# Alternate EVV Vendor Specification

# Version 1.9.4

---

Sandata Technologies, LLC
220 Duffy Ave. Unit 266A
Hicksville NY 11801

# Version History:

- **Please reference Release Notes in Knowledge Base for detailed information about all Spec changes including Payer, Program, and Service code effective dates.**

| Name | Title | Version | Changes | Date |
|---|---|---|---|---|
| F. Simpkins | Original Version | V1.0 | Original Version | 03/20/2024 |
| F. Simpkins | Alternate EVV Vendor Specification | V1.1 | Edited Footer, Edited "ProviderID", Edited "ClientCustomID", Edited "ClientIdentifier", "ClientMedicaidID", Added "ClientMedicaidID" | 04/03/2024 |
| F. Simpkins | Alternate EVV Vendor Specification | V1.2 | Edited "ClientOtherID" to be optional, Added clarification for "ClientVerifiedTimes", "ClientVerifiedService", "ClientSignatureAvailable", and "ClientVoiceRecording" | 04/22/2024 |
| F. Simpkins | Alternate EVV Vendor Specification | V1.3 | Edited "ClientID" in Visit General section to match what is in "ClientIdentifier" field in Client Section and removed "ClientID" in Client Section | 04/25/2024 |
| F. Simpkins | Alternate EVV Vendor Specification | V1.4 | Edited Version History to add additional detail. | 05/22/2024 |
| F. Simpkins | Alternate EVV Vendor Specification | V1.5 | Updated Program Code labeled "HCOI" to "HCPB"<br>Updated Program Description from "Home Care/ Over Income" to "Home Care / Percent Based"<br>**Edited the following fields to provide further clarification:**<br>**Client**<br>"ProviderQualifier", "ProviderID", "ClientQualifier", "ClientIdentifier", "ClientMedicaidID", "ClientAltMedicaidID", "MissingMedicaidID", "ClientCustomID"<br>**Visit**<br>"ClientID", "ClientMedicaidID", "ClientVerifiedTimes", "ClientVerifiedService", "ClientSignatureAvailable", "ClientVoiceRecording", "BypassReason", "GroupCode", "ProcedureCode", "ChangeReasonMemo" | 06/28/2024 |
| F. Simpkins | Alternate EVV Vendor Specification | V1.6 | Updated Exception Code for "Missing Payer" Exception.<br>Updated Addition of PCA Program Code to Service T1019.<br>Removed capitalization on ClientTimezone. | 07/23/2024 |

| | | | | |
|---|---|---|---|---|
| | | | Updated Description of 'Short Visit' exception.<br>Removed Expected Values in the descriptions for the different values in the JSON not in use throughout. | |
| F. Simpkins | Alternate EVV Vendor Specification | V1.8 | Added Table 6.3 -Payer/Program Mapping; Removed ROI as a Program; Edited Tabe 6.4 to be more clear; Added language to Provider ID line clarifying what to do when an uncommon scenario may occur. Made Client address segment required. Edited BypassReason Expected Value and Rules. Edited note at bottom of Version History. | 10/10/2024 |
| L. Klein | Alternate EVV Vendor Specification | V1.9 | • Replaced references of "EOEA" to **"AGE"**<br>• Added T1022 service code "RESTRICTED FOR HH ONLY RN Specialized services in patient home"<br>• Updated Bypass Reasons and added 1 new Bypass Reason (effective 10/22/25)<br>• Added Payers to PCA program and T1019 service code<br>• Added clarification on Minimum Visit Duration in 'Standard Visit Rules' section<br>• Added clarifying language for expected values in 'ClientIdentifier' field<br>• Added new service codes for SDABI and SDMFP Programs<br>• Added New SCO and One Care Payers to PCA Program and T1019<br>• Added ASAP Payers to Payer Program Mapping Table<br>• 'ClientIdentifierOnCall' field updated to **not required**<br>• Reordered Procedure Code Table for easier search | 10/15/2025 |
| L. Klein | Alternate EVV Vendor Specification | V1.9.1 | • Added Value Based Payment Service Codes for Home Health Program and MAHEA Payer<br>• Updated guidance for BypassReason and examples provided<br>• Corrected Payer, Program, and Service Combinations for MASTF<br>• Removal of incorrect Payer, Program, and Service Codes for OneCares & SDABI/SDMFP Programs | 06/01/2026 |
| L. Klein | Alternate EVV Vendor Specification | V1.9.2 | • New SCGBS Program<br>• New Payer, Program, and Service Combinations<br>• Removal of Invalid Payer, Program, and Service Combinations<br>• NEW – Massachusetts Special Notes Section | 07/24/2026 |
| L. Klein | Alternate EVV Vendor Specification | V1.9.3 | • Payer, Program, and Service Combinations that were supposed to be updated in v1.9.2 | 8/20/2026 |

| | | | | |
|---|---|---|---|---|
| L. Klein | Alternative EVV Vendor Specification | V1.9.4 | • End-date ASAP South Shore Elder Services (MAASS) as of 6/30/26<br>• Added Payer Type to Table 6.1 Payers<br>• Added multiple new Payer, Program, and Service Combinations to 6.4 Procedure Codes (HCPCS Codes) to accommodate the 4 new ABI-MFP Services<br>• Added new ABI-MFP Services to 7.2 Overnight Split Shifts<br>• Added Client Identifier use case clarity to Massachusetts Special Notes section. | 10/22/2026 |

# 1 Overview

This specification is intended to document the requirements for using the Sandata Alternate EVV Interface (part of the Open EVV Series of Interface) for receiving information from 3rd party EVV Vendors into the Sandata Aggregator. This interface is also referred to as the Alternate EVV Data Interface or 'alt EVV'. An Alternate EVV Data Collection System will build one data pipe to the Aggregator and send synchronous data 'packages' per defined provider agency.

This interface includes 3 types of data: Visits, the Clients associated with those visits, and the Employees associated with those visits.

For additional information, please refer to the accompanying general specification. This document includes sample JSON for reference.

# 2 Intended Audience

The intended audience of this document is:

- Project Management and Technical teams at Sandata, and
- Project Management and Technical teams at designated Providers/Vendors who will be implementing this interface.

# 3 Vendor Testing

Vendors and Providers using a 3rd Party EVV system must utilize the Sandata EVV Vendor Self-Registration portal. This will allow you to register for testing for the selected state and proceed through the various test cases. All vendor products must go through testing at least once for each program.

Requirements for utilizing the portal:

- You must be a known vendor to Sandata.
- At least one provider must have identified your product as their intended EVV collection system for the program.

The portal can be found at https://evv-registration.sandata.com/vendor-registration.

# 4 TRANSMISSION INFORMATION

## 4.1 TRANSMISSION FREQUENCY

For optimal system performance, it is recommended that visits should be sent in near real time. It is expected that information is sent as it is added/changed/deleted in the Alternate EVV Data Collection.

System Note: Rejection responses will be delivered on a separate API call that is initiated by the third party–in near real time.

## 4.2 TRANSMISSION LIMITS

A single transaction may contain from 1 to 5,000 records. A single record set would include all associated elements. If the group size exceeds the maximum limit for the group, the complete group will be rejected.

During peak loads, records received may be queued and processed as resources permit. Other transactions received for the Provider ID will be queued behind these until they are processed since they are processed in the order received.

Expected result of queued data is…Error Message: "The result for the input UUID is not ready yet. Please try again."

Expected vendor action: Wait 5 minutes before attempting the GET status response.

## 4.3 FILE DETAILS

| | |
|---|---|
| **File Format** | JSON (JavaScript Object Notation) |
| **File Encryption** | Delivery to occur over secure HTTPS connection |
| **RESTful API Endpoint(s)** | **Testing (testing is available through the Sandata Vendor Self Registration Portal):**<br>Client: UAT: https://uat-api.sandata.com/interfaces/intake/clients/rest/api/v1.1<br>Employee: UAT: https://uat-api.sandata.com/interfaces/intake/employees/rest/api/v1.1<br>Visit: UAT: https://uat-api.sandata.com/interfaces/intake/visits/rest/api/v1.1 |

| | |
|---|---|
| | **Production:**<br>Client: Prod: https://api.sandata.com/interfaces/intake/clients/rest/api/v1.1<br>Employee: Prod: https://api.sandata.com/interfaces/intake/employees/rest/api/v1.1<br>Visit: Prod: https://api.sandata.com/interfaces/intake/visits/rest/api/v1.1 |
| **Payload Compression** | No compression of data during delivery |
| **Delivery Mechanism** | Via RESTful API call |
| **Delivery Frequency** | No less frequent than daily (time decided by each vendor supplying the EVV data). Can be multiple times per day at the vendor's discretion. Please note that all visits should be provided including those that are not complete or having exceptions. |

## 4.4 Data Type Format Details

The user will send information in a JSON format. JSON allows multiple child entities for a parent.

The format of the information sent must match exactly the format defined below and must be sent via the web service. We support only three data types during transmission: string, number, and Boolean. The specification uses more traditional data types to ensure that data is received in the expected formats and appropriate record level editing can be incorporated. Except where numeric, the assumed JSON format is string. The data type provided in the specification is based on the following field definitions.

Note that the format is case sensitive. All field names must be provided in EXACTLY the casing used in the definitions below. Sandata utilizes RESTful services with JSON formatting.

