Next Steps and Q&A

Welcome and Reminders

- This effort includes:
 - Nine different policy sections within the MaineCare Benefits Manual (MBM)
 - ~130 service codes
- This effort seeks greater alignment across sections of policy
 - This means draft rates can increase and/or decrease for similar services across different sections to create greater consistency and equity
- Some rates are required to comply with statutory requirements
 - E.g. 22 MRS §7402 requires that wage components equal at least 125% of minimum wage for essential support workers

Welcome and Reminders Cont.

- State and federal approval and funding impact implementation timelines and feasibility.
Things to consider:
 - Budgetary asks and approval from the Maine State Legislature
 - Rulemaking in accordance with the Maine Administrative Procedures Act process
 - Federal authority for changes which can include approval of:
 - State Plan Amendments (SPAs)
 - 1915(C) Waiver Amendments by the Centers for Medicare & Medicaid Services (CMS)
 - Cost neutrality is a requirement of 1915(C) waivers
- Draft rates are based on data submitted from providers and from external data sources
 - Some rates have not been updated in many years
 - Final rates may increase or decrease based upon further review and input
 - Draft rates are developed using inflation through January 2027 as illustration only

Rate Reform Process & Review

Rate Determination Process

Stand-alone section of Maine law (22 M.R.S. § 3173-J) enacted in 2022, codifying process and principles for MaineCare Rate System:

- 1. Sets schedule for regular rate review and adjustment**
- 2. Ensures review of relevant state and national data to inform rate amounts and payment models.**
- 3. Formalizes clear and transparent process for rate determination.**
- 4. MaineCare Advisory Committee**
- 5. Technical Advisory Panel**

Rate Determination Process

Below outlines the rate determination process, currently, in the process of draft rate presentations and public comments.

1. Initiation notice sent on 6/4/2024
2. Kickoff meetings held 8/28/2024
3. Interested parties' engagement meeting series held 9/4/2024 – 10/9/2024
4. Surveys (10/22/2024 – 11/22/2024) and rate model development
5. **Draft rate presentations June 25, 26, 29, 2026**
6. Opportunity for written public comments are due by 7/13/2026
7. Department review and written response to comments
8. Rate Finalization

Draft Rate Model Meeting Series

To comprehensively review all impacted MaineCare rates across home and community-based services, there will be a series of three draft rate presentations organized by section and service type:

	Date & Time	Section	Service Categories
Meeting 1	June 25, 2026 11am	Sections 12, 18, 19, 20, 29, and 96	Care Coordination, Personal Support Services, and Supportive Skills Building
Meeting 2	June 26, 2026 10am	Sections 19, 20, 21, 40, 96, and 102	Clinical Services and Clinical Therapy Services
Meeting 3	June 29, 2026 1:30pm	Sections 18, 19, 20, 21, 29, and 40	Therapeutic Interventions and Assistive Technology

Draft Rate Setting Methodology & Draft Model Inputs

Independent Draft Rate Model Approach

Independent rate models reflect the actual provider costs and use multiple data sources, as displayed below, to develop a final draft rate for each service.

The below data sources are all leveraged to support rate model inputs such as staff wages and benefits, staffing levels, service setting, time to complete service (such as documentation) and transportation costs.

Draft Rate Model Structure

Independent rate models reflect the actual provider costs and use multiple data sources. Below includes the high-level steps to calculate the service rates. Each group rate was calculated by dividing the number of participants by the total hourly individual rate.

A 10% incentive added for all group services.

Rate Model Structure: Benchmark Rate Variables

Rate Variable	Benchmark	Data Source	Notes
Direct Service Staff Wage*	Variable	BLS	Wage data pulled based on May 2024 BLS release.
Fringe & Benefits*	\$9.46 + 8.15%	BLS Dec 2024 & ME Tax	Variable adjustment to benefits based on wage for Maine specific payroll related taxes.
Non-Billable %	25%	Baseline Estimate	
Travel Time	10%	Baseline Estimate	
Overhead Costs	15%	CMS De Minimis Rate	Standard indirect cost rate used by CMS is used in the absence of reliable survey data.
Program Support	10%	Baseline Estimate	Assumption based on 4 hours of direct support per week.
Mileage Costs	\$0.70	Federal Mileage Rate	Cost of one hour traveling multiplied by the time spent traveling and average MPH.

