liletta) or different birth control method (oral contraceptives, contraceptive patch, vaginal ring, Depo-Provera, etc.). The only exception to this 5 year restriction is if the recipient meets one or more of the criteria listed below. If a recipient meets one or more of the criteria listed below, she may qualify for another Kyleena IUD within a 5 year period.

1. Recipient develops high blood pressure or any other medical condition that would allow for a progestin only method.

2. Any nulliparous woman who has a spontaneous expulsion within 6 months of placement.

3. Kyleena IUD is removed to allow a pregnancy. Once delivered, recipient is eligible for another Kyleena IUD.

4. Surgical removal of an embedded IUD in an office or outpatient setting.

In order to receive reimbursement, providers will need to submit a clean claim and medical records documenting the above mentioned criteria to the:

Plan First Program Manager
Alabama Medicaid Agency
Managed Care Division
P.O. Box 5624
Montgomery, AL 36103-5624

NOTE:

Effective 1/1/2008 the Nexplanon implant is restricted to 1 every 3 years. The recipient **cannot** have another Nexplanon implant but may receive an IUD (Mirena, Skyla, Paragard, or Liletta) or different birth control method (oral contraceptives, contraceptive patch, vaginal ring, Depo-Provera, etc.). The only exception to this 3 year restriction is if the recipient meets one or more of the criteria listed below. If a recipient meets one or more of the criteria listed below, she may qualify for another Nexplanon implant within a 3 year period.

1. Recipient develops high blood pressure or any other medical condition that would allow for a progestin only method.

2. Any nulliparous woman who has an embedded or migration of Nexplanon implant within 6 months of placement.

3. Nexplanon implant is removed to allow a pregnancy. Once delivered, recipient is eligible for another Nexplanon implant.

4. Surgical removal of an embedded or migration of Nexplanon implant in an office or outpatient setting.

In order to receive reimbursement, providers will need to submit a clean claim and medical records documenting the above mentioned criteria to the:

Plan First Program Manager
Alabama Medicaid Agency
Managed Care Division
P.O. Box 5624
Montgomery, AL 36103-5624

Modifiers

Appropriate Use of Modifiers

Please refer to this CMS link for more information regarding NCCI edits: https://www.medicaid.gov/medicaid/program-integrity/national-correct-coding-initiative-medicaid/index.html

Modifier 25 (Significant, Separately Identifiable Evaluation and Management Service by the Same Physician on the Same Day of the Procedure or Other Service)
It may be necessary to indicate that on the day a procedure or service identified by CPT code was performed, the recipient's condition required a significant, separately identifiable E&M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E&M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E&M service to be reported.

BMI Requirements

Plan First providers that bill procedure codes 99205, 99212, 99213, or 99214 must include a BMI diagnosis on the claim or the claim will be denied. In instances where a BMI cannot be determined (e.g., wheelchair bound recipients) an override request may be submitted after the claim has been filed and denied. See Chapter 40 for Override request procedures.

The table below provides a description of procedure codes and ICD-10 codes that require a percentile on the CMS 1500 claim form for **recipient's age 8-19 years**:

Procedure Code Description	ICD-10 Diagnosis Code Description for Ages 8-19
99205 Office/Outpatient Visit New 99212 Office/Outpatient Visit Est 99213 Office/Outpatient Visit Est 99214 Office/Outpatient Visit Est	Z6851 BMI Pediatric, Less Than 5th Percentile for Age Z6852 BMI Pediatric, 5th Percentile to Less Than 85% for Age Z6853 BMI Pediatric, 85% To Less Than 95th Percentile for Age Z6854 BMI Pediatric, Greater Than or Equal To 95% for Age

The table below provides a description of procedure codes and ICD-10 codes that require a BMI on the CMS 1500 claim form for **recipients age 20 and older**:

Procedure Code Description	ICD-10 Diagnosis Code Description For Ages 20 and Older
99205 Office/Outpatient Visit New 99212 Office/Outpatient Visit Est	Z681 Body Mass Index (BMI) 19 Or Less, Adult Z6820 Body Mass Index (BMI) 20.0-20.9, Adult Z6821 Body Mass Index (BMI) 21.0-21.9, Adult Z6822 Body Mass Index (BMI) 22.0-22.9, Adult Z6823 Body Mass Index (BMI) 23.0-23.9, Adult Z6824 Body Mass Index (BMI) 24.0-24.9, Adult Z6825 Body Mass Index (BMI) 25.0-25.9, Adult Z6826 Body Mass Index (BMI) 26.0-26.9, Adult

Patient Name_____ Sex: M F Today's Date _____

STD/HIV Risk Screening and Intervention Tool

Questions/Risk Factors	YES	NO
1. Have you had a blood transfusion or received any blood products prior to 1985? ***Blood exposure?***		
2. Have you ever had a job that exposed you to blood or other body fluids? Like a nursing Home or a day care or hospital? Doctor's office? Funeral Home? ***Occupational exposure?***		
3. Your medical history tells me that you (do or do not have) the free bleeding disease called Hemophilia. Is that correct? ***Has Hemophilia?***		
4. Has the use of alcohol or any other drug ever caused you to do things sexually that you Normally would not do? ***Risky use of alcohol or non-IV drugs****?*		
5. Have you **ever** put drugs of any type into your veins? ***Ever an IV drug user?***		
6. Have you ever had any type of infection of the sex organs*?* ***History of STDs?***		
7. Think about the first time you had sex. (Since your last HIV test?) Have you had sex With more than one partner since then? What about your current partner? ***Multiple Sex Partners***?		
8. Some women and some men use sex to get things they need. Have you ever had to do this?		
9. Have you ever been hit, kicked, slapped, pushed or shoved by your partner? ***History of Abuse?***		
10. Some women/men prefer sex with men, some with women and some with both. What type of partner do you prefer? **Circle One: Man Woman Both**		
11. **As far as you know,** have you ever had sex with someone who		
a. was a free bleeder or Hemophiliac?		
b. had HIV or AIDS or an STD?		
c. was a man who had sex with men?		
d. used IV drugs or put drugs into their veins?		
e. was a prostitute - either male or female?		
NOTE: For screening after a previous negative HIV test, ask, "Since your last HIV test ..."		

Documentation instructions and explanations:

1. **Yes or No.** Blood transfusion prior to 1985 places the person at risk for HIV/AIDS.
2. **Yes or No**. Any profession that exposes the patient to body fluids creates a risk for HIV/AIDS.
3. **Yes or No**. Yes, if the patient has Hemophilia; No, if does not have the disease. Hemophilia itself does not create risk for HIV, but the use of blood and blood products by the patient does create risk for HIV/AIDS.
4. **Yes or No.** Use of alcohol or non-IV drugs in a setting/manner that results in sexual risk taking places a person at risk for both STDs and HIV.
5. **Yes or No.** IV drug use is a risk factor for HIV specifically.
6. **Yes or No**. A history of any STD places the patient at risk for another STD including HIV/AIDS.
7. **Yes or No.** Having more than one partner places a patient at risk for both STDs and HIV, unless the partners were prior to 1978.
8. **Yes or No**. Exchanging sex for anything places a person at risk for both HIV and STDs.
9. **Yes or No.** Any type of abuse or coerciveness that the patient has experienced places the patient at risk for both HIV and STDs
10. **Circle** the appropriate choice. Male homosexuality and/or male bisexuality are risk factors for HIV/AIDS.
11. **a-e. Yes or No.** Any Yes answer is considered a risk factor for both STDs and HIV/AIDS.

Intervention Documentation: Circle the intervention taken

Level I: - No risk factors identified – No counseling required. Offer "STDs – Don't…" Handout – because "sometimes we change". HIV testing w/counseling is optional – at patient request.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Level II: Risks are related to blood products exposure ONLY – Recommend HIV test. Inform of need for and explain universal precautions. Use "STDs – Don't… " handout.
Level III: Any other risk factor present - significant risk exists. Recommend strongly the HIV test. Test for other STDs as CI. Provide prevention counseling about need for change in (specifically identified) habits and importance of protected sex. Use "STDs – Don't…" handout. Provide skill training in use of condom and in negotiation skills.
Remember: All patients should be given information the handout, "Facts about HIV and HIV testing."

Documentation of HIV testing:

❑ ***HIV Testing Done***

❑ ***NO HIV Test drawn***

ALABAMA MEDICAID AGENCY STERILIZATION CONSENT FORM

NOTICE: YOUR DECISION AT ANY TIME TO BE STERILIZED WILL NOT RESULT IN THE WITHDRAWAL OR WITH HOLDING OF ANY BENEFITS PROVIDED BY PROGRAMS OR PROJECTS RECEIVING FEDERAL FUNDS.

CONSENT TO STERILIZATION

I have asked for and received information about sterilization from

_____
Physician or Clinic

When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as Temporary Assistance for Needy Families (TANF) or Medicaid that I am now getting or for which I may become eligible.

I UNDERSTAND THAT THE STERILIZATION MUST BE CONSIDERED PERMANENT AND NOT REVERSIBLE. I HAVE DECIDED THAT I DO NOT WANT TO BECOME PREGNANT, BEAR CHILDREN OR FATHER CHILDREN.

I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as a

_____
Specify Type of Operation

The discomforts, risks, and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least thirty days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the with-holding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on _____.
Month/Day/Year

I, _____
Name of the Recipient

hereby consent of my own free will to be sterilized by

_____
Physician or Clinic

by the method called _____.
Specify Type of Operation

My consent expires 180 days from the date of my signature below. I also consent to the release of this form and other medical records about this operation to: Representatives of the Department of Health and Human Services or Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

X_____ X_____
Recipient's Signature Date

_____
Type/Print Recipient's Name

_____
Recipient's Medicaid Number

INTERPRETER'S STATEMENT

If an interpreter is provided to assist the recipient to be sterilized: I have translated the information and advice presented orally to the recipient to be sterilized by the person obtaining the consent. I have also read him/her the consent form in _____ language and explained its contents to him/her. To the best of my knowledge and belief, he/she understood this explanation.

_____ _____
Interpreter's Signature Date

Form 193 (Rev. 9-26-2016)

STATEMENT OF PERSON OBTAINING CONSENT

Before _____
Name of the Recipient

signed the consent form, I explained to him/her the nature of the sterilization operation _____, the
Specify Type of Operation

fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the recipient to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the recipient to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the recipient to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

X_____ X_____
Signature of Person Obtaining Consent Date

_____
Type or Print Name

_____
Facility

_____
Address

PHYSICIAN'S STATEMENT

Shortly before I performed a sterilization operation upon

_____ on X_____
Name of the Recipient Date of Sterilization

I explained to him/her the nature of the sterilization operation _____.
Specify Type of Operation

the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the recipient to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the recipient to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the recipient to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

(Instructions for use of alternative final paragraphs: Use the first paragraph below except in the case of premature delivery or emergency abdominal surgery where the sterilization is performed less than 30 days after the date of the recipient's signature on the consent form. In those cases, the second paragraph below must be used. Cross out the paragraph, which is not used.)

(1) At least thirty days have passed between the date of the recipient's signature on the consent form and the date the sterilization was performed.

(2) This sterilization was performed less than 30 days but more than 72 hours after the date of the recipient's signature on this consent form because of the following circumstances (check applicable box and fill in information requested):

☐ Premature delivery
Recipient's expected date of delivery: _____

☐ Emergency abdominal surgery **(describe circumstances in an attachment)**

Sterilization Consent Form Detailed Instructions Guide

It is the responsibility of the **performing surgeon to submit a legible completed** copy of the Sterilization Consent Form (Form 193) **after** the surgery to Medicaid's fiscal agent, Gainwell Technologies (Gainwell). Consent forms should not be submitted to Gainwell prior to the surgery date. Receipt of multiple consent forms slows down the consent form review process and payment of claims. For timely processing, providers must complete all required fields and the performing surgeon must submit a copy of the recipient's signed Sterilization Consent Form to Gainwell using the Provider Web Portal upload process or via the fax number listed below:

Gainwell
ATTN: Medical Policy Unit/Consent Forms
Fax Number: (334) 215-7416

If submitting this form via fax, a barcode fax coversheet is required with each submission and should be included as page one of the fax transmission for the corresponding Record ID.

Effective November 28, 2016, Gainwell will not accept Consent Forms and supporting documentation in paper format. Consent Forms and supporting documents submitted to Gainwell in paper format on/after November 28, 2016 will be returned to the provider.

ONLY an electronic fillable version of the Sterilization Consent Form can be faxed to Gainwell. **The electronic fillable version of the Sterilization Consent Form** is located on the Alabama Medicaid's website at the following link:
http://www.medicaid.alabama.gov/documents/9.0_Resources/9.4_Forms_Library/9.4.3_Consent_Forms/9.4.3_Form_193_Consent_Sterilization_Fillable_9-26-16.pdf

The electronic fillable version must be printed to complete the signatures and dates. **All SIGNATURES AND DATES MUST BE COMPLETED IN BLACK INK TO ENSURE FAXED COPIES ARE LEGIBLE.**

Note: Gainwell will **not** accept any Sterilization Consent Forms by **email**.

Reference Section C.3.3 for updates regarding the digital submission of the Sterilization Consent Form and supporting documentation effective October 26, 2016.

All blanks on the Sterilization Consent Form must be appropriately completed. Gainwell will **NOT** pay any claims to **ANY** provider until a correctly completed **Alabama Medicaid Agency Sterilization Consent Form (Form 193)** is on file at Gainwell.

Gainwell will return forms to the provider upon identification of missing or invalid information in correctable fields. **Consent forms submitted to Gainwell with missing and/or invalid information in *NON-CORRECTABLE FIELDS [Fields 7, 8, (12 & 13, if provided), 16 and 17] of the consent form will be denied by Gainwell and not returned to the provider, therefore all claims associated with the sterilization WILL NOT BE PAID.**

Before sending the consent form to Gainwell, it is imperative that the **date of surgery** be clarified by reviewing the operative note to remedy claim denials due to incorrect date of surgery.

NOTE:
A *NON-CORRECTABLE FIELD is a field that cannot be changed, edited or revised once the Sterilization Consent Form has been submitted to Gainwell.

Missing and/or invalid information in a *NON-CORRECTABLE FIELD will cause the consent form to be denied , which WILL result in NONE-PAYMENT of ALL providers claims.

NOTE:
All **signature** and **date** lines on the Sterilization Consent Form noted with an **"X"** must be completed after the form is printed.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

CONSENT TO STERILIZATION INSTRUCTIONS		
Filed	**Description**	**Instructions**
1	Name of physician or clinic	Enter the typed or printed name of the physician or clinic that will provide information about the sterilization.
2	Specify type of operation	Enter of the type of operation that will be performed.
	Recipient's date of birth	Enter the recipient's date of birth in the following format: **month/day/year**. **Note: The recipient must be at least 21 years of age at the time consent is obtained. If the recipient was not 21 years of age when the Sterilization Consent Form was signed, the consent form will be denied.**
4	Recipient's name	Enter the typed or printed first and last name of the recipient.
5	Name of physician or clinic	Enter the typed or printed name of the physician or clinic that will perform the operation.
6	Specify type of operation	Enter of the type of operation that will be performed.
*7	Recipient's signature	The recipient must sign his/her first and last name. *(If the patient is unable to sign their name, the physician's office is responsible for documenting the reason why, either on the consent form or on attached documentation. If the individual consenting to sterilization is unable to write at all, due to a physical disability, they should have someone sign for them, in the presence of a witness. The witness **must** be someone other than those individuals required by regulations to be parties to the consent process. Therefore, the witness cannot be the person obtaining consent, the interpreter, or the physician. This same process should be used when the individual cannot write his or her name and signs with an "X".)* ***Note: The recipient's signature on the Sterilization Consent Form is considered a NON-CORRECTABLE FIELD and cannot be changed, edited or revised once submitted to Gainwell.**

All rights reserved. Applicable FARS/DFARS apply.

CONSENT TO STERILIZATION INSTRUCTIONS		
Filed	**Description**	**Instructions**
*8	Date recipient signed	The recipient must provide the date the Sterilization Consent Form was signed. • The date of the recipient's signature must be in the following format: **month/day/year**. • The required 30-day waiting period is calculated from this date. • The recipient's signature date must reflect at least **30 days**, but not more than **180 days** have passed prior to the procedure being done, except in the case of premature delivery or emergency abdominal surgery. • This date must be added at the time the recipient signs the form. • The date cannot be altered or added at a later date. ***Note: The date the recipient signed the Sterilization Consent Form is considered a NON-CORRECTABLE FIELD and cannot be changed, edited or revised once submitted to Gainwell.**
9	Recipient's name	Enter the typed or printed first and last name of the recipient.
10	Recipient's Medicaid Number	Enter the recipient's 13-digit Alabama Medicaid number.
INTERPRETER'S STATEMENT		
11	Language	Enter the language used by the interpreter to communicate the information to the recipient. **Note: If an interpreter is used, this section must be completed in full. If an interpreter is not used, N/A can be written into this section. If this section is blank, the Sterilization Consent Form will be returned to the provider for correction.**

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

CONSENT TO STERILIZATION INSTRUCTIONS		
Filed	**Description**	**Instructions**
*12	Interpreter's signature	The interpreter must sign the Sterilization Consent Form on the same day the recipient signs. ***Note: The signature of the interpreter of the Sterilization Consent Form is considered a NON-CORRECTABLE FIELD and cannot be changed, edited or revised once submitted to Gainwell.**
*13	Date of interpreter's signature	The interpreter must date the form in the following format: **month/day/year**. The interpreters' date must coincide, be the same, as the date provided by the recipient. ***Note: The date of the signing of the Sterilization Consent Form by the interpreter is considered a NON-CORRECTABLE FIELD and cannot be changed, edited or revised once submitted to Gainwell.**
STATEMENT OF PERSON OBTAINING CONSENT		
14	Recipient's name	Enter the typed or printed first and last name of the recipient.
15	Specify type of operation	Enter the type of operation that will be performed.
*16	Signature of person obtaining consent	The person obtaining consent must sign the Sterilization Consent Form at the same time or after the recipient, but **PRIOR** to the date of sterilization. ***Note: The signature of the person obtaining consent is considered a NON-CORRECTABLE FIELD and cannot be changed, edited or revised once submitted to Gainwell.**
*17	Date of signature of person obtaining consent	The person obtaining consent must date the form in the following format: month/day/year. The person obtaining consent signature date will reflect at least **30 days**, but not more than **180 days** have passed prior to the procedure being done. ***Note: The date of the person obtaining consent is considered a NON-CORRECTABLE FIELD and cannot be changed, edited or revised once submitted to Gainwell.**

ALABAMA MEDICAID AGENCY STERILIZATION CONSENT FORM

NOTICE: YOUR DECISION AT ANY TIME TO BE STERILIZED WILL NOT RESULT IN THE WITHDRAWAL OR WITH HOLDING OF ANY BENEFITS PROVIDED BY PROGRAMS OR PROJECTS RECEIVING FEDERAL FUNDS.