*Table 1: Data Type Basics*

| Data Type | Description | Example |
|---|---|---|
| DateTime | The **date** and **time** are represented as a string with the following format:<br>YYYY-MM-DDTHH:MM:SSZ<br>All times will be provided in UTC (Coordinated Universal Time [1]). | 2016-12-20T16:10:28Z |
| Date<br>(Only Date) | The data is represented as a string with the following format:<br>YYYY-MM-DD | 2016-12-20 |
| Timezone | All time for tracking visits will be in UTC.<br>The time zone name expected in each transaction is the actual time zone where the event took place. i.e., US/Eastern. | See the Appendix for the Time Zone list. These are the values supported by Sandata EVV and the Sandata Aggregator. |
| String | A string is a row of zero or more characters that can include letters, numbers, or other types of characters as a unit, not an array of single characters. (e.g., plain text). | This is a string of characters. Some string fields limit the special characters that can be received. |
| Integer | An integer is a numeric value without a decimal. Integers are whole numbers and can be positive or negative. | 52110 (positive)<br>-87721 (negative) |
| Decimal | A floating-point number is referred to as a decimal. Can be positive or negative. | 8221.231 (positive)<br>-71.214 (negative) |
| Boolean | A logic predicate indicator that can be either true or false. | true<br>false |

## 4.5 Rejected Record Process

When records are received, Sandata will return for each group a transaction ID and an ACK (acknowledgment of receipt). This transaction ID can be queried by the caller for status of the records in the transaction. This process will allow the provider/vendor to "GET status" on any of the records that may have been rejected. The example below is shown for an employee record.

[1] The UTC Standard is based on the GMT time zone.

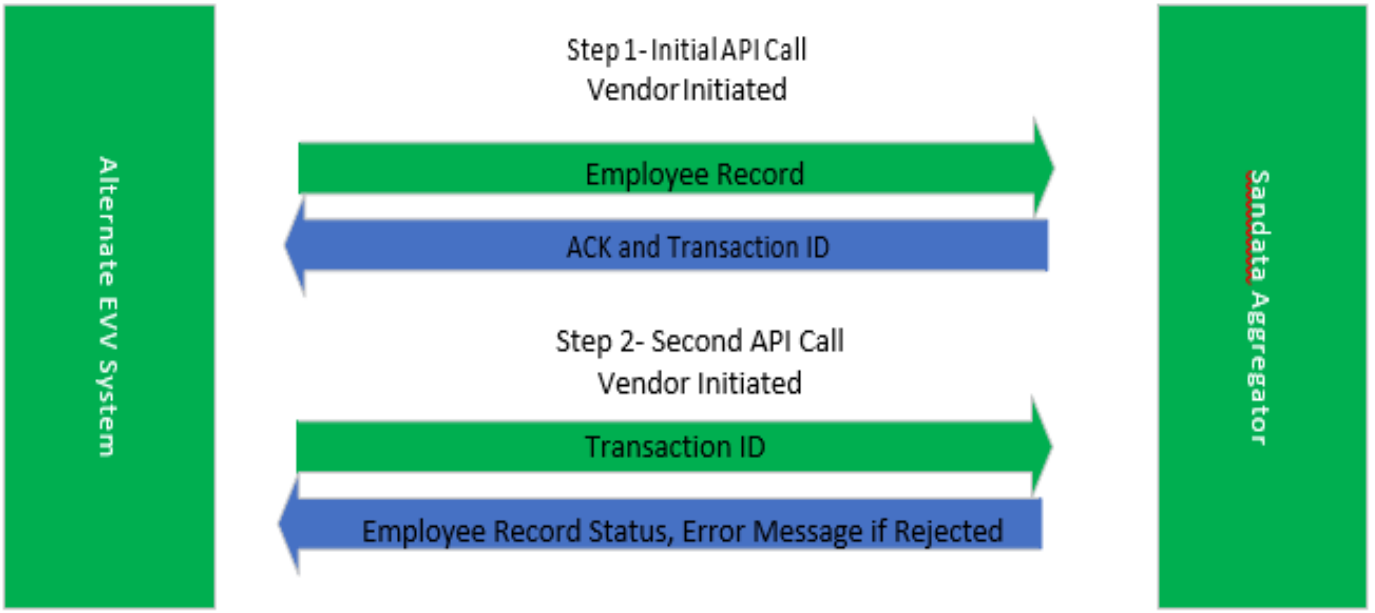

*Figure 1: Transmission Process*

## 4.6 New Record and Updates

New records and updates for previously sent data should be provided via the clients, employees, or visits interfaces ('data packages'). If a set of records is sent (client, employee, or visit), all associated elements should be sent. Partial updates will be rejected. An update that deletes a record will, in most cases, not actually remove information since Sandata will not physically delete information. The deleted record/s will no longer be visible on the application. However, the record history will maintain the original data received.

## 4.7 Transmission Method

Sandata supports an SOA architecture. Sandata will provide an API for 3rd party vendors or agency's internal IT organizations to utilize. Sandata can provide sample JSON format information, as well as the WADL to those parties developing the interface. This specification will include the REST endpoints needed to request status on record acceptance /rejection.

## 4.8 RULES

The following rules apply to information received through this interface. For all rules that result in a rejection, it is expected that the issue will be resolved in the Alternate Data Collection System and the information subsequently retransmitted.

There is one set of Interfaces per Sandata Provider Agency and program.

There will be 3 independent types of data provided through the Alternate EVV interface.

- Clients
- Employees (Field Staff)
- Visit Information

Each will be sent individually but can be delivered through the same single connection.

**THE ALTERNATE DATA COLLECTION SYSTEM WILL BE RESPONSIBLE FOR:**

- Visit transmittals: Visits should be transmitted in near real time. Actual payer frequency requirements may vary. Note that rejection responses will be delivered as separate API calls initiated by the third party. Information should be sent for only those records that are added, changed, or deleted. This is an incremental interface. Records which have not changed should not be resent.
- Complete transmissions:
    - When sending a client, all applicable elements and sub elements must be sent during each transmission.
    - When sending an employee, all applicable elements and sub elements must be sent during each transmission.
    - When sending a visit, all applicable elements and sub elements must be sent during each transmission.
- Call matching: Calls received regardless of the collection method used by the Alternate Data Collection System are received together as part of a complete visit by the Aggregator, per the specification. Sandata will not attempt to match or rematch the visits received.
- Data quality: All data will be accepted from third party data "as is," including any calculated fields.
- Latitude and longitude must be provided for both the visit start and visit end time, assuming it is collected via a GPS-enabled device.
- Assigning sequence numbers: For each of the 3 types of records (client, employee, visit), the Alternate Data Collection System will be responsible for assigning sequence numbers for each interface to ensure that updates are applied in the appropriate sequence. If a record is rejected, an incremented sequence is expected on the next transmission of that record set. Sequence numbers are per unique record (client, employee, visit) and record set (modifications to the same client, employee, visit). For example, the first time a particular client is sent, the sequence would be set to 1. The second time that same client is sent, the sequence would be set to 2, etc.
- Ability to correct defined exceptions: Exceptions must be corrected using the standard set of reason codes provided by Payer/State. Some of the defined reason codes require additional text to provide additional information; this information must also be sent as part of this interface.

- Change log transmission: Changes made to all visit information must be fully logged, and the log information must be transmitted as part of the visit record, as applicable. The log must be completed in the VisitChanges segment.
- Standard date/time format: All dates and times provided must be sent in UTC (Coordinated Universal Time) format which uses GMT.

**GENERAL PROCESSING RULES:**

- If a record is received and any required data is missing, malformed, or incomplete as defined in the specification, the record will be rejected or set to default values in accordance with the detailed specifications.
- If an optional field is provided with an invalid value (one not listed in this specification), the field will be set to the default value, null and/or rejected depending on the field, unless otherwise specified in this specification.
- If text (string) field length is longer (>/greater than) than the maximum allowed for that field value, unless otherwise noted, the field will be truncated to the maximum length specified for that field.
- Any record without a sequence number will be rejected. Sequence numbers are per unique record (client, employee, visit). For example, the first time a particular client is sent, the sequence would be set to 1. The second time the same client is sent, the sequence would be set to 2, etc.
- Records will be processed in the order received using the assigned sequence number.
- If the record is received with a sequential number that is less than the one already processed, the data will be rejected with error "Version number is duplicated or older than current." The vendor must correct the SequenceID and resend the data.
- Header information as determined for the payer and program must be included in each transmission for each record (client, employee, visit), otherwise the entire collection of records will be rejected.

**STANDARD CLIENT RULES:**

The following represents a subset of the requirements for client information. Please see the Field Information section of this document for all applicable rules.

- If the client does not include at least 1 complete address (address line 1, city, state, zip code) the client will be rejected.
- If the client does not include the defined unique identifier, the client will be rejected.
- If the client does not include first name, last name and time zone, the client will be rejected.

**STANDARD EMPLOYEE RULES:**

The following represents a subset of the requirements for employee information. Please see the Field Information section of this document for all applicable rules.

- If SequenceID and Staff ID are not provided, the employee will be rejected.
- If an employee's first name and last name are not provided, the employee will be rejected.