* Rates have been adjusted for inflation through January 2027. This is subject to change.

Rate Model Structure: Draft Rate Model Example

	Step	Line Item	Cost Per Service Hour	Adjustment Factor	Adjustment Factor Notes
Direct Service Staff Costs	1	Direct Service Staff Hourly Wage	\$42.38	n/a	Direct Staff Salary based on May 2024 BLS Data
	2	Employee Benefit Rate	\$12.91	\$9.46 + 8.15%	Variable and fixed benefits based on Dec 2024 ECEC BLS Data.
	3	Total Compensation	\$55.30	n/a	Add hourly wage and benefits.
	4	Nonbillable & Travel Adjustment	1.54	35%	Apply 35% productivity adjustment. For every 40 hours worked, 26 is direct billable time, 4 is travel and 10 is additional non-billable.
	5	Direct Staff Cost per Billable Hour	\$85.07		Multiply the employee hourly plus benefits by the productivity adjustment.
Admin & Program Costs	6	Program Support Cost	\$11.34	10%	Use of national benchmarks of 10% program support costs.
	7	Indirect Cost per Billable Hour	\$17.01	15%	Use of national benchmarks of 15% indirect costs.
Miles Driven	8	Vehicle Mileage Costs	\$5.07	n/a	Cost of one hour of driving multiplied by average travel time per one hour of direct service.
	9	Total Cost	\$118.50		
	10	Final Draft Rate Per Unit	\$29.63	0.25	Multiply the service unit of 15 minutes by the final cost per hour.

* Rates have been adjusted for inflation through January 2027. This is subject to change.

Wage Assumptions: Provider Survey Results

Wage assumptions included in the rate models are higher than wages reported through the provider survey. Survey data varied greatly among survey respondents, but responses were generally low.

Position Type	Provider Survey Data		Median 2024 BLS Data <i>(with Jan '27 CAF)</i>
	Average Reported	Responses	Total Wages Used in Model
Certified Nursing Assistant (CNA)	\$19.41	8	\$23.67
Home Health Aide (HHA)	\$19.01	8	\$19.54
Licensed Practical Nurse (LPN)	\$27.73	6	\$36.76
Occupational Therapist (OT)	\$38.75	4	\$42.64
Occupational Therapist Assistant (OTA)	\$26.98	1	\$30.80
Personal Care Assistant (PCA)	\$18.02	22	\$19.54
Physical Therapist (PT)	\$47.05	3	\$48.71
Physical Therapist Assistant (PTA)	\$29.36	2	\$31.56
Registered Nurse (RN)	\$37.86	12	\$42.99
Social Worker	\$30.53	2	\$37.61
Speech/Language Pathologist (SLP)	\$41.12	4	\$42.38

* Rates have been adjusted for inflation through January 2027. This is subject to change.

Wage Assumptions: Bureau of Labor Statistics

Bureau of Labor and Statistics (BLS) May 2024 Wages: Used to determine the appropriate wage for each position. Cross-industry median wages were used when available. Below is an example of a blended wage.

97129: Therapeutic Interventions for Cognitive Function

Position Title: Therapy + Therapy Assistant Blend

BLS Standard Occupational Classification	Weighting	Median Wage (Hourly Adj)

Fringe & Benefits

Benefit assumptions for direct support staff were based on the Employee Cost for Employee Compensation (ECEC) BLS average benefits for Private Industry Healthcare and Social Assistance as reported for December 2024. Since certain benefit assumptions are fixed, the benefit rate (as a percentage of wages) decreases as the wage increases.

Benefit category	Fixed vs. Proportionate	Inflation Applied Amount
Paid Leave	Fixed*	\$4.31
Insurance- Life, Health, and Disability	Fixed*	\$3.54
Retirement and Savings	Fixed*	\$1.60
Legally Required Benefits (Maine Payroll Tax)	Proportionate	8.15%

** Rates have been adjusted for inflation through January 2027. This is subject to change.*

Inflationary Factors

Inflation is applied to all developed rates in order to account for changes in the economic climate. These factors are calculated using the last 12 months of inflationary data.