CONSENT TO STERILIZATION

I have asked for and received information about sterilization from

Field 1
Physician or Clinic

When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as Temporary Assistance for Needy Families (TANF) or Medicaid that I am now getting or for which I may become eligible.

I UNDERSTAND THAT THE STERILIZATION MUST BE CONSIDERED PERMANENT AND NOT REVERSIBLE. I HAVE DECIDED THAT I DO NOT WANT TO BECOME PREGNANT, BEAR CHILDREN OR FATHER CHILDREN.

I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as a

Field 2
Specify Type of Operation

The discomforts, risks, and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least thirty days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the with-holding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on Field 3 (Month/Day/Year).

I, Field 4 (Name of the Recipient)

hereby consent of my own free will to be sterilized by

Field 5
Physician or Clinic

by the method called Field 6 (Specify Type of Operation).

My consent expires 180 days from the date of my signature below. I also consent to the release of this form and other medical records about this operation to: Representatives of the Department of Health and Human Services or Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

X Field 7 (Recipient's Signature) X Field 8 (Date)

Field 9
Type/Print Recipient's Name

Field 10
Recipient's Medicaid Number

INTERPRETER'S STATEMENT

If an interpreter is provided to assist the recipient to be sterilized: I have translated the information and advice presented orally to the recipient to be sterilized by the person obtaining the consent. I have also read him/her the consent form in Field 11 language and explained its contents to him/her. To the best of my knowledge and belief, he/she understood this explanation.

Field 12
Interpreter's Signature

Field 13
Date

STATEMENT OF PERSON OBTAINING CONSENT

Before Field 14 (Name of the Recipient) signed the consent form, I explained to him/her the nature of the sterilization operation Field 15 (Specify Type of Operation), the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the recipient to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the recipient to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the recipient to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

X Field 16 (Signature of Person Obtaining Consent) X Field 17 (Date)

Field 20
Address

PHYSICIAN'S STATEMENT

Shortly before I performed a sterilization operation upon

Field 21 (Name of the Recipient) on X Field 22 (Date of Sterilization)

I explained to him/her the nature of the sterilization operation

Field 23
Specify Type of Operation,

the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the recipient to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the recipient to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the recipient to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

(Instructions for use of alternative final paragraphs: Use the first paragraph below except in the case of premature delivery or emergency abdominal surgery where the sterilization is performed less than 30 days after the date of the recipient's signature on the consent form. In those cases, the second paragraph below must be used. Cross out the paragraph, which is not used.)

(1) At least thirty days have passed between the date of the recipient's signature on the consent form and the date the sterilization was performed.

(2) This sterilization was performed less than 30 days but more than 72 hours after the date of the recipient's signature on this consent form because of the following circumstances (check applicable box and fill in information requested):

☐ Premature delivery
Recipient's expected date of delivery: Field 24

☐ Emergency abdominal surgery **(describe circumstances in an attachment)**

X Field 25 (Physician's Signature) X Field 26 (Date)

Checklist for Consent Form Completion

Sterilization Claim & Primary Surgeon's Responsibility

It is the responsibility of the performing surgeon to submit a copy of the sterilization consent form to Gainwell. Providers other than performing surgeon should not submit a copy of consent form to Gainwell. Receipt of multiple consent forms slows down the consent form review process and payment of claims. Therefore, please do not forward copies of completed consent forms to other providers for submission to Gainwell.

When the claim for the sterilization procedure is submitted to Gainwell, the claim will suspend in the system for 35 days waiting for the approved consent form to be entered. The Saturday after the claim is keyed into the system, it will check to see if the consent form has been entered. It will check the system each Saturday, up to 35 days, for the approved consent form. After the 35tht day, the claim will deny for no consent form on file. If the approved consent form is found in the system during the 35 days, it will process the claim on the Saturday it finds the form.

Sterilization Consent Form

Clarification of the completion of the sterilization consent form reflecting CMS regulations and Alabama Medicaid policy (refer to the current Appendix C of the Alabama Medicaid Provider Manual and 42CFR50

a) All blanks on the consent form must be appropriately completed before the State may pay the provider for sterilization procedure.

b) The "Consent to Sterilization" must be signed by the person to be sterilized at least thirty days prior to the procedure date. The birth date must indicate the person to be at least twenty-one (21) years of age on the date the signature was obtained.

c) The interpreter, if one is used, must sign and date the consent the same day the recipient signs. In instances where the interpreter signs any date other than the date recorded by the recipient, the claim will be denied. If no interpreter is used, this section of the form must be marked as "not applicable" (N/A). If the Interpreter's Statement is signed and dated, please complete the "form of language" line also.

d) When it is not known in advance which specific physician will perform the procedure, it is acceptable to list a generic description of the physician, i.e. "staff physician, on-call physician, OB/GYN physician". When using a generic description and not a specific physician's name, the patient is to be informed that the physician on call or on duty will perform the procedure. The name of the provider facility (hospital, surgical center, etc.) or provider physician's group must also be entered in the same blank containing the generic physician description when the generic physician description is used. The physician who is named in the first paragraph of the consent form does not have to be the physician who performs the surgery and signs the "Physician's Statement".

e) Signature of person obtaining consent: The individual obtaining consent must sign after the recipient (may sign the same day as the recipient, as long as the recipient signs first) but prior to the procedure in order to properly document informed consent. In instances where the person obtaining consent does not sign prior to the procedure date, (date-wise – not time) the claim will be denied. In other words, denial will occur if the date of the signature of the person obtaining consent and the procedure date is the same or any date after the procedure date.

f) Procedure recorded in physician's statement: It is necessary for the recipient (by signature) to give consent in understanding their rights relative to the sterilization. Both sections of the form should indicate the same type of procedure; however, it is not necessary that the wording of the procedure/manner in which the sterilization is performed be identical under both sections of the form.

Most frequent causes of claims having to be returned for correction:	**Reasons consent forms and associated claims will be denied:**
1. Recipient's date of birth not the same on the claim and consent form.	1. Missing recipient signature.
2. Expected date of delivery not provided when the sterilization procedure is performed less than the required 30-day waiting period.	2. Missing or invalid date of recipient signature, including less than 30 days prior to procedure.
3. Expected date of delivery is recorded but indicator for premature delivery or emergency surgery is not checked.	3. Recipient under age 21 on date consent form was signed.
4. All blanks not appropriately completed.	4. Missing signature of person obtaining consent.
5. Physician's signature is missing.	5. Missing or invalid date of person obtaining consent, including date of procedure, or any later date.
6. Date of sterilization not the same on the claim and on the consent form	6. Missing interpreter signature (if one was used).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

7. Legibility of dates and signatures.	7. Missing or invalid date of interpreter, including any date other than the date the recipient signed (if one was used).
8. Facility name not on the consent form.	8. Sterilization performed less than 72 hours after the date of the recipient signature on the consent form in cases of premature delivery and emergency abdominal surgery.

*** As a reminder if these guidelines are not followed, Gainwell will deny the consent form. ***

D DMH Non-Emergency Transportation

The Non-Emergency Transportation Program for the Alabama Department of Mental Health provides necessary non-ambulance one-way or round trip transportation for Medicaid recipients to a Medicaid covered mental health rehabilitation service.

D.1 Eligible Providers

Alabama Department of Mental Health contractors enrolled in the Medicaid program to provide mental Illness and substance abuse rehabilitation services.

D.2 Covered Service

The ADMH NET Program may be utilized for transportation of a Medicaid recipient to an authorized location for receipt of a covered mental illness or substance abuse rehabilitation service as specified in Chapter 105 of the Alabama Medicaid Agency Provider Manual. Receipt of the service must occur on the same date as the transportation event.

NET must be provided in compliance with written policies and procedures developed and maintained by the ADMH contractor which include, at a minimum, the following specifications:

- Non-emergency transportation services linked to a Rehabilitative service in which medical necessity must be established.
- All vehicles used for the transportation shall have properly operating seat belts or child restraint seats, and provide for seasonal comfort with properly functioning heat and air.
- All vehicles used for transportation shall be in good repair and have documentation of regular maintenance inspections.
- The number of individuals permitted in any vehicle shall not exceed the number of seats, seat belts, and age appropriate child restraint seats as permitted to be operated under the safety standards for the make of that model vehicle.
- All vehicles operated by the provider shall carry:
    a. Proof of accident and liability insurance.
    b. Documentation of the vehicle’s ownership.
    c. A fire extinguisher and first aid kit for company owned vehicles.
- The driver of any vehicle used to transport recipients shall:
    a. Be at least nineteen (19) years old;

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

b. Be in possession of a valid driver's license for the type of vehicle used in transporting recipients;

c. Carry, at all times, the name(s) and telephone number(s) of the performing provider's staff to notify in case of a medical or other emergency;

d. Be prohibited from the use of alcohol, drugs, tobacco products, cellular phones or other mobile devices, or from eating while driving;

e. Be prohibited from leaving a minor unattended in the vehicle at any time;

f. Be prohibited from making stops between authorized destinations, altering destinations, and taking recipients to unauthorized locations. In the event of emergency, unscheduled stops are permitted. In these occasions, the driver must contact the supervisor for instructions.

- The performing provider shall provide an adequate number of staff for supervision of individuals transported to ensure passenger safety.

D.3 Service Documentation

D.3.1 Mental Illness

The Medicaid recipient's service record must fully document the rehabilitation option service provided on the date of the transportation event. The treatment plan will indicate the referral to NET services. A transportation signature log can be used to document transportation to a day program. Recipient signatures for individual/group or other rehabilitation option services will document the transportation for those services. Transportation must be an indicated service on the case plan if transportation is provided by a case manager.

D.3.2 Substance Abuse

The service record must fully document the extent and nature of the non-emergency transportation provided, including:

- Medical necessity for non-emergency transportation.
- Treatment/service plan authorization by a licensed practitioner of the healing arts.
- Medicaid rehabilitation service to which transportation was provided and the date of this service.
- Date of NET.
- Destination.
- Mode of transportation.
- Miles traveled.
- Signature of the Medicaid recipient.
- Signature of the direct service provider.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

D.4 Billing Restrictions

Reimbursement will not be provided for:

- Transportation to any services other than Medicaid Mental Health Rehabilitation Services.
- Services that are not medically necessary or that are not provided in compliance with the provisions of this chapter.

D.5 Reporting Code

Mental Illness: T2002-HE

Substance Abuse: T2002-HF; T2002-HF: HA; T2002-HF: HD; T2002-HF: HH; T2002-HF: HA: HH

D.6 Billing Units

Episode = round trip

D.7 Maximum Units

One episode per day, per recipient, per provider.

D.8 Rate

$17.00/Episode

D.9 Billing Reporting Combination Restrictions

There is no billing reporting combination restrictions.

D.10 Cost Sharing (Copayment)

The copayment does not apply to services provided by transportation providers or to recipients receiving rehabilitative services.

D.11 Billing Recipients

By filing a claim with the Medicaid Program, a provider is agreeing to accept assignment and by accepting assignment, the provider agrees to accept the Medicaid reimbursement, plus any cost-sharing amount (copay) to be paid by the recipient, as payment in full for those services covered under the Medicaid Program. The Medicaid recipient, or others on his behalf, must not be billed for the amount above that, if any, which is paid on an allowed service.

D.12 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

Transportation providers who bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Enhanced online adjustment functions

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Improved access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare-related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

D.12.1 Time Limit for Filing Claims

Medicaid requires all claims for transportation to be filed within one year of the date of service. Refer to Section 5.1.5, Filing Limits, for more information regarding timely filing limits and exceptions.

D.12.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes. These manuals may be obtained by contacting the American Medical Association, AMA Plaza 330 North Wabash Ave, Suite 39300 Chicago, IL 60611-5885, or 1-800-621-8335.

NOTE:

ICD-9 codes should be used for claims submitted with dates of service prior to or equal to 09/30/2015.

ICD-10 codes should be used for claims submitted with dates of service on/after 10/01/2015.

NOTE:

ICD-9 diagnosis codes, within the range of 290-316 for ICD-9 or F0150-F99 for ICD-10, must be listed to the highest number of digits possible (3, 4, or 5 digits). Do not use decimal points in the diagnosis code field. The V code unspecified psychosocial circumstance is covered only for children and adolescents or adults receiving DHR protective services. Claims filed for pregnant women (SOBRA) must include V222 for ICD-9 or Z33.1 for ICD-10 (pregnant state, incidental) as well as the appropriate MI/SA diagnosis code.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

E.4 Hysterectomy Consent Form

ATTACHMENT I

ALABAMA MEDICAID AGENCY HYSTERECTOMY CONSENT FORM

See the back of this form for instructions on completing and submitting the form

PART I. PHYSICIAN

Certification by Physician Regarding Hysterectomy

I hereby certify that I have advised _____ (*Name of Patient*) Medicaid Number _____ to undergo a hysterectomy because of the diagnosis of _____ _____ (*diagnosis code*). Further, I have explained orally and in writing to this patient and/or her representative (_____ (*Name of Representative, if any*)) that she will be permanently incapable of reproducing as a result of this operation which is medically necessary. This explanation was given before the operation was performed.

_____ (*Name of Physician*) _____ NPI #

_____ (*Signature of Physician*) _____ (*Date of Signature*)

PART II. PATIENT

Acknowledgment by Patient (and/or Representative) of Receipt of Above Hysterectomy Information

I, _____ (*Name of Patient*) _____ (*Date of Birth*) and/or _____ (*Name of Representative, if any*) hereby acknowledge that I have been advised orally and in writing that a hysterectomy will render me permanently incapable of reproducing and that I have agreed to this operation. This oral and written explanation that the hysterectomy would make me sterile was given to me before the operation.

_____ (*Signature of Patient*) _____ (*Date*)

_____ (*Signature of Representative, if any*) _____ (*Date*)

PART III. PHYSICIAN

Date of Surgery _____

PART IV. UNUSUAL CIRCUMSTANCES

Recipient Name: _____ Recipient ID: _____

I _____ (*Printed name of physician*) certify

☐ patient was already sterile when the hysterectomy was performed. Cause of sterility _____. Medical records are attached.

☐ hysterectomy was performed under a life threatening situation. Medical records are attached.

☐ hysterectomy was performed under a period of retroactive Medicaid eligibility. Medical records are attached.

Before the operation was performed, I informed the recipient that she would be permanently incapable of reproducing as a result of this operation. ☐ Yes ☐ No

Signature: _____ Date: _____

PART V. STATE REVIEW DECISION

Signature of Reviewer: _____ Date of Review: _____ ☐ Pay ☐ Deny

Reason for denial: _____

PHY-81243 (Revised 09-29-2016) *Alabama Medicaid Agency*

Hysterectomy Form Instructions

Part I.

This section is required for all routine hysterectomies. See Part III and IV for a patient who is already sterile, a hysterectomy performed under life-threatening emergency or during a period of retroactive Medicaid eligilbity.

- Enter the name of the patient.
- Enter the recipient's 13 digit Medicaid Number.
- Enter the diagnosis description requiring hysterectomy.
- Enter the diagnosis code.
- Enter the name of the representative if the recipient is unable to sign the consent form. If a representative is not used enter N/A in the field.
- Enter name of the physician who will perform the hysterectomy.
- Enter the NPI Number of the physician who will perform the hysterectomy.
- Physician must sign their name and enter the date of signature. Date must be the date of the surgery or a prior date. **If any date after surgery is recorded, the form will be denied.**

Part II.

This section is required for all routine hysterectomies. See Parts III and IV for a patient who is already sterile, a hysterectomy performed under a life-threatening emergency or during a period of retroactive Medicaid eligibility.

- Enter the name of the patient and the patient's date of birth including the day/month/year.
- Enter the name of representative if the recipient is unable to sign the consent form. If a representative is not used, record N/A in this field.
- Patient must sign and enter the date of signature unless a representative is being used to complete the form. Date must be the date of surgery or a prior date. **If any date after surgery is recorded, the form will be denied.**
- Representative must sign and enter the date of signature if the recipient is unable to sign the consent form. Date must be the date of the surgery or a prior date. **If any date after surgery is recorded, the form will be denied.**

PART III.