**STANDARD VISIT RULES:**

- Clients and Employees must be sent before visits, to ensure they exist in the Sandata system at the time of visit receipt. If the client and employee have not been received in the Sandata system, the visit will be rejected.
- No Client Provided - To allow the Aggregator to determine if the visit is for a Payer/State client, the visit must include a client. If a visit does not include a client, the complete visit will be rejected.
- Invalid/Unknown Client Provided - To allow the Aggregator to determine if the visit is for a Payer/State Client, the visit must include a valid client associated with the payer. If a visit includes a client that is unknown to Sandata (has not been received and accepted), the complete visit record will be rejected.
- No Employee Provided / Invalid or Unknown Employee Provided - If a visit does not include an employee (visit record send without an employee associated), The visit will be rejected as 'Worker not found'. The data will not process with an 'Unknown Employee' exception in Aggregator.
- The Alternate EVV system is expected to be able to handle a visit that crosses calendar days.
- A visit can only be cancelled if it does not have any calls associated with it or any adjusted times (generally a scheduled visit) and the schedule has not yet started. If a visit has calls but is being cancelled in the source EVV system, the "Bill Visit" indicator should be set to False to indicate that the visit should be disregarded for billing purposes. The visit status will be set to Omit by the Aggregator.
- This Program allows for a Minimum Visit Duration of 60 seconds.
- The following rules apply to the dates and times provided for the visit.

| Date and Time Exists for the Following | | | | Rule |
|---|---|---|---|---|
| Call In | Call Out | Adjusted In | Adjusted Out | |
| x | x | | | Call Out must be > Call In<br><br>Otherwise record rejected. |
| Superseded by Adj. In | Superseded by Adj. Out | x | x | Adj. Out must be > Adj. In<br><br>Otherwise record rejected. |

| Date and Time Exists for the Following | | | | Rule |
|---|---|---|---|---|
| Call In | Call Out | Adjusted In | Adjusted Out | |
| x | Superseded by Adj. Out | | x | Adj. Out must be > Call In<br><br>Otherwise record rejected. |
| Superseded by Adj. In | x | x | | Call Out must be > Adj. In<br><br>Otherwise record rejected. |

*Figure 2: Call and Adjusted Time Precedence*

Upon receipt, Sandata will calculate all configured Payer/Program exceptions and apply those exceptions as applicable.

It is assumed that there are some exceptions that cannot be "fixed" in the Alternate Data Collection System by their nature. They are configured for the Payer/State program as requiring acknowledgement by the system user. One of the included visit elements provides the ability for the user to send their acknowledgement. These exceptions require attestation that the exception has been reviewed/acknowledged in the system along with the appropriate reason code and attestation that appropriate documentation exists. Exceptions are specific to a given Payer/Program and will be noted in the associated appendix.

Upon receipt, Sandata will calculate and apply visit status as defined for the Payer/Program.

The Alternate Data Collection System will be expected to send a reason code and optionally the defined resolution code if it applies to the payer. Based on the definitions of the reason codes, some reason codes require additional information explaining the change. If additional information is required, the alternate data collection system must collect the information and include it when transmitting the visit to Sandata.

## 4.9 SEQUENCING

The SequenceID on all three types of records (clients, employees, visits) should be independent per record and should be incremented each time any record is sent. The Sequence ID will be used to ensure that a record is processed only once and that the most current information is used for reporting and claims processing. In the event a visit update is not accepted (rejected), the SequenceID on that transmission should not be reused. The next update should increment to the next number in the sequence. Failure to do so will cause the new record to be rejected as a duplicate.

Sequence Rules:

- If the latest SequenceID is greater than the highest value previously received, the record set will not be rejected. For example, if the latest SequenceID = 5, and the previous SequenceID = 4, the new record is accepted and displayed.
- If the latest SequenceID is less than the value previously received, and the record has not yet been processed, it will not be applied. For example, if the latest SequenceID = 8, and the previous SequenceID = 10 Record was accepted, the record sent with SequenceID 10 will be considered the current record.
- If the Sequence ID is equal to a value previously received, it will be rejected. i.e., latest SequenceID = 15, previous SequenceID = 15 Record rejected.
- Gaps in sequence will be allowed.

***Please Note:***

*For those agencies that wish to use the Alternate EVV interface, and would prefer to use timestamps as the sequence number in their deliveries, the Sandata system can accept the timestamp value as the sequence number, under two conditions:*

1. *The timestamp value provided must contain only numbers, and no other symbols (i.e. "/", "-", and ":" characters removed)*
2. *The timestamp value provided must be formatted as YYYYMMDDHHMMSS. For example:*

| Timestamp Value | Formatted as Sequence Number (YYYY+MM+DD+HH+MI+SS) |
|---|---|
| April 6, 2017 3:23:15pm | 20170406152315 |

Year Month Day Hour (24) Minute Second

## 4.10 Message Acknowledgement (ACK) and Transaction ID

*Table 2: Message Acknowledgement with Transaction ID*

| Index | Column Name | Description | Max Length | Type |
|---|---|---|---|---|
| 1 | AgencyIdentifier | Unique identifier for the agency. | 10 | String |
| 2 | ProviderID | Unique identifier for the agency. | 64 | String |
| 3 | TransactionID | Unique identifier for the request generated by the payer. | 50 | String |
| 4 | Reason | Default and only value provided: “Transaction Received” | 250 | String |

## 4.11 Response for Record Status

*Table 3: Response for Record Status*

| Index | Column Name | Description | Max Length | Type |
|---|---|---|---|---|
| 1 | AgencyIdentifier | Unique identifier for the agency. | 10 | String |
| 2 | ProviderID | Unique identifier for the agency. | 64 | String |
| 3 | RecordType | Type of record that was rejected. Values: Client, Employee, Visit | 10 | String |
| 4 | RecordOtherID | Value of the record identifier | 50 | String |
| 5 | Reason | Default and only value provided: “Transaction Received” | 250 | String |

# 5 EVV - ELEMENTS

As part of the implementation process, required fields may be adjusted and the available fields may be increased or reduced based on the program specifics. If you are sending fields which are not required, unless specifically noted, Sandata will accept and display these values.

Conditional means if it is present then it is required.

For each of the 3 endpoints, the Provider Identification segment is required.

Values shown in quotes in the Expected Value column indicate that this is a literal value where the word in quotes should be provided.

Information which is specific to Massachusetts is highlighted in blue.

## 5.1 PROVIDER INFORMATION (ALL ENDPOINTS)

**This segment needs to be provided for all 3 endpoints to identify the provider for whom the information is being provided.**

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| **Segment - ProviderIdentification – Required for the Client, Employee and Visit Endpoints** | | | | | | |
| 1 | ProviderQualifier | Unique identifier for the provider as determined by the program definition. | 20 | String | Yes | Send the literal value 'Other'. |
| 2 | ProviderID | Unique identifier for the agency. ID type must match to the ProviderQualifier value being passed for Provider validation and lookup. | 50 | String | Yes | Should be the 9-Digit Identifier for the Provider<br><br>This is the first 9 digits of the MA known PIDSL |

## 5.2 Client Data Endpoint

This endpoint receives information regarding the individual member/beneficiary (known here as the 'Client') that receives care as part of the visit. Please note - the Client record must be successfully delivered and loaded PRIOR to the delivery of the Visit information, or else the visit will be rejected due to "Client not found".

For the Massachusetts program, it is expected that all clients will be sourced from the State MMIS system. When this record is received, the matching record in the MMIS system will be located using the ClientIdentifier (Medicaid ID or AGE Consumer ID) plus the client's date of birth. If a match record is not found in the State system, the record will be rejected along with any associated visits to be received.