Rate Application*	Year
108.25%	2027
111.15%	2028
114.13%	2029
117.19%	2030

**These rate applications apply the current inflation rate to forecast future years' rates*

The rate implementation year of January 2027 applies an inflation factor of 2.68% to all current rate models based on the most recent 12 months of inflationary data available from the Bureau of Labor Statistics (BLS).

Inflation adjustments are applied to:

- BLS May 2024 wage
- December 2024 ECEC benefits

Draft Rate Recommendations

Rates Benchmarked to Medicare

The following draft rates are benchmarked against comparable Medicare services and/or rate models. The draft rates consider an implementation date of January 2027 which may be subject to change based on the actual date of implementation:

Personal Emergency Response System

PCG identified current market rates for Personal Emergency Response System services utilized by MaineCare providers. The service codes informed by market rate research are S5160 and S5161 from Section 19 Assistive Technology services.

Code	Modifier	Policy Section	Description	Units	Draft Rate	Current Rate	Change
S5160	U7	19	Personal Emergency Response System, Installation and Testing	1 Unit - Customary Charge (not to exceed)	\$66.30	\$53.96	+23%
S5161	U7	19	Personal Emergency Response System, Service Fee	Monthly - Customary Charge (not to exceed)	\$47.76	\$41.99	+14%

Providers who currently bill for Policy Section 19 were surveyed via email to identify vendors that their patient population procure these services from. The average between all noted vendors' median pricing plans was found to inform the customary charge limits for both installation and testing as well as service fee rates for Personal Emergency Response System (PERS) services.

Therapeutic Intervention Services

The following draft rates pertain to Therapeutic Intervention Services. These draft rates include estimated inflation through January 2027 and may be subject to change based on the date of implementation.

Therapeutic Interventions – Rate Decrease Explanation

The following draft rates pertain to Therapeutic Intervention Services. These draft rates include estimated inflation through January 2027 and may be subject to change based on the date of implementation of any draft rates.

Code	Modifier	Policy Section	Rev. Code	Description	Units	Draft Rate	Current Rate	Change
N/A	N/A	19	0431	Occupational Therapy Visit	Per visit	\$105.93	\$118.44	-11%
G0151	N/A	40	0421	Services of physical therapist in home health setting	15 mins	\$33.13	\$43.04	-23%
G0151	TF	40	0421	Services of physical therapist assistant in home health setting	15 mins	\$23.62	\$30.13	-22%
G0152	N/A	40	0431	Services of occupational therapist in home health setting	15 mins	\$29.77	\$43.32	-31%
G0152	TF	40	0431	Services of occupational therapist assistant in home health setting	15 mins	\$23.20	\$30.33	-24%
G0153	N/A	40	0441	Services of a speech and language pathologist in home health setting	15 mins	\$29.63	\$46.76	-37%
G0153	TF	40	0441	Services of a speech and language pathologist assistant in home health setting	15 mins	\$19.84	\$32.73	-39%

Rationale for rate decreases for the above codes in section 19 and 40:

- For similar services across policy sections, the rate model uses the same or similar wages and model inputs to ensure consistency and equity for services across policy sections.
- This initiative to ensure consistency of rate methodology and equity across policy sections will lead to a decrease for some sections to align it with the same service in another policy section.

Therapeutic Interventions – Rate Decrease Explanation

The following draft rates pertain to certain Therapeutic Intervention Services. These draft rates represent a benchmark to the Medicare rate:

Code	Mod.	Policy Section	Description	Units	Draft Rate	Current Rate	Change
G0151	U7 TF	19	Certified Physical Therapy Assistant – Home Health Services Visit Charge	Per visit	\$24.14	\$78.82	-69%
G0152	U7 TF	19	Occupational Therapy Assistant - Home Health Services Visit Charge	Per visit	\$24.14	\$83.75	-71%

A draft rate decrease for G0151 U7 TF and G0152 U7 TF for the following reason:

22 M.R.S. § 3173-J(2)(C)(3) requires that MaineCare *determine whether a Medicare rate is available for the service and whether the Medicare rate represents the most appropriate benchmark and payment model*. These draft rate changes represent a change in methodology which consists of **benchmarking to 72.4% of the Medicare rate**.