This section is required for all hysterectomies.

- Enter the date of surgery once the surgery has been performed.

E.7 Sterilization Consent Form

ALABAMA MEDICAID AGENCY STERILIZATION CONSENT FORM

NOTICE: YOUR DECISION AT ANY TIME TO BE STERILIZED WILL NOT RESULT IN THE WITHDRAWAL OR WITH HOLDING OF ANY BENEFITS PROVIDED BY PROGRAMS OR PROJECTS RECEIVING FEDERAL FUNDS.

CONSENT TO STERILIZATION

I have asked for and received information about sterilization from

_____
Physician or Clinic

When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as Temporary Assistance for Needy Families (TANF) or Medicaid that I am now getting or for which I may become eligible.

I UNDERSTAND THAT THE STERILIZATION MUST BE CONSIDERED PERMANENT AND NOT REVERSIBLE. I HAVE DECIDED THAT I DO NOT WANT TO BECOME PREGNANT, BEAR CHILDREN OR FATHER CHILDREN.

I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as a

_____
Specify Type of Operation

The discomforts, risks, and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least thirty days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the with-holding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on _____.
Month/Day/Year

I, _____
Name of the Recipient

hereby consent of my own free will to be sterilized by

_____
Physician or Clinic

by the method called _____.
Specify Type of Operation

My consent expires 180 days from the date of my signature below. I also consent to the release of this form and other medical records about this operation to: Representatives of the Department of Health and Human Services or Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

X _____ X _____
Recipient's Signature Date

_____
Type/Print Recipient's Name

_____
Recipient's Medicaid Number

INTERPRETER'S STATEMENT

If an interpreter is provided to assist the recipient to be sterilized: I have translated the information and advice presented orally to the recipient to be sterilized by the person obtaining the consent. I have also read him/her the consent form in _____ language and explained its contents to him/her. To the best of my knowledge and belief, he/she understood this explanation.

_____ _____
Interpreter's Signature Date

Form 193 (Rev. 9-26-2016)

STATEMENT OF PERSON OBTAINING CONSENT

Before _____.
Name of the Recipient

signed the consent form, I explained to him/her the nature of the sterilization operation _____, the
Specify Type of Operation

fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the recipient to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the recipient to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the recipient to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

Address

PHYSICIAN'S STATEMENT

Shortly before I performed a sterilization operation upon

_____ on X _____
Name of the Recipient Date of Sterilization

I explained to him/her the nature of the sterilization operation _____.
Specify Type of Operation

the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the recipient to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the recipient to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the recipient to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

(Instructions for use of alternative final paragraphs: Use the first paragraph below except in the case of premature delivery or emergency abdominal surgery where the sterilization is performed less than 30 days after the date of the recipient's signature on the consent form. In those cases, the second paragraph below must be used. Cross out the paragraph, which is not used.)

(1) At least thirty days have passed between the date of the recipient's signature on the consent form and the date the sterilization was performed.

(2) This sterilization was performed less than 30 days but more than 72 hours after the date of the recipient's signature on this consent form because of the following circumstances (check applicable box and fill in information requested):

☐ Premature delivery
Recipient's expected date of delivery: _____

☐ Emergency abdominal surgery **(describe circumstances in an attachment)**

10/2019

Instructions for Completing
The Alabama Medicaid Referral Form (Form 362)

TODAY'S DATE- Date form completed

REFERRAL DATE- Date referral becomes effective

RECIPIENT INFORMATION- Patient's name, Medicaid number, date of birth, address, telephone number and parent's/guardian's name

PRIMARY CARE PROVIDER (PCP)- Provide all Provider information. For hard copy referrals, the printed, typed, or stamped name of the PCP with an original signature of the physician or designee is required. Stamped or copied signatures will not be accepted. For electronic referrals provider certification is made via standardized electronic signature protocol.

SCREENING PROVIDER- Screening provider (if different from primary provider) must complete and sign if the referral is the result of an EPSDT screening.

NPI INFORMATION- Provide the NPI number of the referring PCP. For billing purposes, indicate Medicaid Provider number, if available.

TYPE OF REFERRAL:

- **PCP/ACHN**- Referral to specialist/consultant. (See *Chapter 40 for Claim Filing Instructions).
- **EPSDT** - Referral resulting from an EPSDT screening. – indicate screening date (See *Appendix A for Claim Filing Instructions)
  Select one of the following types of EPSDT Screenings:
  - **Periodic**- Well-child checkups that are based on a periodicity schedule
  - **Interperiodic**- Problem-focused and abnormal screenings that are medically necessary for undiagnosed conditions outside the periodicity schedule
- **Case Management/Care Coordination** - Referral for case management services through Network Care Coordinators (See *Chapter 40 for ACHN contact information).
- **Lock-In** - Referral for recipients on lock-in status who are locked in to one doctor and/or one pharmacy (See *Chapter 3 -3.3.2 for Claim Filing Instructions).
- **Other** – All other referral types. (Describe referral type)

LENGTH OF REFERRAL- Indicate the number of visits/length of time for which the referral is valid. *(Note: Must be completed for the referral to be valid).*

REFERRAL VALID FOR:

- **Evaluation Only** - Consultant will evaluate and provide findings to PCP.
- **Evaluation and Treatment** - Consultant can evaluate and treat for diagnosis listed on the referral.
- **Referral by consultant to other Provider for identified condition (Cascading Referral)** - After evaluation, consultant may, using PCP's NPI, refer recipient to another specialist as indicated for the condition identified on the referral form without having to get an additional referral from the PCP.
- **Referral by consultant to another Provider for additional conditions diagnosed by consultant (Cascading Referral)** – Consultant may refer recipient to another specialist for other diagnosed conditions without having to get an additional referral from the PCP. **(EPSDT ONLY)**
- **Treatment Only** - Consultant will treat for diagnosis listed on referral.
- **Hospital Care (Outpatient)** - Consultant may provide care in an outpatient setting.
- **Performance of Interperiodic Screening (if necessary)** - Consultant may perform an interperiodic screening if a condition was diagnosed that will require continued care or future follow-up visits.
- **For Billing Purposes Only**—For ACHN Referrals to specialists/consultants when a PCP is not attributed.
- **Other** – All other referral validation types (i.e. DME). (Describe referral validation type)

REASON FOR REFERRAL BY PCP/ACHN- Indicate the reason/condition the recipient is being referred.

OTHER CONDITIONS/DIAGNOSIS IDENTIFIED BY PCP- Indicate any condition present at the time of initial exam by PCP.

CONSULTANT INFORMATION- Consultant's name, address and telephone number. The consultant can be an individual provider or provider group.

PLEASE SUBMIT FINDINGS TO PCP- The PCP should indicate how he/she wants to be notified by the consultant of findings and/or treatment rendered.

*The Alabama Medicaid Provider Manual is available on the Alabama Medicaid website at http://www.medicaid.alabama.gov

Dear (ALABAMA MEDICAID COMMISSIONER):

A reasonable investigation subject to my control having been conducted in the subject facility, I make the following certification. I hereby attest that I have read all of the requirements set out in the regulations as codified at 42 CFR 483.350-483.376. Based upon my personal knowledge and belief, I attest that the (NAME OF FACILITY) hereby complies with all of the requirements set forth in the interim final rule governing the use of restraint and seclusion in psychiatric residential treatment facilities providing inpatient psychiatric services to individuals under age 21 published on January 22, 2001, and amended with the publication of May 22, 2001 (*Psych Under 21 rule*).

I understand that the Centers for Medicare and Medicaid Services (CMS, formerly HCFA), the Alabama Medicaid Agency, or their representatives may rely on this attestation in determining whether the facility is entitled to payment for its services and, pursuant to Medicaid regulations at 42 CFR, Section 431.610, have the right to validate that (NAME OF FACILITY) is in compliance with the requirements set forth in the *Psych Under 21* rule, and to investigate serious occurrences as defined under this rule.

(NAME OF FACILITY) will submit a new attestation of compliance by July 21st of each year (or by the next business day if July 21st falls on a weekend or holiday).

In addition, I will notify the Alabama Medicaid Agency immediately if I vacate this position so that an attestation can be submitted by my successor. I will also notify the Alabama Medicaid Agency if it is my belief that (NAME OF FACILITY) is out of compliance with the requirements set forth in the *Psych Under 21* rule.

Signature_____Title_____

Printed Name_____Date_____

This attestation must be signed by an individual who has the legal authority to obligate the facility.

Revised 02/04/2021

E.22 PCP Override Request Form

PCP Override Request Form

Please fill out this form **completely** to request a PCP override when you have received a denial for referral services **or** the Primary Care Provider (PCP) has not authorized treatment for **past** date(s) of service. You may also use this form to request an override for a BMI that cannot be obtained. The request must be submitted to Medicaid's Network Provider Assistance Unit within 90 days of the date of service. Attach a **"clean claim"** with any supporting documentation to this form and mail to the Network Provider Assistance Unit at the address below. The Network Provider Assistance Unit will process your request within 60 days of receipt. If your request is approved, the corrected claim will be sent to DXC and will be processed. If your request is denied, Managed Care Operations will notify you by mail of the denial. This form is available in Appendix E of the Alabama Medicaid Provider Manual and at www.medicaid.alabama.gov.

7.2.1 Administrative Review and Fair Hearings

The Alabama Medicaid Agency is responsible for mandating and enforcing the Title XIX Medical Assistance State Plan. The Alabama Medicaid Agency contracts with a fiscal agent to process and pay all claims by providers of medical care, services, and equipment authorized under the provisions of the Alabama Title XIX State Plan. The present fiscal agent contract is with Hewlett-Packard Enterprise (HPE), PO Box 244032, Montgomery, AL 36124-4032. Their toll free telephone is 800-688-7989.

HPE provides current detailed claims processing procedures in a manual format for all claim types covered by Medicaid services. HPE prepares and distributes the **Alabama Medicaid Agency Provider Manual** to providers of Medicaid services electronically via the Alabama Medicaid Agency website. This manual is for guidance of providers in filing and preparing claims.

Providers with questions about claims should contact HPE. Only unsolved problems or provider dissatisfaction with the response from HPE should be directed to the Alabama Medicaid Agency, 501 Dexter Avenue, Montgomery, Alabama 36104 or by calling 334-242-5000.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). Section III: Respiratory Equipment -- Complete All Applicable Responses
*** Indicates EPSDT Only**

13. Apnea Monitor *
☐ Apnea ☐ SIDS Sibling Biological (Brother or Sister) ☐ High Risk for Apparent Life Threatening Event (ALTE)
☐ Infant less than 2 years of age with Trach ☐ Preterm infant with period of pathologic apnea

14. Overnight Pulse Oximetry *
☐ Evaluation for serious respiratory diagnosis and requires short term oximetry to rule out hypoxemia or determine the need for supplemental oxygen

15. Pulse Oximetry * - Patient on supplemental oxygen approved by Medicaid and patient has one of the following conditions
☐ Trach ☐ Ventilator dependant ☐ Unstable saturations with weaning in progress

16. Percussor *
Patient has one of following diagnoses
☐ Cystic Fibrosis ☐ Bronchiectasis, and
Failed chest physiotherapy (Attach clinical documentation)
☐ Hand Percussion ☐ Postural drainage Date used _____ through _____ , and
Caregiver ability to perform chest physiotherapy
☐ Caregiver not available to perform physiotherapy ☐ Caregiver not capable of performing physiotherapy

17. Air Vest*
a. Acute Pulmonary exacerbation during last 12 months documented by
☐ Hospitalization ≥ 2, and ☐ Episode of home IV antibiotic therapy, and
b. ☐ FEV1 in one second < 80% of predicted value, or ☐ FVC is < 50% of predicted value, and
c. ☐ Need for chest physiotherapy ≥ 2 times daily, and
d. Documented failure of other forms of chest physiotherapy
(Attach clinical documentation)
☐ Hand percussion ☐ Mechanical percussion ☐ Positive Expiratory Pressure

18. Ventilator (check one) * ☐ Laptop ☐ Volume Ventilator
a Dependent on vent 6 hours or more per day, and ☐ Yes ☐ No
b. Dependent on vent for at least 30 consecutive days, and ☐ Yes ☐ No
(Medical documentation from the recipient's primary physician indicates long term dependency on ventilator support)
c. Would need care in hospital, NF, ICF, MR and eligible inpatient care under state plan, and ☐ Yes ☐ No
d. Patient has social supports to remain in home, and ☐ Yes ☐ No
e. Physician has determined that home vent care is safe, and ☐ Yes ☐ No
f. Patient has at least one or more of the following
☐ Chronic respiratory failure
☐ Spinal cord injury
☐ Chronic pulmonary disorders
☐ Neuromuscular disorders
☐ Other neurological disorders and thoracic restrictive diseases

19. CPAP/BIPAP *
a. Physician ☐ Pulmonologist ☐ Neurologist ☐ Board certified sleep specialist
b. Patient diagnosis of☐ Obstructive sleep apnea ☐ Upper airway resistance syndrome ☐ Mixed sleep apnea
c. Sleep study recorded for ≥ 360 minutes/6 hours ☐ Yes ☐ No
OR
For patients < 6 months old -- sleep study recorded for ≥ 240 minutes/4 hours ☐ Yes ☐ No
d. Sleep study documents
☐ RDI or AHI ≥ 5 per hour ☐ At least 30 apneas/hypopneas found in sleep study
☐ CPAP reduces sleep events by ≥ 50%
For BIPAP only ☐ Unsuccessful trial of CPAP or ☐ Patient is ≤ 5 years

20. Suction Pump -- Patient unable to clear airway of secretions by cough due to one of the following conditions:
☐ Cancer/surgery of throat ☐ Paralysis of swallowing muscles ☐ Other _____
☐ Tracheostomy ☐ Comatose or semi-comatose condition (specify)

SECTION IV: MEDICAL APPLIANCES AND SUPPLIES

21. Disposable Diapers *

(Patient meets all of following)

- ☐ ≥ 3 years old, and
- ☐ Patient non-ambulatory or minimally ambulatory (cannot walk 10 feet or more without assistance)

Patient at risk for skin breakdown and has at least two of the following:

- ☐ Unable to control bowel or bladder functions
- ☐ Unable to use regular toilet facilities due to medical condition
- ☐ Unable to physically turn or reposition self
- ☐ Unable to transfer self from bed to chair or wheelchair without assistance

---

22. Augmentative Communication Device

- ☐ Patient is mentally, physically and emotionally capable of operating ACD device
- ☐ Medical evaluation completed within 90 days of request for device and patient has a medical condition which impairs the ability to communicate and ACD device is needed to communicate
- ☐ Patient has evaluation by interdisciplinary team which includes a physician, speech pathologist or PT, OT or social worker.
- ☐ Request is for modification or replacement,and one of the following conditions exist
  Include supporting documentation.
  - ☐ Patient had medical change
  - ☐ ACD no longer under warranty, device does not operate to capacity or repair is no longer cost effective
  - ☐ New technology is significantly meets medical need of client that is not meet with current equipment

---

23. Home Phototherapy

- ☐ Infant is term (≥ 37 weeks of gestation) >48 hours of age and otherwise healthy, and
- ☐ Serum bilirubin levels >12, and
- ☐ Elevated bilirubin levels are not due to a primary liver disorder, and
- ☐ Diagnostic evaluation is negative (see instructions), and
- ☐ Infants' age and bilirubin concentration is one of the following
  - ☐ Infant 25-48 hours of age with serum bilirubin ≥ 12 (170)
  - ☐ Infant 49-72 hours of age with serum bilirubin ≥ 15 (260)
  - ☐ Infant great than 72 hours of age with serum bilirubin ≥ 17 (290)

---

24. Alternating Pressure Pad with Pump or Gel or Gel like Pressure Pad for Mattress

- ☐ Patient is bed confined 75 to 100% of the time, and
- ☐ Patient is unable to physically turn or reposition alone, or

- ☐ Patient is medically at risk for skin break down and meets one of the following criteria
  - ☐ Impaired nutritional status defined as BMI ≤ 18.5
  - ☐ Fecal or urinary incontinence
  - ☐ Presence of any stage pressure ulcer on the trunk or pelvis
  - ☐ Compromised circulatory status

  AND
- ☐ Documentation of all of the following;
  - ☐ Recipient/caregiver educated on prevention/management of pressure ulcers
  - ☐ Assessment at least every 30 days by a nurse, doctor or other licensed healthcare professional
  - ☐ Recipient/caregiver can perform appropriate positioning and wound care
  - ☐ Recipient/caregiver understands management of moisture/incontinence
  - ☐ Recipient receives nutritional assessment documenting weight, height, BMI and nutritional intake
  - ☐ Compromised circulatory status

- ☐ Patient is unable to physically turn or reposition alone

NCCI Administrative Review and Fair Hearings
Alabama Medicaid Provider Manual

Title XIX Medical Assistance State Plan for Alabama Medicaid provides that the Office of the Governor will be responsible for fulfillment of hearing provisions for all matters pertaining to the Medical Assistance Program under the Title XIX. Agency regulations provide an opportunity for a hearing to providers aggrieved by an agency action.

For policy provisions regarding fair hearings, please refer to Chapter 3 of the *Alabama Medicaid Agency Administrative Code*.

When a redetermination request results in a denial by the Fiscal Agent, the provider may request an *NCCI administrative review* of the claim. A request for an NCCI administrative review **must be received by the Medicaid Agency within 60 days of the date of the redetermination denial from the Fiscal Agent**.
In addition to a clean claim, the provider must send a copy of the redetermination denial, all relevant Remittance Advices (RAs) and previous correspondence with the Fiscal Agent or the Agency in order to demonstrate a good faith effort at submitting a claim and supporting documentation. This information will be reviewed and a written reply will be sent to the provider.