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| **ClientGeneralInformation - Required** | | | | | | |
| 1 | ClientQualifier | Value being sent to uniquely identify the client. Should be the same as the value sent by the Payer if a client is provided by the Payer | 64 | String | Yes | "ClientMedicaidID" when client has a Medicaid ID.<br><br>"ClientCustomID" when client does not have a Medicaid ID. |
| 2 | ClientIdentifier | Unique client identifier used by the state to reference the member data across all Medicaid activities. | 30 | String | Yes | Use identifier that matches qualifier:<br><br>• Medicaid ID (12 Character Numeric). Always 12 (no trimming of leading anything)<br>**OR**<br>• AGE Consumer ID (Consumer ID, 10-12 digits) |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 3 | ClientFirstName | Client's First Name. | 30 | String | Yes | Only the following special character will be accepted:<br>Alpha Letters<br>Hyphens<br>Periods<br>Apostrophe<br>All other special characters will be rejected. |
| 4 | ClientMiddleInitial | Client's Middle Initial. | 1 | String | No | Client's Middle Initial (Values A-Z) |
| 5 | ClientLastName | Client's Last Name. | 30 | String | Yes | Only the following special character will be accepted:<br>Alpha Letters<br>Hyphens<br>Periods<br>Apostrophe<br>All other special characters will be rejected. |
| 6 | ClientMedicaidID | Unique ID provided by the State Medicaid program to the client. | 64 | String | Conditional | Send Medicaid ID (12 digits) in this field when sending 'ClientMedicaidID' for 'ClientQualifier'. Do not send AGE Consumer ID (10 digits) in this field.<br><br>If sending 'ClientCustomID' in 'ClientQualifier' field, then this field must be NULL. |
| 7 | ClientAltMedicaidID | Alternate ID used for purposes of receiving Medicaid benefits | 15 | String | No | Do Not Provide |
| 8 | MissingMedicaidID | Indicator that a patient is a newborn. | 5 | String | No | Do Not Provide<br><br>Note that this functionality is not used in Massachusetts. |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 9 | SequenceID | The Third-Party EVV visit sequence ID. Sandata recommends this be a timestamp (to the second) to ensure the order of the client data updates. | 16 | Integer | Yes | Third-Party EVV Vendor Visit Sequence ID.<br><br>If TIMESTAMP is used:<br>YYYYMMDDHHMMSS<br>Numbers only; no other characters. |
| 10 | ClientOtherID | Additional client user-defined ID. This value is used to match the client to an existing record during import. | 24 | String | No | Primary Client Key from the EVV Vendor System (No Special Characters). |
| 11 | ClientTimezone | Client's primary time zone. Depending on the program, this value may be defaulted or automatically calculated. | 64 | String | Yes | String match = See the Time Zone List in the Appendix.<br><br>For Massachusetts, this value will be US/Eastern in most cases. |
| 12 | ClientCustomID | Secondary identifier for the client. | 24 | String | Conditional | Send AGE Consumer ID (10 digits) in this field when sending 'ClientCustomID' for 'ClientQualifier'. Do not send Medicaid ID (12-digits) in this field.<br><br>If sending 'ClientMedicaidID' in 'ClientQualifier' field, then this field must be NULL. |
| 13 | ClientSSN | Client's social security number. | 9 | Integer | No | Do Not Provide |
| 14 | Coordinator | The staff member is assigned to the client in a specific agency as the coordinator for an employee. | 3 | String | No | Do Not Provide |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 15 | ProviderAssentContPlan | Indicator to capture provider's assent that the member's contingency plan provided will be reviewed with the member every 90 days and documentation will be provided. | 5 | Boolean | No | Do Not Provide |
| 16 | ClientBirthDate | Client's Date of Birth. | 10 | Date | Yes | Example:2024-03-20<br>Format: YYYY-MM-DD<br><br>This value is required for the Massachusetts program. |
| **Segment - ClientAddress – Required** | | | | | | |
| The primary address for each client will be provided by the State MMIS system. Additional addresses can be provided. | | | | | | |
| 1 | ClientAddressType | This field designates the client address type. Note that multiple of the same type can be provided. Default to Other if not available. | 12 | String | Yes | "Home"\| "Business" \| "Other" |
| 2 | ClientAddressIsPrimary | One address must be designated as primary by sending true. Additional addresses will be false. | 5 | String | Yes | "true" / "false"<br><br>For Massachusetts, this will always be "false". The primary address will be sourced from the State MMIS system. |
| 3 | ClientAddressLine1 | Street address line 1 associated with this address. PO Box may be used for Safe at Home participants. PO Box may impact GPS reporting. | 30 | String | Yes | Address Line 1 |
| 4 | ClientAddressLine2 | Street address line 2 associated with this address. | 30 | String | No | Address Line 2 |
| 5 | ClientCounty | County associated with this address. | 25 | String | No | County |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 6 | ClientCity | City associated with this address. | 30 | String | Yes | City |
| 7 | ClientState | State associated with this address. | 2 | String | Yes | Two-character standard state abbreviation. (Must be capitalized) |
| 8 | ClientZip | Zip Code associated with this address. If additional 4 digits are not known, provide zeros. | 9 | String | Yes | Zip Code<br>Format: ######### |
| 9 | ClientAddressLongitude | Sandata will calculate this value for each address. | 19 | Decimal | No | Do Not Provide |
| 10 | ClientAddressLatitude | Sandata will calculate this value for each address. | 20 | Decimal | No | Do Not Provide |
| **Segment - ClientPayerInformation – Optional**<br>This segment is used to create manual authorizations. | | | | | | |
| 1 | PayerID | Sandata EVV assigned ID for the payer. Payer ID is determined during the implementation process. | 64 | String | Yes | PayerID is the code that correlates to the Payer. See Appendix 6.1 Payers. |
| 2 | PayerProgram | If applicable, the program to which this visit belongs. | 9 | String | Yes | PayerProgram is the code assigned for each of the programs which are part of this program. See Appendix 6.2 for Programs. Note that the program must be valid for the payer. |
| 3 | ProcedureCode | This is the billable procedure code which would be mapped to the associated service. | 5 | String | Yes | ProcedureCode is the HCPCS code assigned. See Appendix 6.3 for ProcedureCodes. Note that the ProcedureCode must be valid for the Payer and Program. |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 4 | Modifier1 | Modifier for the HCPCS procedure code (when applicable). Up to 4 modifiers are allowed. It is required to apply modifier values in the order specifically listed in the Appendix. | 2 | String | Conditional | Service Code modifiers as listed in Appendix 6.3. Value must match distinct values from reference tables. Should be "NULL" if nothing is provided. |
| 5 | Modifier2 | Modifier for the HCPCS procedure code (when applicable). Up to 4 modifiers are allowed. It is required to apply modifier values in the order specifically listed in the Appendix. | 2 | String | Conditional | Service Code modifiers as listed in Appendix 6.3. Value must match distinct values from reference tables. Should be "NULL" if nothing is provided. |
| 6 | Modifier3 | Modifier for the HCPCS procedure code (when applicable). Up to 4 modifiers are allowed. It is required to apply modifier values in the order specifically listed in the Appendix. | 2 | String | Conditional | Do Not Provide<br><br>Not in use for the Massachusetts program. |
| 7 | Modifier4 | Modifier for the HCPCS procedure code (when applicable). Up to 4 modifiers are allowed. It is required to apply modifier values in the order specifically listed in the Appendix. | 2 | String | Conditional | Do Not Provide<br><br>Not in use for the Massachusetts program. |
| 8 | ClientPayerID | Unique identifier sent by the payer. | 20 | String | No | Max Length 20<br>Can be NULL.<br>No Special Characters |
| 9 | ClientStatus | The client's status. Provide the 2-digit code including the 0. | 2 | String | Yes | String match = "02" \| "04"<br>Available values: 02 = Active<br>04 = Inactive |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 10 | EffectiveStartDate | The effective start date for the client payer associated information. | 10 | Date | Yes | Date<br>Format: YYYY-MM-DD |
| 11 | EffectiveEndDate | The effective end date for the client payer information. | 10 | Date | No | Date<br>Format: YYYY-MM-DD |
| 12 | ClientEligibilityDateBegin | Client eligibility begin date. This field is optional if ClientStatus is sent. | 10 | Date | No | DO NOT PROVIDE |
| 13 | ClientEligibilityDateEnd | Client eligibility end date. This field is optional if ClientStatus is sent. | 10 | Date | No | DO NOT PROVIDE |
| 14 | JurisdictionID | Group level identifier within a payer. | 10 | String | No | DO NOT PROVIDE |
| **ClientPhone - Optional** | | | | | | |
| The client's primary phone number will be provided by the State MMIS system. This is for additional phone numbers for the client. The fields in this segment marked as required "Yes" are only needed when this segment is sent. | | | | | | |
| 1 | ClientPhoneType | This is the client phone type. Note that multiple of the same type can be provided. | 12 | String | Yes | "Home" \| "Mobile" \| "Business" \| "Other" |
| 2 | ClientPhone | Client phone number including area code. | 10 | String | Yes | Client Phone Number<br>Format: ########## |
| **Segment - ClientDesignee – Do Not Provide for Massachusetts program.** | | | | | | |
| Provide if applicable for the Client. The fields in this segment marked as required "Yes" are only needed when this segment is sent. | | | | | | |
| 1 | ClientDesigneeFirstName | First Name of the Client Designee.<br>Characters allowed:<br>A-Z ' . - space | 30 | String | Yes | DO NOT PROVIDE |
| 2 | ClientDesigneeLastName | Last Name of the Client Designee.<br>Characters allowed:<br>A-Z ' . - space | 30 | String | Yes | DO NOT PROVIDE |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 3 | ClientDesigneeEmail | Email address of the Client Designee. | 50 | String | Yes | DO NOT PROVIDE |
| 4 | ClientDesigneeStatus | Status of the Client Designee pertaining to Sandata system access. If the ClientDesigneeStatus is sent, ClientDesigneeStartDate and ClientDesigneeEndDate are not required. | 2 | String | Conditional | DO NOT PROVIDE |
| 5 | ClientDesigneeStartDate | The date Client Designee was assigned. Future date is not acceptable. If the ClientDesigneeStartDate is sent, ClientDesigneeStatus is not required. | | Date | Conditional | DO NOT PROVIDE |
| 6 | ClientDesigneeEndDate | The date Client Designee was terminated. Future date and Back date are not acceptable. If the ClientDesigneeEndDate is sent, ClientDesigneeStatus is not required. | | Date | No | DO NOT PROVIDE |
| 7 | ClientDesigneeRelationship | Relationship of the Designee to the Client | 30 | String | No | DO NOT PROVIDE |
| **Responsible Party – Do Not Provide for Massachusetts Program** | | | | | | |
| Provide if applicable for the Client and in the absence of a Payer member feed. | | | | | | |
| 1 | ClientContactType | Client Contact Type. Values: Child, Friend, Other, Parent, Sibling, Spouse. | 12 | String | Yes | DO NOT PROVIDE |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 2 | ClientContactFirstName | Client Contact First Name. Entered by provider agency. Characters allowed: A-Z ‘ . – space | 30 | String | Yes | DO NOT PROVIDE |
| 3 | ClientContactLastName | Client Contact Last Name. Entered by provider agency. Characters allowed: A-Z ‘ . – space | 30 | String | Yes | DO NOT PROVIDE |
| 4 | ClientContactPhoneType | Client Contact’s Phone Type. Values: Business, Home, Mobile, Other. | 12 | String | No | DO NOT PROVIDE |
| 5 | ClientContactPhone | Client Contact Home Phone Number. Entered by provider agency. Format ##########. | 10 | String | No | DO NOT PROVIDE |
| 6 | ClientContactEmailAddress | Client Contact’s email address. Required if this client will be authorized to login to the client portal as the client’s authorized representative and approve timesheets on behalf of the client. | 64 | String | Conditional | DO NOT PROVIDE |
| 7 | ClientContactAddressLine 1 | Client Contact’s Street Address, Line 1. Characters allowed: Alphanumeric _ . ‘ - # , / space | 30 | String | No | DO NOT PROVIDE |
| 8 | ClientContactAddressLine 2 | Client Contact’s Street Address, Line 2. Characters allowed: Alphanumeric _ . ‘ - # , / space | 30 | String | No | DO NOT PROVIDE |
| 9 | ClientContactCity | Client Contact’s City. Characters allowed: A-Z . – space | 30 | String | No | DO NOT PROVIDE |
| 10 | ClientContactState | Client Contact’s State. Two Character standard abbreviation. Capitals only. | 2 | String | No | DO NOT PROVIDE |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 11 | ClientContactZip | Client Contact's Zip Code. 9-digit primary address zip code. If additional 4 digits is not known, provide zeros.<br>Format #########. | 9 | String | No | DO NOT PROVIDE |

## 5.3 EMPLOYEE DATA ENDPOINT

This endpoint receives information regarding the individual caregiver (known here as the 'Employee') that delivered the actual care to the individual as part of the visit. Please note- the Employee must be successfully delivered and loaded PRIOR to the delivery of the Visit information, or else the visit will be rejected due to 'Worker not found'.