Send requests for NCCI Administrative Reviews to the following address:

NCCI Administrative Review
Alabama Medicaid Agency
Attn: System Support Unit
501 Dexter Ave.
P.O. Box 5624
Montgomery, AL 36103-5624

NOTE:
If all NCCI administrative remedies have been exhausted and the claim denies, the provider cannot collect from either the recipient or his/her sponsor or family.

If the NCCI Administrative Review does not result in a favorable decision, the provider may request a fair hearing.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

F Medicaid Internal Control Numbers (ICN)

Gainwell assigns each claim an Internal Control Number (ICN) systematically when it is received electronically or by mail.

Processing or returning the claim constitutes Gainwell final action on that claim. A resubmission of the same service is considered a new claim.

Each claim sent to Gainwell is assigned an ICN automatically, which is used to track the claim. The ICN is made up of 13 digits following a specific format. The format of the ICN enables you to determine when Gainwell actually received the claim.

Example: 20 21 001 200 001

Region	Year	Julian Date	Batch Range	Sequence

Region

The first two digits in the ICN are the region code, which identifies the source of the claim. In this case, the term *region* refers to the claim's submission method. The following region codes define the claim's media as well.

Region Code	***Where the Claim Originated***
00	All Claim Regions
10	Paper claims with no attachments
11	Paper claim
20	Electronic claims with no attachments
21	Electronic claims with attachments
22	Web claims
25	Pharmacy Point of service claims
30	COBA Crossover
40	Converted Region 05 electronic claims
41	Converted Region 10 tape claims
42	Converted Region 22 cap claims (System Generated)
43	Converted Region 33 special batch claims
44	Converted Region 50 online adjustments
45	Converted Region 51 reversals and mass adjustments
46	Converted Region 52 elect provider adjustments
47	Converted Region 98 paper claims
48	Converted Region 07 managed care claims
50	Adjustments – Non-check related
51	Adjustments – Check related
52	Mass adjustments – Non-check related

All rights reserved. Applicable FARS/DFARS apply.

Region Code	*Where the Claim Originated*
53	Mass adjustments – Check related
54	Mass adjustments – Void transaction
55	Mass adjustments – Provider rates
56	Adjustments – Void Non-check related
57	Adjustments – Void Check related
59	POS reversal and internet adjustments
70	Encounters
77	Adjustments - encounters
80	Claims reprocessed by Gainwell Systems Engineers
90	Special projects
91	Batches requiring NCCI review

Year

The next two digits represent the year. For example, 21 is the year 2021.

Julian Date

The next three digits represent the Julian date. Use the table in this appendix to determine the Julian date.

Batch Range

The next three digits represent the batch range.

Batch Sequence

The last three digits of the ICN represent the sequence in the batch

G Non-Emergency Transportation (NET) Program

The Non-Emergency Transportation (NET) Program provides necessary non-ambulance transportation services to Medicaid recipients. Medicaid pays for rides to a doctor or clinic for medical care or treatment that is covered by Medicaid.

The NET Program has the responsibility to ensure that non-emergency transportation services are provided in the manner described below:

- Similar in scope and duration state-wide, although there will be some variation depending on resources available in a particular geographical location of the state
- Consistent with the best interest of recipients
- Appropriate to available services, geographic location and limitations of recipients
- Prompt, cost-effective, and efficient

Coordinators in the NET Program have the following responsibilities:

- Determine availability of free transportation, including recipient's vehicle, transportation by relative or friend, or volunteer services. Medicaid will not reimburse services if recipient has access to free transportation, except in the case of evident hardship (determined by Alabama Medicaid).
- Establish eligibility (Medicaid does not reimburse for non-eligible transportation services)
- Collect and submit medical documentation for medical necessity review by Medicaid medical staff for transportation services
- Determine the least costly means of transportation services
- Coordinate in-state and out-of-state commercial bus, train, or air transportation; Medicaid may approve the use of commercial buses, trains or airplanes for in-state and out-of-state use for Medicaid recipients in special circumstances.

Prior Authorization for NET Program

All payments for NET services require prior authorization with the exception of the services listed in Chapter 8, Ambulance, Section 8.2.2, Non-Emergency Ambulance Services, and those services requiring urgent care.

Urgent care is defined as medical care that is required after normal business hours. Requests for reimbursements for Non-Emergency Transportation as a result of urgent care must be made the first business day after the need for transportation occurs.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Medicaid may issue a travel reimbursement for the cost of fare to recipients who are able to ride public transportation to medical services. Recipients should use public transportation whenever possible. Coordinators should determine that public transportation does not meet the recipient's needs before Medicaid authorizes other modes of transportation.

Recipients who request out-of-state transportation to medical facilities must have a physician send Medicaid a physician's statement that justifies the need for out-of-state services and assures that such services cannot be obtained in-state.

G.1 Benefits and Limitations

This section describes program-specific benefits and limitations. Refer to Chapter 3, Verifying Recipient Eligibility, for general benefit information and limitations. Refer to Chapter 7, Understanding Your Rights and Responsibilities as a Provider, for general criteria on Medical Necessity/ Medically Necessary Care.

This section explains benefits the NET Program offers to eligible recipients and limitations of NET services.

Escorts

An escort is an individual who is not an employee of a NET transporter and whose presence is required to assist a recipient during transport while at the place of treatment. An escort is typically a relative, guardian, or volunteer. Only one escort is covered per recipient in need, and the recipient must prove an identifiable need for the escort.

Medicaid allows escorts for recipients under the age of 21. Escort Services are utilized in-state or out-of-state for recipients over 21 years of age. A recipient age 21 or older that requests an escort must submit a medical certification statement before Medicaid will reimburse the claim. The certification must document that the recipient has a physical or mental disability that would require assistance, such as the following:

- Blindness
- Deafness
- Mental retardation
- Mental illness
- Physical handicap to a degree that personal assistance is necessary

Covered Services

The NET Program may be used for the following medical services:

- Early Periodic Screening, Diagnosis, and Treatment (EPSDT)
- Inpatient hospital care
- Outpatient hospital care
- Physician services
- Diagnostic devices (for example, x-ray and laboratory)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Clinic services (family planning, rural health, and community mental health)
- Dental services
- Orthotic and prosthetic services
- Eye care
- Transportation provided by relatives or individuals living in the same household with the Medicaid recipient
- Transportation provided in the Medicaid recipient's vehicle or relative's vehicle

NOTE:

Medicaid reimburses transportation service to a physician's office through the NET Program only when prior authorized.

NET Resources

NET services include the following resources when the recipient requires medical care and has no other transportation resources. Coordinators must use the most inexpensive mode of transportation that meets the recipient's needs.

- Automobile (volunteer driver) - Medicaid encourages multiple passenger transportation. Volunteer drivers can be reimbursed for transport from the recipient's home (or place of admission or discharge) and return, unless Medicaid determines paying for additional mileage is the most economical transportation.
- Minibus
- Wheelchair vans - Escorts are allowed for wheelchair vans when prior approved by Medicaid.
- Bus (commercial or city transit) – This service may be provided in-state or out-of-state.
- Airplane transportation
- Train service
- Escort services for minibus, automobile, commercial bus, train, and airplane transportation - Escort services for commercial bus, train, and airplane transportation are reimbursed for the actual cost of the bus, train, or plane ticket.
- Meals and lodging for the recipient and one escort, when required, during overnight travel

Meals and Lodging

When overnight travel is necessary, Medicaid pays for meals and lodging for the recipient and one escort (when authorized). Medicaid must receive receipts or confirmation of expenses before reimbursement can be made. Reimbursement will not exceed $50 per person, per day.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Non-Covered Services

The NET program does not cover the following services:

- Any travel when the Medicaid recipient is not an occupant of the vehicle, unless that would be the most economical transportation available
- Meals and lodging for volunteer drivers
- The use of supplies such as oxygen and intravenous fluids
- Transportation for any services other than those covered by Medicaid
- Transportation provided after the death of a Medicaid recipient
- Minibus or wheelchair van travel 30 miles outside the state line
- Services for which prior approval is required but is not obtained
- Services that are not medically necessary or that are not provided in compliance with the provision of this chapter

G.2 Frequently Asked Questions

This section is intended to help NET program providers answer questions frequently asked by Medicaid recipients.

What is Non-Emergency Transportation?

Medicaid's NET program is set up to help pay for rides to and from a doctor's office, clinic, or other place for medical care that can be planned ahead of time. This ride can be in a car, bus, or van and can be given by a friend, neighbor, or family member. You can also get a ride on a city bus or from a group in your town or area.

Who can get a ride?

For Medicaid to pay for a ride, the person who is going to the doctor or clinic must be covered by Medicaid for the visit they are going to make and should be approved for the ride ahead of time.

How does the program work?

For Medicaid to pay for a ride, you (or someone who is helping you) will need to call Medicaid's toll-free number at 1-800-362-1504. When you call, the operator will ask you for some information to make sure you are covered by Medicaid and also about your need for a ride. This information will be used to decide if Medicaid can pay for your ride. The NET hotline is open from 8:00 a.m. to 4:00 p.m., Monday through Friday, except on state holidays.

What do I do?

You must first try to get a ride on your own. If you are approved for a ride, you will be told about people or groups in your areas who can help you get a ride for little or no cost.

If the people or groups in your community who usually give you a ride cannot give you a ride, then call the toll-free hotline to speak to an operator. The operator will try to help you. In some cases, a special Medicaid worker may work with you if you have to go for a lot of medical care or treatment (like kidney dialysis or cancer treatments).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

What if I have an emergency?

If you have an emergency, call 911 (or the emergency number in your town) to reach an ambulance or paramedics who can help you. Medicaid covers ambulance rides when there is an emergency, such as when someone stops breathing or has been badly hurt.

What do I do if I have a medical problem that can't wait?

A medical problem that must be treated right away, but does not cause your life to be in danger is called an "urgent" medical problem. Broken arms, a bad cut, a baby with a bad earache, or mild chest pains are examples of "urgent" problems.

If you have to pay someone to take you to the emergency room or doctor's office after hours because of an "urgent" problem, you need to call Medicaid's toll-free hotline as soon as possible after the visit to apply for payment. Medicaid pays for the ride to the emergency room only if the visit is for an "urgent" medical problem. Medicaid does not pay for a ride to the emergency room for a problem that can wait until the doctor's office or clinic is open.

How much will Medicaid pay for a ride?

Medicaid pays what is reasonable and necessary to make sure you get the medical care you need. If you have questions about this, ask your operator when you call the toll-free number.

What do I do if I have to pay for a ride to see the doctor on the weekend?

Call the toll-free number the next working day after the ride. Tell the operator where you went for care and why you need help in paying for your ride. Depending on what happened, you might be able to get payment for a ride you had to pay for.

Will Medicaid pay for someone to go with me?

Medicaid pays for an escort for a child or for an adult who is unable to go alone because of a physical or mental disability.

How many rides will Medicaid pay for?

Medicaid pays for rides only to a doctor or clinic for medical care or treatment that is covered by Medicaid. For example, once you use up all of your doctor visits for the year, Medicaid will not pay for rides to any doctor visits.

How will Medicaid pay for my ride?

If your ride is approved, Medicaid will send your reimbursement through an Electronic Benefit Transfer (EBT). Once your transportation request to a Medicaid covered service/provider has been verified by a NET worker, your reimbursement will be loaded to an EBT (plastic) card. The EBT card can only be used at stores that display the Quest logo for cash withdrawal or cash purchase transactions.

If you have been approved for transportation reimbursements, an EBT card personalized with your information, along with a training brochure with detailed information on how to use the system, will be mailed to you. The EBT card must be PIN activated **before** it can be used to make cash withdrawals or cash purchases.

H Alabama Medicaid Physician Administered Drugs

Effective October 1, 2010, the NDC is required on all physician-administered drugs in J, S, and Q code ranges. Physician-administered drugs include any covered outpatient drug billed either electronically or on paper CMS-1500 or UB-04 claim forms.

H.1 Policy

H.1.1 Injections

Medicaid covers physician administered drugs when billed by a physician using the new list of approved HCPCS codes.

The HCPCs drug codes are intended for use in Physician office and Outpatient billing of manufactured medications given in each respective place of service. The Alabama Medicaid Agency only reimburses for compounded medications by the billing of NDC numbers through the Pharmacy Program directives.

Appropriate administration code(s) in the Current Procedural Terminology (CPT) may be billed in addition to the HCPCS drug codes and office visit codes for the same date of service. Please refer to the following section "Evaluation and Management Codes Billed in Conjuction With Drug Administration Codes" for details concerning office visits, chemotherapy administration, hydration therapy and chemotherapy, and date specific changes.

Pricing of Physician Administered Drugs

For Dates of Service prior to July 1, 2005, physician drug prices were updated semi-annually by Gainwell. Medicaid reimbursement was calculated by averaging the Average Wholesale Prices (AWP) from the *Red Book or 80-95% of DIMA (Drug, Improvement, and Modernization Act).*

Effective for Dates of Service July 1, 2005 and thereafter, the Alabama Medicaid Agency adopted Medicare's Drug Pricing Methodology using the Average Sale Price (ASP) for HCPCS injectable drug codes.

Compound Drugs for Non-Pharmacy Providers

The compound drug must not be commercially available, and the active ingredient of the compound drug must follow coverage policy of drugs (FDA approved, non-DESI, not obsolete, etc.).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

When a provider administers a drug that must be purchased from a compounding pharmacy because it is no longer commercially available (e.g. due to the manufacturer no longer marketing the product), the applicable claim form may be submitted for consideration of payment. The billed amount should represent the lesser of the actual acquisition cost for the drug or Medicaid rate on file (ASP CMS pricing) at the time of service.

When billing the HCPCS code for a purchased compounded drug, only one NDC can be used per procedure code. Providers must use the HCPCS procedure code, billing units and corresponding covered NDC number on the claim form; for example, J1100 Injection, dexamethasone sodium phosphate, 1 mg. The NDC billed should be the one that represents the drug as described in the HCPCS code definition, in this case dexamethasone sodium phosphate. See the section entitled "Calculation of Billing Units and Wastage" for information on calculating billing units.

The Agency does not reimburse providers for prescription compounding time or non-covered ingredients used in the compounding process.

Mandatory National Drug Codes (NDC) for ALL Physician Administered Drugs

In compliance with the Deficit Reduction Act (DRA) of 2005, Alabama Medicaid (AMA) began accepting and later began requiring the NDC number for the top 20+ physician-administered multiple source drugs. Information on this requirement may be found in the July 2008 and April 2009 issues of the Provider Insider on the Agency's website.

Effective October 1, 2010, the NDC number became mandatory on **ALL** physician-administered drugs in the following ranges: J0000 – J9999, S0000 – S9999, and Q0000 – Q9999. Physician-administered drugs include any covered outpatient drug billed either electronically or on a paper CMS-1500 or UB-04 claim forms. This is for both straight Medicaid and Medicare/Medicaid crossover claims. The 11-digit NDC submitted must be the actual NDC number on the package or container from which the medicine was administered. The NDC is a number that identifies a prescription drug.

Medicaid provided a **grace period from August 15, 2010 to September 30, 2010**, to allow providers sufficient time to acclimate to the change. During this grace period, Medicaid validated the data and set informational denial codes, but DID NOT deny the claim.

This requirement applies to:

- All fee-for-service providers who bill physician-administered drug codes
- HCPCS codes in the ranges J0000 – J9999, S0000 – S9999, and Q0000 – Q9999.
- Both electronic and paper submissions

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

This requirement does **NOT** apply to:

- 340B Providers enrolled on the HHS website
- Vaccines or other drugs in the CPT code ranges 01000 – 99999.
- HCPCS that do not have an NDC
- HCPCS that are considered devices
- HCPCS that are considered radiopharmaceuticals
- Providers paid on a per diem, encounter, or other type of rate, which includes, but may not be limited to:

    - Inpatient Hospitals
    - Nursing Facilities
    - Federally Qualified Health Centers
    - Rural Health Centers
    - Ambulatory Surgical Centers
    - Home Health Agencies

To identify if a product is a drug, look for these three items:

1. NDC - Number located on the package or container of the drug
2. Lot and Expiration Date - All drugs have both a lot number and expiration date on the vial or container
3. Legend - This refers to statements such as, “Caution; Federal law prohibits dispensing without prescription, “Rx only” or similar words. All prescription drugs have these types of statements

As this process is to facilitate Medicaid drug rebates from manufactures for physician-administered drugs, providers are required to utilize drugs manufactured by companies who hold a federal rebate agreement. These NDCs will be the only ones Medicaid will cover for payment. A link to a list of those drug manufacturers who hold a federal rebate agreement, as well as their labeler codes (the first 5 digits of the NDC number), are available on the Medicaid website at: https://medicaid.alabama.gov/content/4.0_Programs/4.3_Pharmacy-DME/4.3.2_Billing_Policy_Info.aspx. Select the “covered labelers (manufacturers) available from CMS” link.

The Alabama Medicaid Agency implemented a Drug Lookup System effective October 5, 2010. The system allows non-pharmacy providers needing NDC information for the billing of HCPCS codes to search for drugs by drug name or NDC and will display coverage information. Providers can access the Drug Lookup feature by visiting the Alabama Medicaid website and clicking on the following link: http://medicaid.alabama.gov/content/4.0_Programs/4.3_Pharmacy-DME.aspx

Please note that the information found on the drug look up website applies to pharmacy claims only (i.e: pricing, PA requirements, and maximum quantity limits).