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| **EmployeeGeneralInformation - Required** | | | | | | |
| Required data in the body of the transmission. This segment provides the basic information about the employee. | | | | | | |
| 1 | EmployeeQualifier | Descriptive reference of the value being sent to uniquely identify the employee. | 20 | String | Yes | Value: "EmployeeCustomID" |
| 2 | EmployeeIdentifier | Employee identifier identified by EmployeeQualifier. This value must equal the EmployeeIdentifier provided in the Visit transmission. | 9 | String | Yes | Please provide a unique system identifier for the employee. |
| 3 | EmployeeOtherID | Unique employee identifier in the external system. This value is used to identify the employee when an updated record is received. | 64 | String | No | Vendor Supplied value based on Vendor's solutions. Unique ID for each employee. |
| 4 | SequenceID | The Third-Party EVV visit sequence ID to which the change applied. | 16 | Integer | Yes | Third-Party EVV Visit Sequence ID.<br>If TIMESTAMP is used:<br>YYYYMMDDHHMMSS<br>Numbers only; no other characters. |
| 5 | EmployeeSSN | Employee Social Security Number. | 9 | String | No | DO NOT PROVIDE. Massachusetts is not requesting the provision of the Employee's SSN. |
| 6 | EmployeeLastName | Employee's last name. | 30 | String | Yes | Only the following special character will be accepted:<br>Alpha Letters<br>Hyphens<br>Periods<br>Apostrophe<br>All other special characters will be rejected. |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 7 | EmployeeFirstName | Employee's first name. | 30 | String | Yes | Only the following special character will be accepted:<br>Alpha Letters<br>Hyphens<br>Periods<br>Apostrophe<br>All other special characters will be rejected. |
| 8 | EmployeeEmail | Employee's email address. | 64 | String | No | Employee's Email Address<br>Format: "@" and extension (.xxx) are required to validate as an email address |
| 9 | EmployeeManagerEmail | Email of the employee's manager. | 64 | String | | DO NOT PROVIDE |
| 10 | EmployeeHireDate | Employee's Date of Hire. | 10 | Date | | DO NOT PROVIDE |
| 11 | EmployeeEndDate | Employee's HR recorded end date. | 10 | Date | | DO NOT PROVIDE |
| 12 | EmployeeAPI | Employee client's alternate provider identifier or Medicaid ID. | 25 | String | | DO NOT PROVIDE |
| 13 | EmployeePosition | Values for payer/state programs to be determined during implementation. If multiple positions, send primary. | 3 | String | | DO NOT PROVIDE |

## 5.4 VISIT DATA ENDPOINT

This endpoint receives the information regarding the EVV visits themselves- including all individual components of the visit, and corrections/changes to the visits over time. Please Note: The visit information must be loaded AFTER the client and the employee associated with the visit have been successfully loaded, or else the visit record will be rejected with appropriate error description.