Any questions should be directed to the Provider Assistance Center at 1-800-688-7989.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Multiple NDCs for a Single HCPCS Drug Code

At times it may be necessary for providers to report multiple NDCs for a single procedure code. If two or more NDCs are to be submitted for a procedure code, the procedure code must be repeated on separate lines for each unique NDC. On the first line, the procedure code, NDC and procedure quantity are reported with a **KP modifier** (first drug of a multi drug). On the second line, the procedure code, NDC and procedure quantity are reported with a **KQ modifier** (second/subsequent drug of a multi drug). When reporting more than two NDCs per procedure code, the KQ modifier is also used on the subsequent lines.

Unclassified Drugs

A provider who administers a physician drug not listed should use the following J codes:

- J3490 - Unclassified Drugs
- J3590- Unclassified Biologics
- J9999 - Not otherwise classified, antineoplastic drugs.

The claim must be sent on paper with a description of the drug attached. Providers should submit a red drop-out claim with the complete name of the drug, total dosage that was administered and a National Drug Code (NDC) number. Please be sure to search the Physician Drug List to see if the drug is possibly under a generic name. The claims containing the unclassified procedure code must be sent to: Gainwell, Attn: Medical Policy, PO Box 244032, Montgomery, AL 36124-4032. Gainwell will determine the price of the drug.

The Alabama Medicaid Agency supports the avoidance of wasted (discarded) medicine whenever possible. Medicaid accepts the use of modifier JW on a second line item to indicate the wasted (discarded) amount of medication.

Breathing/Inhalation Treatment: J2545 Pentamidine Isethionate (Nebupent)

Current coverage policy for breathing or inhalation treatments utilizing drugs such as Albuterol does not allow for the drug to be billed for separately as it is considered a component of the treatment charge. The exception to this policy is the administration of Pentamidine Isethionate.

Pentamidine isethionate (J2545), given by inhalation, is an anti-microbial agent specifically indicated for the prevention of Pneumocystis carinii pneumonia (PCP) in high-risk HIV infected patients. Administration of Pentamidine is done via the Respirgard II nebulizer which utilizes a series of one-way valves and a filter to minimize the release of aerosol droplets into the air. CPT code 94642 (aerosol inhalation of Pentamidine for pneumocystis carinii pneumonia treatment or prophylaxis) is the appropriate code to bill for administration of the drug. This therapy is generally given on a monthly basis and given in the hospital or clinic/office by a health care professional. The administration code does not include the cost of the drug. The inhalation drug code and the administration of the drug should both be reported on the same claim, same date of service.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

340B Drug Pricing

The Veterans Health Care Act of 1992 enacted section 340 B of the Public Health Services Act, "Limitation on Prices of Drugs Purchased by Covered Entities". This Section provides that a manufacturer who sells covered outpatient drugs to eligible 340B entities must sign a pharmaceutical pricing agreement with the Secretary of Health and Human Services in which the manufacturer agrees to charge to Medicaid a price for covered outpatient drugs that will not exceed the average manufacturer price decreased by a rebate percentage.

Eligible 340B entities are defined in 42 U.S.C. are defined in 42 U.S.C. § 256b(a)(4).

When an eligible 340B entity, other than a disproportionate share hospital, a children's hospital excluded from the Medicare prospective payment system, a free-standing cancer hospital exempt from the Medicare prospective payment system, sole community hospital, rural referral center, or critical access hospital, submits a bill to the Medicaid Agency for a drug purchased by or on behalf of a Medicaid recipient, the amount billed shall not exceed the entity's actual acquisition cost for the drug, as charged by the manufacturer at a price consistent with the Veterans Health Care Act of 1992, plus the dispensing fee established by the Medicaid Agency.

A disproportionate share hospital, children's hospital excluded from the Medicare prospective payment system, free-standing cancer hospital exempt from the Medicare prospective payment system, sole community hospital, rural referral center, or critical access hospital may bill Medicaid the total charges for the drug. As manufacturer price changes occur, the entities must ensure that their billings are updated accordingly.

Eligible 340B entities are identified on the Department of Health and Human Service's website. These entities shall notify Medicaid of their designation as a 340B provider.

Audits of the eligible 340B entities' (claims submissions and invoices) will be conducted by the Medicaid Agency. Eligible 340B entities, other than the providers listed above, must be able to verify acquisition costs through review of actual invoices for the time frame specified. Charges to Medicaid in excess of the actual invoice costs will be subject to recoupment by the Medicaid Agency in accordance with Chapter 33 of the Administrative Code.

Medicare/Medicaid Drugs

Medicare Part B covers some drugs in a physician's office. If the recipient is dually eligible for Medicare and Medicaid, the drug code as required by Medicare should be billed first to Medicare. The claim should crossover to Medicaid for consideration of payment. If the claim does not crossover to Medicaid, providers will need to submit the appropriate HCPCS code to Medicaid on a Medical Medicaid/Medicare Related Claim (aka Crossover Form 340) with Medicare allowance/payment/coinsurance/ and deductible.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Medicare Part D drugs are a pharmacy benefit and should not be billed to Medicaid by physicians or outpatient facilities. Part D drugs are billed to Medicare on a pharmacy claim with the NDC number.

Not all drugs listed on the Physician Drug Fee Schedule are considered Part B drugs. Self Administered drugs are generally considered non-covered for Part B benefits. Coverage of Physician Drugs may be found on Medicaid's website at www.medicaid.alabama.gov or by AVRS or Provider Assistance Center at 1-800-688-7989.

Site-Specific Injections

Both the relevant CPT and J codes are billed. For example, a subconjunctival injection to the eye would be billed as 68200 (CPT) with a separate J code for the drug; thus, site specific injections are submitted as two lines.

EVALUATION AND MANAGEMENT CODES BILLED IN CONJUNCTION WITH DRUG ADMINISTRATION CODES

Effective for Dates of Service 01/01/2006 and Thereafter

When an Evaluation and Management service is provided *and* a Drug Administration code (96372, 96373, 96374, 96375 and 96376) is provided at the same time, the E & M code, Drug Administration Code, and the HCPCs Code for the drug may be billed. A **Significant Separately Identifiable Service** must be performed in conjunction with the Drug Administration code for consideration of payment for the Evaluation and Management Code. A **Modifier 25** must be appended to the E&M service for recognition as a "**Significant Separately Identifiable Service".** Medical Record documentation must support the medical necessity of the visit as well as the level of care provided.

However, when no **Significant Separately Identifiable** E & M service is actually provided at the time of a Drug Administration, an E & M code should not be billed. In this instance, the Drug Administration Code and the HCPCs Code for the drug may be billed. An example of this is routine monthly injections like B-12, iron, or Depo-Provera given on a regular basis without a **Significant Separately Identifiable** E & M service being provided.

When an Evaluation and Management service is provided and an Administration Code for Hydration (96360, 96361), Therapeutic, Prophylactic, and Diagnostic Infusion (96365, 96366, 96367 and 96368) and Chemotherapy Administration Code (96401-96542) is provided at the same time/encounter, the E&M code and Administration code may be billed. A **Significant Separately Identifiable Service** must be performed in conjunction with these administration codes for consideration of payment for the Evaluation and Management Code. A **Modifier 25** must be appended to the E & M service for recognition as a **"Significant Separately Identifiable Service".** Procedure Codes 99211 will not be allowed with Modifier 25 or in conjunction with the administration codes for the same date of service. Medical record documentation must support the

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

medical necessity and level of care of the visit. These services are subject to post payment review.

NOTE:
In accordance with Section 5042 of the SUPPORT Act, effective October 1, 2021, prescibers of Medicaid eligible recipients are required tocheck the Alabama PDMP (Prescription Drug Monitoring Program) prior to prescribing a Schedule II controlled substance. If the presciber does not check the PDMP, the prescriber is required to document the reason in the medical record. Exclusions to this requirement include prescriptions written for hospice patients, patients with an active cancer diagnosis, residents of a long-term care nursing facility, and children under the age of 18 (Schedule II prescription for ADHD only).

Chemotherapy Injections

Alabama Medicaid has established the following new guidelines that should be utilized by physicians when billing for administration codes.

- For non-chemotherapy injections, services described by CPT codes 96372, 96374, and 96375 may be billed in addition to other physician fee schedule services billed by the same provider on the same day of service.

- For IV infusions and chemotherapy infusions, if a significant separately identifiable E & M service is performed, the appropriate E & M CPT code should be reported utilizing modifier 25.

- When administering multiple infusions, injections, or combinations, only one “initial” drug administration service code should be reported per patient per day, unless protocol requires that two separate IV sites must be utilized. The initial code is the code that best describes the service the patient is receiving and the additional codes are secondary to the initial code.

- “Subsequent” drug administration codes, or codes that state the code is listed separately in addition to the code for the primary procedure, should be used to report these secondary codes. If an injection or infusion is of a subsequent or concurrent nature, even if it is the first such service within that group of services, then a subsequent or concurrent code from the appropriate section should be reported.

- If the patient has to come back for a separately identifiable service on the same day, or has 2 IV lines per protocol, these services are considered separately billable with a modifier 76.
- Medicaid will not pay for chemotherapy administration in a hospital setting, and claims for these codes with modifier 26 will not be recognized.

Please refer to Chapter 19 (Hospitals) for details on chemotherapy administration and infusion therapy.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Drugs Requiring Prior Authorization

EXAMPLE:

Effective September 1, 2006, injectable drug Orencia (New Code in 2007 - J0129) will require prior authorization as a biological through Health Information Designs (HID) prior to treatment. After receiving authorization from HID, a CMS-1500 paper claim must be submitted to Gainwell including the dosage and NDC number. The letter of approval from HID must be attached to the claim, and "attachment" in block 19. These drugs must be approved through HID prior to administering and billing. HID may be contacted at 1-800-748-0130. The Prior Authorization forms are located on our website at www.medicaid.alabama.gov.

Allergy Treatments

Physicians may bill for antigen services using only the component codes (i.e., the injection only codes 95115 or 95117) and/or the codes representing antigens and their preparation (i.e., codes 95144 through 95170). Physicians providing only an injection service must bill for only code 95115 or code 95117. Professional services for allergen immunotherapy multiple injections (procedure codes 95117 and 95125) should be billed using only one unit. Effective April 1, 2003, the Agency will deny claims for these procedure codes when more than one unit is billed.

Physicians providing only the antigen/antigen preparation service would bill the appropriate code in the range of 95144 through 95170. Physicians providing both services would bill for both services. This includes allergists who provide both services through the use of treatment boards.

Physicians will no longer use the "complete" service codes, and instead must bill for both the injection and the antigen services separately, even though the current CPT definitions of the antigen codes refer to vials and the physicians using treatment boards do not create vials.

Procedure codes 95144 - 95170 are used for the provision of single or multi-dose vials of allergenic extract for single patient use only. These procedures should only be billed at the time that these vials are supplied to the patient.

In the November 2006 Insider, an article was published to announce a change in the maximum number of allowed units for allergen immunotherapy. Medicaid is providing clarification to guide physicians who bill for the provision of allergen immunotherapy. Medicaid allows billing for the allergen at the time an individual vial is first used for a patient, but not for the entire amount of allergen/dilution prepared for the patient at once as this would likely exceed the maximum number of allowed units.

Procedure Code 95165 represents the preparation of vials of non-venom antigens. The reimbursement for procedure code 95165 is based on preparing a vial containing a mixture of all the appropriate antigens plus diluents and calculating the billing units in the vial.

Therefore, one (1) cc equals one (1) billing unit. The actual number of doses received by a patient may differ significantly from the number of billing units.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

When a multidose vial contains less than 10cc, physicians should bill Medicaid for the number of 1cc billing units that may be removed from the vial. If a physician prepares two 10cc vials containing **different allergens**, he/she may bill Medicaid for a total of 20 billing units (10 billing units per vial).

The maximum number of billable units (two-10cc vials) for procedure code 95165 was set as "20" effective November 1, 2006. If multiple vials are prepared at one time, each vial should be billed when that vial is opened for use for the patient. Administration of vaccine may continue to be billed as each dose is given in the physician's office. Medical record documentation must clearly support the treatment plan, each vial used, antigens, dosage, and changes in the treatment regime.

Claims exceeding 20 billing units (such as two 10cc vials containing different allergens) will require manual processing by sending a clean claim with medical justification, medical records, and supporting fact based documentation to:

Alabama Medicaid Agency
P.O. Box 5624
Montgomery, Alabama, 36104
Attention: Medical Support Programs

Calculation of Billing Units and Wastage

HCPCS code for J0587 reads "per 100 units". Therefore, 100 units of J0587 will equal one billing unit. However, because of the expense of the drug, physicians are encouraged to schedule patients in a manner that they can use botulinum toxin most efficiently. For example, a physician schedules three patients requiring botulinum toxin type A on the same day within the designated shelf life of the drug (shelf life is four hours). The physician administers 30 units to all three patients and bills 30 units for the first two patients and 40 units for the last patient. The physician would bill 40 units for the last patient because the patient received 30 units but the physician had to discard 10 units.

HCPCS code for J0585 reads "per unit". Therefore this code requires the units of service on the claim to reflect the number of units used. However, if a physician must discard the remainder of a single does vial (sdv) after administering it to a patient, the Agency will cover the amount of the drug discarded along with the amount administered. For example, a physician administers 15 units of botulinum toxin type A and it is not practical to schedule another patient who requires botulinum toxin. Situations that are impractical to schedule another patient include (a) it is the first time the physician has seen the patient and did not know the patient's condition or (b) the physician has no other patients who require botulinum toxin injections.

Documentation requirements must include the exact dosage of the drug given and the exact amount of the discarded portion in the patient's medical record as well as the corresponding diagnosis. However, if no benefit is demonstrable by two sets of injections, further injections will not be considered medically necessary.

Modifier JW

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

The Agency supports the avoidance of wasted (discarded) medicine whenever possible. Medicare requests the use of modifier JW on a second line item to indicate the wasted (discarded) amount of medication. Medicaid accepts the use of modifier JW, but total units must not exceed maximum number of allowed units.

Units of Service

Physician drug maximum number of units allowed are calculated based on a "per dose" basis, and by the narrative description of the HCPCS code. Some dosages are inherent in the narrative description of the codes and will assist in determining the number of units to file. When administering a lesser or greater dosage than the narrative description providers should round the billing unit up to the closest amount charted. For example, J0290, Ampicillin, up to 500 mg:

If administering 1000mg, bill 2 units
750 mg, bill 2 units
500 mg, bill 1 unit
125 mg, bill 1 unit

Exception: Bicillin CR and Bicillin LA

Effective January 1, 2011, Bicillin CR and Bicillin LA will be priced on a 100,000 unit per ML basis. As well, the HCPCS codes have been condensed into two vs. six codes:

If administering Bicillin CR, bill J0558 (replaces J0530, J0540 and J0550)

If administering Bicillin LA, bill J0561 (replaces J0560, 05670 and J0580)

One of the two HCPCS codes should be chosen based on the drug description. The number of billing units would then be derived by dividing the dosage by 100,000 units. Fractions of billing units are rounded up to the next whole unit.

Example: If the dosage of Bicillin LA is 1,800,000 units, choose the appropriate procedure code. In this case procedure code J0561 is the appropriate code to be used. Next, take the dosage given (1,800,000 units) and divide by 100,000 units to obtain the billing units. This dosage would yield 18 billing units (1,800,000 /100,000 = 18 units) for code J0561.

Flu Vaccination

For influenza vaccine procedure codes covered under the Vaccines for Children (VFC) Program to eligible children less than nineteen years of age, refer to Appendix A, Well Child Check-Up (EPSDT).

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Influenza vaccines are covered fee-for-service (vaccine medication) for ages nineteen and above. For more specific information on coverage, you may call the Provider Assistance Center at 1 (800) 688-7989.

Vaccines for Children (VFC)

The Vaccines for Children (VFC) Program offers free vaccines to qualified health care providers for children who are 18 years of age and under who are Medicaid eligible, uninsured, American Indian or Alaskan Native, or the under insured. Providers must be enrolled in the VFC Program to receive any reimbursement for the administration of immunizations provided to recipients 0-18 years of age. The Alabama Department of Public Health administers this program.

Medicaid tracks usage of the vaccine through billing of the administration fee using CPT codes. Refer to Appendix A, Well Child Check-Up (EPSDT), for covered CPT codes.

ImmPRINT Immunization Provider Registry

The Alabama Department of Public Health has established a statewide immunization registry. Please visit their website at https://siis.state.al.us for more information.

Stand-alone Vaccine Counseling Codes

The following procedure codes may be used for stand-alone vaccine counseling for recipients under 21 years of age.

Procedure Code	Procedure Code Description
G0312	Immunization counseling by a physician or other qualified health care professional when the vaccine(s) is not administered on the same date of service for ages under 21, 5 to 15 mins time.
G0313	Immunization counseling by a physician or other qualified health care professional when the vaccine(s) is not administered on the same date of service for ages under 21, 16-30 mins time.
G0314	Immunization counseling by a physician or other qualified health care professional for COVID-19, ages under 21, **16-30** mins time.
G0315	Immunization counseling by a physician or other qualified health care professional for COVID-19, ages under 21, **5-15** mins time.

- These procedure codes are to be used when ONLY providing vaccine counseling to a recipient under age 21, and the recipient does NOT receive a vaccine on the day of service.