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| **VisitGeneralInformation – Required** | | | | | | |
| Required segment provides the base data regarding an EVV visit. If a visit is changed (corrections, alterations, updates) over time, the same visit may be delivered multiple times, **each sharing the same 'VisitOtherID'**, but each change represented with a different Sequence ID- ascending over time- to allow the state's Aggregator system to keep the changes ordered appropriately. Each update requires a 'VisitChanges' segment. | | | | | | |
| 1 | VisitOtherID | Unique Visit identifier in the external system. | 50 | String | Yes | Visit Identifier<br>No special characters |
| 2 | SequenceID | The Third-Party EVV visit sequence ID to which the change applied. | 16 | Integer | Yes | Third-Party EVV Visit Sequence ID<br>If TIMESTAMP is used:<br>YYYYMMDDHHMMSS<br>Numbers only; no other characters. |
| 3 | EmployeeQualifier | Descriptive reference of the value being sent to uniquely identify the employee. This should be the same as the value sent in the Employee Data Endpoint. | 20 | String | Yes | "EmployeeCustomID" |
| 4 | EmployeeOtherID | Unique employee identifier in the external system.<br>The EmployeeOtherID format must be consistent in both the EmployeeGeneral and VisitGeneral segments. | 64 | String | No | Vendor Supplied value based on Vendor's solutions. Unique ID for each employee. |
| 5 | EmployeeIdentifier | Employee identifier identified by EmployeeQualifier. This value must equal the EmployeeIdentifier provided in the Employee transmission. | 9 | String | Yes | Please provide a unique system identifier for the employee. |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 6 | GroupCode | GroupCode applies to visits for a single caregiver that provides services to multiple clients or multiple caregivers providing service to a single client that occur during the same time span. It is used to reassemble all members of the group. Use only if this functionality is provided by the Alternate EVV vendor. | 6 | String | No | Max Length 6<br>Can be NULL<br>No Special Characters |
| 7 | ClientIDQualifier | Describes what type of identifier is being sent to identify the client. | 20 | String | Yes | Either “ClientMedicaidID” or “ClientCustomID” |
| 8 | ClientID | Unique client identifier used by the state to reference the member data across all Medicaid activities. | 64 | String | Yes | “ClientMedicaidID” when client has a Medicaid ID (12-digits)<br><br>“ClientCustomID” when client has an AGE Consumer ID (10-digits) |
| 9 | ClientMedicaidID | Unique ID provided by the State Medicaid program to the client. | 64 | String | Conditional | Send Medicaid ID (12 digits) in this field when sending ‘ClientMedicaidID’ for ‘ClientQualifier’. Do not send AGE Consumer ID (10 digits) in this field.<br><br>If sending ‘ClientCustomID’ in ‘ClientQualifier’ field, then this field must be NULL. |
| 10 | ClientCustomID | Alternate ID used for purposes of receiving Medicaid benefits | 64 | String | Conditional | Send AGE Consumer ID (10 digits) in this field when sending ‘ClientCustomID’ for ‘ClientQualifier’. Do not send Medicaid ID (12-digits) in this field. |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| | | | | | | If sending 'ClientMedicaidID' in 'ClientQualifier' field, then this field must be NULL. |
| 11 | ClientOtherID | Additional client user-defined ID. This value is used to match the client to an existing record during import. | 24 | String | No | Primary Client Key from the EVV Vendor System (No Special Characters). |
| 12 | VisitCancelledIndicator | Set to false as the default. Set to true if a future scheduled visit previously sent and accepted with no "CallIn", "CallOut" or "Adjusted" times to be cancelled / deleted. Can only be applicable to future schedules. | 5 | String | Yes | "true" \| "false"<br><br>Can only be true or false. |
| 13 | PayerID | Sandata EVV assigned ID for the payer. | 64 | String | Yes | PayerID is the code that correlates to the Payer. See Appendix 6.1 Payers. |
| 14 | PayerProgram | If applicable, the program to which this visit belongs. | 9 | String | Yes | PayerProgram is the code assigned for each of the programs which are part of this program. See Appendix 6.2 for Programs. Note that the program must be valid for the payer. |
| 15 | ProcedureCode | This is the billable procedure code which would be mapped to the associated service. | 5 | String | Yes | ProcedureCode is the HCPCS code assigned. See Appendix 6.3 for ProcedureCodes. Note that the ProcedureCode must be valid for the Payer and Program. |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 16 | Modifier1 | Modifier for the HCPCS code for the 837. Up to 4 of these are allowed. Please consult specific program requirements for exact usage. It is required to apply modifier values in the order specifically listed in the Appendix. | 2 | String | Conditional | Service Code modifiers as listed in Appendix 6.3. Value must match distinct values from reference tables. Should be "NULL" if nothing is provided. |
| 17 | Modifier2 | Modifier for the HCPCS code for the 837. Up to 4 of these are allowed. Please consult specific program requirements for exact usage. It is required to apply modifier values in the order specifically listed in the Appendix. | 2 | String | Conditional | Service Code modifiers as listed in Appendix 6.3. Value must match distinct values from reference tables. Should be "NULL" if nothing is provided. |
| 18 | Modifier3 | Modifier for the HCPCS code for the 837. Up to 4 of these are allowed. Please consult specific program requirements for exact usage. It is required to apply modifier values in the order specifically listed in the Appendix. | 2 | String | Conditional | Do Not Provide<br><br>Not in use for the Massachusetts program. |
| 19 | Modifier4 | Modifier for the HCPCS code for the 837. Up to 4 of these are allowed. Please consult specific program requirements for exact usage. It is required to apply modifier values in the order specifically listed in the Appendix. | 2 | String | Conditional | Do Not Provide<br><br>Not in use for the Massachusetts program. |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 20 | VisitTimeZone | Visit primary time zone. Depending on the program, this value may be defaulted or automatically calculated. Should be provided if the visit is occurring in a time zone other than that of the client. | 64 | String | Yes | String match = See the Time Zone List in the Appendix.<br><br>For Massachusetts, this value will be US/Eastern in most cases. |
| 21 | AdjInDateTime | Adjusted in date/time required only if manually adjusted. **The VisitChanges segment is required if adjusted times are being sent.** | 20 | DateTime | Conditional | Adjusted In Date and Time Format: YYYY-MM-DDTHH:MM:SSZ |
| 22 | AdjOutDateTime | Adjusted out date/time required only if manually adjusted. **The VisitChanges segment is required if adjusted times are being sent.** | 20 | DateTime | Conditional | Adjusted Out Date and Time Format: YYYY-MM-DDTHH:MM:SSZ |
| 23 | BillVisit | True for all visits to be billed. False is only sent if the visit is not to be considered for claims validation and set to omit status. | 5 | String | Yes | "true" \| "false" |
| 24 | Memo | Associated free form text. | 1024 | String | No | |
| 25 | ClientVerifiedTimes | If the client verified the start and end times in EVV Vendor system set this value to true. If the client did not verify times in EVV Vendor system set this value to false. | 5 | String | Yes | Accepted values are 'true' or 'false'. *For guidance on when BapssReason is required, see example scenarios in BypassReason Appendix.* |
| 26 | ClientVerifiedTasks | If the client verified tasks performed in EVV Vendor system set this value to true. If the client did not verify tasks performed in | 5 | String | | "true" \| "false"<br><br>DO NOT PROVIDE |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| | | EVV Vendor system set this value to false. | | | | |
| 27 | ClientVerifiedService | If the client verified the service performed in EVV Vendor system set this value to true. If the client did not verify service performed in EVV Vendor system set this value to false. | 5 | String | Yes | Accepted values are 'true' or 'false'. *For guidance on when BapssReason is required, see example scenarios in BypassReason Appendix.* |
| 28 | ClientSignatureAvailable | The actual signature will not be transferred. The originating system will be considered the system of record. If the client signature is captured in EVV Vendor system set this value to true. If the client signature is not captured in EVV Vendor system set this value to false. | 5 | String | Yes | Accepted values are 'true' or 'false'. *For guidance on when BapssReason is required, see example scenarios in BypassReason Appendix.* |
| 29 | ClientVoiceRecording | The actual voice recording will not be transferred. The originating system will be considered the system of record. If the client voice recording is captured in EVV Vendor system set this value to true. If the client voice recording is not captured in EVV Vendor system set this value to false. | 5 | String | Yes | Accepted values are 'true' or 'false'. *For guidance on when BapssReason is required, see example scenarios in BypassReason Appendix.* |
| 30 | ScheduleStartTime | Activity/Schedule start date and time. This field is generally required but may be omitted if the schedule is denoting services that | 20 | DateTime | No | Format: YYYY-MM-DDTHH:MM:SSZ |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| | | can happen at any time within the service date. Schedules are optional. | | | | |
| 31 | ScheduleEndTime | Activity/Schedule end date and time. This field is generally required but may be omitted if the schedule is denoting services that can happen at any time within the service date. Schedules are optional. | 20 | DateTime | No | Format: YYYY-MM-DDTHH:MM:SSZ |
| 32 | ContingencyPlan | Indicator of member's contingency plan selected by member. Valid values include (CODE should be sent only): CODE-DescriptionCP01 - Reschedule within 2 HoursCP02 - Reschedule within 24 HoursCP03 - Reschedule within 48 HoursCP04 - Next Scheduled VisitCP05 - Non-Paid Caregiver | 64 | String | No | Do Not Provide |
| 33 | Reschedule | Indicator if schedule is a "reschedule". | 5 | Boolean | No | Do Not Provide |
| 34 | HoursToBill | Hours that are going to be billed. Maximum 25.00 (25 hours). Sandata will calculate this value based on the adjusted and/or call times. | | Decimal | No | Do Not Provide |
| 35 | HoursToPay | If payroll is in scope for the payer program, the hours to pay. Maximum 25.00 (25 hours). | | Decimal | No | Do Not Provide |
| 36 | BypassReason | The reason selected by the employee for the signature not being collected. | 4 | String | Conditional | Accepted values are found in BypassReason Appendix (6.6). *For guidance on* |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| | | | | | | *when BypassReason is required, see example scenarios in BypassReason Appendix.* |
| **Segment - Calls – Conditional** | | | | | | |
| CallAssignment providing both "Time In" and "Time Out" are expected with the first instance of every visit, representing visit as captured. These segment details cannot be changed after submitting. Time corrections must be in the Adjusted time fields. Note there are conditional fields, which are required when CallType is "Mobile" or "Telephony". CallType "Manual" requires VisitChanges segment be included. | | | | | | |
| 1 | CallExternalID | Call identifier in the external system. | 16 | String | Yes | Call Identifier |
| 2 | CallDateTime | Event date time. Must be to the second. | 20 | DateTime | Yes | Call Date Time<br>Format:<br>YYYY-MM-DDTHH:MM:SSZ |
| 3 | CallAssignment | This identifies the call assignment type. | 10 | String | Yes | "Time In" \| "Time Out" |
| 4 | GroupCode | GroupCode applies to visits for a single caregiver that provides services to multiple clients or multiple caregivers providing service to a single client that occur during the same time span. It is used to reassemble all members of the group and will impact state reporting and analytics for overlapping visits. Use only if this functionality is provided by the Alternate EVV vendor. | 6 | String | No | Do Not Provide |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 5 | CallType | The type of device used to create the event. Any call with GPS data collected should be identified as Mobile. FVV should be used for any type of fixed visit verification device.<br>**VisitChanges segment is required for CallType = Manual.** | 20 | String | Yes | "Telephony" \| "Mobile" \| "FVV" \| "Manual" |
| 6 | ProcedureCode | This is the billable procedure code which would be mapped to the associated service. Provide if captured as part of the transaction. | 5 | String | Conditional | ProcedureCode is the HCPCS code assigned. See Appendix 6.3 for ProcedureCodes. Note that the ProcedureCode must be valid for the Payer and Program. |
| 7 | ClientIdentifierOnCall | Client identifier that was entered on the call. | 10 | String | No | DO NOT PROVIDE (effective 11/25/2025) |
| 8 | MobileLogin | Login used if a mobile application is in use for GPS calls. Required if CallType = Mobile. | 64 | String | Conditional | Mobile Login of employee |
| 9 | CallLatitude | GPS latitude recorded during the call. Latitude has a range of -90 to 90 with a 15-digit precision. Required for CallType = Mobile. | 19 | Decimal | Conditional | Latitude Value<br>Decimal with sign if negative 2 primary.15digit precision.<br>Decimal format with (-)XX.XXXXXXXXXXXXXX digits |
| 10 | CallLongitude | GPS longitude recorded during the call. Longitude has a range of -180 to 180 with a 15-digit precision. Required for CallType = Mobile | 20 | Decimal | Conditional | Longitude Value<br>Decimal with sign if negative 3 primary.15digit precision.<br>Decimal format with (-)XXX.XXXXXXXXXXXXXX digits |
| 11 | TelephonyPIN | PIN for telephony.<br>Identification for the employee using telephony.<br>Required if CallType = Telephony. | 9 | Integer | Conditional | Telephony PIN<br>Numbers only |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 12 | OriginatingPhoneNumber | Originating phone number for telephony. Required if CallType = Telephony. | 10 | String | Conditional | Originating Phone Number<br>No Special Characters |
| 13 | Location | Specific values to be provided based on the program. | 25 | String | Yes | “Home” or “Community” |
| 14 | VisitLocationType | Self-Reported visit location REQUIRED for all call types. Value to be sent should be “1 “or “2”<br>1=Home, 2=Community | 25 | String | Yes | “1” \| ”2” |
| **Segment - VisitChanges – Conditional** | | | | | | |
| Conditional segment provided when a visit has been manually entered, adjusted, or updated in the source system. The Visit General segment should reflect the updated information, while this associated Visit Change segment should record the details around that change and supply the reason code for why it occurred. The fields in this segment marked as required “Yes” are only needed when this segment is sent. | | | | | | |
| 1 | SequenceID | The Third-Party EVV visit sequence ID to which the change applied. | 16 | String | Yes | Third-Party EVV Visit Sequence ID.<br>If TIMESTAMP is used:<br>YYYYMMDDHHMMSS<br>Numbers only; no other characters. |
| 2 | ChangeMadeBy | The unique identifier of the user, system, or process that made the change. This could be a system identifier for the user or an email. Could also be a system process, in which case it should be identified. | 64 | String | Yes | Unique Identifier of Change Agent<br>Required – Username<br>or User Identifier who completed the change to the visit information (Audit). |
| 3 | ChangeDateTime | Date and time when change is made. At least to the second. | 20 | DateTime | Yes | Date and Time When Change was Made.<br>Format: |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| | | | | | | YYYY-MM-DDTHH:MM:SSZ |
| 4 | GroupCode | GroupCode applies to visits for a single caregiver that provides services to multiple clients or multiple caregivers providing service to a single client that occur during the same time span. It is used to reassemble all members of the group. Use only if this functionality is provided by the Alternate EVV vendor. | 6 | String | No | Do Not Provide |
| 5 | ReasonCode | Reason Code associated with the change. | 4 | String | Yes | See the Reason Code Listing in the Appendix for values. |
| 6 | ChangeReasonMemo | Reason/Description of the change being made if entered. Required if reason code is set to require a change memo. | 256 | String | Conditional | See the Reason Code Listing Table in the Appendix for which Reason Codes are required for. |
| 7 | ResolutionCode | Resolution codes, if selected. Resolution Codes are specific to the program. | 4 | String | No | Do Not Provide.<br><br>Not in use for Massachusetts. |
| | | | | | | |
| **Segment - VisitExceptionAcknowledgement – Conditional** | | | | | | |
| Conditional segment provided for a visit when it has corrections, alterations, or updates that caused exceptions, which have been acknowledged by the provider agency. Every exception that is acknowledgeable (versus exceptions that require a fix- or alteration of the visit data) must have an acknowledgement for the visit to be fully verified and compliant with the EVV program's rules. The fields in this segment marked as required “Yes” are only needed when this segment is sent. This segment should be accompanied by a VisitChanges segment. | | | | | | |
| 1 | ExceptionID | ID for the exception being acknowledged. | 2 | String | Yes | See the Exceptions list in the Appendix for values specific to this program. |