NOTE:
G0315 is for 5-15 minutes of time; whereas, G0314 is for 16-30 minutes of time.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Adult Immunizations

Payment for immunizations against communicable diseases for adults will be made if the physician normally charges his patients for this service. Immunizations that are provided to Medicaid eligible recipients 19 years old and older must submit a claim for the appropriate CPT code. Vaccines are reimbursable on a fee-for-service basis using the appropriate CPT code. The administration fee is included in the price of the vaccine. The administration fee may be billed separately if an office visit is not billed.

Provider should bill only the vaccine administration fee if the vaccine is provided at no cost to the provider from federal resources.

If a 90000s CPT vaccine code does not have a rate, a manual review will need to be submitted. A paper claim should include the following:

- Form 402
- A clean red drop-out ink CMS Form 1500 containing the vaccine procedure code
- Documentation of the total dosage that was administered
- Invoice with the complete name of the drug and a National Drug Code (NDC) number.

Claims may be submitted to:

Alabama Medicaid Agency
Attn: Dental / EPSDT / Physician Division
501 Dexter Avenue
P.O. Box 5624
Montgomery, AL 36103-5624

Radiopharmaceutical Drugs (Invoice Priced)

A provider who administers a Radiopharmaceutical drug not priced on the www.palmettogba.com website should use the following criteria:

- The claim must be sent on paper with a description of the drug attached.
- Providers should submit a red drop-out ink claim with the complete name of the drug, total dosage that was administered and a National Drug Code (NDC) number.
- The claims containing the radiopharmaceutical procedure code must be sent to:

  Gainwell, Attn: Medical Policy
  PO Box 244032
  Montgomery, AL 36124-4032

Gainwell will determine the price of the drug.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

H.2 Physician Drug Fee Schedule

Physician Adminstered Drugs are those that are administered in the Physician's office or outpatient facility. A covered outpatient drug is broadly defined as a drug that may be dispensed only upon prescription and is approved for safety and effectiveness by the FDA. Physician administered drugs are not restricted to injectable drugs only but include any drug regardless of the method of administration.

The inclusion or exclusion of a procedure code does not imply Medicaid coverage, reimbursement, or lack thereof. To inquire regarding any restrictions/limits on these procedure codes, please consult the Provider Assistance Center at 1-800-688-7989 or AVRS at 1-800-727-7848. The pricing file must be verified to determine coverage and reimbursement amounts.

The Physician Drug Fee Schedule is located on the Alabama Medicaid website and can be accessed by clicking the following link: http://medicaid.alabama.gov/content/Gated/7.3G_Fee_Schedules.aspx

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

I ASC Procedures List

CPT codes on the ASC fee schedule are currently covered for ambulatory surgical centers billing.

NOTE:

The ASC fee schedule is used for scheduling Medicaid recipients for outpatient surgeries. Occasionally Medicaid recipients question what procedures Medicaid covers.

Before performing any procedure, providers need to inform the recipient that the recipient is responsible for payment of services that Medicaid does not cover.

Use the AVRS line at Gainwell (1(800) 727-7848) to verify if it is a covered procedure code. Submit requests to add procedure codes to this list in writing to the Alabama Medicaid Agency, 501 Dexter Avenue, P. O. Box 5624, Montgomery, AL 36103-5624, Attention: Medical Services Division.

An ”Y” in the *Requires* PA column indicates that the procedure requires prior authorization. Mail your written request for prior authorization and supporting documentation of extenuating circumstances and the procedure code to Gainwell, Attn: Prior Authorization. P. O. Box 244032, Montgomery, AL 36124-4032.

An “Y” in the *Under 21 Restriction* column indicates that the procedure requires an EPSDT referral or is for QMB recipients only.

NOTE:

Benefit limits may also apply in addition to the hard-coded maximum units.

The inclusion or exclusion of a procedure code on the ASC fee schedule does not imply Medicaid coverage or reimbursement. The pricing file must be verified to determine coverage and reimbursement amounts for the specific date of service. ASCs may bill surgical procedures within the range of 10000 - 69XXX..

The fee schedule for Appendix I is located on Medicaid’s website at www.medicaid.alabama.gov under: Providers > Fee Schedules > Ambulatory Surgical Center (ASC) Fee Schedule.

K Top 200 Third Party Carrier Codes

This appendix lists the top 200 insurance companies that may be a third-party resource for payment of claims. The company name and carrier codes are listed numerically in Section K.1, Numerical Listing by Company Code, and alphabetically in Section K.2, Alphabetical Listing by Company Name.

Because federal Medicaid regulations require that any resources currently available to a recipient, be considered in determining liability for payments of medical services, providers have an obligation to investigate and report the existence of other insurance or liability to Medicaid. When you identify a third party resource, you should submit the claim to that resource.

Refer to Section 3.3.6, Third Party Liability, for more information about how to file a claim when another insurance company may be responsible for all or part of the cost of the medical care.

K.1 Numerical Listing by Company Code

Company Code	*Company Name*	*City, State*
00002	AARP Insurance Plan	Philadelphia, PA
00007	Aetna Life and Casualty Company	Tampa, FL

L AVRS Quick Reference Guide

The Alabama Medicaid Automated Voice Response System (AVRS) enables providers to access information regarding check amount, claim status, recipient eligibility and third party resources, drug and procedure code pricing, prior authorization requirements, and recipient household information. When you dial 1 (800) 727-7848, you can access this information 18-20 hours per day, seven days a week. This guide is intended to help you use AVRS quickly, accurately, and efficiently.

This quick reference guide consists of the following sections:

In This Section	***You Can Find Out About***
AVRS Basics	General information, such as hours of operations and the type of information available on AVRS; AVRS spoken requests and responses; function keys; and time-outs, invalid data, and errors. **Please note the alphabetic table in Section L.1.3, Special Function Keys, which provides a number combination for each letter of the alphabet. Providers who must enter alphabetic characters in AVRS should refer to this section for instructions.**
Accessing AVRS	Using the main menu and enter valid provider number. **You must enter a valid provider number to access any AVRS information. Option 0, the Provider Assistance Center, will be available during normal business hours to callers who do not enter a valid provider number.**
Verifying Check Amount	Selecting the appropriate main menu option and entering valid data to verify check amounts.
Accessing Fee-for-service Claims Status	Selecting the appropriate main menu option and entering valid data to verify claims status.
Verifying Recipient Eligibility	Selecting the appropriate main menu option and entering valid data to verify recipient eligibility. **Providers have the option of receiving the eligibility response via fax. The instructions are included in this section.**
Accessing Pricing Information	Selecting the appropriate menu options and entering valid data to access pricing information for NDCs or procedure codes.
Accessing Fee-for-service Prior Authorization Information	Selecting the appropriate menu option and entering valid data to access information about approved prior authorizations.
Accessing Household Information	Selecting the appropriate menu options and entering valid data to access information for recipient household members. **Providers have the option of receiving the household information response via fax. The instructions are included in this section.**

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

All AVRS responses are based on the information entered by the caller. Data is provided for informational purposes and is current only as of the inquiry date. This information is not a guarantee of payment. Claims submitted for payment are subject to system audits (medical policy), edits, and applicable limitations.

L.1 AVRS Basics

This section provides general information about AVRS that will help you use AVRS more efficiently and effectively. It provides general information on how to access AVRS and what information is provided and describes AVRS spoken requests and responses, special function keys, and global messages. Of particular importance is the alphabetic table, described in Section L.1.3, Special Function Keys, providing number combinations corresponding to the letters of the alphabet. Providers who must enter data that contains both numbers and letters should read this section.

L.1.1 General Information

AVRS is available approximately 18-20 hours per day, 7 days per week. Scheduled down times usually occur during off-peak hours, such as late at night or very early in the morning.

To access AVRS, you must use a touch tone phone. Providers with rotary dial phones should contact the Gainwell Provider Assistance Center, from 8:00 a.m. until 5:00 p.m., Monday through Friday. For Pharmacy Providers only, the Pharmacy Help Desk is also available from 7:00 a.m. until 8:00 p.m. Monday through Friday, and on Saturdays from 9:00 a.m. to 5:00 p.m., and can be accessed by dialing 1 (800) 456-1242. Please refer to the Alabama Medicaid Provider Insider, a quarterly bulletin sent to Alabama Medicaid providers, for holiday schedules.

NOTE:

It is important to have all necessary information on hand prior to calling AVRS. AVRS is designed to give callers several chances to enter or correct data; however, the system will terminate the call if you fail to enter correct data within the allowed number of attempts, or if you cause the system to time-out. Please refer to Section L.1.4, Time-outs, Invalid Data, and Errors, for more information.

AVRS enables callers to access the following data:

Press Menu Option	*To Retrieve Information About*
1	Check amount for the current checkwrite.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Press Menu Option	*To Retrieve Information About*
2	Claim status, including the following information for pharmacy, Medicare-related, and non-Medicare related claims: • Paid amount and checkwrite date for paid claims • Message that the claim is in process for suspended claims • EOB codes and RA date for claim denials • Procedure or revenue code that denied or partially paid (for non-Medicare related claims, as appropriate) • ICN for fully or partially refunded claims
3	**Recipient eligibility verification** (option 1 on the sub-menu), including the following eligibility information: • Check digit for recipient number entered • Recipient last and first names • Current recipient number and check digit • Issue number for recipient ID card • Recipient date of birth and sex • Eligibility start and stop dates corresponding to the month of eligibility entered • Screening information, if selected (Screening information includes both fee-for-service and encounter related if applicable) • City • State • ZIP code • County code • Maternity waiver information, if applicable • Recipient aid category • Lock-in, lock-out, Long Term Care, and waiver information • Medicare HMO information and HIC number • Attributed PCP Provider information, if applicable • Managed care information, including plan, PMP name, phone number, and 24-hour phone number • ACHN enrollment, if applicable • Recipient Application Status, if applicable At the end of the verification response, you may also retrieve the following recipient information using the recipient sub-menu: • **Benefit limits** (option 2 on the sub-menu) (Benefit limits are fee-for-service only), including inpatient, outpatient, and physician counts; eyeglass limitation counts; dental limits; and other counts • **Other insurance** (option 3 on the sub-menu), including the following third party policy information (for up to three policies): – Policy number – Company code and group number – Subscriber name and SSN – Coverage dates – Policy coverage information – Coverage limitation – Health Insurance Premium (HIP) information
4	Drug pricing information for the dispensed date entered, including prior authorization requirements
5	Procedure code pricing information, including prior authorization requirements and procedure coverage information, if applicable
6	Prior authorization verification for procedure code or NDC, including prior authorization number, status, start date, stop date, units or dollars authorized, and units or dollars used

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Press Menu Option	*To Retrieve Information About*
7	Recipient household members. Allows the user to find a recipient Medicaid number for a member of the recipient's household. Information returned includes the following: - member number - name - date of birth - race - sex - certifying program

L.1.2 AVRS Spoken Requests and Responses

AVRS provides a spoken response to queries entered using a touch tone phone. Based on the information you enter, or the menu options you select, AVRS will provide a custom response. AVRS does this by translating responses to the data you enter into speech patterns.

Messages are spoken as recorded, because these do not change. However, other words, such as names, are spelled out. For instance, AVRS translates the last name "Doe" as D-O-E.

Likewise, AVRS speaks number values one number at a time. For example, the number '155' is spoken as 'one-five-five', rather than 'one hundred fifty-five'.

If the response represents a dollar amount, AVRS provides the response in a monetary format. For example, the dollar value '128432' is represented as 'one thousand, two hundred eighty-four dollars and thirty-two cents'.

AVRS translates date responses in a Gregorian format (the manner in which most of us express dates). For instance, the date '05/14/1999' is spoken as 'May fourteenth, nineteen ninety-nine'.

L.1.3 Special Function Keys

You will receive better, faster results using AVRS if you understand how to use the following special function keys.

End of Data

Because the length of data you enter may vary (for instance, while most Alabama Medicaid provider numbers have nine-digit numbers, some have eight-digit numbers, and all National Provider Identifier (NPI) numbers have ten digits), you must signal AVRS when you have finished entering data. The pound sign (#) is the symbol you use to do this. You should always enter the pound sign key to mark the end of the data you have just entered. The following examples illustrate how to use the pound sign (#) to mark the end of data:

To enter provider number 123456789	Press 123456789#
To enter procedure code 11111	Press 11111#

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Repeat Response or Prompt

AVRS is designed to provide you the information you need by using a series of prompts and responses. The system 'speaks' requests to you, such as available menu options, or a request to enter data. If you want AVRS to repeat the message, press the asterisk (*) key on your touch tone phone.

Alphabetic Data

AVRS uses information keyed on a touch tone phone, which does not provide a key for each letter of the alphabet. Sometimes, you will have to enter data that contains letters as well as numbers (for instance, some Alabama Medicaid provider numbers contain letters and numbers). To do this, you must use a combination of the asterisk (*) key and **two** numbers to represent a particular letter.

The table below describes the number combinations that represent the letters of the alphabet:

A - *21	G - *41	M - *61	S - *73	Y - *93
B - *22	H - *42	N - *62	T - *81	Z - *12
C - *23	I - *43	O - *63	U - *82	
D - *31	J - *51	P - *71	V- *83	
E - *32	K - *52	Q - *11	W - *91	
F - *33	L - *53	R - *72	X - *92	

Using this table as a guide, enter data with a combination of letters and number in the following way:

Actual Provider Number	ABC0099D
Enter the following in AVRS	*21 *22 *23 0099 *31
AVRS reads back this number	ABC0099D

L.1.4 Time-outs, Invalid Data, and Errors

AVRS can respond only to what is entered by you, the caller. To receive information from AVRS, you must enter valid data in the correct format. When you make an error or fail to enter information when prompted, AVRS gives you another chance to correct the mistake. If you do not correct the error or respond in a timely fashion, AVRS will end the call.

Maximum Errors Exceeded

You have three chances to enter correct data when prompted. If you exceed the limit, AVRS plays the following message:

> *We're sorry – the data you entered is invalid. If you would like assistance from the Provider Assistance Center, press 0.*

If you press 0, AVRS transfers you to the Provider Assistance Center, which will assist you during normal business hours. If you do not press 0 within 10 seconds, AVRS ends the call.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Maximum Time-outs Exceeded

You have ten seconds to enter requested data. The first time you exceed this limit, AVRS prompts you to enter the data. If you exceed the limit a second time, AVRS plays the following message:

> *You have not responded with the requested information. If you would like assistance from the Provider Assistance Center, press 0.*

If you press 0, AVRS transfers you to the Provider Assistance Center, which will assist you during normal business hours. If you do not press 0 within 10 seconds, AVRS ends the call.

Invalid Data

If you enter a value that is not described as a menu option (for instance, if you press '9' after listening to the main menu, when '9' is not a valid option), AVRS plays the following:

> *Invalid option. Please re-enter.*

AVRS then replays the menu options.

Maximum Transactions Exceeded

To ensure AVRS is available to all providers, you are limited to ten (10) transactions per phone call. For each main menu item, AVRS counts **one** transaction using the following criteria:

- For 'Check Amount,' (Option 1), each time you enter a different provider number
- For 'Claims Status' (Option 2), each time you check another claim for the same recipient, or each time you check a claim for a different recipient
- For 'Recipient Eligibility Verification' (Option 3), each time you verify eligibility for a recipient
- For 'Drug Pricing Information' (Option 4), each time you enter an NDC
- For 'Procedure Code Pricing Information' (Option 5), each time you enter a procedure code
- For 'Prior Authorization Verification' (Option 6), each time you enter a procedure code or NDC
- For 'Household Inquiry' (Option 7), each time you request an inquiry for recipient household information

When you exceed the ten transaction limit, AVRS ends the call after playing the following message:

> *In order to serve as many callers as possible, we must limit the number of inquiries per call. Please call again for any additional inquiries you may have.*

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

L.2 Accessing the AVRS Main Menu

When you dial 1 (800) 727-7848 to access AVRS, the system supplies the following greeting:

> *Good morning (good afternoon, or good evening). Welcome to the Alabama Medicaid Voice Response Inquiry System.*

If the system is unavailable, the following message plays:

> *The Alabama Medicaid Voice Response Inquiry System is currently unavailable. Please call back later or call the Provider Assistance Center at 1 (800) 392-5741 between the hours of 8:00 a.m. and 5:00 p.m., Monday through Friday.*

If you wish to have confirmation after entering required information, press 1 when prompted. For the remainder of the call data entered will be repeated back to you and then ask you to confirm before continuing. Press 2 if you do not wish to have confirmation.

You must enter a valid NPI or Alabama Medicaid provider number to access any AVRS information. If your NPI is shared by multiple provider location ZIP codes and / or taxonomy numbers, you may be prompted to enter your nine-digit ZIP+4 code and, if necessary, your ten-digit taxonomy number.

If AVRS is available, the system provides the Main Menu. Callers may choose from the following menu options:

- Check amount (press 1)
- Claims status (press 2)
- Recipient eligibility verification (press 3)
- Drug pricing information (press 4)
- Procedure code pricing information (press 5)
- Prior authorization verification (press 6)
- Recipient household information (press 7)
- Provider Assistance Center (press 0)

Providers calling from a rotary phone are instructed to hold for the provider unit during normal business hours, or to call back during normal business hours to speak with a representative of the Provider Assistance Center.

L.3 Verifying a Check Amount

To verify a check amount, press 1 (the number one) from the Main Menu. AVRS prompts you to enter your National Provider Identifier (NPI) or Alabama Medicaid provider number. After AVRS verifies your NPI, the system returns the following information:

- Check amount for the current checkwrite

Once you have listened to the response, you may choose from the following options, as prompted by AVRS:

- Press 1 to repeat the checkwrite response
- Press 2 to check another claim on the same recipient
- Press 3 to check a claim on another recipient

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Press 4 to obtain checkwrite information for another provider number
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)
- Hang up to end the call

NOTE:

AVRS returns check amount information based on the payee, or billing provider number. You must have a valid payee provider number in order to complete a successful query. For group practices where several providers receive a single check, the check amount given will be for the entire group.

L.4 Accessing Claims Status

To access claims status, press 2 (the number two) from the Main Menu. AVRS prompts you for your NPI or billing provider number and the Alabama Medicaid recipient ID number entered on the claim form. Once you have entered this data, you may choose from the following options, as prompted by AVRS:

- Press 1 for pharmacy claims
- Press 2 for non-Medicare related claims
- Press 3 for Medicare related claims
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)

L.4.1 Pharmacy Claim Status

To access claims status for pharmacy claims, you must enter the following data:

- Eleven-digit NDC, followed by the pound sign
- Dispensed date in MMDDCCYY format, followed by the pound sign
- Billed amount, including dollars and cents, followed by the pound sign. **Do not include a decimal point. You may enter a maximum of nine digits.**

AVRS has now collected the required input data, and can perform a query to retrieve the requested information. If AVRS cannot find a match for the provider or recipient, the system prompts you to re-enter the data. If the provider and recipient data are valid, AVRS returns one of the following responses:

- System could not find a claim that matches the search criteria
- Paid amount, checkwrite date, and ICN for paid claims
- Message that the claim is in process for suspended claims

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- EOB codes and RA date for claim denials

The system also returns similar messages if more than one claim matches the search criteria. Once you have listened to the response, you may choose from the following options, as prompted by AVRS:

- Press 1 to repeat the claim status response
- Press 2 to check another claim for the same recipient
- Press 3 to check a claim for another recipient
- Press 4 to enter another provider number
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)
- Hang up to end the call

L.4.2 Non-Medicare Claim Status

To access claims status for non-Medicare claims, you must enter the following data:

- From date of service in MMDDCCYY format, followed by the pound sign
- Through date of service in MMDDCCYY format, followed by the pound sign
- Billed amount, including dollars and cents, followed by the pound sign. **Do not include a decimal point. You may enter a maximum of nine digits.**

AVRS has now collected the required input data, and can perform a query to retrieve the requested information. If AVRS cannot find a match for the provider or recipient, the system prompts you to re-enter the data. If the provider and recipient data are valid, AVRS returns one or more of the following responses:

- System could not find a claim that matches the search criteria
- Paid amount, checkwrite date, and ICN for paid claims
- Message that the claim is in process for suspended claims
- EOB codes and RA date for claim denials
- Line item number, procedure or revenue code, and EOB code for each denied line item
- Paid amount, checkwrite date, and ICN for partially paid claims
- Line item, procedure or revenue code, and paid amount for each paid detail on a partially paid claim
- Line item, procedure or revenue code, and EOB code for each denied detail on a partially paid claim

The system also returns similar messages if more than one claim matches the search criteria. Once you have listened to the response, you may choose from the following options, as prompted by AVRS:

- Press 1 to repeat the claim status response
- Press 2 to check another claim for the same recipient

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Press 3 to check a claim for another recipient
- Press 4 to enter another provider number
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance representative (please note that the Provider Assistance Center is available during normal business hours only)
- Hang up to end the call

L.4.3 Medicare Claim Status

To access claims status for Medicare claims, you must enter the following data:

- From date of service in MMDDCCYY format, followed by the pound sign
- Through date of service in MMDDCCYY format, followed by the pound sign
- Billed amount, including dollars and cents, followed by the pound sign. **Do not include a decimal point. You may enter a maximum of nine digits.**

AVRS has now collected the required input data, and can perform a query to retrieve the requested information. If AVRS cannot find a match for the provider or recipient, the system prompts you to re-enter the data. If the provider and recipient data are valid, AVRS returns one or more of the following responses:

- System could not find a claim that matches the search criteria
- Paid amount, checkwrite date, and ICN for paid claims
- Message that the claim is in process for suspended claims
- EOB codes and RA date for claim denials
- Line item number, procedure or revenue code, and EOB code for each denied line item
- Message that claim has been partially refunded and ICN for partially refunded claim
- Message that claim has been fully refunded, and ICN for fully refunded claim

The system also returns similar messages if more than one claim matches the search criteria. Once you have listened to the response, you may choose from the following options, as prompted by AVRS:

- Press 1 to repeat the claim status response
- Press 2 to check another claim for the same recipient
- Press 3 to check a claim for another recipient
- Press 4 to enter another NPI
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance representative (please note that the Provider Assistance Center is available during normal business hours only)
- Hang up to end the call

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

L.4.4 Verifying Recipient Eligibility

To verify recipient eligibility, press 3 (the number three) from the Main Menu. AVRS prompts you for the following:

- Your NPI or Alabama Medicaid provider number, followed by the pound sign
- A valid Alabama Medicaid recipient number, or the recipient's Social Security Number and Date of Birth, each followed by the pound sign
- Eligibility date, either for the current month (simply press the pound (#) sign) or for a previous month for which you must enter the date in MMCCYY format, followed by the pound sign
- Press 1 to hear all screening types; otherwise press 2
- Patient account number, if applicable (to bypass this, simply press the pound (#) sign)

NOTE:

The patient account number is an optional field. It reflects your internal patient account number. You may find it helpful to enter this number if you wish to receive a fax response and would like the number to display on the response. You may enter a maximum of 15 digits.

AVRS verifies the data you entered (except for the patient account number) and returns a message if the recipient is not eligible for the eligibility dates entered. If the recipient is eligible, you may choose from the following sub-menu options, as prompted by AVRS:

- Press 1 for eligibility information
- Press 2 for benefit limits
- Press 3 for other insurance
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)

L.4.5 General Eligibility Information

You can receive a faxed copy of the eligibility response. Instructions are provided below.

Prior to playing the response, you may choose from the following options, prompted by AVRS:

- Press 1 to receive a fax only response of the eligibility information
- Press 2 to receive a voice only response
- Press 3 if you want both a fax and voice response

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Receiving a Fax

When you select Option 1 or 3, AVRS prompts you to enter your ten-digit fax number (three-digit area code plus the seven-digit number), followed by the pound (#) sign. The system will send a fax transmission to the number you entered.

AVRS provides the following eligibility information for the recipient number entered:

- Check digit for recipient number entered
- Recipient last and first names
- Current recipient number and check digit
- Issue number for recipient ID card
- Recipient date of birth and sex
- Eligibility start and stop dates corresponding to the month of eligibility entered
- Screening information, if selected (Screening information includes both fee-for-service and encounter related if applicable)
- City
- State
- ZIP code
- County code
- Maternity waiver information, if applicable
- Recipient aid category
- Lock-in, lock-out, Long Term Care, and waiver information
- Medicare HMO information and HIC number
- Attributed PCP Provider Information, if applicable
- Managed care information, including plan name, PMP name, phone number, and 24-hour phone number
- ACHN enrollment , if applicable
- Recipient Application Status, if applicable

Once the response has played, you may choose from the following options, prompted by AVRS:

- Press 1 to repeat the message
- Press 2 to speak back service type coverage and patient responsibility
- Press 3 to continue

Selecting Option 2 to speak back service type coverage and patient responsibility

Option 2 speaks back the service type coverage and financial responsibility for the recipient's benefit plan. The copay can be zero, a fixed rate, or include an amount range based on the benefit plan. The table below shows the service types to be spoken back along with an example of amounts for co-insurance, deductible and copay.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

NOTE:

The numbers provided below are examples and not actual minimums or maximums.

Plan	Co-Insurance	Deductible	Copay Minimum	Copay Maximum
Medical Care	0	0	0	50.00
Benefit Plan	0	0	0	50.00
Chiropractic	0	0	0	50.00
Dental	0	0	0	50.00
Hospital	0	0	0	50.00
Hospital-Inpat	0	0	0	50.00
Hospital-Outpat	0	0	0	50.00
Emergency SVC	0	0	0	50.00
Pharmacy	0	0	0	50.00
Physician Off Visit	0	0	0	50.00
Vision	0	0	0	50.00
Mental Health	0	0	0	50.00
Urgent Care	0	0	0	50.00

This information is returned by default on the fax back if fax back is selected. It is shown on the fax back under the 'Eligibility Information' section where the benefit plan information is located. Just below the Aid Category and Description the service types table will be shown as above with the correlating information.

After the service type coverage and patient responsibility is spoken back the following options are given.

- Press 1 to repeat the eligibility information
- Press 2 to continue to hear service type coverage and patient responsibility
- Press 3 to continue

Selecting Option 3 to Continue

Option 3 accesses a menu that enables you to do the following:

- Press 1 to continue researching eligibility, such as benefit limits or other insurance, for the same recipient
- Press 2 to verify eligibility for another recipient
- Press 3 to enter another provider number
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Hang up to end the call

If you select Option 1, AVRS allows you to check benefit limits or other insurance for the recipient number you entered.

L.4.6 Benefit Limits

To access benefit limits (option 2 on the sub-menu) (Benefit limits are fee-for-service only) for the recipient number you entered, choose from the following options:

- Press 1 for inpatient, outpatient, and physician counts
- Press 2 for eyeglass limitation counts
- Press 3 for dental limits
- Press 4 for other counts
- Press 5 to repeat the message
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)

If you choose options 1-4, AVRS responds with the applicable limitation information, then prompts you to select from the following:

- Press 1 to repeat the response
- Press 2 to inquire on other limits for the recipient you entered
- Press 3 to continue

If you select Option 3 (to continue), AVRS allows you to request another type of recipient information for the same recipient; check eligibility for another recipient; enter another provider number; return to the Main Menu; speak with a Provider Assistance Center representative; or end the call.

Inpatient, Outpatient, and Physician Counts

AVRS provides the effective date of the limitation counts and the paid and suspended counts for the following limits:

- Inpatient hospital days
- Outpatient hospital days
- Physician office visits

Eyeglass Limitation Counts

AVRS provides the effective date of the limitation counts and the paid and suspended counts for the following limits:

- Eyeglass frames
- Eyeglass lenses
- Eyeglass fitting exams
- Eyeglass exams

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Dental Limitation Counts

When available, AVRS provides the paid and suspended counts for the following limits:

- Space maintainers
- Fluoride
- Prophylaxis
- Full or panoramic X-rays
- Oral exams

Other Counts

AVRS provides the effective date of the limitation counts and the paid and suspended counts for the following limits:

- Home health visits
- Ambulatory surgery center visits
- Dialysis services

Screening Information

AVRS provides the last EPSDT screening date for the following screening types:

- Medical screening
- Dental screening
- Vision screening
- Hearing screening

Please note that EPSDT screenings for recipients under three years of age occur more frequently than yearly. Please refer to Appendix A, EPSDT, for screening schedules.

L.4.7 Other Insurance

AVRS indicates the number of third party policies (option 3 on the sub-menu) on file for the recipient. AVRS will provide the following information for up to three (3) third party policies:

- Policy number
- Company code and group number
- Subscriber name and SSN
- Coverage dates
- Policy coverage information
- Coverage limitation
- Health Insurance Premium (HIP) information

When the response concludes, AVRS provides you with the following options:

- Press 1 to continue researching eligibility, such as benefit limits or other insurance, for the same recipient
- Press 2 to verify eligibility for another recipient
- Press 3 to enter another provider number
- Press 9 to return to the Main Menu

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)
- Hang up to end the call

L.5 Accessing Pricing Information

AVRS allows you to verify pricing information for NDCs and procedure codes.

L.5.1 Drug Pricing

To verify pricing information for drugs, press 4 (the number 4) from the Main Menu. AVRS prompts you for the following:

- Your NPI or Alabama Medicaid provider number, followed by the pound sign
- A valid, 11-digit NDC, followed by the pound sign
- The dispensed date in MMDDCCYY format, followed by the pound sign

AVRS performs a query and responds with the Reimbursement Rate Per Unit (RPU) price on file and whether the NDC requires a prior authorization. The system then allows you to choose from the following options:

- Press 1 to repeat the message
- Press 2 to enter another provider number
- Press 3 to check another NDC for the same provider
- Press 4 to verify the prior authorization number
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)
- Hang up to end the call

L.5.2 Procedure Code Pricing

To verify pricing information for procedure codes, press 5 (the number 5) from the Main Menu. AVRS prompts you for the following:

- Your NPI or Alabama Medicaid provider number, followed by the pound sign
- A valid, five-digit procedure code, followed by the pound sign
- Up to four modifiers, each followed by the pound sign, if applicable (to bypass this, simply press the pound (#) sign)
- The date of service in MMDDCCYY format, followed by the pound sign

AVRS performs a query and responds with the price on file, whether the procedure code requires a prior authorization, and procedure coverage information, if applicable. The system then allows you to choose from the following options:

- Press 1 to repeat the message
- Press 2 to enter another provider number
- Press 3 to check another procedure code for the same provider

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Press 4 to check another modifier for the same procedure
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)
- Hang up to end the call

L.6 Inquiring About Prior Authorization Information

To inquire about prior authorizations (PAs), press 6 (the number 6) from the main menu. AVRS prompts you for the following:

- Your NPI or Alabama Medicaid provider number, followed by the pound sign
- Recipient's ID or Recipient's Social Security Number
- Date of service (DDMMYYYY)
- The five-digit procedure code or 11-digit NDC, followed by the pound sign
- Up to four modifiers, if inquiring on a PA for a procedure code, each followed by the pound sign, if applicable (to bypass this, simply press the pound (#) sign)

AVRS performs a query and responds with the following information for the PA:

- PA number
- PA status
- Start and stop dates, for approved PAs only
- Units or dollars authorized, for approved PAs only
- Units or dollars used, for approved PAs only

When the response concludes, AVRS provides you with the following options:

- Press 1 to repeat the message
- Press 2 to enter another provider number
- Press 3 to enter another NDC
- Press 4 to enter another procedure code
- Press 5 to enter another modifier
- Press 9 to return to the Main Menu
- Press 0 to speak to a Provider Assistance Center representative

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

L.7 Recipient Household Inquiry

To request information about recipient household members, press 7 (the number 7) from the main menu. AVRS prompts you for the following:

- Your NPI or Alabama Medicaid provider number, followed by the pound sign
- The parent/guardian's 12-digit recipient Medicaid number, or the parent/guardian's 9-digit Social Security Number, followed by the pound sign
- The household member's date of birth

You can receive a faxed copy of the household information. Instructions are provided below.

Prior to playing the response, you may choose from the following options, prompted by AVRS:

- Press 1 to receive a fax only response of the household information
- Press 2 to receive a voice only response
- Press 3 if you want both a fax and voice response

Receiving a Fax

When you select Option 1 or 3, AVRS prompts you to enter your ten-digit fax number (three-digit area code plus the seven-digit number), followed by the pound (#) sign. The system will send a fax transmission to the number you entered.

AVRS performs a query and responds with the following information for the household inquiry:

- Member Number
- Member Name
- Member Date of Birth
- Member Race
- Member Sex
- Certifying Program

When the response concludes, AVRS provides you with the following options:

- Press 1 to repeat this member's information
- Press 2 to enter another provider number
- Press 3 to enter a different recipient
- Press 4 to enter another Date of Birth for the same parent/guardian
- Press 9 to return to the Main Menu
- Press 0 to speak with a Provider Assistance Center representative (please note that the Provider Assistance Center is available during normal business hours only)
- Hang up to end the call

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

M DMH Medication-Assisted Treatment (MAT)

Medication-assisted treatment (MAT) is the use of medications, in combination with counseling and behavioral therapies to provide a “whole-patient” approach to the treatment of substance use disorders. These services are provided to recipients on the basis of medical necessity.

M.1. Enrollment

For the provision of Substance Abuse Rehabilitative Services an entity:

- Must be an organization that is currently certified by the Alabama Department of Mental Health (DMH) to provide alcohol and other drug treatment services under the provisions of Chapter 580 of the Alabama Administrative Code; and
- Must submit an application to and receive approval by DMH to provide Substance Abuse Rehabilitative Services under the Medicaid Rehabilitative Option program.
- A provider must demonstrate the capacity to provide services off-site in a manner that assures the recipient's right to privacy and confidentiality and must demonstrate reasonable access to services as evidenced by service location(s), hours of operation, and coordination of services with other community resources.
- A provider must ensure that Medicaid recipients receive quality services in a coordinated manner and have reasonable access to an adequate array of services delivered in a flexible manner to best meet their needs and must have demonstrated the capacity to provide these services.

M.2. Eligible Providers

The eligible practitioners, the qualifications required and services furnished for those who may provide MAT services under the Rehabilitation Option Program are as follows:

- A **physician** licensed under Alabama law to practice medicine or osteopathy; Medical Assessment and Treatment; Intake Evaluation; Individual Counseling; Family Counseling; Group Counseling; Treatment Plan Review; Mental Health and Substance Use Disorders Assessment Update; Psychoeducational Services; Opioid Use Disorder Treatment.
- A **physician assistant** licensed under Alabama law and practicing within the guidelines as outlined by the Alabama Board of Medical Examiners; Medical Assessment and Treatment; Intake Evaluation; Individual Counseling; Family Counseling; Group Counseling;

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Treatment Plan Review; Mental Health and Substance Use Disorders Assessment Update; Psychoeducational Services; Opioid Use Disorder Treatment.