| # | Element | Description | Max Length | Type | Required? | Expected Value and Rules |
|---|---|---|---|---|---|---|
| 2 | ExceptionAcknowledged | True to acknowledge exceptions that are indicated as acknowledgeable only. False by default. This segment is required to clear an acknowledgeable exception. | 5 | String | Yes | "true" or "false" |
| | | | | | | |
| **Segment - VisitTasks – Do Not Provide** | | | | | | |
| Tasks are not in use for the Massachusetts program. | | | | | | |
| 1 | TaskID | Task id, this task id must map to the Task IDs used for the agency in the Sandata system. | 4 | String | | DO NOT PROVIDE |
| 2 | TaskReading | Task reading | 10 | String | | DO NOT PROVIDE |
| 3 | TaskRefused | Indicator denoting if the client refused the specific task. True/False | 5 | Boolean | | DO NOT PROVIDE |

# 6 MASSACHUSETTS PROGRAM APPENDICES

The following appendices are specific to the Massachusetts program. These values may change over time.

## 6.1 PAYERS

*Table 4: Payers*

| PayerID | Payer Type | Payer Name | Notes |
|---|---|---|---|
| MAAAS | ASAP | AgeSpan | |
| MAANC | ASAP | Aging Services of North Central Massachusetts | |
| MABHP | ACO | Be Healthy Partnership Plan | |
| MABFH | ACO | Berkshire Fallon Health Collaborative | |
| MAABS | ASAP | Boston Senior Home Care | |
| MAABE | ASAP | Bristol Elder Services, Inc. | |
| MAACB | ASAP | Central Boston Elder Services | |
| MAACE | ASAP | Coastline Elderly Services, Inc. | |
| MACCA | One Care | Commonwealth Care Alliance One Care | |
| MASCC | SCO | Commonwealth Care Alliance SCO | |
| MABNH | ACO | East Boston Neighborhood Health WellSense Alliance | |
| MAAEB | ASAP | Elder Services of Berkshire County, Inc. | |
| MAAEC | ASAP | Elder Services of Cape Cod and the Islands, Inc. | |
| MAAEW | ASAP | Elder Services of Worcester Area, Inc. | |
| MAAET | ASAP | ETHOS | |
| MAELD | AGE | Executive Office of Aging & Independence (AGE) | |
| MAFAC | ACO | Fallon 365 Care | |
| MAFAH | ACO | Fallon Health – Atrius Health Care Collaborative | |
| MASFA | SCO | Fallon Navicare SCO | |
| MAAGL | ASAP | Greater Lynn Senior Services, Inc. | |
| MAAGS | ASAP | Greater Springfield Senior Services, Inc. | |

| | | | |
|---|---|---|---|
| MAAHE | ASAP | HESSCO Elder Services | |
| MAAHV | ASAP | Highland Valley Elder Services, Inc. | |
| MAALP | ASAP | LifePath, Inc. | |
| MAWGB | ACO | Mass General Brigham Health Plan with Mass General Brigham ACO | |
| MAGBH | One Care | Mass General Brigham Health Plan One Care | Effective 1/1/26 |
| MAGBS | SCO | Mass General Brigham Health Plan SCO | Effective 1/1/26 |
| MAHEA | FFS | MassHealth | |
| MAAMS | ASAP | Minuteman Senior Services | |
| MAAMV | ASAP | Mystic Valley Elder Services, Inc. | |
| MAAOC | ASAP | Old Colony Elder Services, Inc. | |
| MASWH | One Care | Senior Whole Health One Care (Molina) | Effective 1/1/26 |
| MASW | SCO | Senior Whole Health SCO | |
| MAASE | ASAP | SeniorCare, Inc. | |
| MAASC | ASAP | Somerville/Cambridge Elder Services, Inc. | |
| MAASS | ASAP | South Shore Elder Services, Inc. | End-Date: 6/30/26 – Payer should not be imported for dates of service 7/1/2026 and later. |
| MAASP | ASAP | Springwell, Inc. | |
| MSSTV | ASAP | Tri-Valley, Inc. | |
| MATHU | One Care | Tufts Health One Care | |
| MASTF | SCO | Tufts Health Plan SCO | |
| MATFT | MCO | Tufts Health Together | |
| MATCH | ACO | Tufts Health Together with Cambridge Health Alliance (CHA) | |
| MATUM | ACO | Tufts Health Together with UMass Memorial Health | |
| MAUCT | One Care | UnitedHealthcare Connected for One Care | |
| MASTU | SCO | UnitedHealthcare SCO | |
| MAWBI | ACO | WellSense Beth Israel Lahey Health (BILH) Performance Network ACO | |

| | | | |
|---|---|---|---|
| MAWBC | ACO | WellSense Boston Children's ACO | |
| MAWCR | ACO | WellSense Care Alliance | |
| MAWCA | ACO | WellSense Community Alliance | |
| MAWEM | MCO | WellSense Essential MCO | |
| MAWMA | ACO | WellSense Mercy Alliance | |
| MASHN | SCO | Wellsense SCO | End-Date: 12/31/25 – Payer will not be accepted for dates of service 1/1/2026 going forward. |
| MAWSA | ACO | WellSense Signature Alliance | |
| MAWSC | ACO | WellSense Southcoast Alliance | |
| MAAWM | ASAP | WestMass Elder Care, Inc. | |

## 6.2 PROGRAMS

*Table 5: Programs*

| Payer Program | Program Name |
|---|---|
| **ABI-MFP** | Acquired Brain Injury and Moving Forward Plan |
| **Choices** | Choices Waiver |
| **ECOP** | Enhanced Community Options Program (ECOP) / Non-Waiver |
| **GAFC** | Group Adult Foster Care |
| **HCBNW** | Home Care Basic / Non-Waiver |
| **HCBW** | Home Care Basic / Waiver |
| **HCPB** | Home care / Percent Based |
| **HH** | Home Health |
| **PCA** | Personal Care Attendant Program - Self-Directed Only |
| **SCBMC** | SCO Wellsense ASAP |

| | |
|---|---|
| **SCCCA** | SCO Commonwealth Care Alliance ASAP |
| **SCFAL** | SCO Fallon Navicare ASAP |
| **SCGBS** | SCO Mass General Brigham ASAP |
| **SCSWH** | SCO Senior Whole Health ASAP |
| **SCTUF** | SCO Tufts ASAP |
| **SCUNI** | SCO United ASAP |
| **SDABI** | Acquired Brain Injury - Self-Directed Only |
| **SDMFP** | Moving Forward Plan - Self-Directed Only |

## 6.3 Payer Program mapping

*Table 6: Programs*

| Payer Code | Payer Type | Program Code |
|---|---|---|
| **MABFH** | **ACO** | HH, GAFC, SDABI (Consumer Directed Only), SDMFP (Consumer Directed Only) |
| **MABHP** | **ACO** | HH, GAFC, SDABI (Consumer Directed Only), SDMFP (Consumer Directed Only) |
| **MABNH** | **ACO** | HH, GAFC, SDABI (Consumer Directed Only), SDMFP (Consumer Directed Only) |

## 6.5 Reason Code Listing

*Table 8: Reason Code Listing*

| Reason Code | Description | Memo Required |
|---|---|---|
| 100 | Employee did not check in/out or check in/out incorrect | NO |
| 110 | Mobile device not available | NO |
| 120 | Emergency | NO |
| 130 | Member considerations – more or less time needed | NO |
| 140 | Technology Issue / EVV System Unavailable | NO |
| 150 | Member ID was not available or incorrect | NO |
| 160 | Employee ID was not available or incorrect | NO |
| 170 | Program, Payer, or Service incorrect | NO |
| 180 | Location was incorrect | NO |
| 190 | Services provided without Authorization | NO |
| 200 | Group Visit | NO |
| 210 | Overnight Visit | NO |
| 220 | Other | YES |

## 6.6 Bypass Reasons - Member Did Not Provide Signature

*Table 9: Bypass Reasons*

| BypassReason | Description |
|---|---|
| 1100 | Member Refused Verification |
| 1110 | Member Unable to Verify |
| 1120 | Employee Did Not Request Verification |
| 1130 | Other - No Signature |

| | |
|---|---|
| 1140 | Member Verification not required for this service |

## BYPASS REASONS - GUIDANCE

| ClientVerifiedTimes | ClientVerifiedService | ClientSignatureAvailable | ClientVoiceRecording | BypassReason Guidance |
|---|---|---|---|---|
| TRUE | TRUE | TRUE | TRUE | Send 'NULL' cannot be empty string |
| TRUE | TRUE | TRUE | FALSE | Send 'NULL' cannot be empty string |
| TRUE | TRUE | False | TRUE | Send 'NULL' cannot be empty string |
| TRUE | TRUE | FALSE | FALSE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| TRUE | FALSE | TRUE | TRUE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| TRUE | FALSE | TRUE | FALSE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| TRUE | FALSE | FALSE | TRUE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| TRUE | FALSE | FALSE | FALSE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send |

| | | | | |
|---|---|---|---|---|
| | | | | 1140 if Program **does not** require client verification |
| FALSE | TRUE | TRUE | TRUE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| FALSE | TRUE | TRUE | FALSE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| FALSE | TRUE | FALSE | TRUE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| FALSE | TRUE | FALSE | FALSE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| FALSE | FALSE | TRUE | TRUE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| FALSE | FALSE | TRUE | FALSE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |
| FALSE | FALSE | FALSE | TRUE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send |

| | | | | |
|---|---|---|---|---|
| | | | | 1140 if Program **does not** require client verification |
| FALSE | FALSE | FALSE | FALSE | BypassReason Required - send the most appropriate BypassReason code from the following: 1100, 1110, 1120, 1130. Only send 1140 if Program **does not** require client verification |

## 6.7 Exceptions for the Massachusetts Program

When sending updates/changes to a visit, a reason code is required along with the VisitChanges segment.