- A **Certified Registered Nurse Practitioner** (CRNP) licensed under Alabama law practicing within the scope as defined by the Joint Committee of the Alabama Board of Nursing and the Alabama Board of Medical Examiners for Advanced Practice Nurses; Medical Assessment and Treatment; Treatment Plan Review; Opioid Use Disorder Treatment.
- A **Certified Registered Psychiatric Nurse Practitioner** (CRNP) licensed under Alabama law practicing within the scope as defined by the Joint Committee of the Alabama Board of Nursing and the Alabama Board of Medical Examiners for Advanced Practice Nurses; Intake Evaluation; Individual Counseling; Family Counseling; Group Counseling; Treatment Plan Review; Mental Health and Substance Use Disorders Assessment Update; Psychoeducational Services; Opioid Use Disorder Treatment.
- A **psychologist** licensed under Alabama law; Intake Evaluation; Individual Counseling; Family Counseling; Group Counseling; Treatment Plan Review; Mental Health and Substance Use Disorders Assessment Update; Psychoeducational Services.
- A **professional counselor** licensed under Alabama law; Intake Evaluation; Individual Counseling; Family Counseling; Group Counseling; Treatment Plan Review; Mental Health and Substance Use Disorders Assessment Update; Psychoeducational Services.
- A **certified social worker** licensed under Alabama law; Intake Evaluation; Individual Counseling; Family Counseling; Group Counseling; Treatment Plan Review; Mental Health and Substance Use Disorders Assessment Update; Psychoeducational Services.
- A **marriage and family** therapist licensed under Alabama law; Intake Evaluation; Individual Counseling; Family Counseling; Group Counseling; Treatment Plan Review; Mental Health and Substance Use Disorders Assessment Update; Psychoeducational Services.
- A **registered nurse** licensed under Alabama law who has completed a master's degree in psychiatric nursing; Intake Evaluation; Opioid Use Disorder Treatment.
- A **registered nurse** licensed under Alabama state law; Psychoeducational Services; Opioid Use Disorder Treatment
- A **practical nurse** licensed under Alabama state law; Opioid Use Disorder Treatment.
- **Qualified Substance Abuse Professional (QSAP) I**: A Qualified Substance Abuse Professional I shall consist of: (i) An individual licensed in the State of Alabama as a: (I) Professional Counselor, Graduate Level Social Worker, Psychiatric Clinical Nurse Specialist, Psychiatric Nurse Practitioner, Marriage and Family Therapist, Clinical Psychologist, Physician's Assistant, Physician; or (ii) An individual who: (I) Has a master's Degree or above from a nationally or regionally accredited university or college in psychology, social work, counseling, psychiatric nursing, and * (II) Has successfully

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

completed a clinical practicum or has six month's post master's clinical experience; and * (III) Holds a substance abuse counselor certification credential from the Alabama Association of Addiction Counselors, National Association of Alcoholism and Drug Abuse Counselors, Alabama Alcohol and Drug Abuse Association, or International Certification and Reciprocity Consortium/Alcohol and Other Drug Abuse, Inc. which shall be obtained within thirty (30) months of date of hire. Intake Evaluation.

- **QSAP II** shall consist of: (i) An individual who: (I) Has a Bachelor's Degree from a nationally or regionally accredited university or college in psychology, social work, community-rehabilitation, pastoral counseling, family therapy, or other behavioral health area that requires equivalent clinical course work, and (II) Is licensed in the State of Alabama as a Bachelor Level Social Worker; or (III) Has a Bachelor's Degree from a nationally or regionally accredited college or university in psychology, social work, community-rehabilitation, pastoral counseling, family therapy, or other behavioral health area that requires equivalent clinical course work, and (IV) Holds a substance abuse counselor certification credential from the Alabama Association of Addiction Counselors, National Association of Alcoholism and Drug Abuse Counselors, Alabama Alcohol and Drug Abuse Association, or International Certification and Reciprocity Consortium. Individual Counseling; Family Counseling; Group Counseling.
- **QSAP III** shall consist of: (i) An individual who: (I) Has a Bachelor's Degree from a nationally or regionally accredited university or college in psychology, social work, community-rehabilitation, pastoral counseling, family therapy, or other behavioral health area that requires equivalent clinical course work, and (II) Participates in ongoing supervision by a certified or licensed QSAP I for a minimum of one (1) hour individual per week until attainment of a substance abuse counselor certification credential from the Alabama Association of Addiction Counselors, National Association of Alcoholism and Drug Abuse Counselors, or Alabama Alcohol and Drug Abuse Association, or International Certification and Reciprocity Consortium/Alcohol and Other Drug Abuse, Inc. which shall be obtained within thirty (30) months of hire; Psychoeducational Services.
- Certified Recovery Support Specialist (CRSS) must meet the following minimum qualifications: (i) Certified by ADMH as a Certified Recovery Support Specialist (CRSS) within six (6) months of date of hire, (ii) and has 2 years verified lived experience and (iii) Concurrent participation in clinical supervision by a licensed or certified QSAP I; Peer Support Services

M.3. Covered Services

Intake Evaluation (90791-HF)

Initial clinical evaluation of the recipient's request for assistance. Substance abuse recipients undergo standardized psychosocial assessment. The intake evaluation presents psychological and social functioning, recipient's reported physical and medical condition, the need for additional evaluation and/or

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

treatment, and the recipient's fitness for Medication Assisted Treatment (MAT) services.

Billing Unit:	Episode
Maximum Units:	Unlimited
Billing Restrictions:	May not be billed in combination with Treatment Plan Review (H0032)

Medical Assessment and Treatment (H0004-HF)

Face-to-face contact with a recipient during which a qualified practitioner provides psychotherapy and/or medical management services. Services may include physical examinations, evaluation of co-morbid medical conditions, development or management of medication regimens, the provision of insight oriented, behavior modifying, supportive, or interactive psychotherapeutic services, or the provision of educational services related to management of a substance use disorder.

Billing Unit:	15 minutes
Maximum Units:	6 per day, 52 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), Outpatient Detoxification – Ambulatory Detoxification With Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014).

Individual Counseling (90832-HF/90834-HF/90837-HF)

The utilization of professional skills by a qualified practitioner to assist a recipient in face-to-face, one-to-one psychotherapeutic encounter in achieving specific objectives of treatment or care for a mental health and/or a substance use disorder. Services are generally directed toward alleviating maladaptive functioning and emotional disturbances relative to a mental health and/or substance use disorder, and restoration of the individual to a level of functioning capable of supporting and sustaining recovery. Individual Counseling may consist of insight oriented, behavior modifying, supportive, or interactive psychotherapeutic services.

Billing Unit:	1 unit
Maximum Unit:	1 per day, 52 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification With Extended On-Site

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014).

Additional Information: Billing = 1 of the following codes:
- Code 90832 = therapy given for 16 to 37 minutes
- Code 90834 = therapy given for 38 to 52 minutes
- Code 90837 = therapy given for 53 minutes or greater

Family Counseling 90846-HF (without patient present)/ 90847-HF (with patient present)/ 90849-HF (multiple family group)

A recipient focused intervention that may include the recipient, his/her collateral* and a qualified practitioner. This service is designed to maximize strengths and to reduce behavior problems and/or functional deficits stemming from the existence of a mental health and/or substance use disorder that interferes with the recipient's personal, familial, vocational, and/or community functioning. *Family counseling that involves the participation of a non-Medicaid eligible is for the direct benefit of the beneficiary. The service must actively involve the beneficiary in the sense of being tailored to the beneficiary's individual needs. There may be times when, based on clinical judgment, the beneficiary is not present during the delivery of the service, but remains the focus of the service.*

Billing Unit:	1 episode=minimum of 60 minutes (90846-HF/ 90847HF) 1 episode=minimum of 90 minutes (90849-HF)
Maximum Units:	1 episode per day, 104 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification With Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014).

Additional Information:
Family therapy is defined as the treatment of family members as a family unit, rather than an individual patient. When family therapy without the patient present (90846) or family therapy with the patient present (90847) is provided, the session is billed as one service (one family unit), regardless of the number of individuals present at the session.

When a family consists of a Medicaid eligible adult and child(ren) and the therapy is not directed at one specific child, services may be directed to the adult for effective treatment of the family unit to address the adult's issues and impact on the family. If the adult is not eligible and the family therapy is

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

directed to the adult and not the child, the service may not be billed using the child's recipient id number and the service must actively involve the beneficiary in the sense of being tailored to the beneficiary's individual needs.

If there is more than one eligible child and no child is exclusively identified as the primary recipient of treatment, then the oldest child's recipient id number must be used for billing purposes. When a specific child is identified as the primary patient of treatment, that child's recipient ID number must be used for billing purposes. A family may be biological, foster, adoptive or other family unit.

A family is not a group and providers may not submit a claim for each eligible person attending the same family therapy session.

All members of the family in attendance for the session will sign/mark the signature log or progress note to document their participation in the session (in addition to the therapist documenting their presence/participation).

Group Counseling (90853-HF)

The utilization of professional skills by a qualified practitioner to assist two or more unrelated recipients in a group setting in achieving specific objectives of treatment or care for a substance use disorder. Services are generally directed toward alleviating maladaptive functioning and behavioral, psychological, and/or emotional disturbances, and utilization of the shared experiences of the group's members to assist in restoration of each participant to a level of functioning capable of supporting and sustaining recovery. Group Counseling may consist of insight oriented, behavior modifying, supportive, or interactive psychotherapeutic service strategies.

Billing Unit:	1 episode=minimum of 90 minutes
Maximum Units:	1 episode per day, 104 per year
Billing Restrictions:	May not be billed in combination with Partial Hospitalization (H0035), Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification With Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014).

Treatment Plan Review (H0032)

Review and/or revision of a recipient's individualized substance use disorder treatment plan by a qualified practitioner who is not routinely directly involved in providing services to the recipient. This review will evaluate the recipient's progress toward treatment objectives, the appropriateness of services being provided, and the need for a recipient's continued participation in treatment.

Billing Unit:	15 minutes
Maximum Units:	1 event with up to 2 units per quarter, 1 event per day, 8 per year (for DMH-MI providers) 1 event with up to 2 units per quarter, 1 event per day, 8 per year (for DMH-SASD providers)
Billing Restrictions:	None

Substance Use Disorders Update (H0031-HF)

A structured interview process that functions to evaluate a recipient's present level of functioning and/or presenting needs. The assessment is used to establish additional or modify existing diagnoses, establish new or additional goals, assess progress toward goals, and/or to determine the need for continued care, transfer, or discharge.

Billing Unit:	15 minutes
Maximum Units:	8 units per day, 56 units per year
Billing Restrictions:	May not be billed in combination with Intake Evaluation (90791)

All rights reserved. Applicable FARS/DFARS apply.

Psychoeducational Services (H2027-HF – Individual; H2027-HQ – Group)
Structured, topic specific educational services provided to assist the recipient and the families* of recipients in understanding the nature of the identified behavioral health substance use disorder, symptoms, management of the disorder, how to help the recipient be supported in the community and to identify strategies to support restoration of the recipient to his/her best possible level of functioning.

Billing Unit: 15 minutes

Maximum Units: 416 units per year

8 per day for services provided to an individual recipient's family

8 per day for services provided to a group of recipients' families

Billing Restrictions: May not be billed in combination with Opioid Use Disorder Treatment (H0020), Outpatient Detoxification – Ambulatory Detoxification With Extended On-Site Monitoring (II-D) (H0013), Outpatient Detoxification – Ambulatory Detoxification Without Extended On-Site Monitoring (I-D) (H0014) and H0035-HF Partial Hospitalization.

Opioid Use Disorder Treatment (H0020: HF - Methadone, H0020: HF:AM – Buprenorphine, J2315: HF - Vivitrol)
The administration of medication, including the use of FDA approved medications for the use of opioid use disorders, to recipients who have a diagnosed opioid use disorder. Medication is administered to support the recipient's efforts to restore adequate functioning in major life areas that have been debilitated as a result of opioid addiction. This service includes medication administration and concurrent related medical and clinical services.

The program must be staffed as specified in current and subsequent revisions of:

(1) State regulations established for this service by the Alabama Department of Mental Health and published in the Alabama Administrative Code; and

(2) Federal regulations established for this service by the Substance Abuse and Mental Health Services Administration

Billing Unit: One day

Maximum Units: 365 per year for H0020 (oral Methadone, Buprenorphine). 1 per month for J2315 (injectable Vivitrol)

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Additional Information:
H0020 may be span-billed by multiplying the appropriate number of units for the month by the daily rate. Benefits are limited to 365 units per year. Please utilize the AM modifier when billing for Buprenorphine. Utilization will be monitored through retrospective reviews.

Peer Support Services H0038 HF: HB (Adult) or HF: HB: HQ (Group)
Peer Support services provides structured, scheduled activities that promote socialization, recovery, self-advocacy, development of natural supports, and maintenance of community living skills, by Certified Recovery Support Specialists. Peer Support service actively engages and empowers an individual and his/her identified supports in leading and directing the design of the service plan and thereby ensures that the plan reflects the needs and preferences of the individual (and family when appropriate) with the goal of active participation in this process. Additionally, this service provides support and coaching interventions to individuals (and family when appropriate) to promote recovery, resiliency and healthy lifestyles and to reduce identifiable and increase healthy behaviors intended to prevent relapse and promote long-term recovery. Peer supports provide effective techniques that focus on the individual's self-management and decision making about healthy choices, which ultimately extend the members' lifespan.

Billing Unit:	15 minutes
Maximum Units:	Limited to 20 units per day (individual) and 8 units per day (group). 2,080 units per year for group services and 2,080 units per year for individual services.
Billing Restrictions:	None

M.4. Requirements for Recipient Intake, Treatment Planning, and Service Documentation

An intake evaluation must be performed for each recipient considered for initial entry into organized programs or course of covered services. Individuals who are transferred between programs within an agency do not require a new intake at the time of transfer.

To determine a recipient's, need for MAT services, providers must perform an intake evaluation (utilizing the Standardized Substance Abuse Psychosocial Assessment) based on assessment of the following information:

- Family history
- Educational history
- Relevant medical background
- Employment/vocational history
- Psychological/psychiatric treatment history
- Military service history

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2025 American Medical Association and © 2025 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

- Legal history
- Alcohol/drug use history
- Mental status examination
- A description of the significant problems that the recipient is experiencing

A written treatment plan (service plan, individualized family service plan, plan of care, etc. must be completed by the fifth face-to-face outpatient services, within ten working days after admission in all day programs or residential program, or within other time limits that may be specified under programs specific requirements. For SA services, the patient, counselor, and licensed staff as noted above must all approve the treatment plan prior to the provision of SA treatment services.

- Identification of the clinical issues that will be the focus of treatment
- Specific services necessary to meet the recipient's needs
- Referrals as appropriate for needed services not provided directly by the agency
- Identification of expected outcomes toward which the recipient and therapist will be working to impact upon the specific clinical issues

Unless clinically contraindicated, the recipient will sign/mark the treatment plan to document the consumer's/recipient's participation in developing and/or revising the plan. If the recipient is under the age of 14 or adjudicated incompetent, the parent/foster parent/legal guardian must sign the treatment plan.

Additional Information:
Services may be provided and billed between the initial intake service and the development of the treatment plan if provided within the allowed timeframe for treatment plan development. Once the treatment plan is developed, service types must be specified in the treatment plan in order to be paid by Medicaid, with the exception of intake evaluation, substance use disorders assessment update, and treatment plan review. Changes in the treatment plan must be approved as described above.

After completion of the initial treatment plan, staff must review the recipient's treatment plan once every three months to determine the recipient's progress toward treatment objectives, the appropriateness of the services furnished, and the need for continued treatment. Providers must document this review in the recipient's clinical record by noting on the treatment plan that it has been reviewed and updated or continued without change. Staff, as specified above, must perform this review. The treatment plan review must be completed and signed by the appropriate staff in the required time frame in order to continue billing for services.

Treatment plan reviews are not covered in cases where only an intake or diagnostic assessment is provided with no further treatment. One treatment plan review is covered following a three-month interval of no services delivered. Any subsequent reviews with no intervening treatment are disallowed.

All rights reserved. Applicable FARS/DFARS apply.

M.5. Documentation

Documentation in the recipient's record for each session, service, or activity for which Medicaid reimbursement is requested must comply with any applicable certification or licensure standards and must include the following, at a minimum:

- The identification of the specific services rendered
- The date and the amount of time that the services were rendered (to include the time started and the time ended)
- The signature of the staff person who rendered the services
- The identification of the setting in which the services were rendered
- A written assessment of the recipient's progress, or lack thereof, related to each of the identified clinical issues discussed

All entries must be legible and complete and must be signed and dated by the person (identified by name and discipline) who is responsible for ordering, providing, or evaluating the service furnished. The author of each entry must be identified and must sign his or her entry.
Documentation of Medicaid recipients' signatures may be entered on a sign-in log, service receipt, or any other record that can be used to indicate the recipient's signature and the date of service.

Treatment plan review and any non-face-to-face services that can be provided by telephone do not require recipient signatures.

When clinical records are audited, Medicaid will apply the list of required documentation to justify payment. Documentation failing to meet the minimum standards noted above will result in recoupment of payments.

Documentation should not be repetitive (examples include, but are not limited to the following scenarios):

- Progress Notes that look the same for other recipients.
- Progress notes that state the same words day after day with no evidence of progression, maintenance or regression.
- Treatment Plans that look the same for other recipients.
- Treatment Plans with goals and interventions that stay the same and have no progression.