*Table 10: Program Exceptions*

| Exception Code | Exception Name | Description | Acknowledge / Fix |
|---|---|---|---|
| 0 | Unknown Client | *Exception for a visit that was performed for a client that is not yet entered or not found in the EVV system.* | Fix: Resubmit visit. Visit will be rejected without a Client. |
| 1 | Unknown Employee | *Exception for a visit that was performed by an employee that is not yet entered or not found in the EVV system.* | Fix: Resubmit visit. Visit will be rejected without an Employee. |
| 14 | Missing Payer | *The payer on the visit could not be determined.* | Fix: Resubmit corrected visit with a payer. |
| 23 | Missing Service | *Exception when the service provided during a visit is not recorded or present in the system.* | Fix: Resubmit corrected visit with a service. |
| 42 | Missing Location | *A value of Home/Community has not been applied to the visit* | Acknowledge: this exception must be acknowledged using the VisitExceptionAcknowledgement segment. |

| Exception Code | Exception Name | Description | Acknowledge / Fix |
|---|---|---|---|
| 2 | Visits Without Any Calls | *Exception thrown when a visit is recorded without an "in" call and without an "out" call for the visit.* | Fix: The user(s) must provide adjusted times for the visit assuming the visit was completed before the visit was sent. |
| 3 | Visits Without In-Call | *Exception thrown when a visit is recorded without an "in" call that began the visit.* | Fix: The user(s) must provide adjusted times for the visit assuming the visit was completed before the visit was sent . |
| 4 | Visits Without Out Call | *Exception thrown when a visit is recorded without an "out" call that completed the visit.* | Fix: The user(s) must provide adjusted times for the visit assuming the visit was completed before the visit was sent. |
| 8 | Actual Hours more than Scheduled Hours | *(Scheduling only) This occurs when the actual hours for the visit exceed the total scheduled hours for the associated visit in the schedule.* | As of 10/2025, this exception is information-only. No action is needed by Providers or Vendors for this exception. |

## 6.8 Time Zone List

This is the list of supported time zones. If your area is not covered by this list, please contact Sandata support to get additional time zone values that we accept. Please note that the value sent must exactly match the value and case shown.

*Table 11: Accepted Time Zone Values*

| Text Value | Daylight Saving |
|---|---|
| US/Alaska | Active |
| US/Aleutian | Active |
| US/Arizona | Inactive |
| US/Central | Active |
| US/East-Indiana | Active |
| US/Eastern | Active |
| US/Hawaii | Inactive |
| US/Indiana-Starke | Active |

| Text Value | Daylight Saving |
|---|---|
| US/Michigan | Active |
| US/Mountain | Active |
| US/Pacific | Active |
| US/Samoa | Inactive |
| America/Indiana/Indianapolis | Active |
| America/Indiana/Knox | Active |
| America/Indiana/Marengo | Active |
| America/Indiana/Petersburg | Active |
| America/Indiana/Vevay | Active |
| America/Indiana/Vincennes | Active |

## 6.9 ACRONYMS

*Table 12: Acronyms*

| Acronym | Definition |
|---|---|
| ACK | Acknowledge |
| AKA | Also Known As |
| Alt EVV | Alternate EVV System |
| API | Application Programming Interface |
| EVV | Electronic Visit Verification |
| GMT | Greenwich Mean Time (GMT) |
| HCPCS | Healthcare Common Procedure Coding System |
| JSON | JavaScript Object Notation |
| PIDSL | Massachusetts Provider Identifier |
| REST | Representational State Transfer |
| RESTful | REST API, Restful API – API that confirms to the design principles of the REST Architectural Style |
| SOA | Service Oriented Architecture |

| Acronym | Definition |
|---|---|
| TBD | To Be Determined |
| UTC | Coordinated Universal Time |
| UUID | Universally Unique Identifier |
| WADL | Web Application Description Language |

## 6.10 Terminology

*Table 13: Terminology*

| Sandata Terminology | Other Possible References |
|---|---|
| Agency | Agency Provider<br>Provider Account<br>Billing Agency |
| Authorization | Service Plan<br>Prior Auth |
| Client | Individual<br>Patient<br>Member<br>Recipient<br>Beneficiary |
| Contract | Program<br>Program Code |
| Employee | Caregiver<br>Admin |
| Payer | Admission<br>Insurance Company<br>Contract<br>Managed Care Organization (MCO)<br>State |
| Provider | Agency<br>Third-Party Administrator (TPA) |

# 7 MASSACHUSETTS PROGRAM SPECIAL NOTES

The following special notes are specific to Massachusetts and are subject to change over time.

## 7.1 BILLING-ONLY MODIFIERS

- Only the service code modifiers that differentiate the service being provided are included in the below EVV Services table.
- In instances where the modifier is only used in billing (i.e. the service provided is the same regardless of modifier), these billing modifiers will not be accepted in the EVV Aggregator and will not be utilized to match the visit with the claim.
- Therefore, all visit data should be sent without billing modifiers and only include the services and modifiers as listed in this table.

## 7.2 OVERNIGHT SPLIT SHIFTS

- AltEVV Providers and Vendors should send split overnight shifts for the service codes below:

| Sandata Service Code | HCPCS | Modifier 2 | Modifier 3 | Service Description |
|---|---|---|---|---|
| 99509 | 99509 | | | Emergency PCA by Home Health Agency |
| G0156 | G0156 | | | Services of HH Aide in Home Health Setting |
| G0156_UD | G0156 | UD | | HH - HH Aide ADL Only Support in Home Health Setting |
| H0038_UB | H0038 | UB | | SDABI-SDMFP-Peer Support |
| H2014_UB | H2014 | UB | | SDABI-SDMFP-ISCH |
| S5120_UB | S5120 | UB | | SDABI-SDMFP-Chore |
| S5125 | S5125 | | | ABI-MFP Companion, 15 min., Individual Provider |
| S5125_UB | S5125 | UB | | Supportive Home Care Aide, 15 min. |
| S5125_U4 | S5125 | U4 | | SDABI - Adult Companion |
| S5125_U8 | S5125 | U8 | | SDMFP - Adult Companion |
| S5130_U1 | S5130 | U1 | | ABI-MFP Homemaker, 15 min., Agency Provider |
| S5130_U2 | S5130 | U2 | | ABI-MFP Homemaker, 15 min., Individual Provider |
| S5130_UB | S5130 | UB | | Homemaker, 15 min. |
| S5135 | S5135 | | | ABI-MFP Companion, 15 min., Agency Provider |
| S5135_UB | S5135 | UB | | Companion, 15 min. |

| | | | | |
|---|---|---|---|---|
| S5135_UBU1 | S5135 | UB | U1 | TeleHealth - Companion, 15 min. |
| S9129_UB | S9129 | UB | | Home Safety/Independence Evaluation by an OT |
| T1004 | T1004 | | | ABI-MFP - Supportive Home Care Aide, 15 min. |

- **Recommended Split Shift Behavior:**
  - Visits units and dates should be split to match billing practices for billing by day, as required.
  - Example Scenario: A service is provided from 8:00pm on May 4th to 4:00am on May 5th
    - A visit should be imported for May 4th with a visit start time of 8:00pm and end time of 12:00am
    - A visit should be imported for May 5th with a visit start time of 12:00am and end time of 4:00am

## 7.3 Massachusetts Client Identifiers

- There are only two acceptable Massachusetts client identifiers used for EVV data reporting which are the **AGE Consumer ID** and **MassHealth Medicaid ID**. Providers should not use a Payer-specific client identifier to import client or visit records.
- **AGE Consumer ID**:
  - The AGE Consumer ID should only be used when the Payer is an ASAP or MAELD
    - The AGE Consumer ID **should not be used** when the Payer Type is any of the following: ACO, MCO, One Care, SCO, or FFS.
  - The AGE Consumer ID is a 10-digit value leading with "13…"
- **MassHealth Medicaid ID:**
  - The MassHealth Medicaid ID should be used when the Payer Type is any of the following: ACO, MCO, One Care, SCO, or FFS.
    - The MassHealth Medicaid ID **should not be used** when the Payer is an ASAP or MAELD.
  - The MassHealth Medicaid ID is a 12-digit value leading with "100…"
